REGULATIONS OF THE UNIVERSITY.

TITLE I.

OF ADMISSION.

1.—In order to be matriculated, a student must have produced to the officers of his College such testimonials of character as they may require, and have passed the prescribed examination. He shall, at the time of matriculation, subscribe a declaration of obedience to the authorities of the University.

2.—The nature and conditions of the examination to be imposed as a test for matriculation shall be such as Senate may from time to time by standing order require, regard being always had to the proviso of Statute 31.

TITLE II.

OF DISCIPLINE.

1.—Every member of the University *in statu pupillari* shall be liable, in case of misconduct, to such punishment as the Chancellor, or any officer acting under his authority, shall inflict; provided that no one shall be expelled from the University except by sentence of the Chancellor declared in Senate, or by vote of Senate with the concurrence of the Chancellor.

The College of Medicine and Armstrong College shall provide for and exercise the same control over the teaching, residence, maintenance, and discipline of all students of those Colleges as is conferred by Statute 54 on the Council of the Durham Colleges.

2.—Every member of the University not *in statu pupillari* shall be subject to the authority of the Chancellor, and shall be liable, in case of misconduct, to be fined by him in any sum not exceeding twenty pounds, to be paid into the University chest. No such member of the University shall be liable to any other punishment, excepting by a formal sentence passed by Senate and Convocation.

TITLE III.

OF KEEPING TERMS, AND OF STANDING IN THE UNIVERSITY.

1.—No student shall be held to have kept any term unless, being duly matriculated, he shall have complied with such conditions as the Senate of the University and the Council of the Durham Colleges, or the College of Medicine, or Armstrong College, by their standing orders may from time to time determine.

2.—If a member of the University has been prevented by illness or other urgent cause from keeping any term, that term may be granted by grace of Senate, on the proposal of the Council of his College, provided that not more than one term be so granted to any individual in any one academical year.

3.—In question of standing, every term shall be counted during which a person has been a member of the University, and has conformed to the regulations of the University, so far as they apply to him.

TITLE IV.

OF WOMEN STUDENTS.

1.—The residence of women students attending lectures in Durham will be subject to the conditions prescribed by the Council of Durham Colleges.

The residence of women students attending lectures at the Newcastle Colleges will be subject to the conditions prescribed by those Colleges.

2.—Any student of eighteen years of age, who has completed a course of two years' study and examination at any one of the following Colleges or Institutions:—The Ladies' College, Cheltenham; Queen's College, Harley Street, London; the Women's Training College, Darlington; or the Women's Training College, Ripon; and has passed either the Intermediate Public Examination in Letters or the First Public Examination in Arts, may then, or at any future time, if her testimonials are approved, petition the University that the two years kept at such College or Institution may count as one year towards the degree of B.Litt. or of B.A. respectively.

The arrangements made in this clause shall be terminable at twelve months' notice, reserving the privileges of then-existing students.

TITLE V.

OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO DEGREES.

Section I.—Of the Standing and Exercises requisite for proceeding to the Degree of Bachelor of Arts at Durham or Newcastle in the case of students not candidates for Honours.[1]

1.—No grace for the degree of Bachelor of Arts at Durham or Newcastle shall be granted unless the petitioner has kept nine terms as a student in Arts and passed an Intermediate Examination, a Second Year Examination, and a Final Examination, except as provided in the following paragraphs of this section.

[1] For subjects of examination see pp. 122-140.

Candidates shall be required to pass the Matriculation Examination, or such examination as may be accepted as equivalent by Senate, before beginning to keep terms, and shall not be eligible for the Intermediate Examination until they have kept three terms, nor for the Second Year Examination until they have kept three terms after passing the Intermediate Examination.

Candidates who have been admitted to a degree of this University in any other Faculty (save Music) shall be excused the first year of residence and the Intermediate Examination.

2.—Candidates for the Intermediate Examination shall be required to satisfy in five subjects, of which two must be foreign languages, one being an ancient language, under such further restrictions as to choice of subjects as may be imposed from time to time by Senate upon candidates from Newcastle and Durham respectively.

Everyone admitted to this examination must offer five subjects in the first instance, but it shall be within the discretion of the examiners to refer candidates who shall have failed in not more than two of the subjects offered, for re-examination in the subject (or subjects) *at the next occasion of examination only*. Candidates who on that occasion fail in the subject or subjects in which they have been referred for re-examination shall be deemed to have failed in the whole of the examination and shall be required to offer all the five subjects if they present themselves for a subsequent examination.

The subjects of the Intermediate Examination shall be:—

(*a*) Latin.
(*b*) Greek.
(*c*) French.
(*d*) German.
(*e*) English Language and Literature.
(*f*) Religious Knowledge.
(*g*) Ancient History.
(*h*) Modern History.
(*i*) Mathematics.
(*j*) Philosophy.
(*k*) Economics.
(*l*) Geography.
(*m*) Hebrew.
(*n*) Hellenistic Greek.
(*o*) Arabic.
(*p*) Military Science.
(*q*) Music.
(*r*) Fine Art.

The examination shall be conducted by examiners appointed annually by Senate, and the special books and subjects to which it is directed shall be fixed by Senate eleven months at least beforehand.

3.—Candidates for the Second Year Examination shall be required to satisfy in five subjects, and candidates for the Final

Examination shall be required to satisfy after more advanced study in four of the five subjects which they offered for the Second Year Examination, subject in either case to such restrictions as to choice of subjects as may be imposed from time to time by Senate upon candidates from Durham and Newcastle respectively.

Candidates for the Second Year Examination must offer, in the first instance, five subjects, but those who satisfy the examiners in four subjects at one time, and fail in one subject only, may offer that subject by itself at a subsequent examination.

The subjects of the Second Year and Final Examinations shall be :—

(*A*) Latin.
(*B*) Greek.
(*C*) French.
(*D*) German.
(*E*) English Language and Literature.
(*F*) Religious Knowledge.
(*G*) Ancient History.
(*H*) Modern History.
(*I*) Mathematics.
(*J*) Philosophy.
(*K*) Economics.
(*L*) Education or (for Second Year only) Military Science.[2]
(*M*) Hebrew.
(*N*) Hellenistic Greek.
(*O*) Geography.
(*P*) Science.
(*Q*) Comparative Study of Religion (for Second Year only).
(*R*) Arabic.
(*S*) Music.
(*T*) Fine Art.

The examinations shall be conducted by examiners appointed annually by Senate, and the special books and subjects to which they are directed shall be fixed by Senate eleven months at least beforehand.

4.—At Durham, students shall be allowed to offer in lieu of their Final Examination the subjects prescribed for either Part A or Part B of the Diploma in Theology, and, for those who do so, the Second Year Examination shall consist of three subjects, two of the three being Latin and Greek as prescribed for the Final Examination. Such students, on completing their examinations for the Diploma in Theology, shall be entitled to proceed to the Diploma in Theology as well as to the degree of Bachelor of Arts.

5.—The Council of the Durham Colleges may dispense any student from actual residence in Durham and attendance upon

[2] Candidates for the degree of B.A. may offer Military Science as an extra subject, and, if they satisfy the examiners, they will receive a special certificate to that effect.

lectures for a period not exceeding three terms; but no student shall be eligible to proceed to the degree of Bachelor of Arts unless he is of the standing of nine terms from matriculation. A student thus dispensed from residence, may be allowed to offer himself as a candidate for a Final Examination in six subjects to be prescribed by Senate (not less than four of which shall be taken at one and the same examination) in lieu of the Second Year and Final Examinations. Save by leave of the Council of the Durham Colleges no candidate may present himself for examination unless he shall have attended a course of lectures in each of the subjects offered.

6.—Students who have passed the Matriculation Examination and subsequently kept nine[3] terms at one of the following associated Theological Colleges:—St. Aidan's, St. Augustine's, Burgh, Chichester, Cumbrae, Dorchester, Edinburgh, Gloucester, Highbury, Islington, Jamaica, St. John's (Armidale, N.S.W.), Lichfield, Lincoln, Moore College (Sydney), Queen's College (St. John's, Newfoundland), Salisbury, Selwyn College (Dunedin), Truro, Warminster, Bishop Wilson School (Isle of Man), the Theological Department of King's College, London, or the Theological Department of Queen's College, Birmingham; and have passed both parts of the examination for a Licence in Theology and have been duly granted the title of Licentiate in Theology by Convocation, may count the terms so kept in Theology in lieu of six of the terms required for the degree of B.A., and the examinations passed for the L.Th. in lieu of the Intermediate and Second Year Examinations. Such candidates shall be admissible to the Final Examination for the degree of Bachelor of Arts after they have kept three terms at least by residence as students in Arts at Durham. Such terms must include a Michaelmas, an Epiphany and an Easter term. Such candidates will, however, be required to satisfy the examiners in the Final Examination in six subjects, prescribed by Senate, not less than four of which shall be taken at one and the same examination. In order to keep terms such students must have been admitted to the Licence in Theology either before or in the course of their first term of residence as students in Arts; and they shall not be dispensed by the Council of the Durham Colleges, under § 5, from any of the three necessary terms of residence in Arts.

SECTION II.—OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO THE DEGREE OF BACHELOR OF ARTS AT DURHAM OR NEWCASTLE IN THE CASE OF CANDIDATES FOR HONOURS.[4]

1.—No grace for the degree of Bachelor of Arts at Durham or Newcastle shall be granted unless the petitioner has kept nine terms as a student in Arts and passed an Intermediate

[3] Or six terms in the case of students who entered an associated Theological College before Michaelmas Term, 1921.

[4] For Subjects of Examination see pp. 140-166.

Examination and a Final Examination except as provided in the following paragraphs.

Each of these examinations shall be conducted by examiners appointed annually by Senate. The special books and subjects to which it is directed shall be fixed by Senate eleven months at least beforehand.

Candidates for Honours shall be required to pass the Matriculation Examination or an equivalent before beginning to keep terms, and shall not be eligible for the Intermediate Examination until they have kept three terms nor for the Final Examination until they have kept six terms, at Newcastle nine terms, after passing the Intermediate Examination. They must in no case have exceeded the standing of four years from the the Intermediate Examination.

Candidates who have been admitted to a degree of this University in any other Faculty (save Music) shall be excused the first year of residence and the Intermediate Examination.

Candidates for Honours in Arts who have passed the Higher School Certificate Examination of the University of Durham, including Latin either as a principal or a subsidiary subject, having previously passed the examination for matriculation, or an equivalent, may be excused from the first year of study and from the Intermediate Examination in Arts. No candidate thus excused the Intermediate Examination shall be admitted to the degree of Bachelor of Arts unless he shall have pursued a course of study in the University for not less than three academical years. No candidate thus excused shall be allowed to read for Honours in a language unless he shall have passed in that language either as a principal or as a subsidiary subject in the examination for the Higher School Certificate; except that in the case of Greek it shall suffice if the candidate shall have passed in that subject in the Durham School Certificate Examination or the Matriculation Examination or a recognised equivalent.

2.—At DURHAM a candidate may read for Honours *either* in Classics, *or* in Mathematics, *or* in Theology, *or* in Modern History, *or* in two of the following subjects taken together:—English, Modern History, French, German.

Candidates for Honours in Classics or Mathematics, may read for Honours in both the Intermediate and Final Examinations. In the Intermediate Examination they shall be examined in such subjects (Honours or Pass) as Senate shall from time to time prescribe. In order to obtain Honours in the Intermediate Examination candidates must not have exceeded the standing of three terms from Matriculation or other qualification as students in Arts, unless they have already obtained Honours in some other School of the Final Examination, in which case the standing of three terms may be reckoned from the passing of such Final Honour Examination.

Candidates for Honours in the other subjects shall take the Intermediate Examination as prescribed for Pass candidates or that for Honours in Classics or Mathematics as above; but

students who have resided for three terms and have passed the First Public Examination for the degree of B.A. *in litteris antiquis*, may count this examination in lieu of the Intermediate Examination.

Candidates for Honours in the Final Examination shall be examined in such Honour subjects in the respective Schools as Senate shall from time to time prescribe, and those who are deserving of Honours shall be assigned to one or other of four classes at the discretion of the Examiners. In the case of a candidate for Honours in two subjects taken together, the class shall be assigned on the combined results of the two examinations. It shall be in the power of the examiners to place in a separate list distinguished by the word "Aegrotant" or some similar title, such Honour candidates as present to them a sufficient assurance of being in ill health if, in view of all the circumstances, they think them entitled to be considered as having passed the examination. Such candidates shall not be deemed to have obtained Honours. The Examiners may further assign a Pass to such Honours candidates as they consider to have attained a sufficient standard although not worthy of being placed in the Honour list.

Candidates for Honours in the Final Examination shall not have exceeded the standing of four years from Matriculation and shall not have exceeded three years from the time of passing the Intermediate Examination or the examination accepted as equivalent; except that candidates who have already obtained Honours in some School of the Final Examination, may be candidates for Honours in some other School, provided they have not exceeded the standing of fifteen terms from Matriculation, or other qualification as students in Arts, and that they have attended lectures for at least three terms in the subjects of examination.

Licentiates in Theology who satisfy the conditions imposed in Section I. § 6, may be candidates for Honours in the Final Examination for the degree of Bachelor of Arts, provided they have further passed the Intermediate Examination or the First Public Examination in Arts.

3.—At NEWCASTLE Candidates for the Final Examination in Honours shall be required to have passed the Intermediate Examination or, in the case of Honours in Economics, the First Examination in Commerce before entering upon Honours study, except as provided in clause 1. The course for the degree in Honours shall occupy not less than three and not more than four years from the time of passing the Intermediate Examination.

Candidates for Honours in any school may be required to present a certificate of proficiency in such language or languages as Senate may prescribe, not less than two years before their Final Examination.

Honours shall be awarded in any one of the following subjects or groups of subjects:—

(*a*) Any two of the following languages, with their literatures:—Latin, Greek, French, German.
(*b*) Latin Language and Literature (with Greek to Final Pass Standard).
(*c*) Greek Language and Literature, if Latin Honours have been already taken under (*b*).
(*d*) French Language and Literature.
(*e*) English Language and Literature.
(*f*) English and Latin Literature.
(*g*) Philosophy.
(*h*) English Literature and Philosophy.
(*i*) Ancient History.
(*j*) Philosophy, together with *either* (1) an ancient or modern language, as specified in (*a*); *or* (2) Ancient History.
(*k*) Modern History.
(*l*) Economics.
(*m*) Mathematics.
(*n*) Fine Art.
(*o*) Architecture.

4.—All candidates who satisfy the examiners shall receive Certificates to that effect.

5.—Candidates who obtain distinction in the oral examination in French or German shall receive special certificates.

SECTION III.—OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO THE DEGREE OF MASTER OF ARTS.[5]

1.—No grace for the degree of Master of Arts shall be granted unless the petitioner is a Bachelor of Arts of the standing of nine terms at least from his admission to that degree.

2.—Any Bachelor of Arts of the requisite standing who has obtained First or Second Class Honours in the Final Examination for the degree of Bachelor of Arts, or who, after passing the Final Examination for the degree of Bachelor of Arts, has passed either the examination for the Diploma in Theology, or the examination for the degree of Bachelor of Divinity, or for the degree of Bachelor of Civil Law, or for the degree of Bachelor of Medicine, or for the degree of Bachelor of Science, or for the degree of Bachelor of Letters, shall be admissible to the degree of Master of Arts without further examinations or exercises.

Any other candidate for the degree of Master of Arts shall be required *either*

(*a*) To spend one year in approved post-graduate study together with such examination and exercises as Senate shall prescribe (the D.Th.P.T., together with additional exercises prescribed by Senate, and the Dip. Th. examinations being included under this head):

or (*b*) to present a Thesis on a subject approved by the

[5] For Subjects of Examination see pp. 166-168.

Board of the Faculty of Arts and to submit himself for *viva voce* examination in the subject of his thesis;

or (*c*) To present himself for examination in a subject, selected from a list prescribed by Senate, which shall be cognate with some subject which he has already taken in his Final Examination.

SECTION IV.—OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO THE DEGREE OF MASTER OF LETTERS.

1.—No grace for the degree of Master of Letters shall be granted unless the petitioner is a Bachelor of Letters of the standing of three years at least from his admission to that degree.

2.—Any Bachelor of Letters of the requisite standing who has obtained distinction or been placed in Division I at the Final Examination for the degree of Bachelor of Letters, or who, before or after passing the Final Examination for the degree of Bachelor of Letters, has proceeded to the degree of Bachelor of Arts, shall be admitted to the degree of Master of Letters without further examination or exercise. Other candidates for the degree of Master of Letters shall pass such examinations or perform such exercises as Senate may require.

SECTION V.—OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO THE DEGREES OF BACHELOR AND DOCTOR OF DIVINITY.

1.—No grace for the degree of Bachelor of Divinity shall be granted unless the candidate has passed the examination for Bachelor of Divinity.

No one shall be admitted to the examination for the degree of Bachelor of Divinity unless, being not less than twenty-five years of age, he shall have produced satisfactory testimonials of moral character, and shall *either* (1) be a graduate of two years' standing in Arts or Letters of this University *or* (2) be a graduate of two years' standing in Arts of some other University of the British Empire, who has obtained the Diploma in Theology of this University, *or* (3) satisfy the Board of the Faculty of Theology that he is competent to pursue a course of study in Theology, and shall subsequently keep three terms in this University and pass the examination for the Diploma in Theology. Provided that up to the end of 1922, candidates shall also be admissible under the regulations in force in 1915, and any candidate may be examined in the subjects in force in 1915.

Candidates for the examination for the degree of B.D. shall be required to give evidence of a competent general knowledge of Christian Theology, and to be well acquainted with the New Testament in Greek, and with such portion of the Old Testament and in such languages as Senate shall from time to time determine; as well as with such other branch or branches of Theological study as shall be prescribed by Senate from time to time.

The examination shall be conducted by two or more examiners.

2.—No grace for the degree of Doctor of Divinity shall be granted unless the candidate has proceeded to the degree of M.A. in this or some other University in the British Empire.

Candidates shall be of the standing of 10 years at least from their admission to the degree of B.A. (or M.A.).

Candidates for the degree of D.D. shall have proceeded to the degree of B.D. of this University.

Candidates for the degree of Doctor of Divinity shall, before the first day of the Easter or Michaelmas Term, send to the Secretary of Examinations an exercise consisting of *either* published theological work or a dissertation on a subject approved by the Professor of Divinity. No grace shall be granted for the degree unless the exercise submitted shall have been adjudged by Examiners appointed by Senate to be a contribution to learning sufficient for the degree.

SECTION VI.—OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO THE DEGREES OF BACHELOR AND DOCTOR OF CIVIL LAW.[6]

1.—No grace for the degree of Bachelor of Civil Law shall be granted unless the petitioner is of the standing of twelve terms at least from the date of his admission to the degree of Bachelor of Arts, nor unless he has passed the examination in Civil Law appointed by Senate.

2.—No grace for the degree of Doctor of Civil Law shall be granted unless the candidate has proceeded to the degree of M.A. in this or some other University in the British Empire.

Candidates shall be of the standing of ten years at least from their admission to the degree of B.A. of this University. They shall also have proceeded to the degree of B.C.L. of this University.

3.—Candidates for the degree of Doctor of Civil Law shall, before the first day of the Easter or Michaelmas Term, send to the Secretary of Examinations at Durham an exercise, consisting of *either* a published work, *or* two dissertations on subjects approved by the Board of the Faculty of Arts. No grace shall be granted for the degree unless the exercise submitted shall have been adjudged by examiners appointed by Senate to be a contribution to learning sufficient for the degree.

In the case where dissertations are submitted, no grace for the degree shall be granted until the dissertations, having been accepted, shall have been printed by the candidate, who shall not be at liberty to make any alteration or addition thereto without the leave of the senior examiner.

A printed copy of the exercise shall be sent to the Chancellor, the Vice-Chancellor, the Dean of the Faculty of Arts, the Proctors, the Head of the College or Hall of which the candidate is a member and the University Library.

[6] For Subjects of Examination see p. 169.

SECTION VII.—OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO THE DEGREE OF DOCTOR OF LETTERS.

1.—No grace for the degree of Doctor of Letters shall be granted unless the candidate has proceeded to the degree of M.A. or M.Litt. in this University.

2.—Candidates must be of the standing of ten years at least from their admission to the degree of B.A. or B.Litt.

3.—Candidates for the degree of Doctor of Letters shall, before the first day of the Easter or Michaelmas Term, send to the Secretary of Examinations *either* published work, or a special dissertation on a subject approved by the Board of the Faculty of Arts; and no candidate shall be allowed to present a dissertation who has not taken an Honours course and taken an Arts degree with Honours in this University.

4.—No candidate will be accepted for the degree unless the exercise submitted shall have been adjudged by examiners appointed by Senate to be a contribution to learning sufficient for the degree.

5.—If a dissertation be submitted and accepted, the degree cannot be conferred until the dissertation has been printed by the candidate, who will not be at liberty to make any alteration or addition thereto without leave of the senior examiner.

6.—A printed copy of the exercise must be sent to the Chancellor, the Vice-Chancellor, the Dean of the Faculty of Arts, the Proctors, the Head of the College or Hall of which the candidate is a member, and the University Library.

SECTION VIII.—OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO DEGREES IN THE FACULTY OF MEDICINE.[7]

1.—No one shall be held to be a student in Medicine unless he has passed the Matriculation Examination in such subjects as Senate shall from time to time determine, or such other of the registration examinations recognised by the General Medical Council as Senate shall deem equivalent.

Before registration as a medical student a candidate shall be required to have passed, in addition to the examination in General Education, an examination in Elementary Physics and Elementary Chemistry, conducted or recognised by one of the Licensing Bodies. He shall also produce evidence that he has attained the age of seventeen years.

2.—No grace for the degrees of Bachelor of Medicine and Surgery shall be granted unless the petitioner is of the age of not less than twenty-one years, and has, since his registration, spent five years in medical and surgical study, and has been registered in the books of the General Medical Council, one of the said five years having been spent at the University's College of Medicine, Newcastle-upon-Tyne. He may spend the other four years of the curriculum either at Newcastle-upon-Tyne or at one or more of the recognised Medical Schools.

[7] For Subjects of Examination see pp. 170-196.

No grace for the degrees of Bachelor of Medicine and Surgery shall be granted unless the petitioner has passed four public examinations.

The first of these examinations may be passed immediately after attendance on the necessary courses of instruction.

No one shall be admissible to the second of these examinations unless he has spent two academical years at least in medical study as above prescribed, and has passed the first examination.

No one shall be admissible to the third of these examinations unless he has spent three years at least in medical study as above prescribed, and has passed the second examination.

No one shall be admissible to the fourth of these examinations unless he has spent five years in medical study as above prescribed, and passed the third examination.

A student who has diligently attended an approved course of instruction in elementary Biology in a Secondary School or other teaching institution, recognised by a Licensing Body, may be admitted to a Professional Examination in Elementary Biology immediately after his registration as a student of Medicine.

Candidates for the degrees of Bachelor of Medicine and Surgery who have completed in a University of the United Kingdom a course of study and passed an examination in Biology, Chemistry or Physics qualifying for a degree in Science shall be exempted from study and examination in the subject or subjects in which they have passed.

Candidates for the degrees of Bachelor of Medicine and Surgery who have completed in the University of Durham the course of study in Physiology required for the degree of Bachelor of Science, and who have qualified for the degree of Bachelor of Science with Physiology as a chief subject of their final examination, shall be exempted from study and examination in this subject.

Candidates for the degrees of Bachelor of Medicine and Surgery who have completed in a University of the United Kingdom a course of study and passed an examination in Biology, Chemistry or Physics, qualifying for degrees in Medicine and Surgery, may be exempted from study and examination in the subject or subjects in which they have passed; and the Board of the Faculty of Medicine shall have authority to determine in any particular case whether the course of study pursued or the examination passed by a candidate may be accepted for the purpose of the above regulation, and may delegate this authority from time to time to a committee approved by Senate, consisting of not less than five members of the Board. The Board of the Faculty of Medicine shall currently report to Senate all proceedings taken under the foregoing regulation.

No one shall be admissible to any one of these examinations unless he has produced to the Secretary of Examinations, or

other officer appointed by the Council of the College of Medicine, satisfactory testimonials of conduct, and such certificates of attendance on lectures and hospital practice as Senate shall require.

Each of these examinations shall be conducted by three or more examiners, and shall be directed to such subjects of Medical Science and Practice as shall have been fixed by Senate, specialised instruction in Physics, Chemistry and Biology in their application to Medicine being included in the professional curriculum.

Candidates who have satisfied all the above requirements shall be admissible, at one and the same time, to the degrees of Bachelor of Medicine and Bachelor of Surgery.

3.—No Bachelor of Medicine and Surgery shall be admitted as a candidate for the degree of Doctor of Medicine unless he has satisfied the examiners for the Matriculation Examination, either in Greek or German, or has passed in one of these languages in an examination which exempts from the Matriculation Examination.

4.—No grace for the degree of Doctor of Medicine shall be granted (except as provided in the following clause) unless the petitioner is a Bachelor of Medicine and Surgery, of the age of not less than twenty-four years, and has been engaged, for at least two years subsequent to the date of admission to the degrees of Bachelor of Medicine and Surgery, in research work, or in attendance on the practice of a recognised hospital, or in the Military or Naval services, or in medical or surgcal practice, nor unless he has performed such exercises as Senate shall require. The petitioner shall under such conditions as Senate shall determine, either (*a*) present an original essay to be approved by the examiners and pass an oral examination and such further examination as they may require, or (*b*) pass a special examination in the theory and practice of Medicine.

5.—Senate shall have authority to arrange a speeial examination for the degree of Doctor of Medicine, to which persons who have been engaged in the active practice of their profession for fifteen years, and are of not less than forty years of age, and who have produced satisfactory testimonials of moral character, shall be admissible, due regard being had to their attainments in Arts.

6.—No grace for the degree of Master of Surgery shall be granted unless the petitioner is of the age of not less than twenty-four years, has obtained the degree of Bachelor of Surgery, and has fulfilled such conditions as regards attendance on lectures and passed such examination as Senate shall require.

No grace for the degree of Doctor of Surgery shall be granted unless the petitioner is a Registered Medical Practitioner and is of not less than twenty-four years of age, nor unless he has spent three years (not necessarily conseeutive) in the study of Surgery and ancillary subjects, one of the three years at least being spent in the Faculty of Medicine of the University of

Durham. The course of study which the candidate proposes to follow shall be submitted beforehand to the Professor of Surgery, and shall be subject to the approval of the Board of the Faculty of Medicine. It shall include such special departments of work continued for such periods as Senate may prescribe. The candidate shall be required at the conclusion of his course to satisfy examiners appointed by Senate. The subjects of the examination shall be Anatomy, Physiology, Pathology and Surgery.

7.—No grace for the degree of Bachelor of Hygiene shall be granted unless the petitioner is a graduate in Medicine of a recognised University and of the age of not less than twenty-two years, and has, subsequent to the attainment of a first registrable qualification in Medicine, Surgery, and Midwifery, spent one year of professional study in attendance upon lectures, &c., at the University of Durham College of Medicine, Newcastle-upon-Tyne, and shall have passed such examinations as Senate shall require.

No grace for the degree of Doctor of Hygiene shall be granted unless the petitioner is a Bachelor of Hygiene of at least two years' standing from that degree, and has shown that he has conducted original research in a subject or subjects connected with Public Health. The claims of the candidate shall be investigated by two examiners appointed by Senate, one of whom shall be specially conversant with the subject or subjects selected, and the examiners shall examine him in such manner as they may deem advisable, and shall report on his qualifications to the Board of the Faculty of Medicine in Easter Term, basing their report upon the candidate's distinction in special research or learning. The examination shall not necessarily be confined to the subject or subjects advanced by the candidate.

A candidate will be required to make his application in writing to the Registrar of the College of Medicine on or before January 1st in any year, and to state the special subject, upon a knowledge of which he bases his qualifications, forwarding at the same time a thesis and such other evidence of his contributions to the advancement of Hygiene as may support his application. He will be required to satisfy the examiners that the thesis and other contributions submitted are the result of his own observation and research. The names of candidates who satisfy the examiners will be published in June of each year.

Section IX.—Regulations for the Pass Degree of B.Sc.[8]

1.—Candidates before entering on a course of study shall be required to have passed the University Matriculation Examination, or an approved equivalent.

Before presenting themselves for any one of the several examinations subsequent to the Matriculation Examination they must present certificates of having attended the prescribed

[8] For Subjects of Examination see pp. 197-210.

courses of study to the satisfaction of the Heads of the Departments concerned.

The curriculum of the Pass degree of B.Sc. shall occupy three years at least; and, in the case of Pure Science, shall consist of two parts—the Intermediate and Final parts—and in the case of Applied Science, shall consist of three parts—the Intermediate, Second, and Final parts. Each part will conclude with an examination.

Intermediate Part and Examination.

2.—The Intermediate part shall occupy one year at least, and:—

(*a*) For candidates in Pure Science shall comprise study in any four of the following subjects:—Mathematics (Pure and Applied), Physics, Chemistry, Geology, Zoology, Botany.

(*b*) Candidates in Agriculture must offer Chemistry, Botany, Zoology, and either Mathematics or Physics.

(*c*) Candidates in Engineering, Naval Architecture, Mining, and Metallurgy are required to present the four subjects, Mathematics (Pure and Applied), Physics, Chemistry, Applied Mechanics and Mechanical Drawing.

A course of study in each of these subjects, except Mathematics, shall include work in the laboratory or drawing office.

Candidates may present themselves for the Intermediate Examination at the end of their first or any subsequent year. No candidate shall be deemed to have passed it who has not, in the first instance, satisfied the examiners in at least three subjects at the same time. Candidates will be required to satisfy the examiners in their fourth subject before they can be deemed to have completed the Intermediate Examination. For the purpose of this regulation, Applied Mechanics and Mechanical Drawing are treated as one subject.

The Intermediate Examination shall be held in June of each year. A supplementary examination shall be held in September for those candidates who, having passed in three subjects, have permission from the Board of Examiners to complete their qualification by taking *one* subject only.

[9]3.—A candidate in Applied Science may be permitted to proceed to the Pass degree after *two* years' residence provided that—

(*a*) He has qualified to matriculate in the University.

(*b*) He can produce evidence of having completed at least two years' apprenticeship.

(*c*) He has taken continuous day and/or evening courses of study at an approved Technical School or College after commencing his apprenticeship. He shall produce certificates from the school or college showing that he has successfully completed the courses.

[9] This regulation will come into force in, and after the academical year 1923-1924.

(*d*) He can produce evidence that he has taken courses of laboratory work in Physics and Chemistry up to the standard of the first year courses in these subjects for students in Applied Science in the University.

(*e*) He has passed the Intermediate Examination for the degree of B.Sc. in Applied Science before entering on his College course.

Pure Science.

Final Part and Examination.

4.—In Pure Science the Final part shall occupy two years, during which the candidate shall study three subjects selected from the following[10]:—Mathematics (Pure and Applied), Physics, Chemistry, Geology, Zoology, Botany, Physiology.

Three-year students in Education may offer Education in place of one of these.

Registered students in Medicine, who have passed the University of Durham Matriculation Examination or an equivalent before entering on medical study in the University, and who desire to take the degree of B.Sc., shall be excused from study and examination in Mathematics for that degree after matriculation; and in case they qualify for the degree of B.Sc. with Physiology as a subject of their Final Examination, their studies and examinations in Physics, Chemistry, and Biology, for the degree of B.Sc., shall be allowed to count as studies and examinations for the First Examination for the degree of M.B., and their studies and examinations in Physiology for the degree of B.Sc. shall be allowed to count as studies and examinations for the Second Examination for the degree of M.B. also.

Applied Science.

Second and Final Parts and Examinations.

5.—In Applied Science, the Second and Final parts shall consist of courses of study in the subjects of Agriculture, Mechanical, Marine, Electrical, Civil, or Military Engineering, Naval Architecture, Mining, or Metallurgy.

In all the sections of the Second and Final Examinations, candidates will be required to pass in all the subjects of Group I at one examination, and any candidate who fails to satisfy the examiner in any subject of Group I shall be deemed to have failed in the entire group. But in Group II candidates shall be allowed credit for each several subject in which they satisfy the examiners, and will be required to be re-examined in those subjects alone in which they have failed. All candidates will, in the first instance, be required to present themselves for the full examination.

[10] For Subjects of Examination see pp. 197, 198.

Pure and Applied Science.

6.—Dates of the examinations:—The Second Examination for B.Sc. in Applied Science shall be held in June of each year; save that the papers in Agricultural Geology and Entomology which form part of the examination in Agriculture shall be taken in March. A supplementary examination shall also be held in September of each year, at which only those candidates may present themselves who have failed in not more than *one* subject in Group II.

The Final Examination for B.Sc. in Pure and in Applied Science shall be held in June of each year; save that the papers in Farm Accountancy, Estate Management and Forestry which form part of the examination in Agriculture shall be taken in March.

(*a*) A Bachelor of Science who has graduated in Pure Science may proceed to the same degree in Applied Science by attending the second and third year courses in a branch of Applied Science and passing the respective examinations at the end of these courses; but attendance on courses of instruction and examination shall not be required of him in those subjects in which he may have qualified in the course for the degree in Pure Science.

(*b*) A Bachelor of Arts may proceed to the degree of Bachelor of Science in Pure Science by attending the second and third year courses in Pure Science and passing the Final Examination at the end of these courses.

(*c*) A Bachelor of Arts may proceed to the degree of Bachelor of Science in Applied Science provided he passes the Intermediate Examination for B.Sc. in Applied Science and attends the second and third year courses in some branch of Applied Science and passes the respective examinations at the end of these courses.

(*d*) Candidates for the degree of Bachelor of Science may be exempted from the first year of study required therefor, provided that they have pursued in this or any other University a course of study equivalent thereto, and may further be exempted from the first examination for the degree provided that they have passed in this or any other University an examination equivalent thereto.

Applications for such exemption, accompanied by original certificates, must be sent in writing to the Registrar, Armstrong College, before May 30th.

(*e*) The Faculty of Science shall have authority to determine in any particular case whether a course of study pursued, or an examination passed by a candidate in this or any other University, may be accepted for the purpose of the above regulations,

and may delegate this authority from time to time to any committee approved by Senate consisting of not less than five members of its own body.

(*f*) In the case of foreign or Oriental students, who claim exemption under (*d*) and about whose qualifications there is reasonable doubt, the Faculty may, on the recommendation of the Principal of Armstrong College, require that such students shall pass the Intermediate Examination before entrance.

(*g*) The Faculty of Science shall currently report to Senate all proceedings taken under the foregoing regulations.

SECTION X.—(*i*) REGULATIONS FOR THE DEGREE OF B.SC., IN PURE SCIENCE WITH HONOURS.[10]

1.—Honours in the School of Pure Science shall be awarded in the following subjects:—(*a*) Mathematics (Pure and Applied), (*b*) Physics, (*c*) Chemistry, (*d*) Geology, (*e*) Zoology, (*f*) Botany, (*g*) Physiology.

2.—The curriculum for the degree of B.Sc., in Pure Science with Honours, shall occupy a period of not less than three and not more than four consecutive years. Of this period not less than two and not more than three years shall be occupied with study in one of the subjects in the Honours School of Pure Science.

3.—The Honours curriculum in each case shall consist of:—

(*a*) A chief subject, the study of which shall extend over two or three years.

(*b*) Not less than two other subjects, to such extent as may be prescribed from time to time by the Head of the Department in which the chief subject is studied, subject to the approval of Senate.

(*c*) French and German, as defined in paragraph 4 (attendance at a College course in French and German shall not be obligatory).

4.—The examinations for the degree of B.Sc. with Honours shall consist of (*a*) the examination in the chief subject of the Honours School, (*b*) the examination in the subjects selected under 3 (*b*), (*c*) an examination in French and German, in which the candidate's ability will be tested by the translation into English of passages related to the chief subject of the Honours School.

5.—A candidate for Honours shall proceed as follows:—

Either (*a*) attend the Intermediate course qualifying for the Intermediate Examination, and present himself for that examination at the end of the course in June. In addition to passing the examination, the candidate must either be placed in the first division, or show to the satisfaction of the Board of Examiners special proficiency in at least two of the subjects of examination.

[10] For Subjects of Examination see pp. 199-200.

Or (b) if the candidate has obtained the Higher Certificate (A or B) of the University of Durham, and has passed in Mathematics, Physics and Chemistry, he may apply to be admitted to an Honours School. If approved by the Head of the Department concerned, he shall be required to pursue a course of study extending over one year in three subjects selected from the list of subjects given in paragraph 1. One of the subjects so selected shall be the chief subject in which the candidate proposes to read for Honours. At the end of this first year of study, the Heads of the three Departments concerned shall decide jointly as to the candidate's fitness to read for Honours, or, in the alternative, whether he shall be excused the Intermediate part of the Pass degree.

6.—No candidate shall be allowed to read for Honours without the concurrence of the Head or Heads of the departments concerned.

7.—Candidates who shall present evidence satisfactory to the Board of the Faculty of Science that they are qualified to enter upon a course of research may receive permission to pursue such a course, and to offer a thesis on their work in place of a corresponding part of the Honours Examination.

Application for the recognition of research work should be made to the Board of the Faculty of Science, not later than the last day of October preceding the Honours Examination together with a statement of the intended subject of research; and the thesis must be sent to the Secretary of Examinations not later than the first day of May preceding the Honours Examination.

8.—Names of candidates who have passed the examination for the degree of B.Sc. with Honours shall be published in a list drawn up in three classes, each class being arranged in alphabetical order. The list shall indicate the chief subject in the School in which the candidate has obtained Honours.

9.—Candidates who have not shown sufficient merit to deserve Honours, but have reached the standard of the Pass degree, may be recommended for that degree.

10.—The Honours Examination shall be held in June of each year.

Every candidate for the degree of Bachelor of Science with Honours shall be required to present himself for examination at the end of the third or fourth year from the time when he commenced Science studies in the College as a matriculated student, unless he shall present a medical certificate of illness, satisfactory to the Board of the Faculty of Science. A candidate presenting such a certificate may be allowed to enter for the Honours Examination after the lapse of not more than one year from the time when he should have presented himself for examination in due course.

11.—Candidates who have obtained Honours in any subject of the Final Honours School may be admitted to examination

in any other subject of the School after the expiration of not more than two years, on presenting certificates of having during that period attended courses of instruction approved by the Board of the Faculty of Science, provided that no candidate shall be so admitted after a longer period than six years has elapsed since the date of his first commencing Science studies in the College as a matriculated student.

12.—Candidates who have qualified for the Pass degree of Bachelor of Science may, with the approval of the Board of the Faculty of Science, proceed to a course of study in the Honours School; provided that such course of study be pursued during a period of not less than one year and not more than two years. Such candidates may be excused the subjects and examinations specified under the heads 3 (*b*) and 4 (*b*).

(*ii*) Regulations for the Degree of B.Sc. in Applied Science with Honours.[11]

1.—The curriculum for the degree of B.Sc. in Applied Science with Honours shall occupy a period of not less than three, and not more than four consecutive years. Of this period not less than one year (except in the subjects of Mining and Metallurgy) shall be devoted to study in one of the subjects in the Honours School of Applied Science, as laid down in par. 3.

The regulations for Honours in the subjects of Mining and Metallurgy are contained in pars. 7, 10 and 11.

2.—All candidates for Honours shall be required to comply with the regulations of the Pass curriculum in Applied Science, and to pass the First, Second and Final Examinations for the Pass degree. In the case, however, of those who present evidence of sufficient previous training, attendance on the first year's course may be dispensed with, provided they pass the first year's examination for the Pass degree, or are exempted under the regulations for the Pass degree, and in their case the Honours curriculum will be limited to a period of three years in all; but no such candidates shall be allowed to take their degree until the expiration of the third year from entrance.

All candidates for Honours shall be required to pass a fourth examination, styled the "Final Honours Examination in Applied Science."

3.—The course of study in the Honours School shall include (*a*) attendance on such lectures as may be from time to time prescribed by Senate, or by such authority as Senate may determine, (*b*) prosecution of such experiments, research, or investigation, or the preparation of such designs or plans, as may be approved by Senate or by such authority as Senate may determine, (*c*) presentation of a report or thesis dealing with the work undertaken under head (*b*).

[11] For Subjects of Examination see pp. 211-213.

The report or thesis must be handed in to the Secretary of Examinations not later than the 15th day of May preceding the date of the Honours Examination.

4.—The Final Honours Examination shall consist of examinations

(I) On the work referred to in par. 3, viz.:—

(*a*) In one or more branches (approved by the Head of the department concerned) of the professional subject in the Honours School of Applied Science offered by the candidate.

(*b*) In a subject related to the professional subject, and prescribed by the Head of the department concerned.

(II) In at least one language selected from the following:—French, German, Spanish, Italian, as tested by the candidate's ability to translate into English unseen passages from technical or scientific works in these languages.

(Attendance at a College class in a language shall not be obligatory.)

5.—No candidate shall be admitted to the Final Honours Examination who (*a*) has not completed the curriculum as prescribed for the Pass degree, subject to the possible modification of that curriculum as specified in par. 2 above, or (*b*) has failed, at first attempt, to satisfy the examiners in the Second or in the Final Examinations for the Pass degree or (*c*) has not completed, to the satisfaction of the Heads of the departments concerned, his final year's course of study in the Honours School.

6.—With the exception of the Intermediate Examination, the examinations, including the Final Honours Examination, must be passed in June at the end of consecutive academical years, and candidates failing to satisfy the examiners in the Final Honours Examination cannot present themselves for another examination for Honours; it being understood that nothing in these regulations shall prejudice the attainment of the Pass degree.

7.—The names of candidates who have obtained Honours in the Final Honours Examination in Applied Science shall be drawn up in lists, each list being divided into three classes, and each class arranged in alphabetical order. After the name of each candidate shall be specified the professional subject in which he has obtained Honours.

8.—A candidate, who has obtained Honours in any professional subject of the Final Honours School, may be admitted to examination in any other professional subject of the School, after the expiration of a period of not less than one year, and not exceeding three years, from the date of the previous Honours Examination, provided he presents evidence of further study which is satisfactory to the Board of the Faculty of Science.

9.—Candidates who have qualified for the Pass degree of Bachelor of Science, may, with the approval of the Board of the Faculty of Science, proceed to the course of study in the Honours School; provided that such course of study be pursued during a period of not less than one year and not more than two years.

10.—The Honours courses in Mining and Metallurgy shall consist of a special four year course such as may be from time to time prescribed by Senate or by such authority as Senate may determine. The first year's course shall be identical with that for the Pass degree, and attendance on the first year's course may be dispensed with under the conditions laid down in par. 2.

11.—The successive examinations must be passed in June, at the end of consecutive academical years.

Failure to satisfy the examiners in any of these examinations shall disqualify a candidate from obtaining an Honours degree.

He shall, however, be entitled to proceed to a Pass degree; candidates failing in the Second Examination to obtain an Honours standard shall be required to take the Second and Third years in the Pass degree.

Candidates failing in the Third Examination shall take the final year's Honours course, and must attain to a Pass standard in the examinations at the end of that year, in order to obtain the Pass degree.

In no case shall a student be allowed to proceed to the work in any year, until he shall have passed the examination prescribed for the preceding year.

A candidate who has passed the Second and Third years' Honours Examinations, and fails to obtain an Honours standard in the Final Examination, may be granted a Pass degree if, in the opinion of the examiners, he has attained a Pass standard.

Section XI.—(*i*) Regulations for the Degree of M.Sc.[12]

1.—Bachelors of Science of not less than two years' standing as such are eligible for candidature for the degree of Master of Science.

2.—Candidates are required to furnish evidence of advanced knowledge in some division of Mathematical, Natural, Technical, or Mental Science, or in some considerable special branch thereof, to the satisfaction of examiners appointed by the University.

3.—Candidates may submit any original work they have done for the judgment of the examiners, and the examiners may accept such work in evidence of advanced knowledge, with or without direct examination of the candidate, as they may deem fit. The examination shall be held in June.

[12] For recognised branches of Science see pp. 213-215.

4.—Graduates in Science of other approved Universities are permitted, under certain conditions, to become candidates for the degree of Master of Science without first taking the Bachelor of Science degree of this University. Such candidates must have satisfied the Faculty of Science that they are qualified to pursue some selected course of advanced study or research, and must have pursued such course for two years in this University.

5.—Notice of candidature shall be given to the Registrar of Armstrong College, and shall be received by him *up to 1st April in each year*. Candidates must specify *by the same date* the subject in which they wish to be examined, and deposit a copy of any original work, published or unpublished, or any other evidence thereof, which they may desire to submit to the examiners.

(*ii*) Regulations for the Degree of D.Sc.

1.—A Master of Science who matriculated before September, 1901, may elect to proceed to the D.Sc. degree under the regulations which will be found in Calendars before that date.

2.—A Master of Science is allowed to become a candidate for the examination for the degree of Doctor of Science in the seventh year after the year in which he was admitted to the degree of Bachelor of Science, or in any subsequent year.

3.—The candidate will be required to make his application in writing to the Registrar of Armstrong College, *on or before January 1st*, and to state the subject in which he offers himself for examination, forwarding at the same time such evidence of his contributions to the advancement of Science as may support his application. The examiners shall examine the candidate *viva voce* on such contributions.

4.—The candidate shall be allowed to proceed to the degree of Doctor of Science on approval of his qualifications by two examiners specially appointed for this purpose, who shall report thereon to the Board of Examiners in the Faculty of Science, basing their report upon the candidate's distinction in special research or learning.

Section XII. Of the Standing and Exercises requisite for proceeding to Degrees in the Faculty of Music.

1.—No one shall be held to be a student in Music unless he has passed the Matriculation Examination in such subjects as Senate shall from time to time determine, or such other examination as Senate shall deem equivalent.

2.—No grace for the degree of Bachelor of Music shall be granted unless the petitioner has passed two public examinations. Every student in Music admitted to the First Examination shall be required to prove his knowledge of Harmony and Counterpoint in not more than four parts. No one shall be admitted to the Second Examination who has not passed the First Examination, or who, not being a member of this Univer-

sity, has not passed the First Examination in Music at some other University of the British Empire, and sent in an exercise to the examiners, on or before a date to be announced from year to year, and from them received permission to be admitted. The exercise shall consist of a Vocal Composition, either sacred or secular, containing five-part harmony and good fugal counterpoint, with an accompaniment for a string band; but in place of the two middle movements of the exercise candidates shall be allowed to offer themselves for such a practical examination as Senate may prescribe. Every one admitted to the Second Examination shall be required to prove his knowledge of:—(1) Harmony; (2) Counterpoint; (3) Imitation, Canon and Fugue; (4) Form; (5) History of Music; (6) The full scores of such works as shall be previously announced.

3.—No grace for the degree of Doctor of Music shall be granted unless the petitioner, being of at least fifteen terms' standing from the time at which he received the Bachelor's degree, shall have composed an exercise and passed an examination in Music. The exercise shall not be presented for examination until the candidate is of thirteen terms' standing from the Bachelor's degree, nor shall the examination be taken until the candidate is of fifteen terms' standing from the Bachelor's degree. The exercise shall consist of a Vocal Composition, sacred or secular, preceded by an Instrumental Overture, and containing eight-part harmony and good fugal counterpoint, with an accompaniment for a full orchestra. The examination shall consist of:—(1) Harmony; (2) Counterpoint (each of these including examples in eight parts); (3) Imitation, Canon and Fugue; (4) Form; (5) Instrumentation; (6) History of Music; (7) Elementary Acoustics; (8) Knowledge of the scores of the standard works of the great composers.

These examinations in Music shall be conducted annually (at a time to be fixed by Senate) by two or more examiners.

Section XIII.—Of the Standing and Exercises requisite for proceeding to Degrees in Commerce.[14]

1.—No one shall be held to be a student in Commerce unless he has passed the Matriculation Examination in such subjects as Senate shall from time to time determine, or such other examination as Senate shall deem equivalent.

2.—No grace for the degree of Bachelor of Commerce shall be granted unless the petitioner has regularly attended a course of study for three academical years, and passed three examinations, in Economics and in such other subjects as Senate may from time to time determine, provided that a modern foreign language, to be continued throughout the three years' course, shall always be included.

Candidates may, however, under special circumstances, and subject to the approval of the Board of the Faculty in each case, take the various subjects in an order different from that pre-

[14] For Subjects of Examination see pp. 217-218.

scribed, provided only that they have completed the prescribed attendance on courses of instruction in those subjects in which they present themselves for examination.

Candidates who have passed the Matriculation Examination of the University, or its equivalent, and who have obtained the diploma in Commerce of Armstrong College, may count towards the degree any subject or subjects in which they are certified by the diploma examiners to have attained a sufficiently high standard. But such candidates will be required to satisfy the examiners in at least four approved subjects at the Second Examination and four approved subjects at the Third Examination. Such candidates may qualify to proceed to the degree by attendance at either day or evening classes.

3.—The names of successful candidates shall be published in alphabetical order; but distinction may be awarded to candidates who have completed the Third Examination for the degree, and who have shown sufficient merit in the Second and Third Examinations.

4.—Candidates who have passed the Final Examination for a degree of this or any other University of the United Kingdom, or who present evidence of previous study satisfactory to the Board of the Faculty of Commerce, may be excused such attendance and examination as the Board may determine, provided that no candidate shall proceed to the degree until he has completed two years of study as a student in Commerce. Such candidates may qualify to proceed to the degree by attendance at either day or evening classes.

5.—No grace for the degree of Master of Commerce shall be granted unless the petitioner is a Bachelor of Commerce of the standing of three years at least from his admission to that degree.

Candidates shall be required to offer a dissertation on some subject approved by the Board of the Faculty, and to submit to such examination on the subject of their dissertation as may be required by Senate.

SECTION XIV.—OF THE STATUS OF ADVANCED STUDENT AND OF THE STANDING AND EXERCISES REQUISITE FOR PROCEEDING TO THE DEGREE OF DOCTOR OF PHILOSOPHY.[15]

1.—The Status of Advanced Student shall be open to the following:—

(*a*) Holders of research degrees or of post-graduate scholarships or fellowships in this University or in other Universities approved by Senate.

(*b*) Recipients of grants from the State or Public Bodies for the purpose of post-graduate research.

(*c*) Graduates who have obtained a degree in this University or in any other University approved by Senate.

(*d*) Such other persons as Senate may from time to time determine.

[15] For further details see pp. 223-225.

2.—Before entering on the course of advanced study and research the candidate shall be required:—

(*a*) To have submitted to the Professor or Lecturer under whom he proposes to work, a scheme of the course of advanced study and research proposed, together with satisfactory evidence of adequate training and ability to undertake the proposed course, and this shall be submitted for approval, by the Professor or Lecturer concerned, to the Board of the appropriate Faculty.

(*b*) To have matriculated as a student of the University and to have paid the prescribed fees.

3.—Advanced students shall not be allowed to submit a thesis for the degree of Ph.D. unless they shall have spent a period of not less than two years, from the date of their admission, in research under the supervision of the University; provided that, after the first year of their course, candidates may be permitted under conditions sanctioned by the University to continue their studies in some other approved place of study or research.

4.—No grace for the degree of Doctor of Philosophy shall be granted unless the petitioner:—

(*a*) has been admitted to the status of Advanced Student;

(*b*) has spent a period of not less than two years in pursuing a course of research under the supervision of the University, provided that after the first year of the course he may be permitted, on conditions approved by the University, to continue his course at some other approved place of study or research;

(*c*) has submitted a thesis which has been approved by the University as worthy of publication and passed an oral examination and (if required) a further written examination in subjects relevant to the Thesis.

5.—The examination shall be conducted by not less than two examiners, one being an external examiner, who shall be appointed by Senate on the nomination of the Board of the Faculty concerned.

TITLE VI.

OF THE STANDING AND EXERCISES REQUISITE FOR OBTAINING LICENCES AND DIPLOMAS.

Section I.—Of the Standing and Exercises requisite for the Licence of Students in Theology.[16]

1.—Students in Theology shall be licensed to present themselves to the Bishop for Ordination by grace of the University. No one shall be held to be a student for the Licence in Theology unless he has passed either the Matriculation Examination in such subjects as Senate shall from time to time

[16] For Subjects of Examination see pp. 112-115.

determine, or such other examination as Senate shall deem equivalent.

2.—No grace shall be granted unless the petitioner has kept the requisite number of terms as a student in Theology, is of approved moral and religious character, and of competent attainments.

The period of residence required of a student shall be nine terms. Such terms shall be kept at one of the Theological Colleges specified in Title V, Section I, § 6.

In proof of his attainments, he shall produce certificates of having passed two public examinations in Theology. Either of these examinations may be taken after the completion of not less than three terms of residence and the other in the ninth term of residence.

Each of these examinations shall be conducted by two or more examiners, and shall be directed to such subjects as have been fixed by Senate eleven months at least before its commencement.

In each of the aforesaid examinations there shall be one subject to be chosen at the option of the student from a list of subjects approved by Senate. It shall be permissible for any student to offer the optional subjects in either examination or at an examination other than that at which the compulsory subjects are offered.

The examinations conducted by the Central Advisory Council for Training for the Ministry shall be regarded as equivalent to either or both of the examinations for the Licence in Theology so far as the Theological subjects are concerned.

3.—No grace shall be granted unless the petitioner has previously declared in writing that he is a *bona fide* member of the Church of England as by law established.

Section II.—Of the Standing and Exercises requisite for the Diploma in Theology.[17]

1.—Candidates for the Diploma in Theology must, before beginning their course for the diploma, be graduates of some University in the British Empire, except as provided in Title V, Section I, § 4. Save that, if an undergraduate of the University of Durham shall have completed the residence required for admission to the Final Examination for the degree of B.A. at a time when no such examination is appointed to be held, and shall, with the consent of the Council of the Durham Colleges, keep the ensuing term as a student for the diploma, such terms shall count as though it had been kept after the examination for the degree of B.A. had been passed.

2.—No grace for the Diploma in Theology shall be granted unless the petitioner has completed a course of study extending over at least three terms, including attendance upon prescribed courses of lectures in the University, and has passed the pre-

[17] For Subjects of Examination see pp. 115-117.

scribed examination; save that if he be a graduate of any University in the British Empire, residence for one academical year in an Australian College, the course of study and instruction in which has been previously approved by the said Board, shall be accepted in lieu of attendance upon courses of lectures in the University. Unless special permission be granted by the Council of the Durham Colleges such terms shall be kept consecutively. They shall always include a Michaelmas, an Epiphany and an Easter term.

3.—The subjects of the examination shall be:—

(i) A general knowledge of the Holy Scriptures.
(ii) Portions of the New Testament in the original Greek.
(iii) Outlines of Systematic Theology, with special reference to the Creeds.
(iv) Church History.
(v) Practical Theology or such optional subjects as Senate may from time to time determine.

Students for the diploma shall also be required to attend such courses of lectures in Pastoral Theology and Elocution as may be prescribed by the Council of the Durham Colleges.

4.—The examination shall be directed to such portions of the above subjects as Senate may prescribe at least eleven months beforehand.

5.—The examination shall be conducted by at least two examiners appointed annually by Senate. It shall be held in the Easter and Michaelmas terms.

6.—Each of the above subjects of examination shall be divided into two parts, Part A and Part B. Candidates may present themselves for either Part A or Part B of any subject at any examination, provided that they are keeping their third term at least and that one of the Parts of each of the subjects is offered. Candidates shall not be qualified to receive the diploma until they have passed in both parts of all the subjects.

7.—The examiners shall publish the names of the successful candidates arranged in two divisions in alphabetical order in each. No candidate shall be placed in Division I unless he shall have obtained good marks in at least three of the subjects numbered i-v above.

Section III.—Of the Standing and Exercises requisite for the Diploma in the Theory and Practice of Teaching.[18]

1.—Candidates for the Diploma in the Theory and Practice of Teaching must, before beginning their course for the diploma, be graduates of some University in the United Kingdom, or must have obtained one of the qualifications recognised by the Board of Education in "The Regulations for the Training of Teachers in Secondary Schools."

[18] For Subjects of Examination see pp. 221-222.

2.—No grace for the Diploma in the Theory and Practice of Teaching shall be granted unless the petitioner has completed a course of study extending over at least three terms, including attendance upon prescribed courses of lectures in the University, and has further passed a written examination in the Theory of Teaching, and a practical test based on practical work in recognised schools.

3.—The subjects of the written examination shall include the principles and history of Education and the study of children during the school period and of school teaching and management. It shall be directed to such special subjects as shall have been fixed by Senate eleven months at least beforehand. An essay prepared by the candidate before the beginning of the final term on some special subject of school work shall form part of the examination.

4.—The practical work of the candidate shall include attendance at approved schools under proper supervision during not less than 60 school days, and two-thirds of this time shall be in an approved secondary school. Such work shall be tested by reports from the teacher of the school and from the Professor or Lecturer in Education as well as by records furnished by the candidate, who shall further give one or more lessons before the examiners.

Unless specially exempted, a candidate must make a special study of the teaching of one definite branch of the curriculum of a secondary school, success in which will be recorded upon the diploma.

5.—The examination shall be conducted by at least two examiners, who shall be appointed by Senate.

6.—The examiners shall publish the names of the successful candidates in Theory and in Practice in alphabetical order, and shall indicate, by distinguishing marks placed against their names, the candidates (if any) who excel in the written or practical parts of the examination, or both. Candidates must present themselves for both parts of the examination, but candidates who pass in Theory may be allowed subsequently to present themselves for the practical examination without undergoing a further examination in Theory.

Section IV.—Of the Standing and Exercises requisite for the Diploma in Foreign Languages.

1.—Candidates for the Diploma in Foreign Languages must be graduates of the University in Arts, Letters, or Commerce. They must have satisfied the examiners for B.A., B.Litt., or B.Com. in the written part of the examination for such degree in the language which they offer. Should a candidate not have satisfied in such language in the examination for his degree, he shall for the purpose of the diploma be admitted on a subsequent occasion to the written part of the examination in that language for the degree of B.A. or B.Com.

2.—No grace for the Diploma in Foreign Languages shall be granted unless the petitioner has passed an examination in reading, conversation, dictation and oral and written reproduction of a passage read by one of the examiners in the language which he offers, in such a way as to show that he possesses ready comprehension, fluent expression, and correct pronunciation.

3.—The examination shall be conducted by at least two examiners appointed by Senate, of whom one shall be external; and it shall be held at such times as Senate may determine.

Section V.—Of the Standing and Exercises requisite for the Diploma in Arabic.

1.—Candidates for the Diploma in Arabic shall be required to reside in the University and to attend the prescribed courses of lectures for at least three terms before presenting themselves for examination.

2.—No grace for the Diploma in Arabic shall be granted unless the petitioner has passed the examination prescribed by Senate.

3.—The examination shall be conducted by an examiner or examiners appointed by Senate and shall be held at such times as Senate may determine.

Section VI.—Of the Standing and Exercises requisite for the Diploma in Public Health.[19]

1.—Candidates for the Diploma in Public Health must be Registered Medical Practitioners, of not less than 22 years of age, who are of the standing of nine months, at least, from their first registrable qualification in Medicine, Surgery, and Midwifery.

2.—No grace for the Diploma in Public Health shall be granted unless, subsequently to the attainment of the aforesaid qualification, the petitioner (*a*) has received practical instruction for not less than four months in a Laboratory or Laboratories, approved by Senate, in which Chemistry, Bacteriology and the Pathology of the diseases of animals transmissible to man are taught; (*b*) has during six months been diligently engaged in acquiring a practical knowledge of the duties, routine and special, of Public Health administration; (*c*) has during three months attended at least twice weekly the practice of a Hospital for infectious diseases, at which he has received instruction in the methods of administration; (*d*) has passed the examinations prescribed by Senate.

Section VII.—Of the Standing and Exercises requisite for the Diploma in Psychiatry.

1.—Every candidate for the Diploma in Psychiatry must be a legally qualified Medical Practitioner.

2.—No grace for the Diploma in Psychiatry shall be granted

[19] For Subjects of Examination see pp. 187-190.

unless the petitioner has attended such courses of instruction and passed such examination as Senate may from time to time determine. The examination shall be directed to the subjects of Anatomy, Physiology, Pathology and Bacteriology, Psychology and Experimental Psychology, Neurology and Psychiatry (systematic and clinical).

Section VIII.—Of the Standing and Exercises requisite for the Licence in Dental Surgery.[20]

1.—Every candidate for the Licence in Dental Surgery must have been registered by the General Medical Council as a dental student, and must subsequently have attended such courses of instruction at recognised University Colleges, Medical or Dental Schools as Senate may from time to time prescribe.

Before registration as a dental student a candidate shall be required to have passed in addition to the examination in General Education, an examination in Elementary Physics and Elementary Chemistry, conducted or recognised by one of the Licensing Bodies. He shall also produce evidence that he has attained the age of seventeen years.

2.—No grace for the Licence in Dental Surgery shall be granted unless the petitioner has passed four examinations, for each of which he must present certificates of having attended the requisite courses of instruction. Before admission to the Final Examination, he must further furnish evidence of having undergone a three-years' pupilage in Mechanical Dentistry with a registered dentist, and of having been engaged in professional study for at least four years subsequent to registration as a dental student. He must also sign a declaration binding himself not to advertise for professional purposes. The examinations shall be held at such times as may be prescribed by Senate.

TITLE VII.

OF THE MANNER OF CONDUCTING PUBLIC EXAMINATIONS.

Section I.—Of Ordinary Examinations.

1.—The Council of the Durham Colleges, the College of Medicine, and Armstrong College, shall be responsible for the conduct of University examinations held at Durham and in those Colleges respectively.

2.—There shall be three Secretaries of Examinations, one for the Durham Colleges, one for the College of Medicine, and one for Armstrong College. They shall be nominated by the respective Colleges and shall be appointed and paid by Senate. They shall hold office for a period of five years and shall be eligible for re-election.

The name in full of every student offering himself for any

[20] For Subjects of Examination see pp. 192-195.

public examination and of his College (if any) must be signified by himself or some responsible person to the Secretary of Examinations for the Durham Colleges, or the College of Medicine, or Armstrong College, as the case may be, at such time before the commencement of the examination as the College in question shall determine.[21] An account, in writing, of the books or subjects selected by him, when any option is allowed, together with all necessary certificates, shall be delivered to the Secretary of Examinations at the same time.

Every student, on his name being received by the Secretary of Examinations, shall pay for any public examination the fee fixed for that examination by Senate, and the Secretary shall transmit the fees so received to the University Treasurer.

The Secretary of Examinations shall have printed an alphabetical list of those whom he admits to any public examination, and shall cause copies of it to be delivered to each of the examiners, and to be affixed on some public place or places appointed by Senate, seven days, or for examinations in the Faculty of Arts fourteen days, before the commencement of the examination.

Every student sending in his name after the time appointed shall pay such additional fee as Senate may determine.

No student may offer himself for examination after the list has been printed, unless he pay such additional fee as Senate may determine.[22]

Any student may withdraw his name from the list of those to be examined, provided he give notice to the Secretary of Examinations nine days before the beginning of the examination. In such a case the candidate may enter *either* at the next examination, *or* at the next examination but one (but not afterwards) without further payment.[23] Otherwise the fee which has been paid is forfeited, except in the case of examinations where special regulations exist.

3.—Any official entrusted with the duty of superintendence in a University examination may immediately suspend or dismiss from examination a candidate guilty of flagrant breach of the rules, but such action shall be immediately reported to one of the Proctors.

4.—All questions arising among the examiners as to the framing of questions, the rejection of candidates, or any other matter, shall be determined by a majority of votes, the examiner in the chair having a casting vote.

[21] For examinations in the Faculty of Arts at least six weeks before the beginning of the examinations.

[22] For examinations in the Faculty of Arts no late entries will be accepted.

[23] *In the Faculties of Arts and Theology*, the names of candidates who have withdrawn will be placed on the list for the next examination, and if such a candidate wishes to defer entering until the next examination but one he must give notice of withdrawal as provided above.

5.—Any student who, at any final honour examination, presents to the examiners a sufficient assurance of his being in ill-health shall, if the examiners so recommend, be deemed to have passed the examination, and his name shall be placed in a separate list, distinguished by the word "Aegrotant," or some similar title. The names which are placed in it shall be arranged alphabetically. No candidate whose name is placed in this list shall be deemed to have obtained Honours.

6.—The names of those who obtain certificates at any public examination shall be entered in a register, and the entry shall be attested by the signatures of the examiners. The examiners shall also draw up, for publication, lists of the successful candidates.

Section II.—Of Extraordinary Examinations.

1.—If a student has been kept away from any public examination by severe illness or other urgent cause, and shall satisfy Senate that it would be a great hardship for him to wait for the next ordinary examination, he may apply to Senate to grant him an extraordinary examination.

2.—The number of examiners shall be the same for this as for an ordinary examination. The examination itself shall not be less rigorous, but no honours shall be awarded.

3.—Not more than one extraordinary examination for the same class of students shall be granted within one academical year.

4.—Every student who is admitted to an extraordinary examination shall pay, on his name being received by the Secretary of Examinations, such fee as Senate shall from time to time determine.

5.—Those who pass any extraordinary examination shall be registered in the same book with those who pass the ordinary examination, but in such a manner as to be distinguished from them.

TITLE VIII.

OF AFFILIATION.

Section I.—Of the terms and conditions upon which Colleges and like institutions may be affiliated to the University.

1.—No application of any College or like institution for affiliation to the University shall be entertained until evidence has been afforded (as required by Statute 107) that its members are incorporated by Royal Charter, or that provision has been otherwise made (to the satisfaction of the Senate of the University of Durham) for its establishment on a permanent and efficient footing and for its government.

No application shall be entertained unless it sets forth the facilities which the teaching staff of the College or like institution affords for the adequate training of students in subjects

set for examination by the University; nor unless it shows to the satisfaction of Senate that such College or like institution is equipped with such buildings, laboratories, machinery or other appliances as may be necessary for the proper instruction of students in the subject of the Faculty or Department in respect of which the application for affiliation is made.

No application shall be entertained unless it states the Faculty or Department in respect of which the application for affiliation is made.

2.—The students of any College or like institution affiliated to the University in the way and under the authority prescribed by Statute 108 shall have their names placed on the register of the University as matriculated students thereof, provided that they shall have passed such Matriculation Examination as may be prescribed by the Senate.

Students so matriculated shall be admissible to the exercises and public examinations required for proceeding to degrees, licences and academical rank in the Faculty or Department in which they have matriculated, provided they shall have fulfilled to the satisfaction of Senate such conditions *inter alia* as to residence, attendance at lectures and conformity to discipline as are required of other students of the University so admissible.

Students who have fulfilled the prescribed conditions shall be proposed to Convocation for the degrees, licences, or academical rank for which a Proctor certifies that they have qualified.

3.—The affiliation of any College or institution may be terminated at any time either by the University or by the authorities of the affiliated college or like institution by six months' notice on either side.

SECTION II.—OF THE AFFILIATION OF CODRINGTON COLLEGE, BARBADOS, AND FOURAH BAY COLLEGE, SIERRA LEONE, TO THE UNIVERSITY.

1.—Students of Codrington College, Barbados, and Fourah Bay College, Sierra Leone, may have their names placed on the register of the University as matriculated students of the same, provided that the Principal of their College, or other person authorised to act in his behalf, shall have certified that they have passed an examination similar to that required for the admission of students in the several faculties in the University of Durham; and the aforesaid Colleges shall be accounted affiliated Colleges of the University of Durham.

2.—Students of the affiliated Colleges, having been so matriculated, shall be admissible to the exercises and public examinations required for proceeding to degrees, licences, and academical rank in the several faculties, provided that they shall have forwarded certificates of having fulfilled similar conditions as to residence, attendance at lectures, and conformity to discipline in their own College, to those required from other students of the University so admissible, terms of residence being counted

from the time of passing the Admission Examination of their own College; provided also that in each academical year such students shall be required to keep such number of terms, not being less than three, as the authorities of their College shall determine, as the equivalent of three terms at Durham.

3.—The Principals of the said Colleges shall forward to the Secretary of Examinations lists of students of their respective Colleges who are candidates for any examinations, together with the certificates required, in time for them to be received at Durham six weeks at least before the commencement of the examinations at Durham. The examination papers shall be sent to the Principals of the Colleges, in sealed packets, by the last mails, or last mails but one, that leave England previously to the commencement of the examination at Durham. The papers so sent shall be set to the candidates as nearly as possible on the days of the examination at Durham, and the answers to them returned, unread, as soon as possible after the conclusion of the examination to the Secretary of Examinations (who shall transmit them to the examiners), together with a certificate signed by the Principal of each College, or the person acting in his behalf, that the examination has been duly conducted, and the above-named conditions complied with.

4.—The examiners, after examining the papers, shall issue and publish in the usual manner supplemental lists of those who have passed the examination, and of those who have been adjudged worthy of Honours; which lists shall be sent by the Registrar without delay to the respective Principals of the Colleges; and one combined list of all who have passed the examination in England, Barbados, and Sierra Leone, shall be inserted in the next issue of the *University Calendar*.

5.—All prescribed conditions having been fulfilled, graces for degrees, licences, or academical rank, shall be prayed in Convocation, in the usual manner, on behalf of students of the affiliated Colleges; and certificates of such graces, having been granted, shall be forwarded by the Registrar to the respective Principals of the Colleges; after the receipt of which the degrees, licences, or academical rank, for which graces have been granted may be conferred by their Lordships the Bishops of the dioceses in which the affiliated Colleges are respectively situated, as Visitors of the same, or by a Deputy Visitor, acting under commission from the Chancellor.

6.—The above arrangements may be terminated at any time either by the University or by the authorities of each affiliated College on notice of six months at least being given beforehand.

Anyone who previously to Michaelmas Term, 1875, has completed his course of study and examinations at Codrington College, Barbados, and has produced to Senate satisfactory testimonials of character, shall be admissible to the Final Examination for the degree of Bachelor of Arts, and, having passed that examination, to the degree of Bachelor of Arts.

TITLE IX.

OF ADMISSION FROM OTHER UNIVERSITIES.

No person shall be allowed to count terms which have been kept in another University, unless his application be brought before Senate by the Council of the Durham Colleges, or of the College of Medicine, or of Armstrong College, and approved by Senate; except so far as is otherwise provided in Title V, Section VIII, § 2, and Title V, Section IX, § 6 (*d*), (*e*).

TITLE X.

OF MEMBERSHIP OF CONVOCATION.

All graduates of the University, qualified under Statute 35 for membership of Convocation, shall be deemed to have fulfilled the necessary conditions if they have continued without interruption to be members of the University from the date of their admission to the degree by which they claim their seat, and either have paid a fee of two pounds, or are members of the staff.

Female graduates of the University shall be admitted to membership of Convocation on the same terms and conditions as men.

TITLE XI.

OF DEGREES CONFERRED WITHOUT EXAMINATION.

Any person admitted to an Honorary degree under the provisions of Statute 92, though having no claim to membership of Convocation, shall enjoy the rank and wear the dress of his degree, and shall have admission to the Library and Museums, under such restrictions as may be imposed from time to time. Honorary degrees shall not be conferred *in absentia*, save in the case of degrees conferred *jure dignitatis*; but the names of persons resident abroad, for whom Honorary degrees have been voted by Senate, may be proposed to Convocation for graces to enable such degrees to be conferred on them at Codrington or Fourah Bay, in the same manner as ordinary degrees.

Members of the teaching staff admitted to degrees without examination under the provisions of Statute 93 shall enjoy the full rights and privileges belonging to the degrees conferred upon them; but any right such a person may have to membership of Convocation in virtue of such a degree shall cease when he ceases to be a member of the teaching staff.

No person admitted to a degree without examination, by vote of Convocation, shall proceed from a degree thus conferred to any other degree.

TITLE XII.

OF THE CHANCELLOR.

When a vacancy shall occur in the office of Chancellor, the Vice-Chancellor shall, within a month of the occurrence (the months of July, August, and September excepted), summon a special meeting of Senate, in order that Senate may nominate a fit and proper person for the post of Chancellor.

No nomination shall be submitted to Senate to vote upon unless the nomination be made by a member of one division of the University and seconded by a member of the other division of the University.

If more than two persons be nominated, there shall first be taken a preliminary vote; and no name shall be submitted to Convocation which has not received an absolute majority of the votes of those present and voting.

A meeting of Convocation shall be summoned by the Vice-Chancellor within a month (the months of July, August, and September excepted) of the special meeting of Senate, and a motion shall be submitted to Convocation by the Vice-Chancellor that the person nominated by Senate be appointed Chancellor by Convocation.

If the person nominated by Senate be not appointed by Convocation, the Vice-Chancellor shall forthwith summon a special meeting of Senate for the purpose of nominating (in the way above set forth) a fit and proper person.

When a person nominated by Senate has been appointed by Convocation, the Senate shall make such arrangements and prescribe such ceremony for admitting to the office of Chancellor the person thus nominated and appointed as shall befit the dignity and solemnity of the occasion.

TITLE XIII.

OF THE PROCTORS.

1.—The Proctors shall be appointed at the final Convocation in Easter Term, and shall come into office at the first Convocation in Michaelmas Term.

One Proctor shall be nominated from the Durham Division, and one from the Newcastle Division of the University.

2.—On coming into office each Proctor shall nominate two Pro-Proctors, one of whom shall take his place in case of his absence; but a Pro-Proctor nominated by either may act for the other. Each Proctor and Pro-Proctor shall make the declaration provided in the Standing Orders.

3.—In addition to their statutory duties, the Proctors shall see that nominations of the necessary examiners for University examinations are submitted to Senate, and shall certify to the University Treasurer the amount due to each examiner. They shall also decide, on an emergency, any question connected

with a University Examination which may be referred to them. The Durham Proctor may act alone in respect of an examination held at Durham, and the Newcastle Proctor in respect of an examination held at Newcastle; but it shall be competent for either to assist, or act in the place of, the other, when requested to do so by his colleague.

4.—The Proctors shall examine the claims of candidates for degrees, and shall report to Convocation, on behalf of Senate, whether they have fulfilled the necessary requirements.

The names of those candidates who are students of the Durham Division shall be proposed to Convocation by the Durham Proctor, and of those who are students of the Newcastle Division by the Newcastle Proctor.

REGULATIONS FOR MATRICULATION.

Matriculation Board.

D. Drummond, M.A., M.D., D.C.L.
J. W. Duff, M.A., D.Litt.
P. J. Heawood, M.A.
R Howden, M.A., M.B., D.Sc.
F. B. Jevons, M.A., D.Litt.
R. P. R. Lyle, M.A., M.D.
A. Robinson, M.A., D.C.L.
Henry Stroud, M.A., D.Sc.

GENERAL.

Meaning of Matriculation.

Students entering either Division of the University who propose to read for a degree, must matriculate before terms are allowed to count. The act of matriculation is the act of registering for the first time as a student of the University reading for a degree.

Matriculation Examination.

Up to and including September, 1923, the Matriculation Examination will continue to be held in Durham and Newcastle. After October, 1923, the Matriculation Examination (Newcastle division), will cease to be held. The regulations governing entry to the Durham Colleges, The College of Medicine, and Armstrong College, are detailed separately below.

Syllabus of Matriculation Examination.

So long as the Matriculation Examination continues to be held the following will be the syllabus in the different subjects :—

(*a*) *Mathematics.* (*One paper.*)

(1) Arithmetic.

(2) Geometry of the triangle, parallelogram and circle, including the substance of Euclid, Books I., II., and III., with easy deductions and practical constructions with ruler, compasses, etc.

(3) Algebra, up to and including quadratic equations.

Candidates must provide themselves with a graduated ruler, a pair of compasses, and a set square.

(*b*) *Extra Mathematics.* (*Two papers.*)

(1) Arithmetic.

(2) Elementary plane Geometry of the triangle and circle, theory of proportion, and similar figures.

(3) Algebra, up to and including the binomial theorem for a positive integral exponent.

(4) Plane Trigonometry, up to and including the solution of triangles.

Candidates must provide themselves with a graduated ruler, a pair of compasses and a set square.

(*c*) *English.* (*One paper.*)

(1) Composition of a short essay.

(2) *Either* a portion of a special author or authors; or general questions on English Literature. (Candidates must state their choice.)

(3) Grammar, Analysis and Parsing.

Prescribed books for 1922: Shakespeare, *A Midsummer Night's Dream;* Spenser, *Faerie Queene,* Book 2; Tennyson, *Coming of Arthur, Holy Grail, Last Tournament, Guinevere, Passing of Arthur.*

Prescribed books for 1923: Shakespeare, *Macbeth;* Milton, *Paradise Lost,* Books I. and II.; Byron *Childe Harold,* Cantos III. and IV.

(*d*) *English History.* (*One paper.*)

The chief developments of English History. A choice of questions will be given.

(*e*) *Geography.* (*One paper.*)

The elementary facts of the earth in its relation to the solar system. Day and night. Climate and the seasons. Eclipses. Distribution of land and water. Continental and oceanic areas. Contours. Heights and depths. Mountain and river systems. Atmosphere. Physical characteristics. Thermometer and barometer. Rainfall and winds. Sea: composition, temperature waves and currents. Earth sculpture and the agents by which it is effected. Earth movements and their results. The elements of the distribution of animals and plants. Political Geography generally as dependent upon Physical Geography.

The elements of the Political Geography of the British Empire, especially that of the United Kingdom.

N.B.—A knowledge of the Conventional Signs used in Ordnance Maps will be required.

(*f*) *English History and Geography.* (*One paper.*)

The chief developments of English History. Political Geography illustrating English History. A choice of questions will be given.

(*g*) *Religious Instruction.* (*One paper.*)

Some specified portion of the Old and New Testament.

In 1922:—

Joshua, Judges, Ruth and *Acts* 1-15.

In 1923:—

Samuel I. and II. and *The Gospel of St. John.* To be studied in the Revised Version.

(*h*) *Latin.* (*One paper*).

(1) Grammar.
(2) Translation of short sentences from English into Latin.
(3) Translation into English of passages from Latin books not previously specified; *or*, Translation into English of passages from books previously specified.[1]

Specified Books:—

In 1922.—
Cæsar's Invasion of Britain (*Gallic War* IV., 20—V., 23), *and* Vergil *Æneid*, Book VIII.

In 1923:—
Cæsar's *Gallic War* II. *and* Vergil *Æneid* Book IX.

N.B.—For candidates who prefer it, in place of translation from the prescribed books, further passages from books not previously specified will be set. *Candidates, however, must notify their wish when sending in their names.*

(*i*) *Greek.* (*One paper.*)

(1) Grammar, Accidence. The use of the cases, prepositions, negatives, simple uses of the subjunctive and optative, conditional sentences and indirect speech.
(2) Translation of short sentences from English into Greek.
(3) Translation into English of passages from Greek books not previously specified.
(4) Translation into English of passages from books previously specified.

Specified Books:—

In 1922:—
Xenophon *Anabasis* V. *and* Euripides *Alcestis* (Sidgwick's Scenes from the Greek Dramatists).

In 1923:—
Xenophon *Anabasis* IV. *and* Euripides *Medea* (excluding the choric songs).

N.B.—For candidates who prefer it, in place of translation from the prescribed books, further passages from books not previously specified will be set. *Candidates, however, must notify their wish when sending in their names.*

(*j*) *Ancient History.* (*One paper.*)

Some specified portion of Greek or Roman History.

In 1922 *and* 1923:—
Greek History, 594-404 B.C. *or* Roman History, 264-49 B.C.
Candidates must state whether they offer Greek History or Roman History when sending in their names.

[1] In the case of a change of set books in languages other than English, alternative papers will be set from the old books at the examination at which the change first comes into effect but not afterwards.

(*k*) *French.* (*One paper.*)

Grammar. Translation from English into French, or the composition of an essay in French. Translation into English of passages from books not previously specified.

(*l*) *German.* (*One paper.*)

Grammar. Translation from English into German, or the composition of an essay in German. Translation into English of passages from books not previously specified.

(*m*) *Experimental Science.* (*One paper.*)

Measurement of length, area, and volume. The balance and weighing. Comparison of the metric and British systems of weights and measures. Velocity, acceleration, force. The relation of mass and weight. Measurement of forces (*e.g.*, by the spring balance). Composition of two forces acting at a point. Resolution of forces. Atwood's machine, and the general laws of falling bodies. The characteristics of matter in solid, liquid and gaseous states. The principle of Archimedes. Density and specific gravity determinations. Atmospheric pressure. The barometer. Boyle's law. General ideas of the effect of heat on matter. Measurement of temperature. Thermometers. The principle and construction of the mercurial thermometer. Changes of length, area, and volume of solids, and volume of liquids, and gases, with change of temperature. Measurement of quantity of heat, and calorimeters. Specific heat. The following in reference to ice, water and steam: Change of state, latent heat, melting point, boiling point. Simple phenomena of heat in connection with conduction, convection, and radiation. Heat as a form of energy. Chemical and physical change; the indestructibility of matter. Elements, compounds and mixtures; the constancy of composition of compounds. Air, oxygen and nitrogen; the discovery of the composition of air; combustion, respiration. Water: its properties and composition; natural waters; water for domestic purposes; the saline constituents of natural waters; hard and soft waters. The study of limestone, of salt, and of washing soda

(*n*) *Chemistry.* (*One paper.*)

Chemical and Physical Change. Mixtures. Compounds. Elements. Formulæ. Equations. Calculation of Weights and Materials taking part in chemical reactions. Air. Oxygen. Nitrogen. Combustion. Respiration. Correction of Gas Volumes for Temperature and Pressure. Water. Hydrogen. Composition of Water. Natural Waters. Water as a Solvent. Sulphur—its compounds with Hydrogen and with Oxygen; Sulphuric Acid. Sulphates. Salt. Chlorine—its compound with hydrogen: the Oxy-acids of Chlorine. Carbon. Typical Hydrides of Carbon. Oxides of Carbon. Fuel—Coal. Nitric Acid. Nitrates. Oxides of Nitrogen. Ammonia. Phosphorus—its Hydride and Chlorides. Phosphoric Acids. Law of Constant

Proportion. Law of Multiple Proportion, and the Law of Volumes as illustrated by the composition of the compounds of the commoner non-metals. The Atomic Theory. Calculation of the Volumes of Gases resulting from chemical reactions. The general Physical and Chemical characters of the Metals.

(o) *Physics.* (*One paper.*)

Simple physical measurements, and the principles and uses of the apparatus required.

Expansion of solids, liquids and gases due to change of temperature. Thermometry. Calorimetry. Specific Heat. Liquefaction and Solidification. Vaporisation and Condensation. Ebullition. Latent Heat. Conduction, Convection and Radiation. Heat and Work.

Propagation of Light. Velocity of Light. Photometry. Reflection and Refraction of Light. Formation of Images by plane and spherical mirrors and thin lenses. The prism. The spectrum.

Simple phenomena of magnetism and magnetic measurements. Terrestrial Magnetism. Electrostatics. Batteries and the production of Electric Currents. Ohm's law and simple electrical measurements. Magnetic, chemical and heating effects of the electric current. Simple phenomena of electro-magnetic induction.

Note.—Candidates in Physics should have had practical experience in a laboratory.

(p) *Botany.* (*One paper.*)

The external form and gross anatomy of flowering plants as far as they can be studied with the aid of a lens. The structure and pollination of flowers. The fundamental facts of plant physiology, as derived from experiments that have been performed by the candidates themselves. The examination shall include practical questions upon common British plants.

(q) *Zoology.* (*One paper.*)

The elementary anatomy and physiology of the Rabbit; the structure of the cell, and the general microscopical structure of the tissues of the body of such an animal as the Rabbit; the elementary structure, habits, and life-history of the Amœba, the freshwater Polype (Hydra), the Earthworm and the Frog.

(r) *Mechanics.* (*One paper.*)

Rectilinear Motion. Laws of Motion. Composition and Resolution of Vectors. Theory of Moments. Elementary Principles of Statics. Centres of Gravity of simple solids. Uniform Circular Motion.

(s) *Greek Testament.* (*One paper.*)

St. Matthew.

(*t*) *Elementary Logic.* (*One paper.*)

The Elements of Deductive and Inductive Logic; terms, definition and division, propositions—their opposition and interpretation, the syllogism, hypothetical arguments, fallacies, the nature of induction, its chief methods and chief sources of error. Text book recommended: Jevons' Elementary Lessons in Logic (omitting lessons xxii and xxiii).

DURHAM COLLEGES.

(And Associated Theological Colleges.)

Choice of Subjects.

[2]All candidates must offer *six* subjects, viz.:—(*a*) Latin and (*b*) *five* other subjects as follow: (1) Greek *or* French *or* German; (2) Mathematics *or* Logic; (3) English *or* Greek Testament; (4) and (5) *Two* of the following: Religious Knowledge, Ancient History, English History, Geography, *or* one of the above subjects not already offered.

Place and Dates of Examination.

The Examination will be held at the Lecture Rooms, Palace Green, Durham, in January, June or July, and October. In 1922 the Examination will commence on 24th January, 27th June, and 17th October, and in 1923 on 16th January, 26th June, and 9th October.

Entry for the Examination.

Each candidate who wishes to be admitted to any of the Durham Colleges shall, a fortnight before the Examination, send his name together with the required fee, to the Head of the College which he wishes to join or to the Censor of Non-Collegiate Students.

Each candidate in Music shall send to the Secretary of Examinations, University Offices, North Bailey, Durham, *one calendar month* before the first day of the Examination at which he wishes to present himself, a paper containing name, *in full,* the particular subjects in which he wishes to be examined, together with the required fee.

Candidates who have entered for the Examination may withdraw their names upon giving the Secretary nine days' notice; and in that case may enter *either* at the next examination *or* the next but one (but not afterwards) without further payment.

Candidates who have withdrawn their names will have them placed on the list for the next examination, and if candidates wish to defer being examined to the next examination but one, they must give due notice as provided above.

[2] Candidates taking part of the Examination to qualify for admission as students in Music must pass at one and the same time in English and *three* other subjects, or *two* other subjects if one be a foreign language.

Fees.

Each candidate shall pay a fee of £2 on each separate occasion on which he desires to be examined.

Candidates sending in their names after the time appointed pay an additional fee of 5s. Names of candidates sent in after the time-table is printed can only be accepted (*if at all*) on payment of an additional fee of £1. The time-table is printed a fortnight before the Examination commences.

No entry can be accepted unless it be accompanied by the fee, and no late entry unless it be accompanied by the extra fee required.

No fee will be returned.

Winifred Foster Scholarship.

The above scholarship is offered to women candidates only, of limited means, on the result either of the Matriculation Examination or any Examination equivalent thereto

Equivalent Examinations.

Persons who have passed any of the examinations recognised by the Durham Colleges as equivalent to the Matriculation Examination, and who therefore wish to be excused the Matriculation Examination must send to the Secretary of Examinations, Durham, proof that they have passed such examination, together with the fee of £2 0s. 0d.

The following examinations are recognised as equivalent:—

An examination qualifying for a degree in Arts of any University of the British Empire.

Also the following provided the requirements of the Faculty which the candidate wishes to enter are satisfied:—

The Examination for Responsions of the University of Oxford.

The Previous Examination of the University of Cambridge.

The Matriculation Examination of the University of Dublin.

The Matriculation Examination of the University of London.

The Preliminary Examination of the Joint Board of the Scottish Universities.

The Joint Matriculation Examination of the Victoria University of Manchester, the University of Liverpool, the University of Leeds, and the University of Sheffield.

The Matriculation Examination of the University of Wales.

The Preliminary Examination of the University of Birmingham.

The Matriculation Examination of the University of Bristol.

The Matriculation Examination of the National University of Ireland.

The Matriculation Examination of the University of Sydney.

The Matriculation Examination of the South African Universities.

The Higher Local Examination of the University of Oxford.

The Higher Local Examination of the University of Cambridge.
The School Certificate Examination of the Oxford and Cambridge Schools Examination Board.
The Senior Local Examination of the Oxford Delegacy for Local Examinations.
The Senior Local Examination of the Cambridge Local Examinations and Lectures Syndicate.
The School Certificate Examination of the University of Durham.
The School Certificate Examination of the Northern Universities Joint Matriculation Board.
The School Certificate Examination of the University of Bristol.
The Higher Certificate Examination of the Oxford and Cambridge Schools Examination Board.
The Higher School Certificate Examination of the Oxford Delegacy for Local Examinations.
The Higher School Certificate Examination of the Cambridge Local Examinations and Lectures Syndicate.
The Higher Certificate Examination of the University of Durham.
The Higher Certificate Examination of the Northern Universities Joint Matriculation Board.
The Higher School Certificate Examination of the University of Bristol.
The Leaving Certificate of the Higher Grade of the Scottish Education Department.
The Senior Certificate or the Honour Certificate Examination of the Central Welsh Board.
The Oxford Preliminary Examination for Students in Music [for Students in Music only].
The War Office Examination for Certificate A.

* In the Faculty of Arts, when any of the above examinations contains only a part of the subjects required, the certificate of such examination will be accepted *pro tanto*, and the candidate required to satisfy the Durham Examiners in such subjects as are not covered by the previous certificate.

COLLEGE OF MEDICINE.
UNTIL OCTOBER, 1923.

The present Durham University Matriculation Examination (Newcastle Division), will continue to be held up to September, 1923.

Until October of that year students who wish to matriculate in the Faculty of Medicine must either:—

(*a*) Pass the University Matriculation Examination in the required subjects; *or*

(*b*) Present a certificate that they have passed in the required subjects at an equivalent examination (pp. 95, 96).

In the Faculty of Medicine the required subjects are :—

1. English.
2. Mathematics
3. English History.
4. Physical and General Geography.
5. Latin.[3]
6. One subject selected from the following :—Greek, French or German.

The six required subjects must be passed at not more than two separate examinations.

This examination is recognised by the General Medical Council for the registration of medical students.

Every candidate who wishes to enter for the examination, with a view to studying for a degree in Medicine must obtain from the Registrar of the College of Medicine an entry form, complete it and return it to him, together with the required fee of £2, not later than one calendar month before the first day of the examination. For re-examination in not more than three subjects the fee is 10s. a subject.

Late entries may be accepted up to a fortnight before the day on which the examination begins on the payment of a fee of 5s. in addition to the examination fee. This late entry fee will not be charged in August to candidates who have received the results of the Durham University School Certificate Examination too late to enter for the Matriculation Examination at the usual time. [No entry can be received within 14 days of the commencement of the examination.]

Candidates who have entered may withdraw their names on giving 9 days' notice before the date on which the examination begins, and may enter *either* for the next examination *or* the next but one, but not afterwards, without paying another fee.

Candidates who withdraw their names must notify the Registrar of the College of Medicine of their intention to sit at the next or subsequent examination.

N.B.—On and after 1st January, 1923, every applicant for registration by the General Medical Council must have passed, in addition to the above examination in General Education, a pre-registration examination in Elementary Physics and Elementary Chemistry conducted or recognised by the University. A syllabus of this examination is given on pp. 100, 101.

Students who have satisfied the requirements of the General Medical Council as regards registration, in some examination other than the Durham Matriculation or one of its equivalents (see pp. 95, 96), may enter on a course of study for a degree in Medicine upon satisfying the examiners of the University of Durham in *three* of the subjects of the Matriculation Examination, provided that one of them at least is a

[3] Oriental students may offer Sanskrit instead of Latin.

language other than English. In the case of a student who studies only one year in the University, this regulation must be complied with at least twelve months before the candidate presents himself for his final examination.

Registered students in Medicine, who have passed the University of Durham Matriculation Examination before entering on study in the University, and who desire to take the degree of B.Sc., will be excused from study and examination in Mathematics after matriculation.

Candidates from Indian Universities must have passed the Intermediate Examination of one of the recognised Indian Universities, and must be registered as medical students on the books of the General Medical Council.

FOR EXAMINATIONS RECOGNISED AS EQUIVALENT TO THE MATRICULATION EXAMINATION see pp. 95, 96, as for Durham Colleges.

AFTER OCTOBER, 1923.

After October, 1923, students who wish to matriculate in the Faculty of Medicine with a view to reading for a degree in Medicine or Surgery, or a Licence in Dental Surgery must produce a certificate or certificates that they have passed :—

(*a*) One of the six following examinations in the prescribed manner and in the required subjects, *or*

(*b*) Present a certificate that they have passed in the required subjects at an equivalent examination (pp. 99, 100).

The six examinations referred to under (*a*) are :—

1. The School Certificate Examination of the University of Durham.

2. The School Certificate Examination of the Joint Board of the Universities of Manchester, Liverpool, Leeds, Sheffield and Birmingham.

3. The School Certificate Examination of the University of Bristol.

4. The School Certificate Examination of the Joint Board of the Universities of Oxford and Cambridge.

5. The Senior Local Examination of the University of Oxford.

6. The Senior Local Examination of the University of Cambridge.

NOTE.—In all the above examinations the required subjects must have been passed "with credit."

The required subjects are—

1. English.
2. Elementary Mathematics.
3. Greek *or* Latin.[4]

[4] Oriental students may offer Sanskrit for Latin

4. French or German or other modern language for which special permission has been obtained.
5. & 6. Two subjects selected from the following list:—
   (*a*) Ancient History.
   (*b*) Modern History.
   (*c*) Greek } if not already taken under (3) above.
   (*d*) Latin }
   (*e*) French } if not already taken under (4) above.
   (*f*) German }
   (*g*) Advanced Mathematics.
   (*h*) Mechanics.
   (*j*) Experimental Science.
   (*k*) Chemistry.
   (*l*) Physics.
   (*m*) Botany.
   (*n*) Zoology.
   (*o*) Biology.
   (*p*) Geography.

NOTE 1.—Experimental Science may not be counted along with either Chemistry or Physics.

NOTE 2.—Biology may not be counted along with either Botany or Zoology.

NOTE 3.—Candidates who pass in Chemistry and Physics (*k* and *l* above) will still be required to pass a pre-registration examination in these subjects.

The following examinations are recognised for Matriculation as Medical or Dental students:—

EXAMINATIONS RECOGNISED AS EQUIVALENT:—

An examination qualifying for a degree in Arts of any University of the British Empire.

Also the following examinations provided the requirements of the Faculty of Medicine are satisfied:—

The Examination for Responsions of the University of Oxford.

The Previous Examination of the University of Cambridge.

The Matriculation Examination at the University of Dublin.

The Matriculation Examination of the Queen's University, Belfast.

The Matriculation Examination of the National University of Ireland.

The Preliminary Examination of the Joint Board of the Scottish Universities.

The Leaving Certificate of the Higher Grade of the Scottish Education Department.

The Joint Matriculation Examination of the Universities of Manchester, Liverpool, Leeds and Sheffield.

The Matriculation Examination of the University of Bristol.
The Higher Local Examination of the University of Oxford.
The Higher Local Examination of the University of Cambridge.
The Higher Certificate Examination of the Oxford and Cambridge Schools Examination Board.
The Higher Certificate Examination of the University of Durham.
The Higher Certificate Examination of the Joint Board of the Universities of Manchester, Liverpool, Leeds, Sheffield and Birmingham.
The Higher School Certificate Examination of the University of Bristol.

Candidates from a British Colony who present evidence that they have passed an examination which would admit them to a course qualifying for graduation in Medicine in the Colony from which they come will be accepted for Matriculation, provided such examination satisfies the requirements of the General Medical Council for the registration of medical students.

Candidates from India must have passed the Intermediate Examination of one of the recognised Indian Universities, and must be registered as medical students on the books of the General Medical Council.

PRE-REGISTRATION EXAMINATION IN CHEMISTRY AND PHYSICS.

N.B.—On and after the 1st January, 1923, every applicant for registration by the General Medical Council must have passed, in addition to the above examination in General Education, an examination in Elementary Physics and Elementary Chemistry conducted or recognised by the University

The following is the syllabus of the *pre-registration* examination in Chemistry and Physics:—

1.—INORGANIC CHEMISTRY.[5]

The nature of chemical change. Laws of chemical change. Symbols, formulæ, equations. The gas laws. Molecular and atomic weights. Atomic theory. The kinetic molecular hypothesis. Solution; electrolysis; ionisation. Oxygen, hydrogen, air. The halogens and their compounds. Ozone and hydrogen peroxide. The elements sulphur, carbon, nitrogen, silicon, boron and their compounds. The commoner metals and their compounds. The preparation and qualitative analysis of simple salts. Simple quantitative experiments, gravimetric and volumetric. Determination of equivalents.

[5] For the course of instruction and examination in Organic Chemistry see p. 172.

2.—Physics.

(*a*) *Experimental physics*:—Elementary principles of statics. Rectilinear motion. Laws of motion considered experimentally, and simple applications. General properties of solids, liquids and gases. Elementary hydrostatics.

(*b*) *Heat*:—Thermometry. Expansion of solids, liquids and gases due to temperature. Calorimetry. Change of state. Hygrometry. Conduction, convection and radiation. Heat and work.

(*c*) *Magnetism and Electricity*:—Simple phenomena in electricity. Terrestrial magnetism. Batteries; their constitution and use. The magnetic chemical and heating effects of the electric current. Ohm's law and simple electrical measurements. Simple phenomena of induced currents. The induction coil. Elementary phenomena in electrostatics.

(*d*) *Optics*:—Rectilinear propagation of light. Photometry. Reflection and refraction of light. Formation of images by spherical mirrors and lenses. Optical instruments. The prism. The spectrum.

(*e*) *Sound*:—Elementary treatment of.

(*f*) *Practical Physics*:—Candidates will be expected to be familiar with the use of simple physical instruments, and to perform simple experiments in experimental mechanics, heat, electricity, and optics. Candidates are required to bring a stop-watch and a pocket-lens for this examination.

Exemptions from the Pre-registration Examination in Chemistry and Physics.

1.—Candidates who have passed in these subjects in the Higher School Certificate Examination of the Universities mentioned under 1, 2, 3, 4 (p. 98).

2.—Candidates who have passed in these subjects in an examination qualifying for a degree in Science in a University of the United Kingdom.

3.—Candidates who have passed a pre-registration examination (equivalent to that on pp. 100, 101) in a University of the United Kingdom.

ARMSTRONG COLLEGE.

UNTIL OCTOBER, 1923.

The present Durham Matriculation Examination (Newcastle Division) will continue to be held up to September, 1923, and until October of that year the following will be the regulations for matriculation in Armstrong College.

1.—General.

In order to qualify for matriculation in Armstrong College and read for a degree of the University of Durham, students must either—

(*a*) Pass the Matriculation Examination in the required subjects.

(*b*) Obtain a certificate exempting from the Examination.

Students can obtain certificates exempting from the Examination only by producing original certificates of having passed certain other examinations accepted as equivalent. (See paragraphs 8 and 16 below.)

2.—Subjects of Examination.

The subjects of examination are:—

(*a*) Mathematics, or Extra Mathematics.
(*b*) English.
(*c*) English History.
(*d*) English History and Geography (combined paper).
(*e*) Geography.
(*f*) Religious Instruction.
(*g*) Latin.
(*h*) Greek.
(*i*) French.
(*j*) German.
(*k*) Italian, Russian, Spanish.
(*l*) Arabic, Chinese, Hebrew, Pali, Persian, Portuguese, Sanskrit, Urdu.
(*m*) Ancient History.
(*n*) Experimental Science, Chemistry, Physics.
(*o*) Botany, Zoology.
(*p*) Mechanics.

Candidates must satisfy the examiners in six subjects selected from the above list. The choice of subjects depends upon the degree course upon which it is proposed to enter.

3.—Pure Science.

Candidates who propose to enter upon a course of study for the degree of B.Sc. in Pure Science must satisfy the examiners in six subjects as under:—

Either Mathematics *or* Extra Mathematics.
English.
English History.

One of the four languages—Latin, Greek, French, German.

Two other subjects selected from the list, provided that:—
(1) Only one subject is selected from the group (*n*).
(2) Only one subject is selected from the group (*o*).
(3) Not more than two foreign languages in all are selected.

4.—Agriculture, Mining, and Metallurgy.

Candidates who propose to enter upon a course of study for the degree of B.Sc. in Agriculture, Mining, or Metallurgy, must first satisfy the examiners in six subjects as under:—

Either Mathematics *or* Extra Mathematics.
English.
English History.
One of the four languages—Latin, Greek, French, German.
Two other subjects selected from the list, provided that:—
(1) Only one subject is selected from the group (*n*).
(2) Only one subject is selected from the group (*o*).
(3) Not more than two foreign languages in all are selected.

5.—Engineering and Naval Architecture.

Candidates who propose to enter upon a course of study for the degree of B.Sc. in Engineering (Civil, Mechanical, Marine, or Electrical) or in Naval Architecture, must first satisfy the examiners in six subjects as under:—

Extra Mathematics.
English.
English History and Geography (combined paper).
One of the four languages—Latin, Greek, French, German.
Either Experimental Science *and* Mechanics;
or two of the following—Chemistry, Physics, Mechanics.

6.—Arts.

Candidates who propose to enter upon a course of study for the degree of B.A. must first satisfy the examiners in six subjects as under:—

Either Mathematics *or* Extra Mathematics.
English.
English History.
Either Latin *or* Greek.
Two other subjects selected from the list, provided that:—
(1) *Both* Latin *and* Greek may be taken and counted
(2) Not more than two foreign languages in all are selected.
(3) Only one subject is selected from the group (*n*).
(4) Only one subject is selected from the group (*o*).

7.—Commerce.

Candidates who propose to enter upon a course of study for the degree of B.Com. must first satisfy the examiners in six subjects as under:—

Either Mathematics *or* Extra Mathematics.
English.
English History.
One of the five languages—French, German, Italian, Russian, Spanish.
Two other subjects selected from the list, provided that:—
(1) Only one subject is selected from the group (*n*).
(2) Only one subject is selected from the group (*o*).
(3) Not more than two foreign languages in all are selected.

8.—Recognised Equivalent Examinations.

A list of examinations recognised as equivalent to the Matriculation Examination will be found in paragraph 17 below. Certificates for any of these examinations will exempt from the Matriculation Examination only if passes (in certain specified cases passes "with credit") have been obtained in the required subjects (as set out in paragraphs 3 to 7 above), and provided the conditions set out in paragraph 9 below have been fulfilled.

9.—Passing of the Examination.

Candidates must pass the Matriculation Examination or reach matriculation standard in a recognised equivalent examination in at least *six* matriculation subjects. The six required subjects must be passed at not more than two separate examinations as follows:—

Either (*a*) Six at one examination.
or (*b*) Five at one examination and one at a subsequent examination.
or (*c*) Four at one examination and two at a subsequent examination.

A candidate, however, who has qualified by means of two examinations to matriculate and read for one degree and who, before entering upon the course for that degree, decides to read for another degree the matriculation qualification for which is not covered by the certificate or certificates presented, may take the additional subjects required in a third examination.

The subsequent examination referred to need not have been under the same examination board as the first examination.

10.—Foreign Students.

Before obtaining exemption from the Matriculation Examination foreign students must satisfy the College—

(1) That they have passed in their own country an examination of a standard equivalent to that of the Matriculation Examination.
(2) That they have a sufficient knowledge of English to profit by a course of study.

11.—Fees.

The fee for the whole Matriculation Examination is £2. The fee for additional subjects taken separately is 10s. a subject.

The matriculation fee, payable at the time of matriculation is £2. Students who have qualified for matriculation through the Matriculation Examination, or through the Durham University School Certificate Examination, are exempted from paying the matriculation fee.

No fees will be returned.

12.—Date of Examinations.

The Matriculation Examination is held in Newcastle twice

annually; in July at Armstrong College, and in September at the College of Medicine.

In 1922 the Examination commences on Tuesday, 4th July, and on Tuesday, 12th September, at 10 a.m.

In 1923 the Examination commences on Tuesday, 3rd July, and on Tuesday, 11th September, at 10 a.m.

13.—Entry for the Examination.

Every candidate who wishes to enter for the Matriculation Examination with a view to matriculating in Armstrong College must obtain from the Registrar, Armstrong College, an entry form, complete it, and return it to him, along with the required fee, not later than one calendar month before the first day of the Examination. No entry can be accepted unless it is accompanied by the fee.

14.—Late Entries.

Late entries *may* be accepted up to a fortnight before the day on which the Examination begins, on payment of a late fee of 5s. in addition to the examination fee. This late entry fee will not be charged in August to candidates who have received the results of the Durham School Certificate Examination too late to enter for the Matriculation Examination at the usual time. Within the last fortnight before the beginning of the Examination no more entries can be received.

15.—Withdrawal of Entries.

Candidates who have entered for an examination may withdraw their names up to the day before that on which the examination begins; and may enter *either* at the next examination *or* at the next examination but one, but not afterwards, without paying another fee.

Unless they notify the Registrar that they do not wish to enter, the names of such candidates will be automatically included in the list for the next examination. If they wish to defer entry till the next examination but one, they should notify the Registrar before the last day for receiving normal entries.

16.—Examinations Recognised as Equivalent to the Matriculation Examination. (See paragraph 8 above.)

(i) An Examination qualifying for a degree in Arts of any University of the British Empire.

(ii) The Responsions of the University of Oxford.

(iii) The Previous Examination of the University of Cambridge.

(iv) The Matriculation Examination or the School Leaving Examination of the University of London. (If the School Leaving Examination is taken passes must be "with credit.")

(v) The Preliminary Examination of the Joint Board of the Scottish Universities.

(vi) The Matriculation Examination of the Joint Board of the Northern Universities (Universities of Manchester, Leeds, Sheffield, Liverpool and Birmingham).

(vii) The Matriculation Examination of the University of Wales.

(viii) The Matriculation or Entrance Examination of the University of Dublin.

(ix) The Entrance Examination of the National University of Ireland.

(x) The Matriculation Examination of the Queen's University, Belfast.

(xi) The Matriculation Examination of the University of Sydney.

(xii) The School Certificate Examination of the University of Durham, provided the necessary subjects are passed "with credit."

(xiii) The Higher Certificate Examination of the University of Durham (for additional subjects only).

(xiv) The Senior Local Examination of the University of Oxford, provided the necessary subjects are passed "with credit."

(xv) The Senior Local Examination of the University of Cambridge, provided the necessary subjects are passed "with credit."

(xvi) The Higher Local Examination of the University of Oxford.

(xvii) The Higher Local Examination of the University of Cambridge.

(xviii) The Higher Certificate Examination of the Joint Examination Boards of the Universities of Oxford and Cambridge.

(xix) The Oxford and Cambridge Joint Board School Certificate Examination, provided the necessary subjects are passed "with credit."

(xx) The Leaving Certificate Examination of the Higher Grade of the Scottish Education Department.

(xxi) The Senior Certificate or the Honour Certificate Examination of the Central Welsh Board.

AFTER OCTOBER, 1923.

The present Durham Matriculation Examination (Newcastle Division) will not be held after September, 1923. After October, 1923 the following will be the regulations for matriculation in Armstrong College.

1.—Qualifying Examinations.

Except in the special circumstances provided for in paragraph 6 below, all students who wish to matriculate must present a certificate (or certificates) showing them to have passed one of the examinations given below, and in addition, to have passed in the prescribed manner and in the required subjects.

(i) The School Certificate Examination of the University of Durham.

(ii) The School Certificate Examination of the Joint Board of the Northern Universities.

(iii) The School Certificate Examination of the University of Bristol.

(iv) The School Certificate Examination of the Joint Board of the Universities of Oxford and Cambridge.

(v) The Senior Local Examination of the University of Oxford.

(vi) The Senior Local Examination of the University of Cambridge.

In all the above examinations passes in the required subjects must be "with credit."

(vii) The Responsions of the University of Oxford.

(viii) The Previous Examination of the University of Cambridge.

(ix) The Matriculation Examination of the Joint Board of the Northern Universities.

(x) The Matriculation Examination of the University of Bristol.

(xi) The Leaving Certificate Examination of the Higher Grade of the Scottish Education Department.

(xii) The Higher Certificate Examination of the University of Durham.

(xiii) The Higher Certificate Examination of the Joint Board of the Northern Universities.

(xiv) The Higher Certificate Examination of the University of Bristol.

(xv) The Higher Certificate Examination of the Joint Board of the Universities of Oxford and Cambridge.

(xvi) The Higher Local Examination of the University of Oxford.

(xvii) The Higher Local Examination of the University of Cambridge.

Examinations (xii) to (xvii) will be recognised only for the one or two additional subjects passed at a subsequent examination, in accordance with the regulation given in paragraph 4 below. The subjects in these examinations may be taken either as principal or subsidiary subjects.

2.—Subjects of Examination.

The subjects of Examination recognised for matriculation purposes are the following:—

Schedule A.

English.

Elementary Mathematics.

One of the following languages—Latin, Greek, French, German.

Schedule B.

Ancient History.
Modern History.
Latin (if not already taken under Schedule A.).
Greek (if not already taken under Schedule A.).
French (if not already taken under Schedule A.).
German (if not already taken under Schedule A.).
Advanced Mathematics.
Mechanics.
Experimental Science.
Physics.
Chemistry.
Botany.
Zoology.
Biology.
Geography.
Any other foreign language for which special permission has been obtained.

Note (i).

Experimental Science may not be counted along with either Physics or Chemistry.

Note (ii).

Biology may not be counted along with either Botany or Zoology.

3.—Number of Subjects.

The certificate, or certificates, presented for matriculation, must show the candidate to have passed (in the case of examinations (i) to (vi) to have passed "with credit") in at least six subjects chosen from Schedules A and B. The choice of these six subjects is limited in certain ways, as set out in paragraph 5 below.

4.—Number of Sittings.

The certificate, or certificates, must also show the candidate to have passed (in the case of examinations (i) to (vi) to have passed "with credit") in the six required subjects at not more than two separate examinations, as follows:—

Either (*a*) six at one examination;
or (*b*) five at one examination and one at a subsequent examination;
or (*c*) four at one examination and two at a subsequent examination.

A candidate, however, who has qualified by means of two examinations to matriculate and read for one degree, and who, before entering upon the course for that degree, decides to read for another degree the matriculation qualification for which is not covered by the certificate or certificates presented, may take the additional subjects required in a third examination.

The subsequent examination referred to need not have been under the same examination board as the first examination, but in all cases the earlier certificate presented must show the candidate to have passed the earlier certificate or "local" examination as a whole, even though matriculation standard may have been obtained in only four, or five, of the required subjects.

5.—Choice of Subjects.

All candidates must have passed (in the case of examinations (i) to (vi) passed "with credit") in the three subjects of Schedule A.

The choice of subjects from Schedule B is limited as follows:—

(*a*) Candidates who propose to read for the degree of B.Sc. in Pure Science or Agriculture, or for the degree of B.Com. must have passed in any three subjects from Schedule B.

(*b*) Candidates who propose to read for the degree of B.A. must have passed in any three subjects from Schedule B. Such candidates are, however, reminded that for the Intermediate Examination for the degree of B.A., two languages, one of which must be an ancient language, are required, and that the Intermediate courses in Latin, and French assume a knowledge of the language in each case up to matriculation standard. Candidates for matriculation in the Faculty of Arts, therefore, who are not qualified by examination in two foreign languages (one of them being an ancient language) will be allowed to matriculate only on the recommendation of the Senior Tutor in Arts.

(*c*) Candidates who propose to read for the degree of B.Sc. in Engineering (Civil, Mechanical, Marine, or Electrical) or in Naval Architecture, must present the three following subjects from Schedule B:—
Advanced Mathematics, Experimental Science,[6] Mechanics.

(*d*) Candidates who propose to read for the degree of B.Sc. in Mining or Metallurgy must have passed in the following subjects from Schedule B:—
Experimental Science,[6] Mechanics, and one other subject.

6.—Special Cases.

Permission to matriculate without having previously satisfied the above conditions may be granted in special circumstances, as under:—

[6] Physics *and* Chemistry will be accepted as equivalent to Experimental Science.

(*a*) Candidates proposing to read for a degree in Applied Science who produce satisfactory evidence that they have been engaged in technical pursuits for a period of two years approximately, may submit themselves for a special examination instead of for one of the examinations named in paragraph 2 above. The regulations for this special examination are given in Appendix A below.

(*b*) Foreign or Colonial students must produce evidence that they have passed in their own country an examination of the requisite standard, and in approximately the same subjects as would have been required had they taken one of the examinations named in paragraph 1 above; and further, in the case of foreign students, that they have sufficient proficiency in English to enable them to follow a course of study with profit. (It should be noted that in the case of Indian students no examination lower than the Intermediate Examination of an Indian University will be considered for this purpose.)

(*c*) Candidates of more than 23 years of age may be permitted to matriculate if they produce satisfactory evidence of educational attainments. (This applies only to candidates whose native language is English.)

(*d*) In special circumstances, not provided for in paragraphs (*a*), (*b*) and (*c*) above, candidates may, on application to the Registrar, be considered for matriculation.

7.—PROCEDURE.

Candidates who propose to matriculate in Armstrong College in the University of Durham should obtain an application form from the Registrar, complete it, and return it, together with original certificates of examinations passed or other evidence (under paragraph 6 above) of educational qualifications, to the Registrar. This should be done as long as possible before the opening of the academical year, in which they propose to commence their studies in the College.

8.—FEE.

The matriculation fee is £2 0s. 0d. payable at the time of matriculation (not at the time of application). Candidates who have qualified to matriculate through the School Certificate Examination of the University of Durham will be exempted from payment of the matriculation fee.

APPENDIX A.

(See paragraph 6 (*a*) of Armstrong College Regulations.)

1. Candidates in Engineering or Naval Architecture claiming special consideration under paragraph 6 (*a*) of above regulations will be required to satisfy the examiners in a special examination in the following subjects:—

(*a*) *English.*—(1) An essay on some general subject connected with the candidate's technical pursuits: a choice of subjects will be given.

(2) The making of a précis.

(*b*) *A Language.*—Acquaintance with one of the modern foreign languages specified in paragraph 3 as tested by the candidate's ability to translate passages from a scientific work in the language selected.

(*c*) Advanced Mathematics.
(*d*) Mechanics.
(*e*) Experimental Science.

The syllabus and standard to be the same as for the University of Durham School Certificate Examination.

2. Candidates in Mining or Metallurgy may substitute *Elementary Mathematics* for *Advanced Mathematics*, but must otherwise comply with the regulations set out in paragraph 1 of this Appendix.

3. Candidates in Agriculture must satisfy the examiners in subjects (*a*) and (*e*) of paragraph 1, and in Elementary Mathematics, Elementary Biology and a foreign language. The syllabus and standard in all cases except English to be the same as those for the University of Durham School Certificate Examination.

4. The special examination referred to above will be held at the College, if candidates present themselves, early in September of each year. Entries, specifying the subjects chosen, the course of study proposed, and accompanied by a fee of £2 0s. 0d. and by evidence that the candidate has been engaged for a period of approximately two years in technical pursuits, should be lodged with the Registrar not later than 1st August in each year.

SUBJECTS OF EXAMINATION IN THE FACULTY OF THEOLOGY, 1922-23.

COURSES FOR L.Th., DIPLOMA IN THEOLOGY, B.D., AND D.D.

NOTE.—The course of study for the Licence in Theology set out below is that which is compulsory upon all candidates who entered an associated Theological College in and after Michaelmas Term, 1921. Students who entered upon their course of Theological study at an associated Theological College before Michaelmas Term, 1921, may proceed to the Licence in Theology after six terms' residence. Ex-service students will be excused the optional subject in both Parts, and will be required to satisfy the examiners in one language only in subject No. 2 of Part A and Part B. After June, 1922, no papers will be set in subjects other than those prescribed in the current *Calendar*.

A.—FOR THE LICENCE IN THEOLOGY.

The course of study for the Licence in Theology, taken at a Theological College associated with the University, shall extend over three academical years (nine terms).

No candidate shall be eligible to count terms unless he shall previously have passed the Matriculation Examination.

The examination for the Licence in Theology is divided unto two parts, Part A and Part B. These parts may be offered in either order provided that no student shall become a candidate for either part until he shall have completed at least one academical year of residence, nor for the other part until he shall have entered upon his ninth term of residence.

The subjects of examination are as follows:—

PART A.

1. OLD TESTAMENT. The general outlines of the history contained in the Old Testament, together with a special knowledge of the following prescribed books:—

   1922 and 1923: Ezekiel i-xiv, xvii-xx, xxxiii-xxxvii, xliv, xlvii 1-12.

2. New Testament. The Life and Teaching of our Lord as contained in the Gospels, together with a knowledge of one of the Gospels in Greek, and in the Latin Vulgate.

   1922 and 1923: St. Matthew.

3. Systematic Theology. The scriptural basis and the history of the development of the following doctrines:—

   (*a*) God in His Essence, Unity, Trinity, Creation, Man, Sin.

   (*b*) The Person and Work of Jesus Christ.

   Candidates will be expected to show a knowledge of the Creeds and the Articles of Religion.

4. Church History. Outlines of the history of the Church to the death of Charlemagne.

5. Christian Morals.

6. Optional Subject. One of the subjects stated below.

Part B.

1. Old Testament. The outlines of Old Testament Theology, Morals and Worship.

2. New Testament. The History of the Apostolic Age, with a special knowledge of a prescribed portion of the New Testament in Greek, and in the Latin Vulgate.

   1922: I Corinthians (omitting v-vii, xi 1-16, and xiv); 1923: Romans i-viii.

3. Systematic Theology.

   (*a*) The Person and Work of the Holy Ghost.

   (*b*) The Ministry and the Sacraments.

   (*c*) The Doctrine of the Last Things.

   Candidates will be expected to show a knowledge of the Creeds, the Articles of Religion, and other Confessions of Faith, as well as of modern thought upon these subjects.

4. Church History. The outlines of the History of the Church in mediæval and modern times, with special reference to the History of the English Church. An opportunity will be given for showing a knowledge of the History of Missions.

5. Christian Worship. The History of Christian Worship, with reference to the principal ancient rites. The History and Rationale of the Book of Common Prayer.

6. Optional Subject. A second subject chosen from the list below.

Optional Subjects.

Two of these must be offered, but a third may be offered if desired.

1. Greek. Passages for translation from a Classical Greek Author with questions upon Greek Accidence, and the more common Syntax Rules. Prescribed Author:—Plato, *Apology*.
2. Latin. Passages for translation from a Latin Author, with questions upon Accidence and Syntax. Short sentences for translation into Latin. Prescribed Author:—Cicero, *De Senectute*.
3. Hebrew. Passages for translation from a prescribed portion of the Old Testament. Hebrew Accidence, Pointing and the elements of Syntax.[1]
4. Logic. The elements of Deductive and Inductive Logic.
5. English Language and Literature. As set in the Intermediate Examination in Arts.
6. Economics. The elements of Economic Theory.
7. Psychology. The elements of General and Social Psychology. The scope of the subject is indicated by:—Pillsbury, Essentials of Psychology; MacDougall, Social Psychology.
8. Ethics. The elements of Ethics. (Mackenzie's Manual of Ethics is recommended). A special study of Butler, Sermons i-iii; Mill, Utilitarianism; Kant, Fundamental Principles of the Metaphysic of Morals.
9. Philosophical Introduction to Theology.
10. Comparative Study of Religion.

Candidates for the Licence in Theology may offer upon the same occasion of examination, subjects chosen from either Part A or Part B, so as to make up the total number of subjects required in each part, provided that only the subjects numbered correspondingly in each part shall be interchangeable. Candidates must have satisfied the examiners in all the subjects of both parts before they will be qualified to proceed to the L.Th. Candidates shall receive a certificate stating the subjects in which they have passed.

Candidates may also offer subjects chosen as optional subjects at any examination held after the completion of their third term of residence. Thus the two subjects selected under 6 in either part, together with any other optional subject, may be offered at an examination other than that at which the Theological subjects are offered, provided that not less than two optional subjects are offered at one and the same examination. The fee for this examination shall be One Pound if two

[1] The prescribed passages will be those required for the General Ordination Examination.

subjects are offered, and One Pound, Ten Shillings, if more than two subjects are offered.

No L.Th. can become a Candidate for Honours in the Final B.A. until he has passed the First Public Examination in Arts or the Intermediate Arts Examination.

Examinations in Part A and Part B will be held three times a year, in March, June, and December. The examinations for both parts will begin in the seventh week of Easter and Michaelmas Terms and in the eighth week of Epiphany Term.

B.—FOR THE DIPLOMA IN THEOLOGY

Candidates for the diploma in Theology must be graduates of some University in the British Empire, and must subsequently keep three terms (which must ordinarily be consecutive) by attendance upon courses of lectures at Durham, including lectures in Pastoral Theology and Elocution. The course may with advantage be extended (at the candidate's option) over six terms.

D.—FOR THE DEGREE OF DOCTOR OF DIVINITY.

Candidates for the degree of D.D. must have proceeded to the degree of B.D. of this University, and must be of the standing of five years at least from the date of their admission to that degree. They must also have proceeded to the degree of M.A. in this or some other University in the British Empire.

The exercise for the degree of D.D. is *either* published theological work approved by Senate, *or* a dissertation on a thesis connected with the criticism or exegesis of Holy Scripture or with Dogmatic Theology, Church History or Liturgiology.

The exercise should show prolonged and original work, together with some knowledge of the best work of others upon the subject.

A candidate, if he proposes to offer a dissertation, must previously have submitted to the Professor of Divinity the title of the thesis on which he intends to write and the title must be approved by the Professor. All candidates may, at the discretion of the examiners, be examined *viva voce* on the subject of their exercise.

The exercise will not be accepted unless it shall have been judged by the examiners to be a sufficient contribution to learning.

SUBJECTS OF EXAMINATION IN THE FACULTIES OF ARTS AND LETTERS.

(At Durham or Newcastle.)

1.—The course of study for the Pass degree of B.A. consists of not less than nine terms, *i.e.*, three academical years, reckoned from the term in which a student is duly matriculated after having passed the Matriculation Examination. All candidates are required to pass an Intermediate, a Second Year and a Final Examination, except as provided in the following paragraphs. Graduates of any other Faculty desiring to proceed to the degree will be excused the first year of residence and the Intermediate Examination.

2.—Candidates are required to pass the Matriculation Examination before beginning to keep terms and are not eligible for the Intermediate Examination until they have kept three terms, nor for the Second Year Examination until they have kept three terms after passing the Intermediate Examination.

3.—Candidates for the Intermediate Examination are required to satisfy in five subjects, of which two must be foreign languages, one being an ancient language. Candidates must offer five subjects in the first instance, but it shall be within the discretion of the examiners to refer candidates who shall have failed in not more than two of the subjects offered, for re-examination in the subject (or subjects) *at the next occasion of examination only*. Candidates who on that occasion fail in the subject or subjects in which they have been referred for re-examination shall be deemed to have failed in the whole of the examination and shall be required to offer all the five subjects if they present themselves for a subsequent examination.

4.—Candidates for the Second Year Examination are required to satisfy in five subjects, and candidates for the Final Examination are required to satisfy after more advanced study in four of the five subjects which they offered for the Second Year Examination.

5.—Candidates for the Second Year Examination must offer in the first instance five subjects, but those who satisfy the examiners in four subjects at one time and fail in one subject only may offer that subject by itself at a subsequent examination.

6.—At Durham, students may be allowed to offer in lieu of their Final Examination the subjects prescribed for Part A or Part B of the Diploma in Theology, and for those who do so the Second Year Examination shall consist of three subjects, two of

the three being Latin and Greek as prescribed for the Final Examination. Such students shall be entitled to proceed, on passing both parts of the Diploma Examination, to the Diploma in Theology as well as to the degree of Bachelor of Arts.

7.—The Council of the Durham Colleges may dispense any student from actual residence in Durham and attendance upon lectures for a period of not exceeding three terms. But no student shall be eligible to proceed to the degree of Bachelor of Arts unless he is of the standing of nine terms from matriculation. A student thus dispensed from residence, may be allowed to offer himself as a candidate for the Final Examination in six subjects (not less than four of which shall be taken at one and the same examination) in lieu of the Second Year and Final Examinations.

8.—Students who have passed the Matriculation Examination and subsequently kept nine terms at an associated Theological College[3] and have passed both parts of the Examination for a licence in Theology and have been duly granted the title of Licentiate in Theology by Convocation, may count the terms so kept in Theology in lieu of six of the terms required for the degree of B.A., and the examinations passed for the L.Th. in lieu of the Intermediate and Second Year Examinations. Such candidates will, however, be required to satisfy the examiners in the Final Examination in six subjects, not less than four of which shall be taken at one and the same examination. Such students shall not be dispensed by the Council of the Durham Colleges, under 7, from any of the three necessary terms of residence in Arts.

Save by leave of the Council of the Durham Colleges no Durham candidate may present himself for examination unless he shall have attended a course of lectures in each of the subjects offered.

9.—(*a*) Candidates for Honours in Arts who have passed the Examination for the Durham Higher School Certificate, including Latin either as a principal or a subsidiary subject, and have previously passed the Matriculation Examination or an equivalent, may be excused from the first year of study and from the Intermediate Examination in Arts.

(*b*) No candidate, thus excused the Intermediate Examination, shall be admitted to the degree of Bachelor of Arts unless he shall have pursued a course of study in the University for not less than three academical years.

(*c*) Candidates will not be allowed to read for Honours in a language unless they shall have passed in that language either as a principal or a subsidiary subject in the examination for the Higher School Certificate: provided that in the case of Greek it shall suffice if the candidate shall have passed in that subject in the Durham School Certificate Examination or the Matriculation Examination or a recognised equivalent.

[3] Or six terms in the case of students who entered an associated Theological College before Michaelmas Term, 1921.

(i) The additional exercises required under Title V, *Section* IV., § 2 (*a*) from graduates of this University who have obtained the D.Th.P.T. shall be :—A thesis upon a subject previously approved by the Boards of the Faculties of Arts and Letters. This thesis shall be distinct from that offered for the D.Th.P.T. and shall embody further work on some educational problem of a psychological, methodological, or historical character. The candidate must have at least twelve months practical school experience subsequent to his D.Th.P.T.

(ii) The subject of examination for M.A. under Title V, *Section* IV, § 2 (*c*) or for M.Litt. under *Section* V is, at the option of the candidate, one of the following :—

(i) Vergil, with special reference to the *Eclogues* and *Georgics* (recommended :—Sellar's *Vergil*), or Tacitus, with special reference to the *Histories* (recommended —Spooner's *Histories*, Boissier's *Tacitus*, Henderson's *Civil War and Rebellion*).

(ii) Plato's *Republic*, with special reference to Books i-v (recommended :—Nettleship's *Lectures on the Republic*), or Euripides, with special reference to the *Helena*, the *Orestes* and the *Hercules Furens* (recommended :—Décharme's *Euripides*, Verrall's *Four Plays of Euripides*).

(iii) The History of English Institutions, with special reference to *The Constitutional History of English*, by F. W. Maitland, and *A History of English Legal Institutions*, by R. T. Carter, 4th ed. 1910; or The French Revolution.

(iv) Philosophy. Special Subjects in Logic, Psychology, Ethics, Metaphysics, History of Philosophy, or Political Science may be offered, provided they shall

have been previously approved by the Professors of Philosophy at Durham and Newcastle, and the Professor of Logic and Psychology at Durham, jointly.

(v) French. La Fontaine: His Life and Literary Career, with a special study of his *Fables*. A complete edition, with notes, is published by Hachette.

Useful books for reference are:—Taine, *La Fontaine et les Fables* (Hachette); Nicolardot, *La Fontaine et la Comédie Humaine* (Paris); Faguet, *La Fontaine* (Hachette); Saint Marc Girardin, *La Fontaine et les fabulistes* (Calmann Levy). Useful information on versification is to be found in Grammont *Le vers français* (Champion, Paris).

(vi) German. Uhland: His Life and Literary Career, with a special study of his *Poems* (ed. Hewett, Macmillan) and his *Ernst Herzog von Schwaben* (ed. Wolstenholme, Cambridge Press).

For reference books consult the Bibliography in Hewett's edition. On metre may be consulted: Kauffmann, *Deutsche Metrik* (Elvert, Marburg).

(vii) English. Chaucer, *Troilus and Cressida; Patience* (ed. Gollancz, Oxford Press); *The Pearl* (ed. Osgood, Belles Lettres Series), or Tennyson; Keats, *poems and Letters* (Macmillan: ed. Colvin).

(viii) Economics, with special reference to Bastable's *Public Finance*.

(ix) Education. (*a*) General. The History of Educational Institutions in England in the 17th, 18th, and 19th centuries. (*b*) A more detailed study of Educational development in the 19th century and up to 1920.

(x) The Lives, Times and Teaching of the three great Cappadocian Fathers, with a study of the *Catechetical Oration* of St. Gregory of Nyssa (Cambridge Press).

(xi) The New Testament in Greek, with a study of the main questions of criticism.

The exercises shall be worked in the [11]Examination Rooms at Durham or Armstrong College; the exercise is an essay, with questions bearing upon the subject, and in the case of Latin, Greek, French, and German, a knowledge of the prescribed books in the original is required.

[11] Under certain conditions as to invigilation, &c. (which must be approved by the Board of the Faculty of Arts) the Examination for M.A. or M.Litt. may be held abroad. The Fee for examination abroad is £4. Application should be made at least six months beforehand to the Secretary of Examinations.

The examination is held twice a year, in the Easter and Michaelmas Terms.

Candidates must notify the Secretary of Examinations of the subject they offer at least eight weeks before presenting themselves for examination.

The fee for examination for members of the Durham Division is £2. For members of Armstrong College the fee for examination is £5 for the first occasion, but for subsequent examination the fee is £2. B.A.'s are allowed to offer themselves for examination at any examination held at least one year after their B.A., but cannot proceed to the degree of M.A. until they are of standing so to proceed.

All persons who have proceeded to the degree of M.Litt. are allowed to proceed to the degree of M.A. on passing the M.A. Examination, provided that no candidate shall be allowed to present himself for the degree of M.A. in the same department of study in which he presented himself for the degree of M.Litt. For all such candidates the fee for examination is £5 for the first occasion and £2 for subsequent examination.

FOR THE DEGREE OF DOCTOR OF LETTERS.

See Regulations Title V. Section vii.

SUBJECTS OF EXAMINATION IN CIVIL LAW.[12]

FOR THE DEGREE OF B.C.L.

(1) Roman Law (to be studied in the *Institutes of Justinian*, Moyle's edition recommended).

(2) Jurisprudence (in Holland's *Jurisprudence*, parts i and ii and Maine's *Ancient Law*).

(3) *The Principles of the English Law of Contract* (Anson).[13]

(4) *Principles of the Law of Real Property* (Joshua Williams), *or* Jenks' *Modern Land Law*.

(5) *Principles of the Law of Personal Property* (Williams) and Raleigh's *English Law of Property*.

(6) *Either* International Law[14] (in W. E. Hall's *Treatise on International Law*).

(7) *Or* Constitutional Law[14] (in Anson's *Law and Custom of the Constitution* (the whole work); and Dicey's *Law of the Constitution*).

Candidates will be expected to show an acquaintance with the chief cases mentioned in their English Law Books.

The Degrees of B.C.L. and D.C.L. can only be obtained by students who *have taken the Degree of B.A.*, after residence and study in the University of Durham, and are of the requisite standing, and have passed the further examinations, or performed the exercises required by the University, and have paid the requisite fees.

FOR THE DEGREE OF D.C.L.

The exercise for the degree of D.C.L., until further notice will be—

Either:—

(*a*) A *published* work approved by Senate,

or (*b*) Two dissertations on subjects approved by the Board of the Faculty of Arts.

The exercise must be sent to the Secretary of Examinations, Durham, before the first day of the Easter or Michaelmas Terms, together with the Examination Fee of £10 10s. It will not be accepted unless it be adjudged by the examiners to be a sufficient contribution to learning.

[12] An examination will be held in November, 1923.

[13] *A Selection of Cases on the Law of Contracts*, by C. C. Langdell (Boston: Little, Brown, & Co.), or failing that, the Selection by G. B. Finch (Cambridge University Press) is recommended to those students who cannot obtain access to a Law library.

[14] Candidates for distinction must take both International and Constitutional Law.

SUBJECTS OF EXAMINATION IN THE FACULTY OF MEDICINE.

Dates of Examinations.

The dates on which the different examinations in the Faculty of Medicine commence are given on p. 196.

Fees for Examinations.

The fees for the examinations in the Faculty of Medicine are given on p. 365.

A candidate wishing to enter for any of the following examinations must send his name together with the required fee and certificates to Professor Howden, Registrar, College of Medicine, Newcastle-upon-Tyne, at least twenty-eight days before the date of the examination.

Candidates who have entered for an examination may withdraw their names upon giving the Registrar nine days' notice; and in that case may enter *either* at the next examination or the next but one (but not afterwards) without further payment.

THE DEGREES OF BACHELOR OF MEDICINE AND BACHELOR OF SURGERY.
(M.B. AND B.S.)

There are four professional examinations for the degrees of M.B. and B.S., and these are held at the end of Epiphany and Easter terms.

The examinations must be taken in their proper order and each must be passed before the next can be proceeded with.

FIRST EXAMINATION FOR THE DEGREES OF BACHELOR OF MEDICINE AND BACHELOR OF SURGERY.[1]

Regulations.

I.—Education.

Candidates must produce evidence that they have attended at a recognised school the following courses of instruction, viz.:—

Anatomy	2 terms.
Dissections	2 ,,
Chemistry with practical chemistry ...	3 ,,
Physics with practical physics	3 ,,
Biology	2 ,,

[1] **N.B.—Students who begin their course of study after January 1st, 1923, must pass a pre-registration examination in Physics and Inorganic Chemistry.**

The Universities, the University Colleges, and the Schools of Medicine of Great Britain and Ireland are recognised by the University for the teaching of chemistry, physics, and biology.

Exemptions from the first M.B. and B S. Examination.

1.—Candidates who qualify for the degree of B.Sc. will be allowed to count their studies and examinations in physics, chemistry and biology as studies and examinations for the First Examination for the degrees of M.B. and B.S.

2.—Candidates who have completed in a University of the United Kingdom a course of study and passed an examination in biology, chemistry or physics qualifying for a degree in science, shall be exempted from study and examination in the subject or subjects in which they have passed.

3.—Candidates who have completed in a University of the United Kingdom a course of study and passed an examination in biology, chemistry and physics, qualifying for a degree in medicine, *may* be exempted from study and examination in such subjects.

The board of the Faculty of Medicine shall have authority to determine in any particular case whether the course of study pursued or the examination passed by a candidate may be accepted for the purpose of the above regulation, and may delegate this authority from time to time to a committee approved by Senate, consisting of not less than five members of the board.

II.—Examination.

1.—*The subjects of the first M B. and B.S. Examination* are :—

Elementary anatomy, biology, chemistry, and physics.

The examination consists of two parts, viz. :—

(*a*) Elementary anatomy, biology,

(*b*) Chemistry, physics,

and candidates may present themselves for the whole examination or for either part separately.

2.—*Syllabus of the examination.*

(1) Elementary Anatomy—

The bones, joints and ligaments of the body. The muscles of the extremities.

(2) Chemistry—

(*a*) Principles of Chemistry—

General characteristics of chemical action. Conditions under which chemical changes take place. Difference between elementary and compound substances. Explanation of chemical symbols, formulæ and equations. Calculation of quantities of materials necessary to produce or resulting from given chemical reactions.

Characteristics of acids, bases and salts. Nomenclature. Laws of chemical combination. Combination of gases by volume. The atomic theory. Molecules and molecular weights. Avogadro's hypothesis. The general properties of gases.

The non-metallic elements and the compounds they form. The atmosphere; combustion; ventilation. The general properties of the more common metals and their compounds.

(*b*) Organic chemistry—

Differences between organic and inorganic compounds. Methods of determining the composition, molecular weights and constitution of compounds.

The hydrocarbons and their derivatives, more especially their oxidation products—alcohols, aldehydes, ketones and acids. The polhydric alcohols. Glycerol and the fats. The carbohydrates.

Benzene and its more important derivatives.

The simpler chemical constituents of vegetable and animal organisms.

(*c*) Practical Chemistry—

The preparation and qualitative analysis of simple salts Simple quantitative experiments, *e.g.*, the determination of equivalents; volumetric analysis.

The preparation and reactions of the more important organic compounds.

(3) Physics—

(*a*) Experimental Mechanics—

Laws of motion considered experimentally, and simple applications. General properties of solids, liquids and gases treated in an elementary manner.

(*b*) Heat—

Thermometry. Coefficients of expansion. Calorimetry Change of state. Hygrometry. Conduction, convection and radiation.

(*c*) Magnetism and Electricity—

Simple Phenomena in magnetism. Batteries: their constitution and use. The magnetic, chemical, and heating effects of the electric current. Ohm's law. Simple phenomena of induced currents. Elementary phenomena in electrostatics.

(*d*) Optics—

Propagation, reflection, and refraction of light. Formation of images by mirrors and lenses. The prism.

(*e*) Practical Physics—

Candidates will be expected to be familiar with the use of simple physical instruments, and to perform simple experiments in experimental mechanics, heat, electricity, and optics. (Candidates are required to bring a stop-watch and a pocket-lens for this examination.)

(4) Elementary Biology—

(*a*) The distinctive properties of living and non-living bodies. The general conditions favourable and unfavourable to life.

The structure, growth, and chemical composition of the cell-wall, protoplasm, and nucleus. The properties of protoplasm. The growth, modification, and division of cells. Formation of tissues. Division of labour. The elements of vegetable Physiology treated experimentally.

(*b*) The differences between animals and plants.

(*c*) The structure, morphology, physiology, and life-histories of: *Saccharomyces* (Yeast); *Bacterium; Penicillium, Pythium; Mucor; Clavicеps; Hæmatococcus; Spirogyra; Fucus* (Brown seaweed); Fermentation; Putrefaction.

(*d*) The anatomy, morphology, and physiology of the flowering plant as illustrated by a consideration of the structure and functions of stem, leaf, and root. The various parts of the flower and their functions. Fertilization. Germination of seeds.

(*e*) The general characteristics of invertebrate and vertebrate Animals.

(*f*) The morphology, physiology, and life-histories of the Invertebrata as exemplified by the study of *Amœba, Vorticella, Hydra, Lumbricus* (Earthworm), *Tænia, Nephrops* (Norway lobster).

(*g*) The morphology and physiology of the Vertebrata as exemplified by the study of *Amphioxus, Raia* (Skate), *Rana* (Frog), and *Lepus* (Rabbit).

(*h*) The elementary principles of animal embryology as illustrated by a study of the general developmental history of *Amphioxus* and *Rana*.

(*i*) Practical Biology—

Candidates will be required to show a practical acquaintance with the animals and plants mentioned above: they will be expected to make dissections of the animals and expose the various important organs, and to make preparations to illustrate the structure of the various plants. (Candidates are required to bring a microscope, razor and dissecting instruments for this examination).

SECOND EXAMINATION FOR THE DEGREES OF BACHELOR OF MEDICINE AND BACHELOR OF SURGERY.

I.—Education.

Candidates must produce evidence that they have attended the following courses of instruction, viz.:—

(*a*) Anatomy	... ...	4 terms.
(*b*) Dissections	... ...	4 ,,
(*c*) Physiology	... ...	2 ,,
(*d*) Practical physiology and histology	...	3 ,,

Exemption.—Candidates for the degrees of Bachelor of Medicine and Bachelor of Surgery who have completed in the University the course of study in Physiology required for the degree of Bachelor of Science, and who have qualified for that degree with Physiology as a chief subject of the Final Examination, shall be exempted from study and examination in this subject.

II.—Examination.

1.—*The subjects of the second M.B. and B.S Examination* are:—Anatomy and physiology.

2.—*Syllabus of the examination.*

(1) Anatomy—

In addition to a general knowledge of the subject as tested by the written part of the examination, the candidate will be required to make a dissection on the recent subject. In the *vivâ voce* examination he will also be required to recognise parts on recent or prepared dissections, and to answer questions on bones, joints, etc. He must also have a knowledge of the more important facts regarding the development of the various systems.

(2) Physiology.

In addition to the written paper, the candidate will be subjected to a practical examination comprising—

(*a*) In chemical physiology, identification of commonly occurring proximate principles and demonstration of properties of body secretions.

(*b*) In experimental physiology, the performance of simple experiments and explanation of use of apparatus.

(*c*) In histology, methods of preparation in common use, with recognition of specimens under the microscope.

THIRD EXAMINATION FOR THE DEGREES OF BACHELOR OF MEDICINE AND BACHELOR OF SURGERY.

I.—Education.

Candidates must produce evidence that they have attended the following courses of instruction, viz. :—

Pathology and practical pathology	3 terms.
Bacteriology and practical bacteriology ...	3 ,,
Materia medica and pharmacology	1 term.
Practical pharmacy	1 ,,
Public health	2 terms.
Medical jurisprudence	1 term.

II.—Examination.

1.—*The subjects of the third M.B. and B.S. Examination* are :— Materia medica, pharmacology and pharmacy; public health; medical jurisprudence; pathology and elementary bacteriology.

The examination consists of two parts, viz. :—

(*a*) Pathology and elementary bacteriology.

(*b*) Materia medica, public health and medical jurisprudence;

and candidates may present themselves for the whole examination, or for either part separately.

2.—*Syllabus of the third examination* :—

(1) (*a*) Pathology—

In the written examination the candidate's knowledge of the principles of general and special pathology will be tested. In addition to the *vivâ voce* examination, a practical examination will be conducted in which the candidate will be tested in elementary pathological methods, and in the description of naked eye and microscopical pathological specimens. The candidate will also be expected to be familiar with the mode of conduction of post-mortem examinations.

(*b*) Elementary Bacteriology—

Candidates will be expected to possess a competent knowledge of bacteriology and parasitology, in so far as the latter are applicable to disease in man.

In addition to the written and *vivâ voce* examination, candidates will be examined practically in the elements of bacteriological technique.

(2) Materia Medica, Pharmacology, and Pharmacy—

The action of drugs and their active principles on the various tissues of the body. The physical and chemical characteristics of drugs derived from the inorganic kingdom, and of the active principles of drugs derived from the organic kingdom. The official preparations

of the more important drugs. The essential ingredients in the more important preparations and the proportion of these ingredients. The ordinary doses of the principal drugs and their preparations.

(3) Public Health—

(*a*) *Sanitary Medicine.*—General mortality, and its principal features (statistical and other). Zymotic diseases. Epidemic and endemic diseases. Epizootic and enzootic diseases, and their relation to human diseases. Hygiene in relation to meteorological and topographical conditions, climate, air, water, food, clothing, occupation.

(*b*) *Practical Hygiene.*—The dwelling (site, foundations, structure, etc.). Water supply, ventilation and cubic space, warming and lighting. Conveniences. Drains, sewers. Refuse disposal, destructors. Sewage disposal and treatment. Sewerage works. Hospitals for infectious diseases. Disinfection. Vaccination.

(4) Medical Jurisprudence—

Law affecting the medical profession. Obligations of medical men as witnesses. Forms of evidence. Courts. Dying declarations. Wills. Certificates of death. Malpraxis. Identity. Signs of death. Modes of death. Wounds. Assaults. Murder. Manslaughter. Homicide. Pregnancy. Delivery. Birth. Sex. Fœticide. Infanticide. Concealment of birth. Rape. Impotency. Sterility. Legitmacy. Inheritance. Survivorship. Life assurance. Accident assurance. Compensation for injuries. Medico-legal post-mortem examinations. Examination of stains and fabrics. General principles of toxicology. The mode of action, symptoms and treatment of the more important poisons.

FOURTH (FINAL) EXAMINATION FOR THE DEGREES OF BACHELOR OF MEDICINE AND BACHELOR OF SURGERY.

I.—Education.

A candidate for this examination must not be less than 21 years of age and must produce certificates of good moral conduct, and of attendance on the following courses of instruction, viz. :—

Medicine	4 terms.
Psychological medicine and clinical psychological medicine	1 term.
Surgery	4 terms.
Operative Surgery	1 term.
Applied Anatomy	2 terms.
Midwifery and gynæcology ...	2 ,,
Therapeutics	1 term.
Ophthalmology	1 ,,

Diseases of children	1 term.
Diseases of the throat, nose and ear	1 ,,
Diseases of the skin	1 ,,
[2]Medical and surgical hospital practice	3 winter sessions. 2 summer ,,
Medical and surgical clinical lectures	2 winter ,, 2 summer ,,
In-patient medical clerking ...	6 months.
In-patient surgical dressing ...	6 ,,
Out-patient clerking	3 ,,
Out-patient dressing	3 ,,
Assistant in the ophthalmic department	3 ,,
Assistant in the throat, nose and ear department	3 ,,
Assistant and clerk in the post-mortem room, with attendance at not less than 25 *post-mortem* examinations	3 ,,
Assistant to the anæsthetist ...	14 days.
Assistant in the skin department.	1 month.
Assistant in the gynæcological department	1 ,,
Infectious diseases	3 months.
Vaccination (certified by a licenced teacher).	
Personal conduction of not less than 20 cases of midwifery.	

II.—Examination.

1.—*The subjects of the final M.B. and B.S. Examination* are :—

(1) Medicine and clinical medicine.
(2) Surgery, clinical surgery, surgical operations, surgical anatomy, surgical instruments, splints and bandages.
(3) Midwifery, gynæcology and clinical gynæcology.
(4) Therapeutics.
(5) Psychological medicine; diseases of the throat, nose and ear; diseases of the skin; diseases of children; and ophthalmology.

(*a*) Psychological Medicine.—Part I. : Each candidate is given a patient to examine. After examining the patient, the candidate has to give the diagnosis, prognosis, and treatment. He has also to fill up a certificate of insanity the same as that used in connection with the removal of a person to an asylum. No candidate will be considered to have satisfied the

[2] Three months resident clinical clerkship in any County or Borough Asylum may be substituted for three months attendance on hospital practice.

examiners who does not show practical acquaintance with this matter. Part II.: An oral examination dealing in the first place with the patient examined, and also with the symptoms, pathology, and treatment of the commoner forms of mental disease.

(*b*) DISEASES OF THROAT, NOSE AND EAR.—Anatomy and physiology of the nose. Examination of nasal passages. Diseases of the nose and their treatment. Diseases of the pharyngeal tonsil. Post-nasal adenoids. Commoner diseases of the larynx. Anatomy and physiology of the ear. Examinations of the ear. Commoner diseases of the ear and their treatment. Use of instruments, and methods of clinical examination.

(*c*) DISEASES OF SKIN.—Structure and functions of the normal skin. Care of the skin in health. The more common congenital affections of the skin. Affections caused by parasites—Scabies, Pediculosis, Favus, Ringworm. Microbic skin affections—Boil, Carbuncle, Sycosis, Impetigo, Erysipelas, Tuberculosis, Syphilis, Seborrhœa, Acne, Rosacea. Tumours of the skin—Warts, Molluscum contagiosum, Rodent Ulcer, Carcinoma. Erythema multiforme. Erythema nodosum. Urticaria. Purpura. Lupus Erythematosus. Herpes. Psoriasis. Lichen Planus. Pemphigus. Dermatitis herpetiformis. Eruptions caused by drugs. toxines, etc. Eczema.

(*d*) DISEASES OF CHILDREN.—Growth and development of the healthy child. Infant feeding. Rickets. Infantile scurvy. Congenital syphilis. Digestive disorders. Hypertrophy of the pylorus. Intestinal parasites. Congenital and acquired heart disease. Mental deficiency. Acute polio-myelitis. Pseudo-hypertrophic muscular paralysis. Hydrocephalus. And the following diseases as they effect the child: Rheumatism, Tuberculosis, Acute Tonsilitis, Laryngitis, Bronchitis, Pneumonia, Empyema, Cerebral Paralysis, Meningitis, Anæmia, Leukæmia, Purpura, Nephritis-Pyelitis.

(*e*) OPHTHALMOLOGY.—The common diseases of the eyelids. Lachrymal apparatus. Conjunctiva. Sclera. Cornea. Uveal tract. Optic nerve and retina. Glaucoma. Cataracts. Injuries. Symptoms of refraction errors. The use of the ophthalmoscope, and methods of clinical examination.

THE DEGREE OF DOCTOR OF MEDICINE (M.D.).

REGULATIONS.

(1) The candidate must not be less than 24 years of age, and must have obtained the degrees of Bachelor of Medicine and Bachelor of Surgery of the University, and must have been

engaged for at least two years subsequently to the date of admission to these degrees in research work, or in attendance on the practice of a recognised hospital, or in the Naval or Military Medical Services, or in medical or surgical practice.

(2) The candidate may (*a*) present an original essay, or (*b*) undergo a special examination in the theory and practice of medicine.

(*a*) *Essay.*—(i) The Essay must embody the results of personal observation or original research in one of the following subjects, viz. :—Medicine, Psychological Medicine, Public Health, Medical Jurisprudence, Toxicology, Midwifery, Gynæcology, Anatomy including Embryology), Physiology, Pathology, Bacteriology, Pharmacology and Therapeutics. The subject of the Essay must, in the first instance, be submitted to the Professor of Medicine for approval.

(ii) The Essay must be accompanied by a sworn declaration that the work has been done, and the Essay composed, by the candidate.

(iii) The Essay must be lodged, together with the necessary fee, with the Dean of the Faculty of Medicine on or before the 1st day of April.

(iv) The Essay must be typewritten, on one side of the paper only, and the candidate must use thin, strong, cream-wove, half-sheet foolscap, size 13 ins. by 8 ins., with a margin on the left hand side one inch and a half in width.

(v) The candidate will be required to appear for an oral examination on the subject of his Essay, and may be required, if deemed necessary by the examiners, to undergo a practical or a clinical examination on the same subject.

(vi) If successful in obtaining the degree, the candidate will be permitted to publish his Essay, but the original Essay and all drawings or specimens which may have accompanied it will be retained by the University.

(vii) Ten days' notice will be given to the candidate as to whether his Essay is deemed of sufficient merit.

(*b*) *Special Examination.*—The Special Examination will comprise the subjects of Medicine and Clinical Medicine (including the various instruments used in clinical diagnosis). The candidate must also display special knowledge in *one* of the following subjects :—Neurology, Psychological Medicine, Gynæcology, Diseases of the Circulatory, Alimentary, Respiratory, Genito-Urinary or Cutaneous Systems. At the time of entry for the examination the candidate must state in which of these subjects he wishes to be examined.

The Degree of Doctor of Medicine in Absentia.

Arrangements have been made by which a Bachelor of Medicine and Surgery, resident abroad, and wishing to proceed to the M.D. Degree, may do so, and may have the degree conferred *in absentia* under the conditions specified in paragraph 2 (*a*) (i), (ii), (iii), (iv), (vi), of these Regulations.

If the Essay of such a candidate be approved by the examiners, he must pay the sum of £3 in addition to the ordinary degree fee of £10.

THE DEGREE OF DOCTOR OF MEDICINE, FOR MEDICAL PRACTITIONERS OF FIFTEEN YEARS' STANDING, WITHOUT RESIDENCE.

The University of Durham, with the view of affording to practitioners of medicine an opportunity of obtaining the degree of Doctor of Medicine, has instituted a special examination for that purpose.

Regulations.

1.—The candidate shall be registered by the General Council of Medical Education and Registration of the United Kingdom.

2.—The candidate shall have been in the active practice of his profession for fifteen years as a qualified practitioner.

3.—The candidate shall not be under 40 years of age, and shall be required to produce evidence to this effect.

4.—The candidates shall produce certificates of moral character from three registered members of the medical profession.

Examinations.

A.—If the candidate shall not have passed previously to his professional examination (in virtue of which he has been placed on the medical register) an examination in Arts, he shall be required to pass an examination in Classics and Mathematics.

The subjects of this examination shall be :—

1.—An English essay. (A short essay on some subject to be specified at the time of the examination.)

2.—Arithmetic.

3.—Euclid—Books i and ii.

4.—Latin—Translation from Virgil's Æneid, books i and ii, with grammatical questions.

5.—One of the following subjects :—

i. Greek—Translation from Xenophon's Memorabilia, books i and ii, with grammatical questions.

ii. French—Translations from Voltaire's Charles XII, with grammatical questions.

iii. German—Translation from Goethe's Dichtung und Wahrheit, book i, with grammatical questions.
iv. Elements of Mechanics, Pneumatics, and Hydrostatics.
v. Some treatise on moral, political, or metaphysical philosophy.

If the candidate shall have passed, previously to his professional examination (in virtue of which he has been placed on the medical register), a preliminary examination, he shall be required to translate into English, passages from one of the following Latin texts:—

Cæsar—De Bello Gallico (first three books).
Virgil—First three books of the Æneid.
Celsus—First three books.

The candidate may choose any one of the three above-named authors.

The classical may be taken separately from the medical portion of the examination.

B.—The candidate shall be required to pass an examination in the following subjects:—

i. Principles and practice of Medicine, Clinical Medicine, Psychological Medicine, Hygiene and Therapeutics.
ii. Principles and practice of Surgery and Clinical Surgery.
iii. Midwifery and Diseases of Women and Children.
iv. Pathology—Medical and Surgical.
v. Anatomy—Medical and Surgical.
vi. Medical Jurisprudence and Toxicology.

Candidates are examined (1) by written papers, (2) clinically, and (3) *vivâ voce*.

THE DEGREE OF MASTER OF SURGERY (M.S).

Regulations.

I.—Education.

1.—The candidate must have obtained the degrees of Bachelor of Medicine and Bachelor of Surgery in the University, and must have been engaged for at least two years subsequently to the date of admission to these degrees in the practice of a recognised hospital, or in the naval or military services, or in medical or surgical practice.

2.—He must not be less than 24 years of age.

II.—Examination.

1.—*The subjects of the examination are*:—

Surgery. Surgical pathology.
Surgical anatomy. Surgical operations.
Clinical Surgery.

THE DEGREE OF DOCTOR OF SURGERY (D.Ch.).

Regulations.

I.—Education.

1.—The candidate must be a registered medical practitioner, and not less than 24 years of age.

2.—He must devote three years, not necessarily consecutive subsequently to obtaining a registrable qualification, to the study of surgery and ancillary subjects. One at least of the three years must be spent in the Faculty of Medicine of the University.

3.—The candidate must submit to the Professor of Surgery the course of study he proposes to follow, and this course must be approved by the Board of the Faculty of Medicine.

4.—One year shall be devoted mainly to work in the departments of Anatomy, Physiology, Pathology and Bacteriology, and the candidate must submit evidence of having so worked.

5.—Not less than six months of another year must be spent as resident surgeon in a recognised teaching hospital, and the rest of the year in the study of surgery in a recognised medical centre.

6.—Not less than six months of one of the three years must be spent in surgical study abroad.

II.—Examination.

The Examination shall consist of—

1.—The presentation of an essay on some Surgical subject chosen by the candidate and approved by the Professor of Surgery.

This essay must not be of greater length than 10,000 words, and must be type-written on one side of the paper only, and the candidate must use thin, strong, cream wove, half-sheet foolscap, size 13 inches by 8 inches, with a margin on the left-hand side 1½ inches in width.

The essay must be accompanied by a sworn declaration that the work has been done, and the essay composed, by the candidate, and it must be lodged with the Professor of Surgery at least three months before the date of the Examination.

If the essay is not considered of sufficient merit, the candidate shall not proceed further with the examination.

2.—A clinical, practical, and Oral Examination in the field of general surgery, including Anatomy, Physiology, Pathology and Bacteriology, Operative Surgery, Bandaging, Instruments, etc.

THE DEGREE OF BACHELOR OF HYGIENE (B.Hy.).

Regulations to December 31st, 1923.

I.—Education.

1.—The candidate must be a registered medical practitioner and a graduate in medicine and surgery of a recognised University.

2.—He must not be less than 22 years of age.

3.—A period of at least twelve months shall have elapsed since the candidate obtained his first registrable qualification in medicine, surgery, and midwifery, before he presents himself for examination.

4.—He shall have spent six months of professional study subsequently to the attainment of a first registrable qualification in medicine, surgery, and midwifery, in attendance at the University of Durham Colleges in Newcastle-upon-Tyne, in the following manner:—

(*a*) A course of lectures on Comparative Pathology with practical work in the bacteriological laboratory.

(*b*) A course of practical instruction in the chemical and physical laboratories.

5.—The candidate shall produce satisfactory evidence—

Either

(I) That, after obtaining a registrable qualification he has during six months been diligently engaged in acquiring a practical knowledge of the duties, routine and special, of public health administration, under the personal supervision of—

(*a*) In England and Wales, the Medical Officer of Health of a county or of a single or combined sanitary district having a population of not less than 50,000, or a Medical Officer of Health devoting his whole time to public health work; or—

(*b*) In Scotland, a Medical Officer of Health of a county or counties, or of one or more districts having a population of not less than 30,000; or—

(*c*) In Ireland, a Medical Superintendent Officer of Health of a district or districts having a population of not less than 30,000; or—

(*d*) In the British Dominions outside the United Kingdom, a Medical Officer of Health of a sanitary district having a population of not less than 30,000, who himself holds a registrable diploma in Public Health; or—

(*e*) A Medical Officer of Health who is also a teacher in the department of Public Health of a recognised medical school; or—

(*f*) A Sanitary Staff Officer of the Royal Army Medical Corps having charge of an Army Corps, District, Command, or Division, recognised for this purpose

by the General Medical Council, or in charge of a Base District on Lines of Communication of a British Expeditionary Force, and holding a diploma in Public Health or other public health qualification; or—

(g) An assistant Medical Officer of Health of a county or of a single sanitary district having a population of not less than 50,000, provided the Medical Officer of Health of the county or district in question permits the assistant Officer to give the necessary instruction and issue certificates.

Note.—The certificate for the above purpose must include testimony that the candidate has attended under the supervision of the person certifying on not less than 60 working days.

Provided that if the candidate has

(i) Produced satisfactory evidence that he has attended a course or courses of instruction in sanitary law, vital statistics, epidemiology, school hygiene, and other subjects bearing on Public Health administration, given by a teacher or teachers in the department of Public Health of a recognised medical school; or

(ii) Produced evidence that he has been a resident Medical Officer in a hospital for infectious diseases containing not less than 100 beds, during a period of three months,

The period during which he has been engaged in acquiring practical knowledge of his duties under this *Rule* may be reduced to three months, to include an attendance on at least 30 working days.

The following Districts and Commands have been recognised by the Council, viz. :—Aldershot; Salisbury Plain; Southern and South-Eastern; Western; Dublin and Belfast; Cork; Chatham and Woolwich; Home; Eastern; North-Eastern and North-Western; Scottish; Gibralter; Malta. The following Indian divisions, viz. :—1st (Peshawar); 2nd (Rawalpindi); 3rd (Lahore); 4th (Quetta); 5th (Mhow); 6th (Poona); 7th (Meerut); 8th (Lucknow); 9th (Secunderabad); Burmah.

Or

(2) That he has himself held for a period of not less than three years an appointment as Medical Officer of Health of a sanitary district within the British Dominions, and having a population of not less than 15,000.

6.—The candidate shall produce evidence that, after obtaining a registrable qualification, he has during three months attended at least twice weekly the practice of a Hospital for Infectious Diseases, at which he has received instruction in the methods of administration.

Note (1) Methods of administration shall include the methods of dealing with patients at their admission and discharge, as well as in the wards; and the medical superintendance of the hospital generally.

Note (2) In the case of a Medical Officer of the Royal Army Medical Corps a certificate from a Principal Medical Officer under whom he has served, stating that he has during a period of at least three months been diligently engaged in acquiring a practical knowledge of hospital administration in relation to infectious diseases, may be accepted as evidence under *Rule 6.*

7.—He must produce evidence that he has attended a course of lectures on Public Health.

II.—Examination.

The examination consists of two parts which may be passed together or separately, but every candidate must pass in Part I before being admitted to Part II.

The candidate will be examined in both parts by means of written papers, practical work, and *vivâ voce.*

Part I.

1.—Sanitary Chemistry.

The examination of air for sanitary purposes; detection of noxious gases and atmospheric impurities.

Water for sanitary purposes; detection of metals in water; the action of water on metals.

Milk and food.

Practical examination in Chemistry as applied to Public Health.

2.—Physics.

The principles of physics in their application to warming, ventilation, water-supply, and drainage.

The elements of meteorology and the use of meteorological instruments.

3.—Bacteriology and Comparative Pathology, etc.

Written and vivâ voce examinations. The principles of Bacteriology and Immunity and their application to the prevention, diagnosis and treatment of disease. The causation and pathology of diseases due to bacteria, vegetable parasites, protozoa and animal parasites. The methods of bacteriology, with especial reference to the detection of the causal agent of disease and the examination of water, milk and other foods, etc.

Practical Examination.—Candidates will be expected to show a practical acquaintance with the usual methods of bacteriological investigation.

Part II.

1.—Sanitary Legislation.

A general knowledge of the Statutes, Local Government Board Orders, Bye-laws and Regulations relating to Public Health and Housing.

2.—Vital Statistics.

Rates of birth, death, and marriage; methods of calculation, classification and tabulation of returns of sickness and mortality; data required and conclusions deducible therefrom.

3.—Nosology.

Definition, nomenclature, and classification of diseases.

4.—Climatology, Meteorology, Geographical Distribution of Disease.

5.—Sanitary Medicine.

The origin, propagation, pathology, and prevention of communicable diseases; and of diseases caused by or associated with food and drink, environment and occupation. Preventive measures against the propagation and spread of disease.

6.—Practical Hygiene.

Sanitary appliances; the site, materials, construction, capacity, lighting, ventilation, warming, dryness, water supply, drainage, sewerage, and refuse disposal, of houses, schools, hospitals, factories, workshops and other buildings intended for occupation or use by man or cattle. The examination of butchers' meat and other food. Noxious and offensive trades, nuisances. The duties of a Medical Officer of Health and Inspector of Nuisances.

7.—The candidate will also be required—

(*a*) To pass a clinical examination on medical cases at the City Hospital for Infectious Diseases, or elsewhere.
(*b*) To draw up outlines for annual or other reports of a Medical Officer of Health.
(*c*) To report upon the condition of some actual locality.
(*d*) To describe the construction and use of hygienic apparatus, and sanitary appliances.
(*e*) To examine submitted specimens with the microscope.
(*f*) To describe submitted specimens of diseased organs and tissues (human and other).
(*g*) To inspect and describe specimens of meat or other articles of food.

THE DEGREE OF DOCTOR OF HYGIENE (D.Hy.).

Regulations.

1.—The candidate shall be a Bachelor of Hygiene of at least two years' standing. He will be required to satisfy the examiners that he has conducted original research in the subjects of Public Health, and that the thesis and other contributions submitted are the result of his own observation and experiment.

2.—The degree of Doctor of Hygiene shall be conferred after an investigation of the claims of the candidate by two examiners, one of whom shall be specially conversant with the branch of the subject selected by the candidate and appointed for this purpose, who shall report to the Board of the Faculty of Medicine in Easter Term on the qualifications of the candidate, basing their report upon the candidate's distinction in special research or learning.

3.—The examiners shall examine the candidate in such manner as they may deem advisable. The examination shall not necessarily be confined to the subject or subjects advanced by the candidate.

4.—The candidate will be required to make his application in writing to the Registrar of the College of Medicine *on or before January 1st* in any year, and to state the special subject upon a knowledge of which he bases his qualifications, forwarding at the same time a thesis and such other evidence of his contributions to the advancement of Hygiene as may support his application.

5.—The names of candidates who satisfy the examiners will be published in the examination lists of the Faculty of Medicine in June in each year.

THE DIPLOMA IN PUBLIC HEALTH (D.P.H.).

Regulations to December 31st, 1923.

I.—Education.

1.—The candidate shall be a registered medical practitioner.

2.—The curriculum shall extend over a period of not less than nine calendar months.

3.—The candidate shall produce satisfactory evidence that, after obtaining a registrable qualification he has received practical instruction in a laboratory or laboratories approved by the University, in which chemistry, bacteriology, and the pathology of the diseases of animals transmissible to man are taught.

The laboratory instruction shall cover a period of not less than four calendar months, and the candidate shall produce evidence that he has worked in the laboratory for at least 240 hours, of which not more than one-half shall be devoted to practical Chemistry. The laboratory course should be so arranged as to lay special stress on work which bears most directly on the duties of a Medical Officer of Health.

Alternative arrangements for British Armies in the Field.—The laboratory experience at a Base Hygiene Laboratory, when and so far as approved by the General Medical Council, shall count towards the four months' laboratory course prescribed by the Council; and laboratory experience acquired by medical officers on the staff of hospitals for infectious diseases shall count for such part of the laboratory course for the diploma

in Public Health as the Assistant Director for Medical Services (Sanitation) may recommend, and the General Medical Council on consideration may approve.

4.—The candidate shall produce satisfactory evidence of having complied with Regulations 5 and 6 on pp. 189.

II.—Examination.

The examination is the same as that for the degree of Bachelor of Hygiene (pp. 189).

THE DEGREE OF BACHELOR OF HYGIENE AND THE DIPLOMA IN PUBLIC HEALTH.

Regulations to come into force on January 1st, 1924.

1.—A period of not less than two years shall elapse between the attainment by a candidate of a registrable qualification in Medicine, Surgery, and Midwifery and his admission to the Final Examination for a diploma or degree in Sanitary Science, Public Health, or State Medicine.

2.—The curriculum for a degree or diploma in Sanitary Science, Public Health, or State Medicine shall extend over a period of not less than twelve calendar months subsequent to the attainment of a registrable qualification.

3.—Every candidate shall produce evidence of having attended, during a period of not less than five months, at an institution approved by the Licensing Body granting the diploma or degree, practical instruction in—

(*a*) Bacteriology and parasitology (including medical entomology), especially in their relation to diseases of man, and to those diseases of the lower animals which are transmissible to man;

(*b*) Chemistry and Physics in relation to Public Health;

(*c*) Meteorology and Climatology in relation to Public Health.

At least 180 hours must be devoted to course (*a*), of which not less than 150 hours shall be occupied in practical laboratory work.

At least 90 hours must be devoted to course (*b*), of which not less than 70 hours shall be occupied in practical laboratory work.

At least 10 hours must be devoted to course (*c*).

4.—Every candidate shall produce evidence of having received, during not less than 80 hours, at an institution or from teachers approved by the Licensing Body granting the diploma or degree, instruction in the following subjects:—

(*a*) The Principles of Public Health and Sanitation (30);

(*b*) Epidemiology and Vital Statistics (20);

(*c*) Sanitary Law and Administration (including Public Medical Services) (20);

(*d*) Sanitary Construction and Planning (10).

[The numbers indicate the normal proportion of time to be given to each subject.]

5.—Every candidate shall produce evidence that he has attended for three months on the clinical practice of a recognised Hospital for Infectious Diseases, and has received therein instruction in the methods of administration. At least 30 daily attendances of not less than two hours in each week shall be required.

6.—Every candidate shall produce evidence that he has, during a period of not less than six months, been engaged in acquiring a practical knowledge of the duties, routine and special, of Public Health Administration under the supervision of a Medical Officer of Health, who shall certify that the candidate has received, from this Officer or other competent Medical Officer, during not less than three hours on each of sixty working days, practical instruction in these duties, and also those relating to—

(*a*) Maternity and child welfare service;
(*b*) Health service for children of school age;
(*c*) Venereal diseases service;
(*d*) Tuberculosis service;
(*e*) Industrial hygiene;
(*f*) Inspection and control of food, including meat and milk.

Certificates of having received the prescribed instruction in Public Health Administration must be given by a Medical Officer of Health who devotes his whole time to Public Health work; or by the Medical Officer of Health of a Sanitary Area having a population of not less than 50,000, or in Ireland the Medical Superintendent Officer of Health of a County or County Borough having a population of not less than 50,000

7.—The examination for the diploma or degree shall be divided into two parts, Part I and Part II, each of which shall extend over not less than two days, and shall be conducted by Examiners specially qualified.

A candidate must pass in all the subjects of Part I before being admitted to examination for Part II.

In Part I, and also in Part II, a candidate must pass in all the specified subjects at one time.

8.—The examination for Part I shall be practical, written, and oral, and shall include the following subjects:—

Bacteriology and Parasitology (including medical entomology; Chemistry and Physics, and Meteorology and Climatology, in relation to Public Health.

Candidates may not be admitted to examination for Part I until after they have completed the prescribed courses of instruction in the subjects thereof.

9.—The examination for Part II shall include the following subjects:—

Hygiene and sanitation (including sanitary construction);
Epidemiology and infectious diseases;
Sanitary law and Vital statistics;
Public health administration.

The examination shall be written and oral, and shall include practical examinations in Infectious Diseases; Food Inspection; Inspection of premises—dwellings, factories, workshops, schools, etc.

Candidates may not be admitted to examination for Part II until after they have completed the prescribed courses of instruction in the subjects thereof.

No candidate shall be admitted to Part II of the examination until after the lapse of not less than two years from the date of his obtaining a registrable qualification in Medicine, Surgery, and Midwifery, which qualification must be registered before admission to Part II of the examination.

THE DIPLOMA IN PSYCHIATRY.

Regulations.

I.—Education.

1.—The candidate must be a registered medical practitioner.

2.—He must have attended, subsequently to passing his qualifying examination, the following courses of instruction:—

(*a*) Anatomy.

Ten meetings of two hours each.

Development and anatomy (advanced) of the nervous system, with practical dissection of the brain and spinal medulla.

(*b*) Physiology, histology and chemistry of the nervous system.

Thirty meetings of two hours each.

The work will include:—

Histology.—Methods of preparing and staining nervous tissues. The development and structure of nerve cells and fibres. Degenerative and regenerative changes in the neuron. The various forms of nerve endings. The arrangement of the cells and the course of the conducting tracts in the spinal medulla, medulla oblongata and pons. The structure of the cerebellum and cerebral cortex.

Chemistry.—The chemical composition of white and grey matter, and of the cerebro-spinal fluid.

Experimental Study.—The excitability and conductivity of nerve, and the response of the nerve to various forms of stimulus. The functions of the spinal medulla, medulla and cerebellum. Muscular sense, cutaneous sensations, reflex action and fatigue. The functions of the cerebrum.

(*c*) Pathology.

Twenty meetings of two hours each.

Post-mortem technique; the removal of nervous tissues from the body for microscopical examination. Special

methods of fixation and staining. Preparation of microscopical specimens by rapid freezing, celloidin and paraffin methods. Examination of illustrative preparations of disease in the peripheral nerves, spinal medulla and brain, including vascular disturbances, inflammatory conditions, the infective granulomata, tumours, general paralysis of the insane and other types of insanity. Demonstrations of naked eye appearances of recent specimens of disease in the central nervous system. Cytological examination of the blood and cerebro-spinal fluid.

(*d*) Bacteriology.

The same course of instruction as for the degree of Bachelor of Hygiene.

(*e*) Psychology and Experimental Psychology.

Twenty-five to thirty hours instruction.

The work will include:—A general description of normal states of consciousness. The relation between physical and mental processes. Conscious and sub-conscious states of mind, and the development of mental processes. The normal personality. Introspection and psychological analysis. Will, emotion, attention, habit, instinct, perception, and ideation.

Methods of experimental psychology, their application and limitations.

(*f*) Clinical Neurology.

Ten demonstrations of the rarer forms of nervous diseases, the special methods of their examination and treatment, including operative.

(*g*) Psychiatry.

A course of ten hours, supplemental to the course of mental diseases now required for the degrees of M.B., B.S.

(*h*) Clinical Psychiatry.

A course of six months duration in an asylum in which instruction is given on at least three days in each week; or a course of three months duration along with a resident appointment for three months. The holding of a resident appointment for six months in an asylum, with attendance on clinical instruction, will be regarded as equivalent to either of the above requirements.

3.—Candidates who have qualified as medical practitioners before January 1st, 1911, are eligible for examination without attendance on the courses of instruction above mentioned.

II.—Examination.

The examination consists of two parts, viz.:—

(*a*) Anatomy, physiology, pathology, and bacteriology;

(*b*) Psychology and experimental psychology, neurology and psychiatry (systematic and clinical);

and candidates may present themselves for the whole examination or for either part separately.

THE LICENCE IN DENTAL SURGERY (L.D.S.).

Regulations for Students beginning study before January 1st, 1923.

I.—Education.

1.—A candidate for the licence in dental surgery must be registered as a dental student by the General Medical Council for registration.

2.—Before presenting himself for examination he shall be required to furnish certificates of instruction in the following subjects, attended after registration as a dental student at a recognised University College, Medical or Dental School:—

First Examination.

Chemistry. Lectures and practical work. 3 terms.
Physics. Lectures and practical work. 3 terms.

Second Examination.

Dental mechanics. Not less than 20 lectures.
Dental metallurgy. Not less than 12 lectures, and not less than 30 hours of practical work.

No candidate shall be allowed to sit for the Second Examination unless he furnishes evidence of having completed two, at least, of the requisite three years pupilage in mechanical dentistry.

Third Examination.

Anatomy. 2 terms.
Dissections. 4 terms.
Physiology. 2 terms.
Histology. 1 term.
Dental anatomy and physiology. Not less than 20 lectures.
Dental histology. Not less than 12 lectures.
Dental materia medica. Not less than 12 lectures.

Final Examination.

Dental bacteriology. 2 terms.
General hospital practice. Nine months.
Medicine lectures. 2 terms.
Surgery lectures. 2 terms.
Dental surgery and pathology. Not less than 20 lectures.
Dental bacteriology. 2 terms.
Operative dental surgery. Not less than 12 lectures.
Anæsthetics. Not less than one month.

Before admission to the Final Examination, the candidate must furnish evidence (1) of having undergone three years pupilage in mechanical dentistry with a registered dentist, and (2) of having been engaged in professional study for at least four years subsequently to registration as a dental student.

Before admission to the final examination the candidate must also sign the following declaration :—

I, the undersigned, do solemnly and sincerely declare that I will exercise the several parts of my profession to the best of my knowledge and ability for the good, safety, and welfare of all persons committing themselves or committed to my care; and I hereby promise as a licentiate in dental surgery that I will abstain from advertising for professional purposes, or employing any other unprofessional modes of attracting patients; and that I will not allow my name to be connected with anyone who does so; and I further promise to conform to the discipline of the University and to all statutes, regulations, and rules in force for the time being, relating to licentiates in dental surgery.

II.—Examination.

1.—There are four examinations, of which the subjects are as follows :—

First Examination.

(*a*) Chemistry.
(*b*) Physics.

Second Examination.

(*a*) Dental mechanics (theoretical and practical)
(*b*) Dental metallurgy.

Third Examination.

(*a*) Anatomy.
(*b*) Physiology and histology.
(*c*) Dental anatomy and dental histology.
(*d*) Dental materia medica.

This examination may be passed in two portions, viz. :—

(*a*) Anatomy, physiology, and histology.
(*b*) Dental anatomy, dental histology, and dental materia medica.

Final Examination.

(*a*) Surgery.
(*b*) Dental surgery, including prosthetics and orthodontia.
(*c*) Operative dental surgery (practical examination).
(*d*) Dental pathology and bacteriology.

THE LICENCE IN DENTAL SURGERY (L.D.S.).

Regulations for Students beginning study after January 1st, 1923.

A.—Preliminary Examination and Registration.

1.—Every Dental student shall, at the commencement of his studentship, be registered in the manner and under the conditions prescribed for Medical students.

2.—Before registration in the *Dental Students Register* every applicant shall be required to have passed, in addition to the examination in General Education, which shall be the same as that required for Medical students, an examination in Elementary Physics and Elementary Chemistry (conducted or recognised by the University), which shall also be the same as that required for Medical students.

3.—Before registration as a Dental student every applicant shall produce evidence that he has attained the age of seventeen years.

B.—Professional Study.

4.—Every candidate for the licence in Dental Surgery shall be required before admission to the final or qualifying examination to produce certificates showing—

(i) That he is at least twenty-one years of age.

(ii) That he has been registered as a Dental student.

(iii) That he has, subsequently to the date of registration as a Dental student, been engaged in Professional Study for at least four years.

(iv) That, subsequently to the date of registration as a Dental student, he has attended at a recognised Medical School courses of instruction, which shall be the same as those required for Medical students, in the following subjects:—

(*a*) Organic Chemistry.
(*b*) Elementary Biology.*
(*c*) Human Anatomy with dissections and demonstrations for three academic terms.
(*d*) Physiology, including Biochemistry and Biophysics (with laboratory instruction, including practical Histology) for three academic terms.
(*e*) General Pathology (including Bacteriology) for two academic terms.
(*f*) Medicine for two academic terms.
(*g*) Surgery for two academic terms.
(*h*) The practice of a recognised General Hospital or Hospitals of not less than eighty beds, with certified instruction in Clinical Medicine and Clinical Surgery, for four academic terms.

The certificates of teaching at General Hospitals must furnish evidence of the student having acted as Medical Clinical Clerk and Surgical Dresser, and of attendance in the Out-patient or Casualty Departments.

A certificate of clinical instruction in Venereal Disease is required.

* A student who has diligently attended an approved course of Elementary Biology in a Secondary School or other Teaching Institution recognised by the University may be admitted to a Professional Examination in Elementary Biology immediately after his registration as a Dental student.

(v) That he has attended at a recognised Dental School courses of instruction in the following special subjects :—

(*a*) Dental Anatomy and Physiology, human and comparative. The course should comprise a minimum of twenty meetings of the class.

(*b*) Practical Dental Histology and Morbid Histology. The course should comprise a minimum of sixteen meetings of the class.

(*c*) Dental Pathology and Surgery. The course should comprise a minimum of twenty meetings of the class.

(*d*) Dental Materia Medica and Therapeutics. The course should comprise a minimum of sixteen meetings of the class.

(*e*) Dental Metallurgy (with practical work and demonstrations). The course should comprise a minimum of twenty meetings of the class.

(*f*) Dental Mechanics (with practical work and demonstrations). The course should comprise a minimum of twenty meetings and twenty demonstrations.

(*g*) A course of instruction in the use of Anæsthetics, general and local, employed in Dental Practice.

(*h*) A course of instruction in Radiology as applied to Dentistry.

NOTE.—A candidate must produce a certificate of having administered general anæsthetics on at least ten occasions.

(vi) That he has for at least twenty-four calendar months attended, during the ordinary academic terms, the practice of a recognised Dental Hospital or of the recognised Dental Department of a General Hospital.

(vii) That he has received for not less than twenty-four calendar months practical instruction in Dental Mechanics.

NOTE.—No portion of such practical instruction which is taken prior to the date of registration shall be reckoned as a portion of the four years of Professional Study required.

Instruction in Dental Mechanics should, if possible, be taken at a recognised Dental Hospital and School. If any part of such instruction be taken by the candidate as a pupil with a registered dentist the time required to be devoted to it shall be at least twice the time required for the corresponding instruction taken at a Dental Hospital and School.

EXAMINATIONS.

First Examination.

This examination consists of two parts which may be passed separately.

Part 1 { Biology.
Organic Chemistry.

Part 2 { Theoretical Dental Mechanics.
Dental Metallurgy (theoretical and practical).

Second Examination.
Anatomy.
Physiology (including biochemistry and biophysics).
Dental Anatomy and Dental Histology.

Third Examination.
Pathology and Bacteriology.
Practical Dental Mechanics.
Dental Materia Medica and Therapeutics.

Final Examination.
Medicine.
Surgery.
Dental Surgery and Pathology.
Orthodontia.
Operative Dental Surgery and Dental Prosthetics.

DATES OF EXAMINATIONS IN THE FACULTY OF MEDICINE IN 1923.

Pre-registration examination in Chemistry and Physics. First examination for the degrees of M.B., B.S.	March 9	June 8
Second examination for the degrees of M.B., B.S.	March 8	June 7
Third examination for the degrees of M.B., B.S.	March 12	June 11
Final examination for the degrees of M.B., B.S.	March 14	June 13
Examination for the degree of M.D. (*Essay and Special Examination*)	—	June 20
Examination for the degree of M.D. (*Practitioners*)	March 14	June 13
Examination for the degree of M.S. ...	March 14	June 13
Examination for the degree of B.Hy. and for the diploma in public health ...	March 2	June 6
Examination for the diploma in psychiatry	—	June 7
First and Second L.D.S. examinations	March 9	June 8
Third L.D.S. examination	March 8	June 7
Final L.D.S. examination	March 14	June 13

SUBJECTS OF EXAMINATION IN THE FACULTY OF SCIENCE.

A. FOR THE PASS DEGREE OF B.Sc. IN PURE SCIENCE.[1]

The following particulars give some idea of the scope of the various subjects:—

Intermediate Part.

(*a*) *Mathematics.*

Geometry of the Triangle and Circle. Algebra, including Binomial Theorem. Logarithms. Graphs. Elements of the Calculus. Trigonometry, including the Solution of Triangles. The Elementary Laws and Principles of Mechanics.

(*b*) *Physics.*

Experimental Physics, including Hydrostatics and Pneumatics. The Elementary Phenomena of Heat, Sound, Light, Electricity and Magnetism, treated experimentally. Practical Examination.

(*c*) *Chemistry.*

General Principles of Chemistry. Elements of Organic Chemistry. Practical Examination.

(*d*) *Geology.*

General Principles of Physical and Historical Geology. Field Work. Practical Examination.

(*e*) *Zoology.*

Elementary Morphology, Life-Histories and Classification of Animals. Practical Examination of the following types:—Amœba, Paramecium, Vorticella, Hydra, Taenia, Lumbricus, Blatta, Nephrops, Anodonta, Amphioxus, Raia, Rana, Lepus.

(*f*) *Botany.*

The Elements of Morphology and Histology as exemplified by the various types of the vegetable kingdom. The fundamental principles of the Nutrition and Reproduction of Plants treated experimentally. Outline of Classification. Practical Examination.

Final Part.

(*a*) Mathematics.

Analytical Geometry of the Line and Circle. Differential and Integral Calculus. Conic Sections. Differential Equations. Geometry of three dimensions. Statics. Dynamics.

[1] For regulations see pp. 64-68 above.

(*b*) *Physics.*

The subjects of the Final Examination will include the experimental treatment of:—

General Physics, including the Properties of Matter. Heat, including the Laws of Thermodynamics. Sound. Light. Magnetism and Electricity.

Practical Physics:—

Candidates will be required to hand over their laboratory notebooks duly examined, and to submit to such further practical tests as the examiners may require.

(*c*) *Chemistry.*

The subjects of the Final Examination will be:—

Inorganic Chemistry. Organic Chemistry. The Outlines of Chemical Philosophy, and General Chemistry, including —The Metals and their more important compounds; Advanced Study of Non-metals; Qualitative Analysis; Quantitative Analysis.

Practical Chemistry:—

Students will be required to hand in their laboratory journals duly initialled by the Professor, and to submit to such further tests of their knowledge of Qualitative and Quantitative Analysis as the examiners may require.

(*d*) *Geology.*

Physical Geology. Stratigraphical Geology. Palæontology. Petrology. Practical work in all branches, including Field Work.

(*e*) *Zoology.*

The Morphology, Physiology, Development, Distribution and Classification of Protozoa and Invertebrate Metazoa. Morphology, Physiology, Embryology, Distribution and Classification of Vertebrata. Theories of Evolution and the Philosophical problems of Zoology. Practical examination—(Dissections outside the ordinary routine of laboratory work may be required).

(*f*) *Botany.*

The general Morphology and Anatomy of Plants. The Structure and Life-histories of the more important types of Algae; Fungi; Mosses and Liverworts; Ferns and Fern Allies; Gymnosperms and Angiosperms; the important British Natural Orders. The Physiology of Plants. Vegetable Pathology. The Elements of Palæobotany. The Structure and Mode of Action of Bacteria. The Classification of the Vegetable Kingdom including the Phyllogeny of the various Groups. Considerations of Plant Ecology with special reference to the influences determining the Character and Distribution of the British Flora. Outlines of the History of Botany. Practical examination.

(*g*) *Physiology.*

The elements of general Physiology, including the elements of Plant Physiology. Blood and lymph; the circulatory

system. Respiration. The digestive system; metabolism. The endocrine organs. The urinary system. Voice and speech. The nervous system and special senses. The reproductive system. A practical course of chemical and experimental Physiology. A course of Practical Histology. Practical examination.

(*h*) *Education.*

Part I.

The Logical and Psychological bases of Education. The main principles of teaching founded upon the above and upon School Experience. School Hygiene and Physical Exercises. Discipline and Class Management. The Organisation and Administration of English Schools, the various types of Schools and Colleges and their interrelation.

Part II.

(i) An Essay based on the study of some special subject or question, *either* (*a*) from books *or* (*b*) from visits paid to schools. The subject to be chosen by each student and to be approved at the beginning of the academical year.

(ii) 1923. Educational movements of the Renaissance with a special study of Vittorino, Erasmus, Montaigne, Ascham, and Commenius.

The Practice of Teaching. Candidates will be required to produce certificates of attendance and competency from the teachers concerned.

B. FOR THE DEGREE OF B.Sc. IN PURE SCIENCE WITH HONOURS.[2]

The following particulars give some idea of the scope of the various subjects :—

(*a*) *Mathematics.*

(1) Pure :—

Higher Algebra including continued fractions. Theory of Equations, Theory of Forms, Spherical Trigonometry. Infinitesimal Calculus, ordinary differential equations, partial differential equations of the first order. Co-ordinate Geometry of Conics, Geometry of Three Dimensions. Elements of the Theory of Functions.

(2) Applied :—

Statics, Dynamics, Hydrostatics, Analytical Statics, Rigid Dynamics, Elements of the Theory of Vibrations. Advanced Rigid Dynamics, and one of the following divisions :—(*a*) Hydrodynamics, Sound, Elasticity. (*b*) Attractions, Electricity, Optics.

The examination in Mathematics (Pure and Applied) to consist of eight papers.

[2] For regulations see pp. 68-69 above.

(*b*) *Physics.*

The general study of the subject with special attention given to one particular section of Physics.

The examination to consist of four written papers, one of these written papers being on some special section of Advanced Physics. Practical examination of 12 hours.

(*c*) *Chemistry.*

Inorganic, Organic, Analytical, and Physical Chemistry, and the History of Chemistry.

The examination to consist of four written papers, one of which will deal with a special department of Chemistry selected by the candidate with the approval of the Head of the Department. Practical examination of 18 hours.

(*d*) *Geology.*

Geology, Palæontology, Petrology, with special attention to one particular section of the subject.

The examination to consist of three papers and one special paper. Practical examination of 9 hours.

(*e*) *Zoology.*

Zoology, Palæzoology, Morphology, Physiology, and the History of Zoology, with a knowledge of a special section.

The examination to consist of three papers. Practical examination of 12 hours.

(*f*) *Botany.*

Classification and Anatomy, Physiology, Pathology, Bio-Chemistry and Bio-Physics of Plants, Bacteria, Ecology, Palæobotany, Cytology, History of Botany, with a knowledge of a special section.

The examination to consist of four papers. Practical examination of 12 hours.

(*g*) *Physiology.*

General, experimental and chemical Physiology, with special attention to one particular section. Histology. The History of Physiology.

The examination to consist of three papers and an essay. Practical examination of 10 hours.

C. FOR THE PASS DEGREE OF B.Sc. IN APPLIED SCIENCE.[3]

Intermediate Part.

(*a*) *Agriculture.*—Candidates for Agriculture must offer Chemistry, Botany and Zoology and *either* Mathematics or Physics.

For particulars of all these subjects see p. 197 above.

[3] For regulations see pp. 64-68 above.

(*b*) *Engineering, Naval Architecture, Mining, and Metallurgy.*—Candidates in Engineering, Naval Architecture, Mining, and Metallurgy, are required to present the four subjects, Mathematics (Pure and Applied), Physics, Chemistry, and Applied Mechanics and Mechanical Drawing.

For particulars of Mathematics, Physics and Chemistry see p. 197 above.

The following particulars give some idea of the scope of

Applied Mechanics and Mechanical Drawing.

Strength of Materals.—Tension, compression and shear, B.M. and S.F. diagrams for simple cases. Properties of materials used in construction. Factors of safety. Fatigue.

Heat and Heat Engines.—Properties of steam. Steam engines. Slide valves, expansive use of steam. Steam jacket. Theoretical indicator diagram. Horsepower. Brakes. Boilers. Internal combustion engines, simple cycles. Carburettors and vapourisers.

Hydraulics.—Stream line and eddying motion. Nozzles and orifices. Flow without friction. Hydraulic machines.

Practical Geometry.—Curves, conic sections, involutes, loci of points, cams. Simple mechanism. Projection, interpenetration and developments of solids. Isometric projection.

Machine Drawing.—Sketches of parts from models or memory, with full descriptions.

Machines. Simple machines. Efficiencies. Transmission of power. Gearing.

Second Part.

Agriculture.

Group I.

(*a*) Agriculture. Part I.
(*b*) Organic and Agricultural Chemistry.

Group II.

(*a*) Agricultural Botany.
(*b*) Anatomy and Physiology of the Farm Animals, and Entomology.
(*c*) Land Surveying.
(*d*) Agricultural Geology or Military Science, Part I.

The following particulars give some idea of the scope of certain of the above subjects:—

Agriculture. Part I.

Soils.—Variations; influence of climate; improvement by draining, irrigation, liming, bare fallowing, and other means.

Tillage Operations.—Implements and machines. Cultivation by hand, horse, steam and motor.

Manures.—Farm-yard manure; lime, chalk, and marl;

seaweed; green manuring; artificial manures; manurial residues. Sewage.
Crops.—Selection of seed; rotation; the common farm crops; variations. Weeds.
Hay and Pasture.

Organic and Agricultural Chemistry.
Plants; their constituents and products.
Soil.—Functions. Formation. Physical and Chemical Properties. Classification.
Air and Water.—Relation to Plant and Soil.
Manures.

Agricultural Geology.
Outcrops. Geological Maps. Denudation. The Superficial Deposits. Mineral Constituents of Soils. Hydrography. Distribution of Flora and Fauna. Mineral Deposits used in Agriculture. Practical Work.

Military Science.
See p. 219 below.

Mechanical Engineering.

Group I.
(*a*) Engineering.
(*b*) Mechanical Drawing.
(*c*) Engineering Laboratory.
Group II.
(*a*) Physics.
(*b*) Electrical Engineering.
(*c*) Mathematics.

Marine Engineering.

Group I.
(*a*) Engineering.
(*b*) Mechanical Drawing.
(*c*) Engineering Laboratory.
Group II.
(*a*) Physics.
(*b*) Naval Architecture.
(*c*) Mathematics.

Electrical Engineering.

Group I.
(*a*) Electrical Engineering.
(*b*) Electrical Engineering Laboratory.
Group II.
(*a*) Engineering—Engineering Laboratory.
(*b*) Mechanical Drawing.
(*c*) Physics.
(*d*) Mathematics.

Civil or Military Engineering.

Group I.

(*a*) Civil Engineering.
(*b*) Engineering.
(*c*) Engineering Drawing.

Group II.

(*a*) Engineering Laboratory.
(*b*) *Either* Applied Geology (for students in Civil Engineering).
or Military Science, Part I (for students in Military Engineering).
(*c*) Surveying.
(*d*) Mathematics.

The following particulars give some idea of the scope of certain of the above subjects:—

Engineering.

Statics. Kinematics and Dynamics of Machines. Hydraulics. Strength and Elasticity of Materials. Heat and Engines.

Physics.

Mechanics—The laws of motion and their applications. The law of the conservation of energy as a fundamental principle of Physics.

Heat—Thermometers. Expansion. Change of State. The Critical Point. Theory of Exchanges. Relations of Heat and Work.

Sound—Sound Waves. Velocity of Sound. Reflection and Refraction of Sound. Interference of Sound. Resonance. Vibrations of strings, rods, and columns of air. Harmonics.

Light—Mirrors and Lenses. Microscopes. Telescopes. Velocity of Light. Photometry. The Rainbow. Spectroscope and Spectrum analysis. Simple phenomena of plane polarisation.

Electricity and Magnetism—Electrical Units. Measurement of magnetic elements, resistance, E.M.F., and current strength. The magnetisation of iron. Electro-magnetic induction. The induction coil. Electrolysis. Thermo-electricity. Electrostatics.

Mathematics.

(1) Pure:—

The higher parts of Algebra and Plane Trigonometry. Analytical Geometry of two Dimensions, applied to the straight line and circle. Differential and Integral Calculus.

(2) Applied:—

Statics and Dynamics. Equilibrium under Coplanar Forces. Graphical Statics. Hydrostatics. Parabolic and Circular Motion. Simple Harmonic Motion. Impact. Energy of Rotation.

Electrical Engineering.

Units of Electrical Measurement and their relation. Methods

of Measurement of Current, Voltage and Resistance. Magnetic Induction. The Magnetic Circuit. Generation of Voltage. Theory of Continuous Current Generators and Motors. Types defined by the Magnetic Field Windings. Series, Shunt and Compound Machines. Armature Reaction. Characteristic Curves of Generators and Motors. Efficiency. Connection and Testing of Machines.

Alternating Current Theory. Self Induction and its Effects. Effects of Capacity. Graphical Solutions. Generators. Synchronous Motors. Transformers. Induction Motors. Three-phase Working. Theory of Measuring Instruments. Distribution of Electric Energy.

Civil Engineering.

Earthwork and Masonry—Roads. Canals. Brickwork and Masonry. Calculation of Quantities. Embankments and Cuttings.

Structures—Roofs and Bridges. Wind pressure and oblique loads. Computation of Stresses. Reinforced Concrete.

Docks and Harbours—Estuaries and Bars of Rivers. Tide Gauges. Estimation of Drainage and of Discharges. Water Storage.

Applied Geology (For Civil Engineering).

Study of Geological Maps. Sources of Economic Minerals and Rocks. Stability of Rocks. Water Supply, etc.

Surveying (For Civil Engineering).

Plotting, Chain Surveying, Levelling, Compass Surveying, and Dialling. The Theodolite and its uses. Miscellaneous Surveying Problems. Practical Work.

Military Science. See p. 219.

Naval Architecture.

Group I.

(*a*) Naval Architecture
(*b*) Ship Drawing and Calculations.

Group II.

(*a*) Physics.
(*b*) Engineering—Engineering Laboratory.
(*c*) Mathematics.

The following particulars give some idea of the scope of certain of the above subjects:—

Naval Architecture.

The buoyancy of ships. Displacement and position of centre of buoyancy. Trim. Freeboard. Tonnage. Strength of ship materials and riveted joints. Classification Societies rules. Launching. Elementary work relating to strength and stability of ships.

Physics, Engineering, and Mathematics.

See p. 203 above.

MINING.

Group I.
(*a*) Geology.
(*b*) Economic Mineralogy.
(*c*) Mineral Deposits.

Group II.
(*a*) Engineering—Engineering Laboratory.
(*b*) Mechanical Drawing.
(*c*) Chemistry.

The following particulars give some idea of the scope of certain of the above subjects:—

Geology.

General Principles of Physical and Historical Geology. Field Work. Practical examination.

Economic Mineralogy.

General properties; symmetry; systems; Sulphur; Diamond; Graphite; Salt; Fluor; Corundum; Spinels; Witherite; Aragonite; Calcite; Dolomite; Barytes; Anhydrite; Gypsum; Apatite; Quartz; Minerals containing Iron, Copper, Lead, Zinc, Silver, Tin, Platinum, Gold, Mercury, Antimony, Arsenic, Bismuth, and Aluminium; Felspars; Amphiboles; Pyroxenes; Micas; Zeolites; Topaz; Baryl; Garnet. Goniometers, mineralogical analysis, optical methods.

Mineral Deposits.

Nature of Mineral Deposits. Methods of Classification. Genesis of Mineral Deposits. Various classes of Deposits. Irregularities of Mineral Deposits, Faults, etc. The chief Mineral Deposits of the world. Mineral Statistics. The Coalfields.

Engineering.

See p. 203 above.

Chemistry.

The commoner metals—Their extraction from their ores and their natural and artificial compounds. The atomic weights of the elements—The methods used in their determination. Classification of the elements. Revision and extension of non-metallic elements. Outlines of Organic Chemistry.

METALLURGY.

Group I.
(*a*) General Metallurgy.
(*b*) Chemistry.

Group II.
(*a*) Economic Mineralogy.
(*b*) Engineering—Engineering Laboratory.
(*c*) Mechanical Drawing.

The following particulars give some idea of the scope of certain of the above subjects :—

General Metallurgy.

The physical properties of metals. General character of alloys. Fuels, their composition and general characters. Fire clays and fire-resisting materials. Fluxes and slags. Processes for obtaining metals from their ores. The extraction of iron, copper, lead, silver and gold from their ores.

Economic Mineralogy, Engineering, and Chemistry.

See pp. 203 and 205 above.

Final Part.

Agriculture.

(Professional Subject, "Agriculture," Group I.)

Group I.

(*a*) Agriculture, Part II.
(*b*) Estate Management.
(*c*) Farm Accountancy.

Group II.

(*a*) Agricultural Chemistry.
(*b*) Agricultural Botany.
(*c*) Pathology and Farm Hygiene.
(*d*) Forestry.
(*e*) Agricultural Engineering.

The following particulars give some idea of the scope of certain of the above subjects :—

Agriculture. Part II.

(1) Farm Live Stock.—Breeding; Housing and Management; Feeding; Manurial values. Wool. Dairying. Farm servants. Farm buildings. Stocking of farms. Capital and its allocation. Farm Demonstrations and Practical work.

(2) Economics of Agriculture.—Rent. Land Tenure. Co-operation. Land Banks. Protection and Free Trade. Labour Problems. Workmen's Compensation and Insurance. Statistical returns.

Estate Management.

Laws relating to ownership and occupation of landed property. Acts of Parliament relating to Agriculture. Roads and road-making.

Farm Accountancy.

Book-keeping. Depreciation. Sources of Profit and Loss. Assets and Liabilities. Partnerships. Bills of Exchange and Promissory Notes. Banking. Registers and farm books.

Agricultural Chemistry.

Crops.—Composition and chief products. Relation to soil. Unsaleable parts. Animal nutrition.—Constituents of animal body. Metabolism. Work. Fattening. Foods.—Composition. Digestibility. Comparative values. Impurities. Analysis. Relation of food to animal requirements and to manure. Dairy.—Composition of milk and milk products. Fermentation. Analysis. Poisons.—Insecticides. Sheep dips. Preservatives.

Agricultural Botany.

Cultivated plants: cereals and common grasses. Farm seeds: seed testing. Weeds. Fungi. Plant diseases and methods of control. Bacteria. Heredity, Variation and Evolution in relation to Crops. Plant Ecology. Physiological Anatomy. Field Demonstrations.

(Candidates for the Final Examination are required to present a collection of cultivated plants and weeds, dried, mounted and named.)

Pathology and Farm Hygiene.

Health—Normal structure and physiology. Variation. Conditions of life, and animal's power of adaptation. Disease—Causes and effects. Heredity. Natural and artificial selection. Survival of fittest. Principal diseases of farm animals—Causes, treatment and prevention. Hygiene of stable and byre. Prevention of disease.

Forestry.

Systems of Forestry:—

Preparation of the soil for planting. Management of young trees in nurseries. Formation of pure and mixed woods. The tending of woods. The characters, special properties and requirements of the leading British forest trees. The properties of timber.

Agricultural Engineering.

Applied Mechanics. Mechanical Drawing. Agricultural Machinery.

MECHANICAL ENGINEERING AND MARINE ENGINEERING.

(Professional Subject: "Engineering," Group I.)

Group I.

(*a*) Thermodynamics and Steam Turbines.
(*b*) Steam and Internal Combustion Engines.
(*c*) Strength and Elasticity of Materials.
(*d*) Mechanical Drawing.
(*e*) Engineering Laboratory.

Group II.

(*a*) Special Mathematics.
(*b*) Metallurgy.

Electrical Engineering.

(Professional Subject, "Electrical Engineering," Group I.)

Group I.

(*a*) Electrical Engineering.
(*b*) Electrical Engineering Laboratory.
(*c*) Strength and Elasticity of Materials.

Group II.

(*a*) Thermodynamics and Steam Turbines.
(*b*) Mechanical Drawing.
(*c*) Engineering Laboratory.
(*d*) Special Mathematics.

Civil or Military Engineering.

(Professional Subject, "Civil Engineering," Group I.)

Group I.

(*a*) Civil Engineering.
(*b*) Strength and Elasticity of Materials.
(*c*) Special Drawing.
(*d*) Surveying.

Group II.

(*a*) Engineering Laboratory.
(*b*) Practical Geology (for Students in Civil Engineering).
(*c*) Military Science, Part II. (for Students in Military Engineering).
(*d*) Special Mathematics.

The following particulars give some idea of the scope of certain of the above subjects:—

Special Mathematics.

(1) Pure:—
Analytical Geometry of two and three Dimensions.
Differential and Integral Calculus.
Differential Equations.

(2) Applied:—
Statics, Dynamics and Hydrostatics, with simple applications of Differential and Integral Calculus.

Metallurgy.

The Physical Properties of Metals. General Character of Alloys. Fuels, their composition and general character. Fire Clays and Fire-resisting Materials. Fluxes and Slags. Processes for obtaining metals from their ores.

Electrical Engineering.

Advanced Theory of Electric Circuits, Continuous and Alternating. The Complete Magnetic Circuit. Theory of Armature Windings. Armature Reaction. Commutation. Principles of Design of Alternating Current Generators. Windings. Breadth Co-efficients. Fourier's Theorem and its Application.

Transformers. Induction Motors. The General Circle Diagram. Starting Resistances. Alternators in Parallel. Synchronous Motors. V. Curves. Regulation of Generators. Predetermination of Voltage Drop on Load. Advanced Testing of Machines. Elementary Theory of Alternating Current Commutator Motors.

High Tension Transmission. Electric Cables. Properties of Dielectrics. Three-phase Cable Currents. Systems of Protection by Automatic Control. Heavy Switch Gear.

Civil Engineering.

Theory of Structures. Masonry, etc. Earthwork Foundations, Temporary Works, etc. Hydraulic Engineering.

Surveying (for Civil Engineering).

Triangulation of Areas, the elements of major triangulation for Geodetic surveys. Tacheometry. Determination of Meridian by equal altitudes, by ex-meridian observations, etc. Alignment and setting out of railway curves. Circular arcs, cant of rails, transition curves. The use and adjustment of surveying instruments, including both Vernier and Micrometer Theodolites.

Military Science (for Military Engineering).

See p. 219 below.

Naval Architecture.

(Professional Subject, "Naval Architecture," Group I.)

Group I.

(*a*) Buoyancy and Stability of Ships.
(*b*) Strength of Ships, Waves, and Rolling of Ships.
(*c*) Resistance, Propulsion, and Design of Ships.
(*d*) Strength and Elasticity of Materials.

Group II.

(*a*) Metallurgy.
(*b*) Engineering Laboratory.
(c) Special Mathematics.

For particulars of *Metallurgy* and *Mathematics*, see p. above.

Mining.

(Professional Subject, "Mining," Group I.)

Students must show sufficient knowledge of both Coal and Metal Mining. Before being presented for a degree they must also produce satisfactory evidence that they have spent a period of not less than four months altogether in or about a mine, with the object of acquiring a practical insight into the elements of their future profession.

Group I.

(*a*) Mining.
(*b*) Surveying.

Group II.

(*a*) Dressing of Minerals.
(*b*) Metallurgy.

(*c*) Strength and Elasticity of Materials.
(*d*) Electrical Engineering.

The following particulars give some idea of the scope of certain of the above subjects:—

Mining.

Objects and Conditions of Mining. Mining Jurisprudence. Prospecting. Breaking ground; levels; shafts; exploitation; transport; winding; drainage; ventilation. Miscellaneous matters.

Surveying.

Plotting, Chain Surveying, Levelling, Compass Surveying, and Dialling. The Theodolite and its uses. Miscellaneous surveying problems. Practical Work.

Dressing of Minerals.

Principles and objects of Dressing. Handsorting, Spalling and Picking. Breaking and Crushing, Sizing and Sieving. Hydraulic Dressing. Jigging. Coal Washing; Vanning, etc. Pneumatic Dressing. Magnetic Separation. Flotation Processes. Application of methods to special cases. The design and Erection of Dressing Plants.

Metallurgy.

As for Second Part of course for students in Metallurgy (see p. 206 above).

Electrical Engineering.

As for Second Part of course for students in Engineering (see p. 203 above).

Metallurgy.

(Professional Subject, "Metallurgy," Group I.)

Group I.
(*a*) Metallurgy.
(*b*) Assaying.

Group II.
(*a*) Dressing of Minerals.
(*b*) Chemistry (Organic and Gas Analysis).
(*c*) Strength and Elasticity of Materials.
(*d*) Electrical Engineering.

The following particulars give some idea of the scope of certain of the above subjects:—

Metallurgy.

Practical Metallurgy. Assaying. Metallography.

Dressing of Minerals.

See above under Mining.

Chemistry.

Organic Chemistry—Aliphatic and Aromatic Compounds.

Electrical Engineering.

See above under Mining.

D. FOR THE HONOURS DEGREE OF B.Sc. IN AGRICULTURE, ENGINEERING, OR NAVAL ARCHITECTURE.[4]

Honours may be taken in one or more of the following professional subjects:—

(1) Agriculture.
(2) Mechanical Engineering.
(3) Marine Engineering.
(4) Civil Engineering.
(5) Electrical Engineering.
(6) Naval Architecture.

Courses of study will be arranged in consultation with Heads of Departments.

E. FOR THE HONOURS DEGREE IN MINING.[5]

Intermediate Part.

See pp. 200-201 above.

Second Year.

(1) Mathematics.
(2) Chemistry of Metals and Chemical Laboratory.
(3) Engineering Laboratory.
(4) Geology.
(5) Economic Mineralogy.
(6) Descriptive Mineralogy.
(7) Mechanical Drawing.
(8) Ambulance.

(1) *Mathematics.*—As for Second Part of Pass course in Engineerinwg (see p. 203 above).

(2) *Chemistry*, (3) *Engineering*, (4) *Geology*, (5) *Economic Mineralogy*, and (7) *Mechanical Drawing*. As for Second Part of Pass course in Mining (see p. 205 above).

(6) *Descriptive Mineralogy.*—Fuller details of Economic Mineralogy. Examination of simple Crystal Models. Assigning of Millerian Indices. Principles of Sterographic Projection. The use of the Polariscope.

(8) *Ambulance.*

Third Year.

(1) Metallurgy and Metallurgical Laboratory.
(2) Strength and Elasticity of Materials, and Engineering Laboratory.
(3) Applied Geology.
(4) Surveying.
(5) Mineral Deposits.
(6) Ambulance.

[4] For regulations see pp. 70-72 above.

[5] For regulations see pp. 70-72 above.

(1) *Metallurgy.*—As for Second Part of Pass course in Metallurgy (see p. 206 above).
(2) *Strength and Elasticity of Materials, etc.*, and (4) *Surveying.*—As for Final Part of Pass course in Mining (see p. 210 above).
(3) *Applied Geology.*—Study of Geological Maps, sources of economic minerals and rocks, stability of rocks, water supply, etc.
(5) *Mineral Deposits.*—As for Second Part of Pass course in Mining (see p. 205 above).
(6) *Ambulance.*

FOURTH YEAR.

(1) Mining.
(2) Thermodynamics.
(3) Electrical Engineering and Laboratory.
(4) Dressing of Minerals.
(5) Surveying.
(6) Gas Analysis.
(7) Ambulance.
(8) Accounting.
(9) Economics of Industry (optional, but recommended).

(1) *Mining*, (2) *Thermodynamics*, (3) *Electrical Engineering, etc., and* (4) *Dressing of Minerals.*—As for Final Part of Pass course in Mining (see p. 210 above).
(5) *Surveying.*—As for Final Part of Pass course in Civil Engineering (see p. 209 above).
(6) *Gas Analysis.*—As for Final Part of Pass course in Metallurgy (see p. 210 above).
(7) *Ambulance.*
(8) *Accounting.*—The general principles of Accounting. Mining Accountancy.

F. FOR THE HONOURS DEGREE OF B.Sc IN METALLURGY.[6]

INTERMEDIATE PART.

See pp. 200-201 above.

SECOND YEAR.

(1) Mathematics.
(2) Chemistry of Metals and Chemical Laboratory.
(3) Engineering and Laboratory.
(4) Economic Mineralogy.
(5) Mechanical Drawing.
(6) Ambulance.

(1) *Mathematics.*—As for Second Part of Pass course in Engineering (see p. 203 above).
(2) *Chemistry*, (3) *Engineering*, (4) *Economic Mineralogy*, and

[6] For regulations see pp. 70-72 above.

(5) *Mechanical Drawing.*—As for Second Part of Pass course in Metallurgy (see p. 206 above).

(6) *Ambulance.*

THIRD YEAR.

(1) Metallurgy and Metallurgical Laboratory.
(2) Strength and Elasticity of Materials, and Engineering Laboratory.
(3) Physics.
(4) Practical Chemistry.
(5) Surveying.
(6) Ambulance.

(1) *Metallurgy, etc.*—As for Second Part of Pass course in Metallurgy (see p. 206 above).

(2) *Strength and Elasticity of Materials, etc.*—As for Final Part of Pass course in Metallurgy (see p. 210 above).

(3) *Physics.*—As for Second Part of Pass course in Engineering (see p. 203 above).

(5) *Surveying.*—As for Second Part of Pass course in Civil Engineering (see p. 204 above).

(6) *Ambulance.*

FOURTH YEAR.

(1) Advanced Metallurgy and Laboratory.
(2) Metallography.
(3) Thermodynamics.
(4) Electrical Engineering and Laboratory.
(5) Gas Analysis
(6) Dressing of Minerals.
(7) Ambulance.
(8) Economics of Industry.
(9) Accounting.

(1) *Advanced Metallurgy.*—Detailed Study of either the Ferrous or the Non-Ferrous Metals, and their production.

(2) *Metallography.*—The Principles and Practice of Metallography. The Heat treatment of Metals.

(4) *Electrical Engineering, etc.*, (5) *Gas Analysis*, and (6) *Dressing of Minerals.*—As for Final Part of Pass course in Metallurgy (see p. 210 above).

(7) *Ambulance*, and (8) *Economics of Industry.*

(9) *Accounting.*—The General Principles of Accounting—Accounting as applied to the Metallurgical Industries.

G. FOR THE DEGREE OF M.Sc.[7]

The following are recognised amongst others as special branches of the several Natural and Technical Sciences for the purpose of the regulations for the degree of M.Sc.:—

[7] For regulations see pp. 72-73 above.

Mathematics.

Plane Geometry. Geometry of three Dimensions. Theory of Algebraic Forms. Differential Equations. Theory of Functions. Theory of Quaternions. Dynamics of a Rigid Body. Hydromechanics. Theory of Attractions and Potential, including Spherical Harmonics. Astronomy.

Experimental Physics.

Mechanics and Acoustics. Heat and Thermodynamics. Light. Electricity and Magnetism.

Chemistry.

Pure Inorganic Chemistry. Pure Organic Chemistry. Analytical Chemistry. Applied Chemistry. Physical Chemistry. Agricultural Chemistry.

Geology.

Physical Geology.—Astronomical Relations of the earth; general knowledge. Volcanic and Subterranean Phenomena; Metamorphism; Denudation; Glacial Phenomena. Rock-formation. Origin of Lodes and Veins. Lithology.—Lithology. Mineralogy of rock-forming Minerals. Micro-petrography. Descriptive Geology.—Stratigraphy. Leading features of European Geology. Topographical Geology of Britain, or some equally well-defined region. Palæontology.—Flora and Fauna of the great Fossiliferous Formations. One important Group of Fossil Forms. Mining Geology.—Physical Geology so far as relates to Subterranean Phenomena, and the Origin of Lodes and Veins. Stratigraphy. Mineralogy so far as relates to Minerals used in the Arts. Geological Surveying. Agricultural Geology.

Botany.

Histology. Classification. Physiology. Pathology. Morphology. Palæobotany. The origin and characters of the various Flora. Bacteriology. Agricultural Botany.

Zoology.

Embryology. Morphology and Morphogenesis. Histology and Histogenesis. Physiology. Palæozoology and Distribution. Parasitology. Economic Zoology. Agricultural Zoology. Marine and Oceanic Zoology. Philosophy and History.

Physiology.

Experimental Psychology.

Agriculture.

Soils. Crops. Live Stock. Dairying. Forestry.

Candidates presenting any of these subjects are required to satisfy the examiners as to their knowledge of Agriculture as a whole.

Engineering.
Mechanical Engineering. Marine Engineering. Civil Engineering.

Electrical Engineering.

Naval Architecture.

Mining.
Coal Mining. Metalliferous Mining.

All candidates are required to show a knowledge of recent discussions and discoveries.

SUBJECTS OF EXAMINATION IN THE FACULTY OF MUSIC.

All candidates, not graduates in Arts of some University in the United Kingdom, must have obtained the Testamur of Admission as students in Music (see footnote p. 94).

FIRST EXAMINATION FOR THE DEGREE OF BACHELOR OF MUSIC.

(1) Harmony; (2) Counterpoint in not more than four parts.

FINAL EXAMINATION FOR THE DEGREE OF BACHELOR OF MUSIC.

(1) Harmony in not more than five parts (of a Figured Bass and also of a given Melody); (2) Counterpoint in not more than five parts; (3) Fugue, Canon, and Form (a Fugue, in not more than four parts, to be composed on a given subject; a Canon to be continued for a certain number of bars; explanations of musical Forms to be given ; (4) History of Music.

The Special Subjects for the *viva voce* portion of the examination are the full scores of certain selected works, announced beforehand to those persons who make application, and who are eligible for the Final Examination.

No one will be admitted to the Final Examination who has not passed the First Examination or who, not being a member of this University, has not passed the First Examination in Music at some other University of the British Empire, and

sent in an exercise to the examiners, on or before a date to be announced from year to year, and from them received permission to be admitted. (1) This exercise (which may be either a sacred or secular work) is to consist of four movements only:—A five-part Chorus (with a short Introductory Symphony); an unaccompanied Quartet; a Solo; a five-part Choral Introduction and Fugue. (2) The accompaniments are to consist of those for the usual string-band only, and must show skill and independent features.

As an alternative to the above exercise candidates are now allowed to offer a composition consisting of the first and fourth movements only if they also offer themselves for examination on the piano *or* the organ *or* a stringed instrument of the violin family. Candidates will be required to satisfy the examiners (*a*) in playing specified compositions; (*b*) in playing at sight; (*c*) in improvising on a given theme. The prescribed works are as follows:—

Organ: Bach, Prelude and Fugue in B minor (Novello, Bk. vii, p. 52, and *either* Sir H. Parry's Choral Prelude on St. Anne's tune (Novello); *or* Harwood's First Sonata, Op. 5 (First Movement only), Schott.

Pianoforte: Beethoven, Sonata No. 16, Op. 31, No. 1, and *either* Schumann, Intermezzo and Finale Faschengeschwank, Op. 26; *or* Debussy, Preludes, Book I, Nos. 4 and 8.

Violin: Rode, Study No. 15 from 24 Caprices (Peters, 284), Beethoven, Sonata No. 5, in F major (First Movement), and Stanford, Reel, Op. 54, No. 6.

EXAMINATION FOR THE DEGREE OF DOCTOR OF MUSIC.

(1) Harmony; (2) Counterpoint (each of these including examples in eight parts); (3) Imitation, Canon and Fugue; (4) Form; (5) Instrumentation; (6) History of Music; (7) Elementary Acoustics; (8) Knowledge of the scores of the standard works of the great composers.

The exercise, which must not be presented for examination until the candidate is of thirteen terms' standing from the Bachelor's degree, must consist of a vocal composition, sacred or secular, in not less than six movements. It must contain good eight-part choral writing and a fugue in not less than five parts. It must be preceded by an overture, must be scored for full orchestra, and should take about forty minutes to perform.

The Final Examination for D.Mus. cannot be taken until the candidate is of fifteen terms' standing from the degree of B.Mus.

SUBJECTS OF EXAMINATION IN THE FACULTY OF COMMERCE.[1]

Candidates are required to attend for a period of at least three academical years the following course of study:—

FIRST YEAR. (Examinations in June and September.)

(i) Economics I.
(ii) Economic History.
(iii) French I, *or* German I, *or* Russian I, *or* Spanish I.
(iv) Social Psychology.
(v) *Either* Mathematics (1st course) *or* a Science (1st course), *or* Modern History, *or* the 1st course of a second modern foreign language.

SECOND YEAR. (Examinations in June and September.)

(i) Economics II.
(ii) Commercial Law.
(iii) French II, *or* German II, *or* Russian II, *or* Spanish II (whichever language was taken in the 1st year).
(iv & v) Two additional subjects as specified below:—

THIRD YEAR. (Examination in June.)

(i) Economics III.
(ii) French III, *or* German III, *or* Russian III, *or* Spanish III (whichever language was taken in the 1st and 2nd years).

(iii & iv) Two additional subjects as specified below:—

SECOND AND THIRD YEARS.

In addition to the subjects specially mentioned above candidates shall be required in their 2nd and 3rd years to take *two* of the following groups:—

(1) The 1st and 2nd courses of a modern foreign language not already taken as the optional subject in the 1st year.

(2) The 2nd and 3rd courses of the modern foreign language taken as the optional subject in the 1st year.

(3) The 1st and 2nd courses of Mathematics if this was not taken as the optional subject in the 1st year.

(4) The 2nd and 3rd courses of Mathematics if this was taken as the optional subject in the 1st year.

(5) The 1st and 2nd courses of a science applicable to manufacture if this subject was not taken as the optional subject in the 1st year.

[1] For regulations see pp. 74-75 above.

(6) The 2nd and 3rd courses of the science applicable to manufacture which was taken as the optional subject in the 1st year.

(7) The 1st and 2nd courses of a second science applicable to manufacture.

(8) (*a*) Banking and Currency and (*b*) International Trade and the Foreign Exchanges.

(9) (*a*) Railway Economics; (*b*) Railway Law.

(10) (*a*) Railway Operating; (*b*) Railway Geography of the United Kingdom.

(11) Any *two* of the following three subjects:—(*a*) Public Finance; (*b*) Statistics; (*c*) [2]Economic History of the 19th century.

(12) Any *two* of the following three subjects:—(*a*) Modern History (if not already taken as the optional subject in the 1st year); (*b*) Political Science; (*c*) [2]Economic History of the 19th century.

Candidates for the degree of Bachelor of Commerce are also required to attend a course and pass an examination in Accounting. The course and the examination may be taken in any year at the option of the candidate. Candidates who have passed an approved examination in Accounting may be excused attendance and examination in this subject.

SUBJECTS OF EXAMINATION IN MILITARY SCIENCE.

Under conditions specified in the different syllabuses, Military Science may be taken as an optional subject for the degrees of B.A. and B.Com., Part I in the First Year course, and Part II in the Second Year course.

Candidates for these degrees who do not offer Military Science as part of their degree course may offer it as an extra subject, and, if successful, will receive a special certificate to that effect.

PART I. FIRST YEAR COURSE.

The elements of Organisation.

The Elements of Tactics.

Musketry.

Practical Work. Section, Platoon, and Company Drill. Field Training, Musketry.

The course of instruction to consist of two hours lectures per week, together with from two to three hours practical work

[2] This subject cannot be counted in both Groups 11 and 12.

PART II. SECOND YEAR COURSE.

Advanced Organisation and Administration.

Advanced Tactics.

The Elements of Strategy.

The Elements of Military Law.

Practical Work. Company and Battalion Drill. Advanced Field Training, Musketry, Tactical Exercises.

The course of instruction to consist of two hours lectures per week and from two to three hours practical work.

Detailed syllabuses of the above courses are shown below:—

Part I. First Year.

The Elements of Organisation.

The Organisation of a Battalion, personnel, animals.

SUBJECTS OF EXAMINATION FOR THE DIPLOMA IN THE THEORY AND PRACTICE OF TEACHING.

1. Candidates before beginning the course for the diploma must be graduates of some University in the United Kingdom, or must have obtained one of the qualifications recognised by the Board of Education in "The Regulations for the Training of Teachers for Secondary Schools."

2. The course of study must extend over at least three terms, and must include attendance upon prescribed courses of lectures in the University, and practical work in recognised schools.

3. The examination for the diploma is divided into two parts, theory and practice.

4. *Theory.* Candidates are required to pass written examinations in the following:—

(i) The principles of Education, including the application of Psychology, Ethics, and Logic. *One paper.*

(ii) A prescribed period in the history of Education, with set books. 1923—Educational movements of the Renaissance with a special study of Vittorino, Erasmus, Montaigne, Ascham and Comenius. *One paper.*

(iii) Class and school management. The preparation of school lessons. Method in school. The teaching of the ordinary school subjects. School hygiene. School games. *One paper.*

(iv) Special method in at least one subject of the curriculum of a secondary school. *One paper.*

In addition each candidate shall, before the opening of the final term, prepare and present to the examiner an essay on some special subject of school work. As a rule this essay must be on the teaching of the special subject offered under (iv).

5. *Practice.* Candidates must attend approved schools for purposes of practice. The time spent in connection with a class under proper supervision must not be less than 60 school days, and two-thirds of this time must be in an approved Secondary School.

Candidates are to be tested in *practice*

By reports from the teacher of the school in which the student has practised, and from the Professor or Lecturer in Education; and by giving one or more lessons before the examiners, and submitting to the examiners records of school work.

Unless specially exempted a candidate must include in his course a special study of the teaching of one definite branch of the curriculum of a Secondary School. Success in this particular work will be recorded upon the testamur.

6. The examiners are to publish the names of the successful candidates in Theory and in Practice in alphabetical order, and to indicate, by distinguishing marks placed against their names, the candidates (if any) who excel in the written or practical parts of the examination, or both. Distinctions will be recorded on the diploma. Candidates must present themselves for both parts of the examination, but candidates who pass in Theory may be allowed subsequently to present themselves for the practical examination without undergoing a further examination in Theory.

7. Candidates before entering for the examination must present certificates of satisfactory attendance in Theory and Practice, and must pay a fee of £3.

8. The University will deliver the diploma to candidates who have passed both portions of the examination upon payment of a fee of £3. For graduates of Durham the fee is £1.

SUBJECTS OF EXAMINATION FOR THE DIPLOMA IN FOREIGN LANGUAGES.

The examination for a diploma consists in reading, conversation, dictation and oral and written reproduction of a passage read by one of the examiners.

Candidates must possess ready comprehension, fluent expression and correct pronunciation.

All graduates of the University in Arts, Letters, or Commerce are admissible to this test, provided that they have satisfied the examiners in the written part of the B.A., B.Litt., or B.Com. examination in the language which they offer. If the candidate has not satisfied in such language at his degree examination he may be admitted for the purpose of this diploma on a subsequent occasion to the written examination in that language.

The examination is held in the December of each year.

SUBJECTS OF EXAMINATION FOR THE DIPLOMA IN ARABIC.

The diploma is designed to meet the needs of two classes of students, (*a*) intending Missionaries to the Mohammedan East, (*b*) those about to take up an official or commercial career there.

The courses are as follow:—

Course. A.

1. Thatcher's Grammar.
2. Colloquial Arabic.
3. History of Muslim Theology and Philosophy, with a study of Ar-Rihlah, pp. 81-167.
4. (1) Quran Surahs, 12, 18, 19 (ed. Nallino, Leipzig, 1893).
   (2) Selections from the Sahih of El Bukhari.

Course B.

1. Thatcher's Grammar.
2. Colloquial Arabic.
3. Contemporary Arabic Literature (Newspapers, Journals, etc.).
4. Geographical and cultural conditions of a selected country, to be studied in one Arabic and one or more English authors.

For Regulations see Title VI, Section V.

DOCTORATE IN PHILOSOPHY.

I.

The University of Durham has established a Doctorate in Philosophy for the encouragement of post-graduate study. The degree may be conferred upon graduates of approved Universities, whether within or without the British Dominions, but such graduates must furnish evidence that they are qualified to undertake the course of study which they propose to pursue. The University Session begins in the first week of October and ends in the first week of July, but research students will have for a great part of the long vacation.
access to the laboratories and other facilities for their research

Research students will as a rule be expected to begin their course in the October term but may, under special circumstances, begin it at other times in the session. Intending students should communicate in good time with one of the following :— the Secretary of the Council of the Durham Colleges, the Registrar of the College of Medicine, or the Registrar of Armstrong College according as they wish to study at Durham, at the College of Medicine, or at Armstrong College respectively. They will then be put into communication with the head of the department in which they propose to work. It is desirable that with their original application they should enclose evidence of their qualifications to undertake the research proposed.

The fees payable are as follow :—

1. Entrance fee, £5.[1]
2. Tuition fee, £5 per term.
3. On presentation of a thesis, £10.
4. On admission to the degree, £5.

II

The Regulations for the degree of Ph.D. are as follow :—

A.

1.—The status of advanced student in the University of Durham shall be open to the following :—

(*a*) Holders of research degrees or of post-graduate scholarships or fellowships in this University or in other universities approved by Senate.

(*b*) Recipients of grants from the state or public bodies for the purpose of post-graduate research.

[1] Not payable by members of the University of Durham.

(*c*) Graduates who hold a degree of this or any other university approved by Senate.

(*d*) Such other persons as Senate may from time to time determine. In this case Senate shall decide by what tests the qualifications of the candidates are to be estimated.

2.—Before entering on the course of advanced study and research the candidate shall be required:—

(*a*) To have submitted to the professor or lecturer under whom he proposes to work a scheme of the course of advanced study and research proposed together with satisfactory evidence of adequate training and ability to undertake the proposed course.

(*b*) To have matriculated as a student of the University and to have paid the prescribed fees.

3.—Candidates admitted to the status of advanced student shall not be allowed to submit a thesis for the degree of Ph.D. till after a period of not less than two academical years from the date of their admission. The whole of this period shall be spent in research under the supervision of the University, provided that, after the first year of their course, candidates may be permitted, under conditions approved by the University, to continue their studies in some other approved place of study or research.

B.

OF THE EXERCISES AND EXAMINATIONS REQUIRED FOR THE DEGREE OF PH.D.

The candidate will be required:—

(*a*) To present a thesis[2] embodying the result of his research and to satisfy the University that it contains original work worthy of publication.

(*b*) To pass an oral examination in matters relevant to the subject of the thesis, and, if required, a further written examination.

C.

OF FEES PAYABLE BY ADVANCED STUDENTS.

1.—Every candidate admitted to the status of advanced student who is not already a member of the University of Durham shall, when matriculating, pay an inclusive fee of £5.

[2] The date for sending in the thesis in each year is September 30th.

2.—All candidates admitted to a course of study for the Ph.D. shall pay such tuition fees as the University may from time to time determine.[3]

3.—All candidates for the Ph.D. shall pay £10 on presenting their application for the degree on the conclusion of their course, and £5 for the conferring of the degree.

D.

PROVISION FOR FURTHER REGULATIONS.

It shall be lawful for Senate to amend or modify these regulations from time to time as occasion arises, provided that no alteration take effect with less than a year's notice, or prejudice the interests of any candidate who has already entered on a course of study for the degree.

[3] For the fees at present in force see Section I above.

FELLOWSHIPS, SCHOLARSHIPS AND PRIZES.

IN THE DURHAM COLLEGES.

FELLOWSHIPS.

1.—There are three Tutorial Fellowships tenable for five years the holders being eligible for re-election, the value being £200 on the 1st election, £250 on the 2nd election, and £300 on the 3rd and subsequent elections.

2.—The Fellow, as Fellow, shall deliver ten lectures a week if called upon by the Council so to do; and shall be paid for lectures above ten per week at the rate in force for the time being for additional lectures.

3.—The holder of a Tutorial Fellowship must reside in Durham during term time.

4.—There is one ordinary Fellowship tenable for two years of the value of £200 a year paid terminally. The Council when electing to an ordinary Fellowship may either require the holder to reside in Durham during term-time, and to do such academic work—not exceeding ten hours a week—as may be prescribed by the Council, or may require that he shall pursue a post-graduate course of study to the satisfaction of the Council. Unless candidates when they specify the subjects they offer should also state that they do not desire to do academic work in Durham, or do not desire to follow a post-graduate course of study, they will be regarded as willing to do whatever Council may require them to do. An ordinary Fellowship is vacated by marriage.

Ordinary Fellowships are awarded by Council after examination. Candidates may offer the subjects included in any one of the Honours Schools for the B.A. degree. The examination is held in November. Candidates for an ordinary Fellowship are eligible only for the first three examinations held after they have taken their Final Examination for the degree of B.A.

5.—Fellowships can be held only by those who have kept terms and taken the degree of B.A. in the Durham Division of the University. A Tutorial Fellowship cannot be held along with an ordinary Fellowship.

Fellows.

1906 Pace, E. G. (*Tutorial*).
1914 Pestle, E. P. (*Tutorial*).
1921 Beckles, H. A. M. (*Ordinary*).

Such course of study must be previously approved by the Professor, and must not ordinarily be of less than six weeks in duration. The remaining moiety shall be payable when the Professor certifies that the course of study and instruction has been duly completed.

Van Mildert Scholarship.

This Scholarship, founded in memory of the late Bishop Van Mildert, is of the annual value of £50.

Regulations for the Van Mildert Scholarship.

1. Unless examiners shall be specially appointed for the purpose by the Durham Colleges Council, the electors for the Van Mildert Scholarship shall be the examiners for the degree of B.A.

2. The candidates for the Van Mildert Scholarship shall be such undergraduates admitted to the Final Pass Examination for the degree of B.A. in Easter Term, as are desirous of pursuing a course of study in Theology, and are recommended as fit by the President and their tutor, and have signified their desire to the examiners before the examination.

3. The examiners shall elect that candidate who, from the talents and acquirements shown in the examination, shall appear to them to be the best qualified to pursue the study of Divinity with success, provided he has shown distinctive merit.

4. The election shall be certified to the Council in writing, attested by the signatures of the examiners.

5. The Van Mildert Scholar shall keep three consecutive terms in Theology; at the end of his third term he shall pass the examination for the Diploma in Theology.

6. One-third of the proceeds of the Scholarship shall be payable when the Scholar has kept one term, one-third when he has kept a second term, and the remainder of the Scholarship when he has kept a third term and proceeded to the diploma in Theology. The residue which may be occasioned, either by his non-residence or by any other circumstances, shall either be laid out in prizes for those who distinguish themselves at the examination for the Diploma in Theology or applied in such other manner as the Council of the Durham Colleges may think most conducive to the interests of the University.

7. No Van Mildert Scholar shall receive the proceeds of the Scholarship unless he produces a certificate from his tutor of good conduct and attention to his studies.

8. The Council shall have the power to alter or amend these regulations from time to time, provided that the Van Mildert Scholarship shall always be applied to the encouragement of Theological learning in the University.

LINDSAY SCHOLARSHIP.

This Scholarship was founded by Mr. Ralph Lindsay, a native of St. Oswald's in the City of Durham.

Regulations for the Lindsay Scholarship.

1.—The above-mentioned Foundation and its endowment are administered by the Council of the Durham Colleges (hereinafter called the Trustees), in conformity with the provisions of a Scheme, dated June 19th, 1906, under the name of the Ralph Lindsay Scholarship, hereinafter called the Foundation.

2.—After payment of the expenses of administration, the Trustees shall apply a yearly sum of not less than £40, and not more than £60, in the maintenance of a Scholarship, to be called the Lindsay Scholarship, tenable at Durham University, and to be awarded to boys, who—

(i) are and have for not less than three years been in attendance at Durham Grammar School, and

(ii) either (*a*) were born in the dioceses of Durham or Newcastle, or (*b*) are of kin to the Founder, Ralph Lindsay.

Provided that any Scholarship for which there is no candidate qualified under both the foregoing paragraphs (i) and (ii) hereof, who on examination is adjudged worthy to take it, may for that turn be awarded to a candidate qualified under paragraph (i) only. Each Scholarship shall be awarded for a period of three years.

The Trustees may in any year apply any accumulations of income of the Foundation in increasing the value of the Scholarship, provided that the yearly value of the Scholarship shall not exceed £60.

3.—Within the limits fixed by this Scheme, the Scholarship shall be freely and openly competed for, and shall be awarded for merit on the result of such examination, and under such regulations and conditions *as the Trustees think fit*, provided that, in the award, preference shall be given for proficiency in classics. Any Scholarship, for which there is no duly qualified candidate who, on examination, is adjudged worthy to take it, shall for that turn not be awarded.

4.—The Scholarship shall be tenable only for the purposes of education. If the holder of a Scholarship is, in the judgment of the Trustees, guilty of serious misconduct or idleness, or fails to maintain a reasonable standard of proficiency, or wilfully ceases to pursue his education, the Trustees may deprive him of the

Scholarship, and for this purpose may act on the report of the proper authorities of the said University, or on such other evidence as the Trustees think sufficient. Under this clause the decision of the Trustees shall be final in each case.

5.—No boy shall, by reason of any exemption from attending prayer or religious worship, or from any lesson or series of lessons on a religious subject, be deprived of any advantage or emolument out of the endowment of the Foundation, to which he would otherwise have been entitled.

6.—The Scholarship is awarded on the results of the Matriculation Examination.

Ellerton Scholarship.

The Rev. Edward Ellerton, D.D., Fellow of Magdalen College, Oxford, by deed dated February 22nd, 1848, founded a Scholarship now of the value of about £25 a year, for natives of the North Riding of York, tenable in ordinary cases for three years.

Deed of Foundation.

In gratitude to Divine Providence, I am desirous of assisting some of my compatriots, natives of the North Riding in the County of York, by founding for their benefit in the University of Durham a Scholarship of £21 per annum, tenable in ordinary cases for three years.

The qualifications of the candidates shall be the following:—

1. That they be natives of the North Riding of Yorkshire.

2. That they be sons of parents who are members of the Church of England.

3. That they shall have received their education at Richmond Grammar School.

[25] Of University College. [26] Of Bede College.

4. That they shall not exceed their twentieth year on the day of their first election.

5. That they be in need of such assistance.

But if no candidate appear from Richmond School, or if such candidate be declared by the examiners to be incompetent,[26] a native of the North Riding of Yorkshire educated elsewhere is to be elected Scholar. And if more candidates than one should appear, either from Richmond School or of those who have had their school education elsewhere, I desire that the best scholar be elected.

I consider it most safe to elect the scholar only for one year; and, if his conduct be satisfactory, to repeat the election at the commencement of the second year and third year; that if a youth elected scholar should, in the judgment of the Senate of the University, have forfeited his claim to re-election by indolence or immorality, he may be removed; and I hereby authorise and request the University to elect another scholar[27] in the room of him who has been found unworthy; and the scholar so elected, if he approve himself to the University by his diligence as a student and his exemplary life as a Christian, shall enjoy the Scholarship for three years, having been three times elected, and at the end of the third year shall vacate it, to make room for another possessing all the requisite qualifications enumerated above.

Supplement to the above deed, dated March 15, 1848.

The event contemplated, that there may be no native of the North Riding a candidate for the Scholarship founded by me is possible, but not probable; but such a contingency should be provided for.

If such a case actually arise, I wish that the Scholarship should be thrown open to natives of the East and West Ridings of the county *pro istâ vice*, and that the person elected, if his conduct be satisfactory to the University, should enjoy it after three elections for three years.

Regulations for the Ellerton Scholarship.

1. The Ellerton Scholar shall, in ordinary cases, be elected by the Council of the Durham Colleges in the Michaelmas Term of each year.

2. Each candidate, before he is admitted to examination, must submit to the Council testimonials of character and certifi-

[27] An extraordinary election of this sort would, of course, be communicated to the Master of Richmond School, that he may avail himself of the vacancy, if he have any boys sufficiently advanced to fill it; if not, the election must be made out of natives of the North Riding educated elsewhere.

cates to show that he possesses the qualifications specified in the Deed of Foundation.

3. The examination for admission to the Scholarship shall be conducted by two or more examiners, to be nominated by the Council.

The examiners, being furnished with a list of the candidates, shall make to the Council a report of the proficiency of each.

4. The Ellerton Scholar will be required to keep his terms and pursue his studies in the Durham Division as a Student in Arts.

5. The Council shall have authority to dispense with the keeping of not more than one term of residence in the course of two years; and not more than two terms of residence in the course of three years.

6. In such cases the Scholar shall receive only such portion of the proceeds of the Scholarship as may be due for the terms he has kept.

The residue which may arise, either from this cause or from any other circumstance, shall be added from time to time to increase the value of the Scholarship.

7. The Council shall have power to alter and amend these Regulations from time to time, consistently with the Deed of Foundation.

Barry Scholarship.

James Barry, late of the City of Durham, devised to William Lloyd Wharton, Francis Dixon Johnson, Anthony Wilkinson, the Rev. James Raine, and John Fogg-Elliot, such part of his effects as should enable them to invest in the parliamentary or public stocks of this kingdom a sum producing £30 per annum for a Divinity Scholarship.

In the year 1913 (March 18) the following scheme was made by the Board of Education :—

1.—In this Scheme the expression "the Foundation" means the Foundation called the James Barry Divinity Scholarship, in connexion with the University of Durham, now regulated by a Scheme of the Charity Commissioners of 7th February, 1893.

2.—The Foundation and its endowment (including the sum of Stock specified in the Schedule to this Scheme) shall be administered and managed in conformity with the provisions of this Scheme.

3.—The body of Trustees shall consist of the Chancellor of the University of Durham, the Dean of Durham, and the Professors of Divinity, Greek, and Hebrew in the said University, for the time being respectively.

4.—There shall be a quorum when two Trustees are present at any meeting. The Trustee who, of those present stands first

[28] Of Hatfield College.

in the list of Trustees contained in the foregoing clause shall be the Chairman of the meeting. Every matter shall be determined by the majority of the Trustees present and voting upon the question. In case of equality of votes the Chairman shall have a second or casting vote.

5.—All the proper costs, charges, and expenses of and incidental to the administration and management of the Foundation shall be first defrayed by the Trustees out of the income thereof.

6.—Subject to the payments aforesaid, the yearly income of the Foundation shall be applied by the Trustees in the annual award of one or more Scholarships, tenable for one year in the University of Durham by resident students engaged in the study of Theology, being members of the Church of England, to be elected by the Trustees subject to the following rules :—

(*a*) The election shall take place at such time in Easter Term as the Trustees shall fix.

(*b*) Candidates must be of not less than three nor more than nine terms standing.

(*c*) Candidates must furnish such testimonials of good conduct and studious habits as shall be satisfactory to the Professor of Divinity of the University.

(*d*) Every Scholarship shall be awarded by the Trustees upon consideration of—

(i) An essay by each candidate on such subject, being a subject included in any of the courses prescribed by the University for the study of Theology, as the Professor of Divinity shall appoint; and

(ii) The Academic record of the candidates, with special reference to their performances in any examinations of the University.

(*e*) A Scholarship cannot be awarded twice to the same person.

(*f*) Subject as aforesaid the Scholarship or Scholarships shall be awarded under such rules and conditions as the Trustees think fit. If at the time of election there shall be no duly qualified candidate who is adjudged worthy to take a Scholarship, no Scholarship shall for that turn be awarded.

7.—Any sum of cash now or at any time belonging to the Foundation and not needed as a balance for working purposes shall (unless otherwise ordered by the Board of Education) be invested in the name of the Official Trustees of Charitable Funds.

8.—Any question as to the construction of this Scheme, or as to the regularity or the validity of any acts done or about to be done under this Scheme, shall be determined conclusively by the Board of Education, upon such application made to them for the purpose as they think sufficient.

9.—The date of this Scheme shall be the day on which it is established by an Order of the Board of Education.

NEWBY SCHOLARSHIP.

The pupils and friends of the late Rev. George Newby, M.A., having proposed to found an open Scholarship in memory of him, the proposal was accepted October 31st, 1848. The Scholarship is of the annual value of about £18.

Regulations for the Newby Scholarship.

1.—The Newby Scholarship shall be open to all Undergraduates who are not yet qualified to present themselves for the Final Examination for the Degree of Bachelor of Arts, and to all persons not yet admitted to be students in the University.

2.—Every candidate must produce to the Council satisfactory testimonials of character before he can be admitted to examination.

3.—Unless Examiners are specially appointed by the Council the Examiners for the First Year Examination in Arts shall be Examiners for the Newby Scholarship. The Examination shall be exclusively Classical.

4.—The Newby Scholarship shall be tenable until the Scholar is of standing to present himself for the Final Examination for the Degree of Bachelor of Arts, provided the Scholar during that time keep his terms and pursue his studies in the Durham Division.

LIGHTFOOT SCHOLARSHIP.

This Scholarship, given by the Rev. Alfred William Gross, of Hatfield College, in memory of the late Bishop Lightfoot, is of the annual value of £50. Its object is to encourage those who have taken Honours in Arts to devote at least three terms to the study of Theology and take Honours in Theology.

Regulations.

1.—The examiners for the Final Examination in Classics or Mathematics shall award the Lightfoot Scholarship each June to the candidate for Honours in Arts who seems to them to be the most promising as a student of Theology, and has signified to the examiners before the examination his intention of competing for the Scholarship.

2. The candidate selected must have taken Honours in the Final Examination in Arts. During his tenure of the Scholarship he shall read for Honours in Theology.

3. The Lightfoot Scholarship shall be tenable for one year, and one-half shall be payable after the Scholar has kept two terms as a student in Theology, the other half after he has kept a third term and has taken Honours in Theology. Holders of the Lightfoot Scholarship, being Bachelors of Arts, shall be allowed to offer, from amongst the subjects required for Honours in Theology, New Testament, and three other subjects, of which one must be Dogmatic Theology or Ecclesiastical History.

4. The Lightfoot Scholarship shall not be tenable with the Van Mildert Scholarship.

5. These regulations shall not be changed during the lifetime of the founder without his consent.

Winifred Foster Scholarship.

This Scholarship was founded in 1912, by the Will of the late Lord Ilkeston, in memory of his daughter. It is derived from the income on a capital sum of £800. The following are the conditions:—

1. The Winifred Foster Scholarship shall be open to a woman candidate requiring help in order to maintain herself at Durham, whose age on the first day of the examination shall be not less than seventeen and a half years, nor more than twenty-two years.

2. The Scholarship shall be awarded upon the result of either the Matriculation Examination or any Examination equivalent thereto, and the Principal of St. Mary's College and the Censor of Home Students shall be empowered to make the award after consideration of the qualifications of the candidates, and to subject the candidates to such further test as they may decide.

3. The candidate shall furnish particulars as to income of parents and number of family to be educated, with evidence of her industry and public spirit during her school career.

4. Forms of application (to be obtained from the Principal of St. Mary's College or the Censor of Home Students) shall be returned to them before the 1st day of September.

5. In any year when the Scholarship is available, should no applicant present herself in July, who, at the same time, in the opinion of the Examiners reaches a sufficiently high standard in the Matriculation Examination, and in the opinion of the Principal of St. Mary's College and the Censor of Home Students offers satisfactory evidence of limited means and general ability and character, it shall be within the discretion of the Principal and the Censor to advertise the Scholarship again for competition in the October Matriculation, or to hold it over until the following July.

6. If for any cause a successful candidate fails to take up her Scholarship, the Principal and Censor may either award it to the candidate next in merit or advertise it again for competition.

[6] Of Hatfield College. [7] Of St. Chad's College.

7. In case the Principal of St. Mary's College and the Censor of Home Students cannot agree as to the course to be adopted either under Clause 5, 6 or 7, the President of the Council shall decide.

8. The Scholar shall come into residence in the October of the year in which the Scholarship is awarded. It shall be tenable for one year, and may be renewed for a second or third year on the recommendation of the examiners, either in a University Examination or in Collections, and subject to the approval of the Principal of St. Mary's College or the Censor of Home Students, as the case may be.

9. The holder of the Scholarship shall reside and be a student in the Durham Division of the University, as a condition of receiving the income of the Scholarship.

PEARS SCHOLARSHIP.

This Scholarship was founded on a bequest made to the Dean and Chapter of Durham, as Governors of the University, by George Pears, of Witton-le-Wear, in a Will dated 31st May, 1898.

The conditions of this Scholarship, as set forth in the Bequest, are:—

1.—That it should be granted to a candidate who has not yet matriculated.

2.—That the elected candidate should begin residence in the University in the term next ensuing after his election.

3.—And that such scholar may follow out his education in the Faculty of (*a*) Arts, or (*b*) Theology, or (*c*) Medicine.

4.—The Scholarship may be tenable for three years; with power to the "University Authorities," in case of misconduct or idleness, to withdraw the Scholarship from any holder of it.

5.—The Donor directs that, though the Scholarship is to be open to all, other things being equal, a preference should be given to a native of Witton-le-Wear or of Bishop Auckland, or of any place within a radius of two miles from either of these places. Candidates must be persons who "but for the help of the Scholarship would not be able to meet the expenses of a University course."

Regulations.

1.—The Examination on which this Scholarship shall be awarded shall be the "Matriculation Examination in Medicine, Science, Letters, and Music." Candidates for the Scholarship must offer English, Latin, Additional Mathematics, Greek (if he proposes to enter under Arts or Theology); or (if he proposes

This Exhibition was founded on a gift to the University of £1,500, made by an anonymous benefactor in 1908.

Regulations.

1.—The Exhibition or Exhibitions shall be held only by students of limited means.

2.—Preference in the election shall be given to candidates who are members of Hatfield College.

3.—The electors shall be the Master and Vice-Master of Hatfield College.

4.—The electors shall decide whether the whole or part of the amount available shall be awarded to any candidate.

5.—The Exhibition shall be paid terminally to the exhibitioner by the University Treasurer, provided that the exhibitioner has kept the term and produces a certificate from the Master and Vice-Master requiring the Treasurer to pay.[13]

6.—Subject to the preceding clause the Exhibition shall be tenable for two years, and may, at the discretion of the Master and Vice-Master, be renewed on the same conditions for a third year.

7.—The Exhibition at present is of the value of £54 a year.

The Pemberton Fund.

This Fund was established in 1846 by the benefaction of Mrs. Pemberton, of Sherburn Hall, in memory of her husband, John Pemberton, Esq., a member of University College. In 1870 the usufruct of the endowment was transferred to the College of Science. Under an agreement made in 1921 between Armstrong College and the Council of the Durham Colleges (J. S. G. Pemberton, Esq., M.A., D.C.L., the great-nephew of the benefactress, being then President of the Council of the Durham Colleges), a moiety of the existing capital will hence-

University Medical Scholarships.

Four scholarships of £25 a year each were set apart in 1856 for students of Medicine, and are tenable for four years by students pursuing their medical studies and not of sufficient standing to proceed to a degree in Medicine.

Regulations.

1.—In ordinary cases such medical scholarships as shall have become vacant shall be filled up at the beginning of Michaelmas Term in each year.

2.—Candidates must produce to the Vice-Chancellor and Senate satisfactory testimonials of character.

3.—Candidates for the medical scholarships shall be those persons who are desirous of being admitted as medical students, or who have not attended more than one term in the College of Medicine, and the successful candidates must pursue their entire curriculum at the University of Durham College of Medicine, Newcastle-upon-Tyne.

4.—The examination shall be the Matriculation Examination of the University, held in September.

5.—The subjects of examination are:—English, Latin, Arithmetic, Algebra, Euclid, Geography, English History, and one, or two, of the three languages—French, Greek, German. The books recommended are given on page 90 *et seq.*

6.—The scholarships shall be tenable by the successful candidates for four years, provided they produce, each term, satisfactory testimonials of character from the Registrar of the College of Medicine, and pass their professional examinations in a creditable manner.

7.—If a scholarship be forfeited from any cause, the Chancellor and Senate shall have power to assign the scholarship for the remaining part of the period to a student not already a scholar, who may be recommended by the Council of the College of Medicine.

LUKE ARMSTRONG SCHOLARSHIP.

The friends of the late Dr. Luke Armstrong, who was a Lecturer in the College for a period of twenty-four years, desiring to testify their esteem and to perpetuate his memory, contributed a sum of £680, which has been invested to found a scholarship in Comparative Pathology.

Regulations.

1.—The scholarship is open to all graduates in Medicine or Hygiene, and to candidates for those degrees who have spent at least two terms at the University.

2.—The scholarship will be awarded at the end of Easter term in each year to the author of the best essay on some subject in Comparative Pathology which has been approved by the Heath Professor of Comparative Pathology.

Candidates must not be more than 30 years of age at the time the essay is presented.

The essay must be type-written or printed and must be received by the Heath Professor not later than the 1st June in any year.

The essay may be illustrated by drawings, preparations and specimens. These together with the successful essay shall become the property of the College.

3.—The successful candidate shall be styled the Luke Armstrong Scholar in Comparative Pathology.

4.—By permission of the Council of the College the scholar may publish his essay.

5.—In the event of no essay of sufficient merit being presented, the scholarship may be awarded to the candidate who, in passing Part I. of the examination for the degree of B.Hy., obtains the highest number of marks in Comparative Pathology, during the year.

Up to and including the year 1897 the scholarship was awarded to the student who passed the best final examination for the degree of Bachelor of Medicine. Subsequently to 1897 the scholarship has been awarded, in the absence of an essay of sufficient merit, on the results of the Comparative Pathology part of the examination for the degree of Bachelor of Hygiene.

GOYDER SCHOLARSHIP.

The interest of the sum of £325, contributed by friends (professional and private) of the late Charles McIvor Goyder, Surgeon, whereby his memory may be perpetuated, and medical students incited to emulate his meritorious example, will be awarded annually to the student who shall most distinguish himself in clinical Medicine and clinical Surgery at the Royal Victoria Infirmary, Newcastle-upon-Tyne.

Regulations.

The scholarship shall be attached to the Royal Victoria Infirmary, Newcastle-upon-Tyne, and be termed the Goyder Scholarship.

The subjects of examination shall be Clinical Medicine and Clinical Surgery.

The scholarship shall be open for competition to students during their fourth and fifth years only of medical study; the scholarship shall not be taken twice by the same student; and no student shall be eligible for examination unless he be a full student, both at the College of Medicine and at the Royal Victoria Infirmary, Newcastle-upon-Tyne.

The examination for the scholarship shall be in the hands of the Honorary Staff of the Royal Victoria Infirmary, Newcastle-upon-Tyne, who shall have power, if the candidates do not show sufficient merit, to withhold the scholarship. In the following year the scholarship not awarded shall be competed for, in addition to the scholarship of that year, but both shall not be held by the same individual.

College Prizes.

In connexion with each of the courses of lectures, etc., prizes are awarded at the end of the term or terms in which the lectures are given, to those students who pass the best examination in the subjects lectured on.

The prizes consist of books, and are awarded to the students who obtain the highest marks in the class examinations, provided they receive not less than 75 per cent. of the marks obtainable.

Students who have attended a first-year's course only, are eligible for the prizes in the junior classes of Anatomy and Dissections, and in Chemistry, Physics, practical Chemistry, practical Physics, and Biology; second-year students in the classes of Physiology, practical Physiology and practical Histology, and in the senior classes of Anatomy and Dissections; third year students in the classes of Materia Medica, Medical Jurisprudence, Public Health, and Pathology and Bacteriology; fourth year students in the classes of Midwifery and Ophthalmology; fourth or fifth year students in the classes of Medicine, Surgery, Applied Anatomy and Therapeutics, and fifth year students in the classes of Operative Surgery, Psychology, Diseases of children, Diseases of the throat, nose and ear, and Diseases of the skin.

Students can only sit for these examinations at the end of the term or terms in which the class has been attended. Students, after attending a second course of Lectures, will not be allowed to compete for these Prizes, except in Medicine and Surgery.

Honours will also be awarded as follows:—First Class Honours corresponding to marks of 75 per cent. and upwards; Second Class Honours to marks of from 65 to 74 per cent.

The Council reserves the right of withholding any scholarship or prize when a satisfactory degree of proficiency is not shown at the examinations, and no scholarship, medal, or prize can be competed for by any students to whom it has already been awarded in a previous year.

FELLOWSHIPS, SCHOLARSHIPS, AND PRIZES.

AT ARMSTRONG COLLEGE.

PART I.—AWARDED ON ENTRANCE.

THE COCHRANE SCHOLARSHIPS.

A sum of £3,000 has been presented to Armstrong College by the former Directors and Shareholders of Messrs. Cochrane & Co., Ltd., for the purpose, in the first instance, of founding two scholarships. Candidates eligible for the scholarships shall be either (*a*) foremen or workmen (including women) employed by the firm of Messrs. Cochrane & Co., Ltd., at the Ormesby Ironworks, Middlesbrough; Stanghow Ironstone Mines, Guisborough; and New Brancepeth Colliery, Durham, on March 31st, 1918, including those who at that time were on Naval, Military or National Service, or (*b*) their children. The scholarships shall be awarded in alternate years to candidates (1) from Ormesby and Stanghow, and (2) from New Brancepeth Colliery, and shall be each tenable for three years, subject to satisfactory attendance, conduct and progress. The successful candidate will be required in each case to enter College at the beginning of the next session after his appointment, and to read for a degree or diploma in any Faculty in which such degree or diploma is granted. In the case of candidates from Ormesby and Stanghow the scholarship shall be of the annual value of £60; in the case of candidates from New Brancepeth Colliery of £45. Intending candidates will be required to send in their names to the Registrar, Armstrong College, *not later than April 30th* of each year, enclosing a statement of their qualifications, together with such credentials and testimonials as they may think necessary, or as may be required by the Council. The scholarships will be awarded on the results of (*a*) the School Certificate Examination, or (*b*) the Higher Certificate Examination of the University of Durham, or (*c*) such other test as the Council of Armstrong College may from time to time ordain. If in any given year there shall be no candidate of sufficient merit the scholarship shall not be awarded, and the income shall be devoted either towards the augmentation of the existing scholarships, the provision of a second scholarship, or in such other manner as Council may determine. When in course of time there are no longer any candidates eligible for these scholarships the capital sum shall be at the disposal of the College for the encouragement, under such conditions as Council may from time to time decide, of study and research in the Faculty of Science, with special reference to the mining of coal or ironstone, the manufacture of iron, or ironfounding.

The Cochrane Scholars.

1919. K. E. Spittle. 1920. S. B. Daglish.

Entrance Exhibitions.

(*a*) *In Arts.*

There will be two exhibitions in Arts, each of the value of £15 *per annum*.

Candidates must have qualified to matriculate.

Exhibitions will be awarded on the results of an examination to be held in June, in *four* out of the following subjects, of which *two* must be languages other than English:—Latin, Greek, Ancient History, English Literature, Modern History, French, German.

Entries, specifying the *four* subjects offered, must be lodged with the Registrar by 30th April in each year.

Exhibitioners may continue to hold their exhibitions for three years, on the recommendation of the Board of Professors.

Two fourth year exhibitions of £15 will be offered, for which all students in Arts will be eligible: they will be awarded on the joint recommendation of the Heads of Departments in Arts.

(*b*) *In Pure Science.*

There will be three exhibitions in Pure Science, each of the value of £15 *per annum*.

Candidates must have qualified to matriculate.

Exhibitions will be awarded on the results of an examination to be held in June, to candidates who do best in one of the following groups of subjects:—(*a*) Mathematical (Pure and Applied Mathematics), (*b*) Physical (Physics and Chemistry), (*c*) Biological (Botany, *and* Zoology *or* Geology).

Entries, specifying the group offered, must be lodged with the Registrar by 30th April in each year.

The tenure of an exhibition for a second or a third year will depend upon the recommendation of the Board of Professors.

(*c*) *In Applied Science.*

There will be two exhibitions in Applied Science, each of the value of £15 *per annum*.

They will be awarded on the results of a special examination to be held in June of each year.

One exhibition will be awarded to a student in Engineering or Naval Architecture, on the results of an examination of a higher standard than that of the Matriculation Examination in three out of the following subjects:—Pure Mathematics, Applied Mathematics, Physics, Mechanical Drawing.

The other exhibition will be awarded to a student in Agriculture, Mining or Metallurgy, on the results of an examination of a higher standard than that of the Matriculation Examination in three out of the following subjects:—Pure Mathematics, Applied Mathematics, Physics, Chemistry, Geology, Botany, Zoology.

Although a candidate may sit the special examination before he is qualified to matriculate no student other than a matriculated student may hold an exhibition.

If in one of the two groups no candidate reaches a sufficiently high standard to justify an award within that group, the examiners shall have power to recommend either that the exhibition be not awarded at all, or that it be transferred for the session in question to the other group and awarded to the second candidate in that group.

Entries specifying the subjects offered and the course of study proposed must be lodged with the Registrar by 30th April in each year.

The tenure of an exhibition for a second or a third year will depend upon the recommendation of the Board of Professors.

THE EARL GREY MEMORIAL SCHOLARSHIPS.

Two scholarships have been established on the Earl Grey Memorial Foundation. They are each of the value of £50 per annum, and are tenable for three years. Under the terms of the Memorial they are open to all candidates who propose to read for either a degree or diploma in the Faculties of Science or Commerce. Intending candidates are requested to apply to the Registrar of the College, *not later than 30th April* of each year and to enclose with their applications statements of their qualifications, together with such credentials and testimonials as they may think necessary. If the College so ordain, they may be required either to submit themselves to an oral or a written examination. If in any given year there shall be no candidates of sufficient merit, the scholarships for that year shall not be awarded, and the income shall be added to the capital sum for the augmentation of the scholarships in future.

The Yarrow Scholarship is of the annual value of £100. It is awarded to engineering apprentices in private firms or Royal dockyards on the results of a special scholarship or bursary examination in Armstrong College, the University of Glasgow, the University of Liverpool, and the Imperial College of Science and Technology, London, in the following subjects:—(1) English, (2) a modern foreign European language, or Latin, or Greek, (3) Mathematics and Additional (or Extra) Mathematics, (4) Mechanics or Physics; and on the results of a special examination—(5) English Essay on some subject connected with ships, and (6) Marine Engineering.

The Weir Scholarship is of the annual value of £150, and is awarded under the same conditions as the Yarrow Scholarship.

Weir Scholar.

1921. Edward Steel.

The Parsons Scholarship is of the annual value of £150, and is awarded under the same conditions as the Yarrow Scholarship.

The John Brown Scholarship is of the annual value of £150, and is awarded under the same conditions as the Yarrow Scholarship.

The R. L. Scott Scholarship is of the annual value of £150, and is awarded under the same conditions as the Yarrow Scholarship.

All the above scholarships are subject to further conditions, full particulars of which may be obtained from the Secretary, Institution of Naval Architects, 5, Adelphi Terrace, London, W.C. 2, to whom all applications should be addressed.

Lloyd's Register Scholarships in Marine Engineering.

Three entrance scholarships, each of the value of £100 per annum, and tenable for three years, have been offered to the College by the Committee of Lloyd's Register of Shipping. One scholarship is open to competition annually to male candidates who are British subjects, and whose age does not exceed 23 years on the 1st October immediately following the examination. Candidates must produce evidence that they have served three years' apprenticeship in a mercantile marine engineering works. Candidates will be required to undergo an examination which must include the following subjects:—

(*a*) English Literature and Composition.

(*b*) French or Spanish or other approved foreign language at the option of the candidate.

(*c*) Mathematics.—Algebra, including Quadratics and Binomial Theorem; Elementary Trigonometry; and Additional Mathematics, viz., Arithmetic with practical application; Geometry of the Triangle, Parallelogram, Circle, and similar figures, including the substance of Euclid Books I-IV and VI, with deductions, and use of logarithmic tables.

(*d*) Mechanics, including elements of Statics, Dynamics and Hydrostatics, and principles of Applied Mechanics.

(*e*) Practical Marine Engineering.

Preference will be given to candidates who have a sound knowledge of English and the selected language. Candidates will be required to appear before a board, who will determine the relative fitness of the candidates to hold the scholarship. This board will consist of the Principal of Armstrong College, the Professor of Marine Engineering, the Professor of Naval Architecture, a nominee of the Faculty concerned, and a nominee of Lloyd's Register of Shipping.

The award of the scholarships will be based on the results of the written examination and on the report of the interviewing board named above. The scholarships are confined to students who propose to enter on the first year of their course at the University. The scholar must read for the degree of Bachelor of Science, specialising in Marine Engineering, and must devote his whole time to the pursuit of his studies during the academical year. The continuation of the scholarship will depend on satisfactory progress being made in the course of studies pursued, as determined by the sessional examination, and on the report of the Professor concerned. The scholarship will be continued during the pleasure of the Committee of Lloyd's Register, and the conditions may be altered from time to time at the discretion of the Committee. Candidates must send in their names to the Registrar of the College *not later than* 1*st September*[3] in each year.

THE WILLIAM BLACK NOBLE MEMORIAL FUND.

This fund will be used in the first instance for the purpose of providing scholarships for day students reading for the degree of B.Com. (The term *student* shall not be taken as excluding those who have taken a degree in some other Faculty in this or any other University.) If no award be made, or, if for any other cause, no payment be made in any year, the amount shall be used for the purposes of research at home or abroad; and, if the fund should cease to be required for scholarships or for research within the Faculty of Commerce, it shall be used to help individual students of the College in such ways as the Council may determine. Each scholarship shall be of the value of £50 per annum tenable for three years, subject to satisfactory reports on conduct and proficiency. The scholarship will be awarded on the results of a special examination held annually in June, but, if there be no candidate of sufficient merit, it will not be awarded. Candidates shall sit for examination in:—

(*a*) General Knowledge.
(*b*) A modern language, *i.e.* (French, German, Spanish or Russian).
(*c*) Mathematics.
(*d*) A science.
(*e*) *One* of the following:—
English.
A modern language not taken under (*b*).
History.
Geography.

Successful candidates for the scholarship must have passed the Matriculation Examination or a recognised equivalent before coming into residence. Candidates shall notify the Registrar of Armstrong College of their intention to compete *not later than* 31*st March* preceding the examination, stating in their application what subjects they intend to offer. The Board of Examiners shall consist of the Professor of Economics and the Heads of all Departments teaching subjects offered at any given examination. A *viva voce* examination of the candidates' work shall be conducted by the Professor of Economics and two other of the examiners.

NORTH-EAST COAST INSTITUTION OF ENGINEERS AND SHIPBUILDERS' SCHOLARSHIP.

This scholarship is of the annual value of £100 and is tenable for two years. It is awarded in September on the results of a special examination conducted by the College simultaneously with the Intermediate Examination for the degree of B.Sc., in any *three* of the following subjects:—

(1) Pure Mathematics.
(2) Applied Mathematics.
(3) Physics.
(4) Practical Plane and Solid Geometry.

Every candidate shall satisfy the Council of the Institution that he has already passed an examination of approved matriculation standard, but entries for the scholarship will be received from candidates who have not passed such an examination, provided they undertake to enter for an examination of approved matriculation standard in time for the results to be communicated to the Council of the Institution at the same time as those of the Scholarship examination. Every candidate shall be a British subject and a member of the graduates section of the Institution of not less than one year's standing; and shall have served or be serving an apprenticeship on the North-East Coast. The successful candidate shall undertake to remain a member of the aforesaid graduate section during the tenure of the scholarship, and shall attend a college or technical school on the North-East Coast of England. The scholarship shall not be held simultaneously with any other scholarship, bursary, or prize awarded in money.

Candidates must forward a written application on the prescribed form, on or before the 1st day of August,[5] to the Secretary, North-East Coast Institution of Engineers and Shipbuilders, Bolbec Hall, Newcastle-upon-Tyne, from whom further particulars may be obtained.

PART III.—TENABLE DURING POST-GRADUATE STUDY.

THE CAMERON-SWAN WEARDALE LEAD CO., LTD., SCHOLARSHIP.

The Weardale Lead Company, Limited, offer a scholarship of the value of £60, tenable for one year. The scholarship will be awarded annually to the student who, in the opinion of

the Board of Examiners, stands highest in the whole of the three years' examinations for the degree of B.Sc. in Mining, or, failing a satisfactory candidate for the degree, it will be awarded to a candidate taking the College diploma in Mining who in the opinion of the Board of Examiners stands highest in the Final Examination.

Entries must be lodged with the Registrar by 30th April in each year.

College Fellowship.

This fellowship is of the annual value of £150, and is tenable for two years, in exceptional circumstances for three years.

Candidature is open to any graduate of the University of Durham who studied in Armstrong College during the final two years of his curriculum for the degree of Bachelor. The holder must engage in advanced study or research to the satisfaction of the Council, either in the College itself or in some other approved place. This fellowship may not be held concurrently with any other fellowship, scholarship or like emolument, without leave of the Council, and the fellow may not, without leave of the Council, engage in any remunerative employment during this tenure of the fellowship.

Notice of candidature in any year must be given to the Registrar by 30th April. A candidate must specify his age, his degree, any honours or prizes he may have gained, the line of advanced study or research he proposes to pursue, and the place in which he desires to pursue it, and may furnish any such other information as to his qualifications as he may deem advisable.

Appointment to the fellowship is made in June or July by the Council of the College, on the recommendation of the Board of Professors. In making an award the Council will consider the candidate's place in examination lists, his general capacity and aims, and any original work he has already done. No fellowship is awarded unless the Board of Professors recommends a candidate as a person suitable to carry out the intentions of the foundation.

A fellow is required to make a full report of his proceedings to the Board of Professors before 1st June in each year of his tenure of the fellowship.

If no fellowship is awarded in any one year an additional fellowship may be awarded in the following year.

College Research Studentships.

Two research studentships are offered for competition annually in June.

They are each of the value of £75, and are tenable for one year.

Candidature is open to any graduate of the University of Durham who studied in Armstrong College during the final two years of his curriculum for the degree of Bachelor. The holders must engage in advanced study or research in the College itself, to the satisfaction of the Council. A studentship may not be held concurrently with any other fellowship, scholarship or like emolument without leave of the Council, and the students may not, without leave of the Council, engage in any remunerative employment during their tenure of the studentships.

Notice of candidature in any year must be given to the Registrar by 30th April. A candidate must specify his age, his degree, any honours or prizes he may have gained, and the line of advanced study or research he proposes to pursue, and may furnish any such other information as to his qualifications as he may deem advisable.

Appointment to the studentships is made in June or July by the Council of the College, on the recommendation of the Board of Professors. In making an award the Council will consider the candidate's place in examination lists, his general capacity and aims, and any original work he has already done. No studentship is awarded unless the Board of Professors recommend a candidate as a person suitable to carry out the intentions of the foundation.

A student is required to make a full report of his proceedings to the Board of Professors before the 1st of June in the year of his tenure of the studentship.

If no studentship, or only one studentship, is awarded in any one year, one or more additional studentships may be offered in the following year.

Daglish Fellowship.

This fellowship is of the value of about £120 per annum, is tenable for one year, and renewable for a second year under exceptional circumstances.

Its object is to enable the holder to spend a period of at

least ten calendar months in travelling, chiefly in foreign mining districts, so as to enable him to enlarge his technical experience.

It is awarded to a Mining student, of not less than 20 years of age, who need not necessarily be a student of this College.

Full information may be obtained from the Secretary, North of England Institute of Mining and Mechanical Engineers, Neville Hall, Newcastle-upon-Tyne, to whom applications must be sent by 1st December of each year.

The election to the fellowship will be made in January.

ROYAL COMMISSION FOR THE EXHIBITION OF 1851 SENIOR STUDENTSHIPS.

In place of the former 1851 Exhibition Science Research Scholarships, the Commissioners have instituted a scheme of Senior Studentships, with a view to giving a few selected students of exceptional promise and proved capacity for original work the opportunity of devoting their whole time for a period of not less than two years to the prosecution of scientific research. The Studentships will be of the annual value of £400; there will normally be five available each year for the British Universities. The student will be required to devote himself to research in some branch of Pure or Applied Science.

Graduates of the University of Durham wishing to be considered for a Senior Studentship should apply to the Registrar, Armstrong College, *not later than 31st March in each year.*

1851 EXHIBITION POST-GRADUATE RESEARCH SCHOLARSHIP IN NAVAL ARCHITECTURE.

This scholarship which is of the annual value of £250 for two years is awarded through the Institution of Naval Architects on the recommendation of Armstrong College, the Royal Naval College, Greenwich, the University of Glasgow, and the University of Liverpool. The scholar must be a graduate of an approved university or college, who has taken a course of study in Naval Architecture with marked distinction, and be under the age of 30 years. The scholar must engage exclusively in research work at some approved institution during the tenure of the scholarship.

1851 Exhibition Industrial Research Bursaries.

The Royal Commissioners for the above may allot one or more bursaries to Armstrong College annually.

The scheme of industrial bursaries is designed for the assistance of young men who, after a course of training in a University of approved Technical College, desire to take up engineering, chemical or other industrial work.

These bursaries are intended, not to facilitate the continuance of collegiate studies by means of post-graduate work, but to enable suitable applicants to tide over the period between their leaving College and obtaining remunerative employment in industry.

The value of the bursary will depend on the circumstances of the holder, but will as a rule not exceed £150 a year.

A bursar will be elected in the first instance for one year, but the tenure of his bursary will ordinarily be prolonged a second year provided that the Commissioners are satisfied with the work done by the bursar during his first year.

In special circumstances a bursary may be renewed for a third year.

The appointments to the bursaries will be made by the Commissioners from among candidates recommended by the authorities of certain selected Universities and Technical Schools. In the consideration of these recommendations great weight will be given to evidence that a candidate has the practical ability likely to lead to his advancement in industrial work; academic success alone is not a sufficient recommendation.

The candidate must be a British subject under the age of 25.

The candidate must have been a *bona fide* student of Science for a term of three years.

The candidate must further satisfy the Commissioners:—

(*a*) That he has obtained, or can, within one month of election, obtain, an industrial post to be approved by them.

(*b*) That he is in need of pecuniary assistance to enable him to hold such a post.

A bursar may, if the Commissioners approve, spend part of the tenure of his bursary in studying industrial process or processes in works either at home or abroad.

No bursar shall enter a firm as a premium pupil without the special consent of the Commissioners.

A bursar must submit to the Commissioners, on the expiration of each year of his bursary, a satisfactory report of his work from his employers.

[If and when a bursary is allotted to Armstrong College a notice will be put on the notice boards.]

THE EARL GREY MEMORIAL FELLOWSHIP.

This fellowship is of the value of £300.

It is awarded annually, and is tenable for one year. Under exceptional circumstances a successful candidate may be re-elected for a second year, but for no further period.

Candidates must be graduates of the University in Science or Commerce, who desire to pursue a further course of study or research either in England or abroad.

The fellowship will be awarded on the result of such tests or under such conditions as the Council of the College may from time to time determine. The successful candidate will be required to submit for approval a scheme stating the kind of work in which he proposes to engage, and the place or places in which this is to be carried out. He will also be required to report from time to time as to the nature and progress of his work, and to submit, when requested to do so, a thesis on the subject selected, or such evidence of progress as the College may from time to time determine.

If there be two candidates of equal merit, the College shall have power to divide the emoluments of the fellowship between them; but if in any year there be no candidate of sufficient merit, the fellowship for that year shall not be awarded, and the income shall be added to the capital sum for the augmentation of the fellowship in future.

Entries must be lodged with the Registrar by *30th April* in each year.

JOHNSTON CHEMICAL SCHOLARSHIP AND PRIZE.

This scholarship, of the value of £145 and tenable for one year, together with a prize in books of the value of £5. was founded by the trustees of the late Professor Johnston, M.A., F.R.S. (L. and E.), to promote advanced study and research in Chemistry.

The competition will be restricted to Bachelors in Science of any British University, of not more than three years' standing from the date of graduation.

Candidates will be required to submit evidence of their previous training and of their ability to conduct an original chemical investigation.

The scholarship will be awarded on the results of an examination in Chemistry, with Crystallography or Mineralogy.

The scholarship will be held on the condition that the successful candidate shall attend Armstrong College for not less than twenty-four hours per week throughout the session, and shall devote himself to some subject of chemical enquiry approved by the Professor of Chemistry.

The examination will be held annually, about the commencement of each session.

MINING SCHOLARSHIP.

A scholarship of £50, tenable for one year, may be awarded in June to the best student taking his B.Sc. degree in Mining or Metallurgy, to enable him to take a practical course in mines or works in this country or abroad, under conditions approved by the donors, the Institution of Mining and Metallurgy, London.

Entries must be lodged with the Registrar by 30*th April* in each year.

THE SIR WILLIAM STEPHENSON STUDENTSHIP.

This studentship has been founded by Miss Kate Stephenson in memory of her father, Sir William Stephenson, who was for many years a member of the College Council.

It is of the value of £150 per annum, and is tenable for one year; under exceptional circumstances the successful candidate may be nominated for a second year, but for no longer period.

Candidates must be graduates in the Faculty of Arts who intend to pursue a further course of study or research, either in England or abroad. They will be required to submit to the College a scheme of the study or research on which they propose to engage. At the close of the Epiphany term they shall report on the progress of their work, and shall be required before the last payment of the studentship is made to present the results of their work in the form of a thesis.

The student may not, without the consent of the Council of the College, engage in any remunerative employment during the tenure of the Fellowship.

The award shall be made by the Board of Professors on the recommendation of the Heads of Departments in the Faculty of Arts.

Applications should be lodged with the Registrar by 30*th April* in each year.

SIR WILLIAM WHITE POST-GRADUATE RESEARCH SCHOLARSHIP.

This scholarship is of the annual value of £150 for two years and is awarded by the Institution of Naval Architects on the recommendation of the following Institutions:—the Royal Naval College, Greenwich, the Imperial College of Science and Technology, London, the University of Glasgow, Armstrong College, the University of Liverpool. The scholar must be under 30 years of age, have been a student of Naval Architec-

ture in Marine Engineering and have taken a course of study with marked distinction in an approved university or college.

Scholars must at some time have been employed in professional shipbuilding or engineering work, and during the tenure of the Scholarship must engage in research work in problems connected with the design and construction of ships and their machinery at some approved institution at home or abroad.

The Scholarship will be awarded again in 1922.

ELLEN PHŒBE WRIGHT PRIZE.

The Ellen Phœbe Wright Prize in Education was founded by Emeritus-Professor Mark R. Wright in 1921 in memory of Mrs. Wright, who was the first woman member of the staff of Armstrong College (then the Durham College of Science).

The prize is the income from £300 and is of the annual value of £15 or thereabouts. It will be awarded to a woman student for the best essay on some special subject of school work (see Regulations for the diploma in the Theory and Practice of Teaching, and for Education as a subject of the Final Examination for the degree of B.A. or B.Sc.). It is a condition of the award that the candidate must in all other respects have satisfied the examiners in the diploma or the Final degree Examination, and must have fulfilled all regulations as to practical teaching, and obtained in this subject a mark above the average.

If in any year there is no essay of sufficient merit no prize shall be awarded, but an additional prize may be awarded in a subsequent year.

The following satisfied the Examiners in *Three* subjects :—

Gibson, D.[11]

The following being a candidate for Mathematical Honours, satisfied the Examiners in two pass subjects:—

Mulcahy, W.[2]

EXAMINATIONS IN MEDICINE.

FOR THE DEGREE OF DOCTOR OF MEDICINE.

EPIPHANY TERM, 1922.

Practitioners of fifteen years standing.

The following satisfied the Examiners :—

Lewis, D. J.
Meynell, J. L.

EASTER TERM, 1922.

The following Candidates satisfied the Examiners :—

Clark, G. A., M.B. B.S.
Chatterji, S. R., M.B., B.S. (*in absentia*),
Forrest, W. D., M.B., B.S.
Gover, J. M., M.B. B.S.
Hughes, J. R., M.A., M.B., B.S.
Lake, H. A., M.B.
Pirrie, I. M., M.B., B.S.
Welch, R., M.B., B.S., B.Sc.
Young, S. K., M.B., B.S.

Practitioners of fifteen years standing.

The following candidates satisfied the Examiners :—

Attwood, R. D.
Brownlee, A.
Prichard, J. Ll.
Rossiter, C. B.

EXAMINATION FOR THE DEGREE OF MASTER OF SURGERY.

EASTER TERM, 1922.

The following candidates satisfied the Examiners :—

FIRST CLASS HONOURS.

Gilmour, J.

PASS LIST.

Jones, A. B.
Lloyd, G. E.

FINAL EXAMINATION FOR THE DEGREES OF BACHELOR OF MEDICINE AND BACHELOR OF SURGERY.

EPIPHANY TERM, 1922.

The following satisfied the Examiners :—

Second Class Honours.

Locke, R. W.
Crowe, W. N.
Hall, G. A. M.
Coltman, J. F.

Pass List.

Angus, A.
Benjamin, F. J.

Wilson, G.
Wilson, H. A.
Wylam, E. H.
Young, E. L.

EXAMINATION FOR THE DEGREE OF BACHELOR OF HYGIENE.

EASTER TERM, 1922.

The following candidates satisfied the Examiners :—

Hurrell, G., M.B., B.S.
Stenhouse, A. M., M.B. B.S.

EXAMINATION FOR THE DILPOMA IN PUBLIC HEALTH.

EASTER TERM, 1922.

The following candidates satisfied the Examiners :—

Hurrell, G., M.B. B.S.
Stenhouse, A. M., M.B. B.S.

THIRD EXAMINATION FOR DEGREES OF BACHELOR OF MEDICINE AND BACHELOR OF SURGERY.

SEPTEMBER, 1921.—SPECIAL EXAMINATION.

The following satisfied the Examiners :—

Anderson, E. M.
Basham, S.
Bell, D. C.
Brown, W. A.
Henry, L. S.
Isaacs, B. R.

ELEMENTARY ANATOMY AND BIOLOGY.

Jackson, D. S.
(Passed Chemistry and Physics in First B.Sc. Examination).

FINAL EXAMINATION FOR THE LICENCE IN DENTAL SURGERY.

EPIPHANY TERM, 1922.

The following satisfied the Examiners:—

Second Class Honours.

Slack, J. N.

Pass List.

Hutson, S.
Mackay, S. G.
Reay, R. H.
Vasey, J. W.
Williams, G.

EASTER TERM, 1922.

The following candidates satisfied the Examiners :—

Clare, G.
Cowden, W. A.
Moor, H.
Peters, N.
Walker, W. N.

THIRD EXAMINATION FOR THE LICENCE IN DENTAL SURGERY.

EPIPHANY TERM, 1922.

The following satisfied the Examiners :—

Second Class Honours.

Joseph, J. H.

Pass List.

Benjamin, B.

EASTER TERM, 1922.

The following candidates satisfied the Examiners :—

Fleming, W. L.
John, U. M.
Page, G. S.
Phillips, E. B.
Robertson, A. S.

SECOND EXAMINATION FOR THE LICENCE IN DENTAL SURGERY.

EPIPHANY TERM, 1922.

The following satisfied the Examiners :—

First Class Honours.

Catcheside, G. A.

Pass List.

Dewar, L. G.
Gibson, D.
Picton, A. T.
Robinson, E.

EASTER TERM, 1922.

The following candidates satisfied the Examiners :—

SECOND CLASS HONOURS.

Collins, W. J.

PASS LIST.

Daniels, J. E.
Gale, W. A.
Wilkinson, N.

FIRST EXAMINATION FOR THE LICENCE IN DENTAL SURGERY.

SEPTEMBER, 1921.

Special Examination.

The following satisfied the Examiners :—

Clark, A. D.
Clark, G. G.
Dewar, L. G.
Gale, W. A.
Hails, C. W.

EPIPHANY TERM, 1922.

The following satisfied the Examiners :—

Second Class Honours.

Jones, A. C.

Pass List.

Bruce, F. G. W.
Moody, R.
Park, H.

EASTER TERM, 1922.

The following candidate satisfied the Examiners :—

Eddy, P. W.

EXAMINATIONS IN SCIENCE.

EXAMINATION FOR THE DEGREE OF M.Sc.

EASTER TERM, 1922.

The following were recommended for the Degree of M.Sc. :—

Akester, A. G.
Arthur, J. C.
Calderwood, J.
Crowe, T. A.
Dorey, S. F.
Hill, A.
Robson, A. H.
Telfer, E. V.
Watson, S. J.

FINAL EXAMINATION FOR THE DEGREE OF B.Sc. IN PURE SCIENCE WITH HONOURS.

SEPTEMBER, 1921.

Auxiliary Subjects.

The following satisfied the Examiners in subjects as stated :—

Duncan, H. G. (*Physics*).

Shaw, G. (*Physics, Botany*).

EASTER TERM, 1922.

The following were classified as under :—

First Class.

Boll, S. F. (*Botany*).
Davis, R. (*Physics*).
Halkier, W. W. L. (*Chemistry*).
Hewitt, J. T. (*Chemistry*).
Inkster, J. J. (*Chemistry*).
Linnell, W. H. (*Chemistry*).
Reynolds, E. R. B. (*Chemistry*).
Westgarth, G. C. (*Chemistry*).

Second Class.

Anderson, W. R. (*Chemistry*).
Bennison, R. A. (*Chemistry*).
Boll, W. H. (*Physics*).
Bruce, F. R. (*Chemistry*).
Clarkson, W. (*Physics*).
Crawford, A. (*Chemistry*).
Dawson, N. (*Chemistry*).
Dee, G. P. (*Chemistry*).
Duncan, H. G. (*Chemistry*).
Gibson, J. P. (*Chemistry*).
Hodge, M. B. (*Geology*).
Hopkins, W. (*Geology*).
Kellett, J. G. (*Geology*).
Middlemas, A. (*Geology*).
Myers, G. N. (*Chemistry*).
Neilson, M. A. (*Botany*).
Rowell, G. (*Physics*).
Sayce, L. A. (*Chemistry*).
Scott, P. V. (*Chemistry*).
Shaw, G. (*Chemistry*).
Smailes, J. (*Physics*).
Stuart, R. G. (*Geology*).

Third Class.

Bell, H. V. (*Chemistry*).
Grave, P. (*Physics*).
House, S. (*Physics*).
King, E. W. (*Physics*).
Peaps, M. (*Chemistry*).

Recommended for the Pass Degree :—

Blythman, T. P. (*Physics*).
Forster, C. (*Chemistry*).

AUXILIARY SUBJECTS.

The following satisfied the Examiners in subjects as stated :—

Biggs, E. (*Physics, Botany*).
Birkett, L. C. W. (*Physics, Geology*).
Blaylock, A. F. (*Mathematics, Chemistry*).
Brown, W. (*Physics, Geology*).

Brown, J. (*Physics, Geology*).
Chapman, M. (*Mathematics, Chemistry*).
Charlton, W. (*Mathematics, Physics*).
Cook, A. L. (*Mathematics, Chemistry*).
Cook, D. (*Chemistry*).
Cooper, A. (*Mathematics, Physics*).
Daglish, S. F. B. (*Physics*).
Darke, C. W. (*Mathematics, Physics*).
Dewhirst, N. (*Physics, Geology*).
Gold, A. (*Mathematics, Chemistry*).
Green, R. A. (*Mathematics, Physics*).
Henderson, I. (*Physics, Chemistry*).
Hodgson, T. R. (*Mathematics, Physics*).
James, W. R. (*Mathematics*).
Lee, G. G. (*Mathematics, Chemistry*).
Lowther, W. M. (*Physics, Chemistry*).
Mewse, E. (*Mathematics, Chemistry*).
Mills, G. W. (*Mathematics, Chemistry*).
Nichols, J. E. (*Agricultural Botany, Agricultural Chemistry, Anatomy and Physiology of Farm Animals*).
Norris, J. H. (*Mathematics, Physics*).
Peart, J. S. (*Mathematics, Physics*).
Peat, S. (*Mathematics, Physics*).
Rimer, E. (*Mathematics, Chemistry*).
Robinson, A. (*Mathematics, Chemistry*).
Rule, W. (*Mathematics, Chemistry*).
Saunders, J. A. (*Mathematics, Physics*).
Short, A. W. (*Chemistry*).
Smith, J. M. (*Mathematics, Physics*).
Spall, J. H. (*Mathematics, Chemistry*).
Stephenson, G. E. (*Mathematics, Physics*).
Stephenson, W. (*Mathematics, Chemistry*).
Taylor, W. (*Mathematics, Chemistry*).
Thomson, M. G. (*Mathematics, Physics*).
Thurston, A. J. (*Mathematics, Physics*).
Tranter, D. J. (*Physics, Chemistry*).
Watson, H. F. (*Physics, Mineralogy*).
Willis, N. (*Mathematics, Physics*).
Wray, P. R. (*Physics*).
Yeal, S. P. (*Mathematics, Physics*).

EXAMINATION QUALIFYING TO READ FOR HONOURS IN PURE SCIENCE.

The following were recommended to read for Honours in subjects as stated :—

Biggs, E. (*Chemistry*).
Blaylock, A. F. (*Physics*).
Charlton, W. (*Chemistry*).
Cooper, A. (*Chemistry*).

Darke, C. W. (*Chemistry*).
Gold, A. (*Physics*).
Mewse, E. (*Physics*).
Norris, J. H. (*Chemistry*).
Peat, S. (*Chemistry*).
Rimer, E. (*Physics*).
Saunders, J. A. (*Chemistry*).
Thomson, M. G. (*Chemistry*).
Willis, N. (*Chemistry*).
Wray, P. R. (*Chemistry*).

The following were NOT recommended to read for Honours in Pure Science, but were allowed the Intermediate Examination :—

Cubey, D. R.
Hollins, W. J.

FINAL EXAMINATION FOR THE PASS DEGREE OF B.Sc. IN PURE SCIENCE.

(OLD REGULATIONS).

The following satisfied the Examiners in Chief Subjects as stated :—

Armstrong, S. (*Physics, Geology*).
Barron, G. (*Mathematics, Physics*).
Brown, M. A. W. (*Chemistry, Metallurgy*).
Brown, W. L. (*Chemistry, Geology*).
Donaghy, J. J. (*Chemistry, Geology*).
Donald, A. (*Chemistry, Botany*).
Floyd, K. (*Botany, Zoology*).
Hall, A. L. (*Mathematics, Physics*).
Hornsby, W. V. (*Physics, Chemistry*).
Hudson, T. B. (*Mathematics, Physics*).
Hunter, D. (*Chemistry, Geology*).
McDonald, M. A. (*Physics, Botany*).
Murray, H. L. (*Chemistry, Geology*).
Nightingale, T. W. (*Physics, Geology*).
Richardson, T. R. (*Physics, Geology*).
Ritson, M. I. (*Chemistry, Botany*).
Scholefield, A. (*Physics, Geology*).
Secker, J. (*Zoology, Physiology.*)
Sharp, M. (*Physics, Chemistry*).
Slee, W. (*Physics, Botany*).
Stavers, R. (*Chemistry, Geology*).
Stephenson, E. (*Mathematics, Physics*).
Sudder, J. F. (*Physics, Chemistry*).
Sumner, W. (*Mathematics, Physics*).
Thompson, W. (*Physics, Chemistry*).
Thompson, M. E. (*Physics, Chemistry*).
Thompson, J. H. (*Physics, Chemistry*).
Townsend, F. O. (*Chemistry, Metallurgy*)
Wigham, J. N. (*Mathematics, Physics*).
Willey, E. J. B. (*Chemistry, Geology*).
Wilson, R. M. (*Mathematics, Physics*).

The following satisfied the Examiners in third subject as stated :—

Brown, W. L. (*Education*).
Daws n, W. A. (*Physics*).
Hall, A. L. (*Education*).
Pearson, R. A. (*Education*).
Stavers, R. (*Education*).
Taylor, C. W. (*Education*).
Weddell, E. T. (*Education*).
Wigham, J. N. (*Education*).

SECOND EXAMINATION FOR THE PASS DEGREE OF B.Sc. IN PURE SCIENCE.

September, 1921.

Chief Subjects.

The following satisfied the Examiners in Chief Subjects as stated :—

Armstrong, S. (*Physics, Geology*).
Clayton, T. (*Mathematics, Physics*).
Curry, C. N. (*Chemistry, Botany*).
Wallace, C. W. (*Mathematics, Physics*).

Third Subjects.

The following satisfied the Examiners in Third Subjects as stated :—

Curry, C. N. (*Physics*).
Hall, W. (*Mathematics*).
Platts, F. N. (*Mathematics*).
Ritson, M. I. (*Mathematics*).
Scholefield, A. (*Mathematics*).
Thomas, S. (*Zoology*).
Todner, A. W. (*Physics*).
Wilkinson, H. R. (*Physics*).

Easter Term, 1922.

The following satisfied the Examiners in Chief Subjects as under :—

Hill, R. McG. (*Chemistry, Geology*).
Thomas, S. (*Physics, Chemistry*).

The following satisfied the Examiners in the Third Subject as stated :—

Hill, R. McG. (*Mineralogy*).

INTERMEDIATE EXAMINATION FOR THE DEGREE OF B.Sc. IN PURE SCIENCE.

September, 1921.

The following satisfied the Examiners in the whole examination :—

Bamlett, E. M.

Supplementary List.

The following satisfied the Examiners in subjects as stated :—

Armstrong, W. J. (*Geology*).
Dowson, P. (*Geology*).
Robinson, A. (*Mathematics*).
Ruddick, W. C. (*Geology*).
Rutherford, G. S. (*Mathematics*).
Scott, W. (*Chemistry*).
Tuff, J. H. (*Geology*).

Easter Term, 1922.

The following satisfied the Examiners in the whole examination :—

Division I. (in order of merit).

Robson, R.
Conn, A.
Burn, R. D.
Dunn, W. P.

Pass (in alphabetical order).

FINAL EXAMINATION FOR THE DEGREE OF B.Sc. IN APPLIED SCIENCE WITH HONOURS.

EASTER TERM, 1922.

The following satisfied the Examiners :—

First Class.

Stead, H. V. (*Mechanical Engineering*).
Taylor, J. L. (*Naval Architecture*).

Second Class.

Batie, R. (*Mechanical Engineering*).
Bell, J. (*Electrical Engineering*).
Butterfield, J. L. (*Naval Architecture*).
Tutin, J. (*Naval Architecture*).

THIRD EXAMINATION FOR THE DEGREE OF B.Sc. IN APPLIED SCIENCE, WITH HONOURS.

The following satisfied the Examiners :—

MINING.

Pedelty, J. F.

SECOND EXAMINATION FOR THE DEGREE OF B.Sc. IN APPLIED SCIENCE, WITH HONOURS.

The following satisfied the Examiners :—

METALLURGY.

Scoular, G.

FINAL EXAMINATION FOR THE PASS DEGREE OF B.Sc. IN APPLIED SCIENCE.

PASS LIST.

The following satisfied the Examiners in the whole examination :—

Agriculture.

Campbell, K. W. D.

INTERMEDIATE EXAMINATION FOR THE DEGREE OF B.Sc. IN APPLIED SCIENCE.

SEPTEMBER, 1921.

The following satisfied the Examiners in the whole examination :—

Gledson, W. R.
Mullens, H. H.

Supplementary List.

The following satisfied the Examiners in subjects as stated :—

Bramble, H. (*Mathematics*).
Horn, H. T. (*Mathematics, Physics, Applied Mechanics and Mechanical Drawing*).
Howden, I. A. (*Mathematics*).
Hunter, A. C. (*Mathematics*).
Jardine, T. C. (*Mathematics*).
Mordue, E. (*Chemistry*).
Musgrave, W. L. (*Mathematics*).
Neasham, G. W. (*Mathematics*).
Palmer, B. I. (*Mathematics*).
Watson, L. (*Mathematics*).

External Candidates.

The following satisfied the Examiners in the whole examination and are recommended to read for Honours :—

Laidlaw, E.
Nixon, S. W.
Pelton, F.
Scoular, G.

Easter Term, 1922.

Pass List.

The following satisfied the Examiners :—

Division I. (in order of merit).

Gill, R.
Parker, J.
Mitchell, A.
Thomas, E. A. D.
Greensitt, J. I.

REGULATIONS OF THE DURHAM COLLEGES.

TITLE I.

OF ADMISSION.

1.—Candidates for admission as students in Arts shall be required to pass an approved School Certificate Examination or the Matriculation Examination in such subjects as Council shall from time to time determine. The Matriculation Examination shall be conducted by examiners appointed by the Council of the Durham Colleges.

2.—Any student of the University of Durham who has passed the Final Examination for the Licence in Theology, and has produced, if required, satisfactory testimonials of character, shall be admissible as a student in Arts.

Anyone who has completed a course of study and examinations qualifying him for the Licence in Theology at any of the following Theological Colleges:—St. Aidan's, St. Augustine's, Burgh, Chichester, Cumbrae, Dorchester, Edinburgh, Gloucester, Highbury, Islington, Jamaica, St. John's College (Armidale, N.S.W.), Lichfield, Lincoln, Moore College (Sydney), Queen's College (St. John's, Newfoundland), Salisbury, Selwyn College (Dunedin), Truro, Warminster, Bishop Wilson School (Isle of Man), the Theological Department of King's College, London, or the Theological Department of Queen's College, Birmingham, and has produced satisfactory testimonials of character, shall be admitted as a student in Arts, provided that at the time of his course such college was connected with the University. Such a student, in order to keep terms, must have been admitted to the Licence in Theology either before or in the course of his first term of residence as a student in Arts.

3.—Any student of the University of Durham, who has passed the examination for the degree of Bachelor of Arts, and has produced, if required, satisfactory testimonials of character, shall be admissible as a student for the Diploma in Theology.

4.—Anyone who has passed the examination for the degree of B.A., or any higher degree, at another University, and has produced satisfactory testimonials of character, shall be admissible as a student for the Diploma in Theology, provided that the examination for that degree is of a character similiar to that required at this University.

5.—Candidates for admission as students in Music must have previously satisfied examiners appointed by the Council in the prescribed subjects of examination, unless they have passed an examination recognised as equivalent.

TITLE II.

OF THE LICENSING OF HALLS AND HOUSES FOR THE RECEPTION OF STUDENTS.

1.—Halls and Houses may be opened for the reception of students by licence from the Council of the Durham Colleges.

2.—No such licence shall be granted unless the Hall or House is under the immediate care of a Master or other chief officer, of the degree of Master of Arts at least. The Master, or other chief officer, may or may not be assisted by a Council. The President of the Council of the Durham Colleges shall either be Visitor of any such Hall or House, or preside in it, according to the terms of the licence.

3.—The buildings shall in every case be described, and the conditions stated, in the licence, which shall be null and void if the buildings be changed, or if any of the conditions be disregarded.

4.—Any licence may be revoked, and any Master or other officer may be removed by the Council of the Durham Colleges; an appeal being in every case open to the Visitor.

TITLE III.

OF DISCIPLINE.

1.—In Durham the public Divine Services of the University shall be those of the Cathedral, but attendance at such services shall not be reckoned for the purpose of keeping term. A record of the attendance of resident members of the University *in statu pupillari* at Morning Chapel on week-days shall be kept, but such a Service shall not be reckoned as one of the occasions upon which attendance is required for the keeping of term as provided in Title IV.

2.—The resident members of the University shall wear such academical dress as shall be appointed by Senate in all public places between the hours of 8.45 a.m. and 1 p.m. and after dusk and at the services of the Cathedral.

3.—No resident member of the University who is *in statu pupillari*, and who is a resident member of any recognised College, Hall, or House, shall reside outside its precincts save by leave of the Head of the College, Hall, or House.

4.—Men students for the Degree of B.A. must reside either in a College or Hall, or with parents or guardians in the City of Durham or elsewhere, or, provided they are not less than twenty-three years of age, in some house or lodging approved by the Praelector and the Censor of Unattached Students.

5.—The residence of women students attending lectures in Durham shall be kept either (*a*) in St. Mary's College, or (*b*) with parent or friend approved by the Council of the Durham Colleges, or (*c*) in St. Hild's College, Durham.

6.—The gates of every College, Hall, or House, shall be shut at night-fall; and an account shall be kept of all students who go in and out after that time.

TITLE IV.

OF KEEPING TERMS IN DURHAM.

1.—Save as provided in the following paragraph, no student shall be certified by the Praelector to have kept any term who has not attended upon all required occasions on forty week-days between the first and last Mondays in term (both inclusive).

A student who has commenced keeping term shall not be held to have lost any days in that term on which he may have been excused from attendance by Council, or may, on the evidence of a medical certificate accepted by the Praelector, have been prevented by illness from attendance.

2.—If a Member of the University has been prevented by illness or other urgent cause from keeping any term, that term may be granted by grace of Senate on the proposal of the Council, provided that not more than one term be so granted to any individual in any one academical year.

3.—At the end of term the Praelector shall issue certificates of having kept the term to those students who are then taking degrees, and to other students at the beginning of the following term.

TITLE V.

OF ATTENDANCE AT LECTURES.

1.—Every Member of the University shall be admissible to any lecture in the ordinary course of instruction, on paying the terminal tuition fee.

2.—Any person, whether he be a member of the University or not, may be admitted by leave of the Council and subject to the approval of the Lecturer to attend any particular course of lectures, on paying to the chest of the Durham Colleges such fee as the Council shall direct.

3.—The Professor, Reader, or Lecturer, shall in every case have the power of excluding any person from his class, subject to an appeal to the Council of the Durham Colleges.

TITLE VI.

OF THE PRESIDENT.

1.—The President shall be elected at the first meeting of Council in the Easter Term, and shall enter upon his office on the first day of the Long Vacation. He shall hold office for a period of five years and shall be eligible for re-election. Should the President vacate office during the course of an academical year his successor shall be appointed for the remainder of that year.

2.—There shall be a Senior and a Junior Vice-President, appointed from among members of Council by the President, to hold office for one academical year, one of whom shall preside at meetings of the Council in his absence. They shall also exercise such other of his powers as he may from time to time request them to perform.

3.—The President, or in his absence a Vice-President nominated by him, shall preside at Collections.

4.—The President shall have power to dispense any member of the teaching staff from lecturing for brief periods in cases of urgency, and temporarily to sanction any arrangements that may be necessitated thereby.

5.—The President shall be the Visitor of any Hall or House opened by Licence of the Council.

6.—The President may, on application from the Head of a House, Hostel, or body of Unattached Students in the Durham Division, rusticate or (with the approval of Council) expel a student guilty of misconduct.

7.—The President shall be an *ex-officio* member and Chairman of (*a*) the Board of Curators of the Library, (*b*) the Board of Curators of the Museum, (*c*) the Board of Curators of the Observatory, and shall, if present, preside at the meetings of these Boards.

8.—The President shall be *ex-officio* a member and Chairman of all Committees of Council.

9.—In matters which are not provided for by the Regulations of the Council, and in which action is necessary before Council can be consulted, the President shall have power to act on

behalf of Council, and shall inform Council of the action he has taken.

10.—The President, or in his absence a Vice-President, shall have an ordinary and a casting vote at all meetings at which he presides.

TITLE VII.

OF THE CENSOR OF UNATTACHED STUDENTS.

1.—The Censor of Unattached Students shall be responsible for the general care and discipline of men Students in residence in the Durham Division of the University, who are not attached to any College or Hall, and shall be paid such stipend as the Council may determine; such Students shall be termed Non-Collegiate Students.

2.—He shall be responsible for receiving the names and examining the testimonials and certificates of candidates for admission as Non-Collegiate Students.

3.—He shall, at the beginning of each term, send to the Secretary of the Council a list of Non-Collegiate Students who intend to keep that term.

4.—In conjunction with the Praelector he shall license houses for the reception of Students *in statu pupillari.*

5.—He shall be appointed annually at the first ordinary meeting of Council in Easter Term, and shall be eligible for re-election

TITLE VIII.

OF THE PRAELECTOR.

1.—There shall be a Praelector appointed by the Council, who shall be paid such stipend as the Council may determine.

2.—He shall be responsible for the arrangements in connection with Collections.

3.—He shall keep the records of a student's attendance at Lectures, and shall send such record to the censor to whose authority the student is liable.

4.—He shall issue to students certificates of having kept term, charging such fees as Council may from time to time appoint.

5.—In conjunction with the Censor of Unattached Students he shall license houses for the reception of students *in statu pupillari*

6.—He shall be appointed annually at the first ordinary Meeting of Council in Easter Term, and shall be eligible for re-election.

TITLE IX.

OF THE SECRETARY.

1.—There shall be a Secretary of the Council who shall keep the Minutes and conduct the correspondence of the Council, and shall be paid such stipend as the Council may determine.

2.—He shall be responsible for preparing and publishing the Lecture Lists.

3.—He shall, at the beginning of each term, prepare the list of students in residence.

4.—He shall be responsible for the custody of one of the two keys by which the Common Seal of the Council is secured.

5.—He shall receive and deal with applications for the use of the Lecture Rooms.

6.—He shall be appointed annually at the first ordinary meeting of the Council in Easter Term, and shall be eligible for re-election.

TITLE X.

College Expenses.

	£	s.	d.
Caution Money†	5	0	0
Annual charges, inclusive of Admission and Tuition Fees, and Fees for University (but not Matriculation) Examinations, *each on one occasion*; also Board, Lodgings, Subscriptions and Gratuities, (but not Degree Fees or Laundry Charges) ...	120	0	0

† This is a guarantee fund against loss by terminal defalcation and is returned to a student when he leaves the University, if his debts to the College have been discharged. The sum may be borrowed, under certain conditions, which may be obtained from the Master.

These charges are payable in three equal terminal instalments, in the first week of term.

Clergy and married students may lodge in the town. The terminal College expenses of those who do so amount to about £15; Caution Money £5.

Every B.A., in order to count terms, pays terminally to the College 5s. until he is of sufficient standing to take the degree of M.A.; or he may compound for this charge by a payment of £1 1s., made to the College upon his taking the degree of B.A.

HATFIELD COLLEGE.

This College was opened as Bishop Hatfield's Hall in October, 1846, for the reception of students in any Faculty.

Members of the College are classed under the various Professors and Tutors according to their qualifications and attainments, and in this respect, as also in their being eligible to all Fellowships and Scholarships, are exactly on the same footing as members of University College. In addition, Bishop Maltby founded an Exhibition with a preference to members of the College, and an anonymous benefactor founded the "Hatfield Exhibition" in 1908. In the management of the College the greatest regard is paid to economy.

Annual Charges, inclusive of Admission and Tuition Fees, and Fees for University (but not Matriculation) Examinations. *each on one occasion*; also Board, Lodging, Subscriptions and Gratuities, (but not Degree Fees or Laundry charges) ...	100	0	0

These charges are payable in three equal terminal instalments in the first week of Term.

Clergy, married students, and some others, are allowed to live in licensed lodgings, and to provide partially for themselves. In such cases the Caution Money and the charge for Terminal Battels (consisting of Luncheon and Dinner in the Hall), are reduced.

* This is a guarantee fund against loss by terminal defalcation and is returned to a student when he leaves the University, if his debts to the College have been discharged.

BISHOP COSIN'S HALL.

This Hall was opened in October, 1851. The arrangements were nearly the same as in Bishop Hatfield's Hall. In Michaelmas Term, 1864, the students then in residence were transferred partly to University College and partly to Bishop Hatfield's Hall.

ST. CHAD'S COLLEGE.

This College was opened in Michaelmas Term, 1904, as a licensed Hall of Residence for the reception of students in Theology or Arts, but primarily for the training of candidates for Holy Orders who are of limited means. It was constituted a College in 1919.

In the case of candidates of special ability who are wholly, or in part, unable to defray the fees of the University and of the College, the Council will, on the recommendation of the Principal, make grants of Exhibitions and Bursaries so far as the funds at their disposal admit. The following endowments are at present available for this purpose:—The "Douglas Horsfall" Exhibition of the value of £60 per annum, the "In Memoriam Capt. Robin Horsfall" Exhibition, the "Per Ardua ad Astra" Exhibition, the "M.H." Exhibition, each of the value of £100 per annum, the "William Jones" Bursary, the "Ellen Elizabeth" Bursary, the "Frank Tobin" Bursary, the "Moulsdale" Bursary, the "Old Etonian" Bursary, the "In Memoriam" Bursary, the "Frank Rigby" Bursary, the "York" Bursary, the "James Marke Wood" Bursary, the "John Hedley Tuebrook" Bursary, the "Bishop King" Bursary, the "Clampitt" Bursary, and the "Sir Alfred Jones" Bursary, each of the value of £30 to £40 per annum. These endowments are generally allotted to candidates for Holy Orders who are capable of reading for an Honours Degree.

There is also one College Fellowship of the value of £150 per annum at least, tenable by a graduate in honours.

ST. MARY'S COLLEGE.

This Hostel was opened in Easter Term, 1899, for the reception of Women Students in any Faculty except that of Theology. It was constituted a College in 1920.

Students of the College are on the same footing as other students of the University.

All the Entrance Scholarships and Exhibitions in Arts offered by the Council of the Durham Colleges are open to women as well as men.

The Winifred Foster Scholarship of £30 a year (for women only) is offered (when vacant) in October each year, on the result of either the Matriculation Examination or an equivalent thereto.

The above is tenable for one year in the first instance, after which they may be continued or discontinued, increased or diminished, according to the recommendations of the Examiners in the First Public Examination.

TERMINAL EXPENSES.

Non-Collegiate students take lodgings for themselves and arrange what they will pay for Board and Lodging. The cost averages somewhat as follows:—

Lodging for a term, from £6 to £14.

Board (say) from £8 to £10.

Every Non-Collegiate student pays to the University the ordinary terminal fee of £8, and is a member of all University Clubs and all Non-Collegiate Clubs without any further payment.

[4] O.B.E.

HOME STUDENTS (WOMEN).

Home students were first admitted in Michaelmas Term, 1895.

Scholarships ranging in value from £30 to £70 can be competed for in June by students who intend to work for Honours.

The Winifred Foster Scholarship (for women only), value about £30 is offered (when vacant) in October each year, on the result of either the Matriculation Examination or an equivalent thereto.

THE FOLLOWING ARE THE UNIVERSITY EXPENSES AT DURHAM.

		£	s.	d.
Admission Fee	in Arts or Theology, for students entering upon residence at Durham who have paid a fee of £2 for the Matriculation Examination or for the School Certificate Examination of the University of Durham ...	1	0	0
Do.	for other students, including those entering upon residence at Theological Colleges	2	0	0

Terminal Expenses.

	£	s.	d.
[1] Tuition Fees (including Censor's Fee, Chest, Library and Club Subscriptions, but *not* including subscription to the Union Society)	8	0	0

Students in Arts or Letters reading for the Diploma in Education pay an additional fee of £2.

Non-resident students, who are not Bachelors of Arts, or Licentiates in Theology, pay terminally 10s. to the Chest, 10s. to the Library, and if members of a College, Hall or House, 10s. to such College, Hall, or House. These payments are not required from students who have been prevented by illness from keeping any term or terms, nor in any case for more than three terms of non-residence.

Every B.A., in order to count terms, pays terminally to the chest 10s. until he takes the degree of M.A. This payment is not required for more than nine terms. In the case of a B.A., this charge, together with the payment of £2 required after the M.A. degree for membership of Convocation, may be compounded for by one payment of £5 upon his taking the degree of B.A.

Every D.D., D.C.L., M.A., or M.Litt. who is not a member of the Teaching Staff, in order to be a member of Convocation, pays a fee of £2 to the University. This is included in the composition fee which may be paid after taking B.A., as above specified.

[1] These are included in the fixed annual charges to be found under the respective Colleges.

Students for the B.A. other than *in litteris antiquis*, not actually resident in Durham, pay £7 10s. instead of £8. Students at Bede College pay £5.

UNIVERSITY OF DURHAM COLLEGE OF MEDICINE.

Newcastle-upon-Tyne.

The College was founded in the year 1832 under the name of "The Newcastle-upon-Tyne School of Medicine and Surgery," and for two years the lectures were delivered in a couple of rooms situated in Bell's Court, Pilgrim Street. The hall of the Barber-Surgeons at "The Manors" was then rented from that Company, and, after being fitted up for the purposes of a Medical School, was opened in October, 1834.

In 1852 the School became associated with the University of Durham and assumed the title of "The Newcastle-upon-Tyne College of Medicine in connexion with the University of Durham." In the same year, Westmorland House, adjoining the Library of the Literary and Philosophical Society, was purchased, and in the garden of the house a new Medical School was built. The house itself was afterwards sold to the members of the Mining Institute, who erected on its site their present building.

In 1870 a closer connexion was established with the University of Durham, one of the provisions being that the College should in future be called "The University of Durham College of Medicine."

The foundation stone of the present College in Northumberland Road was laid on November 3rd, 1887, and the building opened in October, 1889.

Dr. George Yeoman Heath, who was President of the College from 1874 until his death in 1892, left a sum of £6,000 for the purpose of building a residential hall for students, but, as this was not considered feasible, an order of the Chancery division of the High Court of Justice was obtained giving consent for the erection of laboratories, etc., instead of a residential hall, and the buildings, known as the "Heath Wing," were added to the College in 1906.

By the University of Durham Act, 1908 (8 Edw. VII c. 20), Commissioners were appointed to make statutes "regulating the constitution of the University and the powers and duties of its various authorities and constituent bodies and the disposition of its existing property." These statutes, which were approved by His Majesty in Council on November 22nd, 1909, determine, *inter alia* (1) that the University shall consist of two divisions, viz., the "Durham division" and the "Newcastle division," the former to comprise the Colleges in Durham, and the latter the College of Medicine and Armstrong College; and (2) that Senate shall be the supreme governing body of the University. Senate consists of thirty-nine members, of whom four are appointed by the College of Medicine.

The College is incorporated under the Companies Acts, and its Articles of Association are registered by the Board of Trade. It is controlled by a Court of Governors and an Executive Council (p. *et seq.*). The Council consists of twenty-five members: (*a*) nine elected by the Court of Governors, (*b*) seven by the Academic Board, (*c*) two by the Senate of the University, (*d*) two by the Council of Armstrong College, (*e*) two by the House Committee of the Royal Victoria Infirmary, (*f*) two by the Honorary Medical and Surgical Staff of the Royal Victoria Infirmary, and (*g*) the Principal of Armstrong College.

REGULATIONS FOR UNIVERSITY OF DURHAM COLLEGE OF MEDICINE.

Degrees of Bachelor of Medicine and Bachelor of Surgery.

A student entering on a course of study for the degrees of Bachelor of Medicine and Bachelor of Surgery is required—

(1) To produce a satisfactory testimonial of character.

(2) To pass the necessary subjects of the Matriculation examination (p. 97) or of an equivalent examination (p. 98).

(3) To sign the College register and pay the necessary fees (pp. 525 and 529).

(4) To register as a medical student on the books of the General Medical Council.

The student should forward to the Registrar of the General Medical Council, 44, Hallam Street, Portland Place, London, W.:—

(1) A form of application for registration, filled up according to the printed directions attached thereto, together with

(2) A certificate of having begun medical study

(3) A certificate of having passed the registration examination, and

(4) A certificate that he has attained the age of 16 years.

N.B.—On and after January 1st, 1923, every candidate for registration must have attained the age of 17 years and must have passed (*a*) an examination in General Education, and (*b*) a pre-registration examination in Elementary Chemistry and Physics conducted or recognised by the University.

Attendance upon medical lectures, or any medical study previous to registration by the General Medical Council is not recognised.

The student, when registered by the General Medical Council, is considered to have commenced his professional education, of which the curriculum is a period of *bona fide* study during not less than five years at one or more of the medical schools recognised by the University.

The University requires that one, at least, of the five years of professional education shall be spent in attendance at the College of Medicine, Newcastle-upon-Tyne. During that year, the student must attend at least two courses of lectures in the Winter Session and two in the Summer Session, *together with the class examinations* held in connexion with those courses, and must also attend medical and surgical hospital practice and clinical lectures on Medicine and Surgery at the Royal Victoria Infirmary. [First and second year students (dating from registration) are not required to comply with the regulation regarding attendance on hospital practice.] They may spend the

other four years of study either at Newcastle-upon-Tyne, or at one or more of the medical schools recognised by the University.

The laboratory courses in Chemistry and Physics and Bacteriology, forming part of the curriculum for the degree of Bachelor of Hygiene and for the diploma in Public Health, cannot be attended as courses in the curriculum for the degrees of Bachelor of Medicine and Surgery.

Exemptions from the full curriculum :—

(i) Graduates in Arts or Science of any University recognised by the General Medical Council, who shall have spent a year in the study of Physics, Chemistry, and Biology, and have passed an examination in these subjects for the degrees in question, shall be held to have completed the first of the five years of medical study.

(ii) Students who hold the degree of Bachelor of Science of the University of Durham, and who have registered as medical students before the commencement of their second year in Science, will, under certain conditions, be allowed to reckon their second year's course in Science as one of the five years of medical study.

Students are recommended to commence their course of study *at the beginning of the Michaelmas Term*, and to carry out the curriculum on some such plan as the following :—

First Winter.

Anatomy and dissections.
Chemistry and practical chemistry.
Physics.
Biology and practical biology.

First Summer.

Chemistry and practical chemistry.
Practical Physics.

Second Winter.

Anatomy and dissections.
Physiology, practical physiology, and histology.

Second Summer.

Practical histology.

Third Winter.

Public health.
Pathology and practical pathology.
Bacteriology and practical bacteriology.
Hospital practice, clinical lectures and Hospital appointments.

Third Summer.

Pathology and practical pathology.
Bacteriology and practical bacteriology.
Materia Medica, pharmacology and practical pharmacy.
Medical jurisprudence.
Hospital practice, clinical lectures and Hospital appointments.

FOURTH WINTER.

Medicine.
Surgery.
Midwifery and gynæcology.
Hospital practice, clinical lectures and Hospital appointments.

FOURTH SUMMER.

Therapeutics.
Opthalmology.
Practical midwifery.
Hospital practice, clinical lectures and Hospital appointments.

FIFTH WINTER.

Medicine.
Surgery.
Diseases of children.
Diseases of the skin.
Diseases of the throat, nose and ear.
Applied anatomy.
Infectious diseases.
Practical midwifery (if not previously attended).
Hospital practice, clinical lectures and Hospital appointments.

FIFTH SUMMER.

Operative surgery.
Psychological medicine.
Hospital practice, clinical lectures and Hospital appointments.

Hospital practice must extend over three years, and the following curriculum is recommended:—

1st Hospital year.
- (*a*) Two months Out-patient dressing.
- (*b*) Three months assistant and clerk to the Pathologist.
- (*c*) Six months In-patient surgical dressing *or* Six months In-patient medical clerking.
- (*d*) Tutorial classes.

2nd Hospital year.
- (*a*) Six months In-patient medical clerking *or* Six months In-patient surgical dressing.
- (*b*) A fortnight (about 60 hours) assistant to the Anæsthetist.[1]
- (*c*) Three months Out-patient clerking.
  Each student so appointed will clerk for:—
  (1) One Out-patient Physician one morning each week.
  (2) One Out-patient Surgeon one morning each week.
- (*d*) Tutorial classes.

3rd Hospital year.
- (*a*) Ward demonstrations in Medicine and Surgery.
- (*b*) Medical clinical lectures.
- (*c*) Surgical clinical lectures.
- (*d*) Tutorial classes.
- (*e*) One month Assistant in the Skin department.
- (*f*) One month Assistant in the Gynæcological department.
- (*g*) Three months Assistant in the Ophthalmic department.
- (*h*) Three months Assistant in the Throat and Ear department.

[1] On completion of the course of Anæsthetics, students must furnish the Dean with a certificate of attendance signed by the Anæsthetist.

The Regulations for Degrees, Diplomas, etc., are given on pp. 61-64 and 80-81.

Licence in Dental Surgery.

A student desirous of entering on a course of study for the licence in Dental Surgery (L.D.S.) is required—

(*a*) To pass one of the examinations recognised by the General Medical Council for purposes of registration.

(*b*) To register as a dental student on the books of the General Medical Council (p. 501).

N.B.—On and after January 1st, 1923, every dental student shall be registered in the manner and under the conditions prescribed for medical students. He must also have passed a pre-registration examination in elementary Chemistry and Physics which shall be the same as that required for medical students. Every applicant for registration as a dental student shall produce evidence that he has attained the age of 17 years. (pp. 100-101).

A student can fulfil the following portion of the curriculum required for the licence in Dental Surgery of the University of Durham, at the College of Medicine, and the Royal Victoria Infirmary, Newcastle-upon-Tyne, viz. :—

Biology	2 terms.
Anatomy	2 ,,
Dissections	3 ,,
Physiology	2 ,,
Practical physiology	1 term.
Practical histology	1 ,,
Materia medica	1 ,,
Dental bacteriology	2 terms.
Surgery, including the elements of surgical pathology	2 ,,
Medicine, including the elements of general pathology	2 ,,
Chemistry, with practical chemistry ...	3 ,,
Physics, with practical physics	3 ,,
Medical and surgical hospital practice with medical and surgical clinical lectures ...	9 months.

The curriculum can be completed at the Newcastle-upon-Tyne Dental Hospital; particulars of this part may be obtained from Mr. James Coltman, L.D.S., Dental Hospital, Newcastle-upon-Tyne.

The regulations for the licence in Dental Surgery are given on page 81.

LECTURES, LABORATORY WORK AND CLINICAL INSTRUCTION IN THE FACULTY OF MEDICINE.

CHEMISTRY.

At Armstrong College.

1.—The General Principles of Chemistry.

A. Lectures.

Michaelmas and Epiphany Terms.

Monday, Wednesday and Friday at 9.15 a.m.

A description of the properties of the commoner elements (non-metallic and metallic), and their more important compounds.

Students are required to satisfy the Professor that they are keeping regular notes of the lectures, and will be expected to pass satisfactorily the terminal examinations.

Text Books.—Remsen's Inorganic Chemistry. Lupton's Chemical Arithmetic, or Mellor's Modern Inorganic Chemistry.

B. Laboratory Work.

Michaelmas and Epiphany Terms.

Monday and Wednesday, 10.30 to 12.

This course is intended to make the student familiar with the elements of qualitative and of volumetric analysis; the detection of the commoner bases and acids in simple salts; the reactions of glucose, cane sugar, fats, urea, uric acid, and of the commoner alkaloids.

2.—Organic Chemistry.

Easter Term.

Lectures: *Monday, Wednesday and Thursday, 12-1.*

Laboratory Work: *Monday, 9.30-4; Tuesday, 11-5.*

A general introduction to Organic Chemistry including a study of the more important compounds.

Text Book.—Cohen's Organic Chemistry.

3.—Public Health Chemistry.

Epiphany Term.

Monday, Tuesday and Wednesday, 2-5 p.m.

This course is designed to meet the requirements of students reading for the B.Hy. degree and for the diploma in Public Health.

The chemical laboratories are appointed so as to meet the requirements of all classes of students, and to provide facilities for research. Each student has a fully-fitted bench to himself, furnished with all the necessary apparatus and reagents. The laboratories are open daily from 10 a.m. till 5 p.m. during term time.

PHYSICS.

At Armstrong College.

1.—The Principles of Physics.

Michaelmas Term.

Tuesday and Thursday, 10-11.

Epiphany and Easter Terms.

Tuesday, 10-11.

The lectures will be devoted to the demonstration of the principal laws and phenomena comprehended in the synopsis of subjects of the first examination for the degree of Bachelor in Medicine. (pp. 172-173).

Written answers to questions set in the lectures will be expected to be worked out and brought by students, and will be returned corrected.

Text Books.—D. E. Jones' Heat and Light. S. P. Thompson's Electricity and Magnetism.

2.—Practical Physics.

Epiphany Term.

Friday, 10-12.

Easter Term.

Thursday, 10-1, and Friday, 9.30-12.

This course is designed to afford students attending the lectures above-mentioned the opportunity of becoming familiar with the use of the simpler physical instruments. It will include experiments in experimental mechanics, heat, electricity, and optics.

Each student should provide himself with a stop watch and pocket lens.

Text Book.—Stroud's Elementary Practical Physics.

3.—Public Health Physics.

Epiphany Term.

Friday, 10-1.

This course is designed for the instruction of students preparing for the degree of Bachelor of Hygiene or the diploma in Public Health.

Text Books.—Shaw's Air Currents and the Laws of Ventilation. Magnus's Hydrostatics and Pneumatics, Scott's Meteorology. Corfield's Laws of Health, and selections from other works.

Special laboratory courses are arranged for students desiring to study some one branch of physics, and opportunity is afforded for undertaking research. The laboratory is open daily during term time.

BIOLOGY.

At Armstrong College.

Michaelmas and Epiphany Terms.

Botany—Lecture, Thursday, 10-11. Practical Work, Wednesday and Thursday, 2-5.

Zoology—Lectures, Tuesday and Thursday, 12-1. Practical Work, Tuesday, 2-5.

The fundamental facts and laws of the morphology, histology, physiology, and life-histories of plants as illustrated by, *Bacterium, Saccharomyces, Hæmatococcus, Spirogyra, Mucor, Penicillium, Pythium, Claviceps, Fucus, Flowering Plant.*

The elements of vegetable physiology treated experimentally; and pathology.

The fundamental facts and laws of animal morphology and physiology as illustrated by *Amoeba, Vorticella, Hydra, Taenia, Lumbricus, Nephrops, Amphioxus, Raia, Rana, Lepus.*

The general developmental history of *Amphioxus, Rana and Gallus.*

Practical instruction in the general structure of each of the animal and vegetable types above specified will be given.

The student is required to provide himself with microscope, dissecting instruments, and razor.

This course is accepted by the Royal College of Surgeons as covering the instruction in Comparative Anatomy required for the diploma of F.R.C.S.

Text Books.—Parker's Practical Zoology. Potter's Botany. Meek's Animal Types.

The laboratories of botany and zoology are open daily during term time, and every opportunity is afforded for the prosecution of research.

ANATOMY.

1.—Systematic Lectures.

(*a*) Junior Division.

Michaelmas Term.

Monday, Wednesday and Friday at 12 noon.

Epiphany Term.

Monday and Friday at 12 noon.

The subject of these lectures will be the bones, joints and muscles of the body generally, together with an outline of the vascular, nervous and alimentary systems.

In connexion with the lectures a course of tutorial instruction will be given in Osteology.

Text Book.—Gray's Anatomy, 21st edition.

(β) Senior Division.

Michaelmas Term.

Tuesday and Thursday at 11.30 a.m.

Epiphany Term.

Tuesday, Wednesday and Thursday at 11.30 a.m.

The lectures will include the anatomy of the brain and sense-organs, and the more important facts regarding the development of the various systems.

Text Book.—Gray's Anatomy, 21st edition.

2.—Anatomical Demonstrations.

Michaelmas and Epiphany Terms.

Wednesday, Thursday and Friday at 4 p.m.

Easter Term.

Monday, Wednesday and Friday at 11.30 a.m.

These demonstrations are specially adapted for senior students.

3.—Practical Anatomy.

The practical anatomy room is open daily during term time from 9 a.m. until 5 p.m. (Saturday until 12 noon).

Text Books.—Cunningham's Manual of Practical Anatomy, or Walmsley's Manual of Practical Anatomy.

4.—Medical and Surgical Applied Anatomy.

Michaelmas and Epiphany Terms.

Monday and Tuesday at 2.15 p.m.

This course should be attended by students during the fourth winter.

Text Books.—Treves' Surgical Anatomy or Taylor's Applied Anatomy

PHYSIOLOGY.

1.—Systematic Lectures.

Michaelmas and Epiphany Terms.

Monday, Wednesday and Friday at 10 a.m.

Text Book.—Essentials of Physiology (Bainbridge and Menzies).

2.—Practical Physiology.

(Chemical and Experimental).

Michaelmas and Epiphany Terms.

Tuesday and Thursday at 9.30 a.m.

The course includes :—

(1) CHEMICAL SECTION.

Chemistry of carbohydrates, fats, proteins, and their derivatives.
Chemistry of foods.—Milk, bread, meat, etc.
Chemistry of digestion.—Salivary, peptic and pancreatic digestion; bile.
Chemistry of urine.—Normal and pathological. Quantitative estimation of urea, sugar, phosphates, chlorides, acidity and ammonia, nitrogen.
Chemistry of blood, with the estimation of hæmoglobin and the enumeration of corpuscles.
Estimation of oxygen capacity of the blood.
Changes in air and in blood in respiration.

(2) EXPERIMENTAL SECTION.

The contraction of skeletal and cardiac muscle under various conditions. Ciliary movement.
The heart-beat, pulse, blood-pressure.
Conduction in nerve, reflex action, reaction time.
The special senses, methods of investigation; ophthalmoscope, perimeter, phakoscope, etc.

Demonstrations will likewise be given on blood pressure, innervation of heart, respiration, secretion, etc.

TEXT BOOKS.—Essentials of Chemical Physiology (Halliburton), an Experimental Physiology (Sharpey Schafer). An Introduction to Biophysics (David Burns).

3.—PRACTICAL HISTOLOGY.

EASTER TERM.

Monday, Wednesday and Friday at 9.30 a.m.

The examination of fresh tissues. The preparation of sections of tissues and organs. Stained sections, prepared chiefly by the paraffin method, are also distributed.

APPARATUS.—Each student must provide himself, before commencing the course, with the following apparatus and re-agents :—A good microscope, with low and high powers; box for slides, to hold one gross; one gross micro. slides, 3 inches by 1 inch; thin cover slips, $\frac{3}{4}$-inch circles, $\frac{1}{4}$ ounce; $\frac{3}{4}$-inch squares, $\frac{3}{4}$ ounce; labels for slides; two strong-handled needles; pair of fine forceps; small camel hair brush; section lifter; two small watch glasses; an "Army" razor; a wide tube containing xylol; a bottle containing canada balsam in xylol; small bottle of Farrant's medium; small bottle of glycerine; a drawing book; coloured pencils or water colours; dissecting case; small wide-mouthed bottle with cork; duster.

TEXT BOOK.—Essentials of Histology (Sir E. Sharpey Schafer).

Advanced classes in Physiology and Practical Physiology are held at times to be arranged.

Students desiring to undertake original investigations, or to practise physiological methods, may be admitted to work in the laboratories on the fulfilment of certain conditions. Application in all cases must be made to the Professor.

PATHOLOGY.

1.—Systematic Lectures.

Michaelmas, Epiphany and Easter Terms.

Monday at 3 and Tuesday at 2.30.

General Pathology.—The causation of disease. Cellular pathology. The pathology of nutrition, including the degenerations and infiltrations. Atrophy and necrosis. The vital reaction of the cells and tissues to irritants. Inflammation, suppuration and repair. The pathology of infection. The infective granulomata. Hypertrophy and neoplasia. Mechanical disturbances of the circulation. Hyperæmia, acute and chronic. Thrombosis. Œdema. Ischæmia. Embolism and infarction.

Special Pathology.—A systematic description of the pathology of the individual tissues and organs.

The lecture course will be illustrated by microscopical and lantern demonstrations.

2.—Practical Pathology.

Michaelmas and Epiphany Terms.

Monday, 4-5, and Friday, 3-5.

Easter Term.

Friday, 2-4.

The practical course will be complementary to and illustrative of the systematic lectures. Practical instruction will be given in the ordinary methods of pathological investigation, in pathological histology, and in morbid anatomy. Students will be provided with a set of microscopical preparations illustrating pathological histology.

3.—Demonstrations in the Post-mortem Room.

At 11 (Thursday at 12-30).

Instruction in *post-mortem* methods and demonstrations on morbid anatomy will be given in the pathological department of the Royal Victoria Infirmary as opportunity occurs. Special demonstrations on collected specimens are held on Thursdays.

4.—Demonstrations in the Museum.

Michaelmas and Epiphany Terms.

Surgical, *Monday at 3 p.m.*

Medical, *Tuesday at 2 p.m.*

These demonstrations are intended for the instruction of students in their fourth and fifth years of medical study.

Arrangements for advanced or research work in morbid histology and chemical pathology can be made on application to the Professor.

Clerks in the pathological department of the Royal Victoria Infirmary are appointed in March, June, September and December.

Pathological Diagnosis. ...

Examinations of morbid tissues, urine, blood, gastric contents, etc., for purposes of clinical diagnosis, are made in the pathological laboratory for medical practitioners at fees which vary with the nature of the investigation. Reduced fees are charged in the case of hospitals and other public bodies.

COMPARATIVE PATHOLOGY AND BACTERIOLOGY.

1.—Systematic Lectures.

Michaelmas, Epiphany and Easter Terms.

Monday at 2 p.m.

An elementary course of lectures on bacteriology and parasitology for the degrees in medicine.

2.—Practical Bacteriology, etc.

Michaelmas, Epiphany and Easter Terms.

Thursday, 2-4.

The instruction in the laboratory will be supplementary to the lectures mentioned above.

The student is required to provide himself with a good microscope which should be fitted with a $\frac{1}{12}$ inch oil immersion lens and an Abbe condenser.

3.—Advanced Bacteriology, etc.

Michaelmas Term.

Monday, Tuesday, Wednesday and Friday, 2-5.

This course is designed to meet the requirements of the General Medical Council for students reading for the degrees in hygiene and for the diploma in public health.

4.—Post-Graduate Instruction.

Easter Term.

Tuesday at 4 p.m.

These lectures and demonstrations are devoted to the discussion of matters of especial interest to men engaged in general practice.

5.—Comparative Pathology.

Easter Term.

Wednesday at 3 p.m.

These lectures will deal with the special pathology and bacteriology of the diseases of animals communicable to man.

The Heath laboratory is open daily from 10 a.m. to 5 p.m. during term, for the convenience of those wishing to carry on research work. A small fee is charged for the use of the laboratory and apparatus, viz.:—for one day a week, 1 guinea per term of three months, two days a week, 2 guineas, and so on. *These facilities do not apply to undergraduates and others working for the ordinary degree and diploma examinations.*

Clinical and Public Health Department.

Material sent for investigation will be examined by a member of the teaching staff, who will submit a report upon it as soon as possible after its receipt. The preparation of vaccines, serum diagnosis, Wassermann's reaction, etc., is also undertaken.

The fees charged will vary with the amount of work required to complete the investigation, but will in every case be as small as is consistent with reliable work.

MATERIA MEDICA AND PHARMACOLOGY.

1.—Lectures.

Easter Term.

Monday, Wednesday and Friday at 4 p.m.

Definitions. Weights and measures. Dosage. Prescribing. Drugs, their sources, physical characters, adulterations, and incompatibles; their pharmaceutical preparations, pharmacological actions, uses, and methods of administration.

Text Books.—Hale White's Materia Medica. Dixon's Pharmacology.

2.—Practical Pharmacy.

Practical pharmacy is taught in the dispensary of the Royal Victoria Infirmary.

PUBLIC HEALTH.

1.—Lectures.

Michaelmas and Epiphany Terms.

Tuesday and Thursday at 4 p.m.

The following subjects are considered:—

Air and ventilation. Lighting and warming. The effects on health of impure air.

Water supply and the effects on health of impure water.

The dwelling—site, construction, disposal of refuse and excretal matters, unhealthy dwellings.
The etiology and prevention of infective diseases.
The general principles and methods of preventive inoculation, isolation and disinfection.
Foods and dietaries—unsound food.
Dairies and cowsheds, slaughterhouses, offensive trades.
Personal hygiene. School hygiene.
Maternity and child welfare.
Sanitary law with special reference to the powers and obligations of the medical practitioner.
Sanitary administration and elementary vital statistics.

TEXT BOOKS.—Porter's Elements of Hygiene and Public Health. Parkes and Kenwood's Hygiene and Public Health. Reid's Practical Sanitation.

And in addition for the degree in hygiene and for the diploma in public health, the following books are recommended:—Hime's Practical Guide to the Public Health Acts. Robertson and Porter's Sanitary Law and Practice. Notter and Firth's Theory and Practice of Hygiene. Dwelling Houses, by Professor Corfield. Meat Inspection, by Professor Walley. Ferguson's Aids to the Mathematics of Hygiene. Ker's Manual of Fevers.

2.—CLINICAL INSTRUCTION IN INFECTIOUS DISEASES.

A course of lectures and clinical instruction at the City Hospital for Infectious Diseases, Newcastle-upon-Tyne, will be given during Michaelmas term by Professor KERR. This course cannot be attended by students who are in residence at the Maternity Hospital.

TEXT BOOK.—Ker's Manual of Fevers.

3.—OUT-DOOR SANITARY PRACTICE FOR THE B.HY. DEGREE AND D.P.H.

A course of six months out-door sanitary work, together with methods of hospital administration and clinical instruction in infectious diseases may be arranged by applying to Professor KERR, Medical Officer of Health, Town Hall, Newcastle-upon-Tyne.

MEDICAL JURISPRUDENCE.

EASTER TERM.

RULES OF THE COLLEGE OF MEDICINE AND ROYAL VICTORIA INFIRMARY.

All students, including those attending Hospital Practice or Clinical Lectures, must produce satisfactory testimonials of character, sign their names in the College register and pay the necessary fees at the beginning of the Michaelmas and Easter terms.

Students are required to be punctual and orderly in their attendance upon lectures and demonstrations, and to observe decorum in the College, Hospital, and elsewhere.

To secure certificates of attendance at lectures, etc., students must :

1. Be regular in attendance, and orderly in conduct.
2. Must attend the Class Examinations, and obtain a percentage of marks satisfactory to the Lecturer. Students may be excused attendance at the Class Examinations for any reason deemed satisfactory by the Lecturer.

The following resolutions have been adopted by the Council, viz. :—

(*a*) That a return be presented at the end of Epiphany term in each year by the Professor of Anatomy, giving the names of those students who have failed to present themselves for, or who have failed to pass their examinations within reasonable time, together with a report of their general conduct.

(*b*) That if a student be known to be systematically neglecting his work at the College or Hospital, or fail to present himself for his examination within a reasonable time of the period at which in the ordinary course he might have presented himself, a report of the fact be sent by the Council to his parents or guardians, or person to whom the student may be responsible for his conduct.

(*c*) Students systematically neglecting their work, or not complying with the regulations of the College, are liable to suspension.

Certificates and prizes will only be granted when the work and conduct of the student are satisfactory to the Council.

Students are required to make good, to the satisfaction of the Council, any damage or injury they may cause to the property of the College.

No specimens or preparations may be removed from the Museum, nor may any books or unbound journals lying on the tables of the Library or Museum be removed.

Students are required to wear academic dress at lectures delivered in the College, and at class and degree examinations.

Smoking is prohibited inside the College buildings, except in the Dissecting room, Gymnasium, and Students' smoking room.

As evidence of diligence in every department of study at the Royal Victoria Infirmary, each student will be required to present to the Dean a certificate signed by the member of the

Honorary Staff in whose class he may have been or under whom he has held office.

A record of the appointments held by students at the Infirmary is kept, and this record will be considered when applications are made for post-graduate appointments.

Clerks and dressers must attend each morning at 9 a.m., and must leave the wards at 1 p.m. After this hour no clerk or dresser is allowed to be present in the wards without special permission from the House Physician or House Surgeon with whom he is associated.

Students holding appointments at the Infirmary must not be absent from duty without leave from the Dean, and must in addition have obtained consent from the House Physician or House Surgeon with whom they are associated.

After the completion of the operation lists in the morning, no student shall enter the operating theatres except in company with a member of the Honorary or Resident Staff.

No student, unless he holds an appointment, is allowed in any ward or department of the hospital except in company with a member of the Honorary or Resident Staff.

Strict punctuality at examinations is essential.

Any candidate copying or communicating with others during an examination will be dismissed from the examination and will be reported to the Vice-Chancellor and Senate.

Candidates are forbidden to make any enquiry of an examiner as to the result of an examination. The Secretary of examinations is the only person authorised to give information regarding examinations.

The infringement of the above, or any other rules, which may from time to time be passed by the Council, renders a student liable to suspension or immediate dismissal from the College, and to the forfeiture of all fees, certificates, and privileges as a student of the College.

The Professor of Anatomy is specially empowered to see that the above rules, so far as they relate to the College, are observed.

Every student, by signing the College register, subscribes to the following undertaking, viz. :—

> I, a student of the University of Durham College of Medicine, Newcastle-upon-Tyne, hereby undertake to comply with all rules and regulations of the College, and to conduct myself on all occasions in an orderly manner. I fully understand that I have no claim upon the Council of the College in respect of any fees paid by or due from me in case such fees are forfeited by any irregularity or misconduct on my part.

Every student shall in the presence of the Vice-Chancellor, or a Pro-Vice-Chancellor, sign the following declaration of obedience to the authorities of the University, viz. :—

> I hereby promise to conform to the discipline of the University and to all statutes, regulations and rules in force for the time being, in so far as they concern me.

ARMSTRONG COLLEGE,
Newcastle-upon-Tyne.

INTRODUCTION.

Armstrong College was founded in 1871, by the joint efforts of the University of Durham and the North of England Institute of Mining and Mechanical Engineers, with the object of promoting University education in Newcastle and the surrounding counties. It was originally intended for the Faculty of Science in the University of Durham, as its first title "University of Durham College of Physical Science" indicates. Its first quarters were partly on the upper floor of the Coal Trade offices in Neville Chambers, and partly in the buildings of the College of Medicine at Westmorland House, adjoining the library of the Literary and Philosophical Society. When the College of Medicine was compelled to remove from Westmorland House, the College of Physical Science moved to its present site between the Leazes and Barras Bridge, a site until then known as Lax's Gardens. The first building to be erected on the new site was the north-east wing. The south-east and south-west wings were opened in 1894. The cost of the tower in the south-east wing was defrayed out of the surplus funds in the hands of the promoters of the Royal Jubilee Exhibition, held in 1887 on the Town Moor; this tower thus forms the Newcastle memorial of the Jubilee of Queen Victoria. In 1904 the College was given its present title in memory of the late Lord Armstrong. In 1906 the main block of the College, facing Victoria Road, was opened by His Majesty King Edward VII. In 1911 the King Edward VII School of Art was added, and in 1914 the Agricultural Block.

From the beginning, the College was associated with the University of Durham. In the course of its early history its students were admitted to the degrees of Bachelor, Master and Doctor of Science, and also to degrees in Letters, though not to degrees in Arts. In 1909, when through the University of Durham Act it obtained the full status of a University College, its students were admitted also to degrees in Arts.

The constitution of the College is that of an incorporated society, registered under the Companies Acts. Its members are Governors, and consist of (1) persons who subscribe not less than £5 to the funds of the College, or have contributed a donation of not less than £25; (2) representatives of persons who bequeath not less than £100; (3) nominees of public companies and Corporations which subscribe not less than £10 per annum, or have made a donation of not less than £250; (4) representatives of firms subscribing £10 per annum, or contributing a donation of not less than £100; and (5) certain *ex-officio* and representative Governors.

The executive of the College is vested in a Council, consisting of the President and not more than sixty members, of

whom five shall be members of the Chapter of Durham, or of the Senate, or of the Convocation of the University of Durham, elected out of and by the Governors. Of the others, fifteen are elected out of and by the Governors, and the remainder, including four nominated by the Corporation of Newcastle-upon-Tyne, two by each of the County Councils of Northumberland and Durham, and one by the Corporation of Gateshead, by the other members of the Council. Any County Council or Local Authority contributing to the funds of the College is entitled to representation on the Council in proportion to the amount of its contribution.

Courses of instruction are given in the College leading to the following degrees:—B.A. (Pass and Honours); B.Sc. (Pass and Honours) in Pure Science, Agriculture, Mechanical, Marine, Civil or Electrical Engineering, Naval Architecture, Mining, and Metallurgy; B.Com. (Pass only); Ph.D. in Arts or Science.

Courses may also be taken under certain conditions leading to the University diploma in the Theory of Practice of Teaching.

The College also awards diplomas in Agriculture, Engineering, Naval Architecture, Mining, Mine Surveying, Commerce, Fine Art, and Architecture, and a certificate in Fine Art. Vacancies are, however, strictly limited for diploma students in Engineering and Naval Architecture.

The Department of Fine Art was formed in 1888 by the amalgamation with the College of the North of England Society for the Promotion of the Fine Arts, a society which was founded in 1837 and which maintained, as one of its activities, the old Newcastle School of Art. The present King Edward VII School of Art was erected in 1911 and opened in 1912. The Professorship of Fine Art was established in 1917.

The Teachers' Training Department was formed as the Normal Department in September, 1890, and began the training of teachers concurrently with academic instruction. Subsequently the Department undertook the training of teachers for secondary schools in a post-graduate year leading to the University diploma in the Theory and Practice of Teaching. Easton Hall, Eskdale Terrace, a hostel for 40 women students in the Department, was opened in September, 1915, the Easton Trustees contributing £5,000 towards the erection of the building.

The Agricultural Department was formed in 1892. It is subsidised by the Ministry of Agriculture and by the Councils of the four Northern Counties. Cockle Park, the Northumberland County Agricultural Experiment Station, is under the scientific direction of the College. The new Agricultural building was completed in January, 1914, half the cost being met by the late Dr. Clement Stephenson and the other half by the Ministry of Agriculture.

The Joint Committee for Tutorial Classes, besides lending tutors to the Durham Division, and one tutor to the University of Liverpool Joint Committee, provided tutors during 1921-1922 for five extra-mural classes.

GENERAL REGULATIONS OF ARMSTRONG COLLEGE.

1. *Admission to College.*—Before being admitted to the College students must have reached the age of 17 years (in the Department of Fine Art, 16 years) and must furnish testimonials as to character.

Students are classified either as matriculated or non-matriculated.

2. *Matriculation.*—The act of matriculation is the act of registering for the first time as a student reading for a degree of the University of Durham. Before being allowed to matriculate, a student must have qualified by examination in the required subjects in accordance with the regulations shown on pages 101-111 above.

Before matriculating and before registering for academical years subsequent to the first, students must:—

(1) Interview a Tutor in Arts or Science or Commerce, as the case may be;

(2) Under his or her direction fill up an entrance form on which will be stated the course of study proposed.

(3) Obtain the approval of the Senior Tutor in Arts or Science or Commerce, as the case may be, to the course of study proposed.

For all new students the times of the first interview will be arranged by the Registrar.

A student will matriculate by:—

(1) Presenting an entrance form duly filled in, and initialled by a Senior Tutor.

(2) Presenting a Matriculation Examination testamur or a certificate exempting therefrom.

(3) If the exemption certificate has been obtained on account of any examination other than the University of Durham School Certificate Examination, paying a matriculation fee of £2.

(4) Paying a registration fee of £2.

(5) Signing the matriculation book as a promise to obey the regulations of the University and the College during his or her residence *in statu pupillari*.

A matriculated student will register in academical years subsequent to the first by:—

(1) Presenting an entrance form duly filled in, and initialled by a Senior Tutor.

(2) Paying a registration fee of £2.

3. *Diploma and Certificate Students.* Students reading for a College diploma in Agriculture, Mining, Mine Surveying, or Commerce are not required to pass any regular entrance examination but must satisfy a Senior Tutor in Science or Commerce, as the case may be, of their educational fitness to enter upon the course of study proposed.

Students reading for a College diploma in Engineering or Naval Architecture must first pass an entrance examination in the following subjects:—

English (as tested by an Essay or the making of a précis).
Extra Mathematics.
Mechanics.
Physics.
Chemistry.

The standard, papers, and syllabus in all the above subjects, except English, shall be the same as for the Matriculation Examination of the Newcastle Division, and when this examination is no longer held, shall be the same as for the University of Durham School Certificate Examination.

Exemption from this Examination on account of having passed some equivalent examination may be obtained in the same way as exemption from the Matriculation Examination.

Students entering for the diploma in Fine Art must first pass an entrance examination in English and one of the following languages—French, German, Spanish. A pass in these subjects in any examination qualifying to matriculate will be accepted.

Students entering for the certificate in Fine Art are not required to pass any regular entrance examination but must satisfy the Professor of Fine Art of their general and artistic qualifications.

4. *Occasional Students.* Occasional students, *i.e.*, those not reading either for a degree of the University, or a diploma or certificate of the College, are not required to pass any regular entrance examination, but must satisfy a Senior Tutor in Arts, or Science, or Commerce, or the Professor of Fine Art, as the case may be, of their educational fitness to enter upon the course of study proposed.

5. *Registering by diploma, etc., students.*—Diploma, certificate, or occasional students will register for the first time by:—

(1) Presenting an entrance form duly filled in, and initialled by a Senior Tutor or the Professor of Fine Art;

(2) Producing an entrance examination testamur or an exemption certificate (in the case of Engineering, Naval Architecture, or Fine Art diploma students only);

(3) Paying a registration fee of £2;[1]

[1] Day students in the Department of Fine Art pay a registration fee of £1 only. Occasional students, and evening students reading for the diploma in Commerce pay a registration fee at the rate of 10s. a subject. Students taking the six weeks' course in Agriculture or Forestry pay a registration fee of 10s.

(4) Signing the registration book as a promise to obey the regulations of the College during his (or her) residence in the College.

Such students will register in academical years subsequent to the first by:—

(1) Presenting an entrance form duly filled in and initialled by a Senior Tutor or the Professor of Fine Art;
(2) Paying a registration fee of £2;[2]
(3) Receiving a registration card.

6. *Matriculation period.*—The period for matriculation and registration is from Monday, 25th September, 1922, to Saturday, 7th October, 1922, inclusive. No student will be permitted to matriculate or register after the latter date without the special recommendation of a Senior Tutor. No student (other than a student entering for a diploma in Fine Art or Architecture or an occasional student) will be allowed to matriculate or register in any circumstances after 11th November, 1922.

7. *Class enrolment period.*—The period of enrolment in classes will be from Tuesday, 3rd October, 1922, till Saturday, 7th October, 1922, inclusive. No student will be allowed to enrol in any class after the latter date without the special permission of the Professor or Lecturer concerned.

8. *Period for paying fees.*—The period for the payment of tuition fees will be from Monday, 9th October, 1922, to Thursday, 19th October, 1922, inclusive. Students (other than those whose fees are being paid by the Board of Education, by Local Education Authorities, or by associations, firms, or public bodies) who fail to pay their tuition fees between these dates will be suspended from attendance at the College, until such time as their fees are paid; and if their fees are still unpaid on Monday 13th November, 1922, they will not be allowed to count the term.

9. *Academical dress.*—All matriculated students are required to wear academical dress when attending lectures, examinations, or public meetings of the College, or when calling upon the Principal, the Professors, the Tutors, the Registrar, or the Bursar, during College hours.

10. *Illness.*—No student who is suffering from an infectious illness, or in whose home or lodging there has been such illness, is allowed to return to College until a medical certificate has been received by the Registrar stating that there is no longer any danger of infection being conveyed.

11. *Irregularity of attendance.*—Students will not be allowed to count any term during which they have been persistently and without good reason irregular in their attendances.

Not more than one term in any academical year may be granted to a student who has been prevented by illness or other urgent cause from keeping that term.

[2] See note on preceding page.

12. *Cases of discipline.*—All cases of misconduct will be reported to the Principal, and, if sufficiently grave, will be reported by him to the House Committee of the College. The House Committee has power to ordain that any student so reported be not allowed to count the term. No student may be expelled from the College unless the order for such expulsion is ratified by the Council. No student may be expelled from the University except by sentence of the Chancellor declared in Senate, or by vote of Senate with the concurrence of the Chancellor.

REGULATIONS FOR COLLEGE DIPLOMAS.*

A. AGRICULTURE.

1.—Students who do not intend to proceed to a degree in Agriculture are not required to qualify by examination for matriculation, but will be required to undergo such tests of general education as the Senior Tutor in Science in consultation with the Head of the Department of Agriculture may think desirable.

2.—A special College diploma is granted to students who follow the specified course and who attain a certain standard in the examinations.

3.—Such students must adopt the following course of study during three winters of two terms each :—

FIRST WINTER.—Elementary Agriculture. Chemistry. Chemical Laboratory. Zoology. Zoological Laboratory. Botany. Botanical Laboratory. Mensuration.

SECOND WINTER.—Agriculture (soils, manures and crops). Agricultural Chemistry. Agricultural Botany. Anatomy, and Physiology of the Farm Animals. Entomology. Land Surveying.

THIRD WINTER.—Agriculture (farm live stock and feeding stuffs). Agricultural Chemistry. Agricultural Botany. Farm Hygiene and Pathology. Estate Management. Forestry.

B. ENGINEERING AND NAVAL ARCHITECTURE.

1.—Students proposing to enter upon a course of study for a diploma in Engineering or the diploma in Naval Architecture are required to pass an entrance examination in the following subjects :—

English (as tested by an essay or the making of a précis). Extra Mathematics. Mechanics. Physics. Chemistry.

The standard, papers, and syllabus in all the above subjects, except English, shall be the same as for the Matriculation

* Regulations for degrees are given on pp. 51-76.

Examination of the Newcastle Division, and when that examination is no longer held, the same as for the University of Durham School Certificate Examination.

The courses for the diplomas are the same in all cases as those for the degree of B.Sc. in corresponding branches of Engineering or in Naval Architecture.

C. MINING AND MINE SURVEYING.

1.—Students who propose to enter upon a course of study for the diploma in Mining or Mine Surveying are not required to qualify by examination for matriculation; but will be required to undergo such tests of general education as a Senior Tutor in Science in consultation with the Heads of Departments may think desirable.

2.—Special College diplomas are granted to students who follow the specified courses and who attain a certain standard in the examinations.

3.—Such students must adopt one of the following courses of study:—

MINING.

First Year.

Mathematics, Physics, and Chemistry, as for Intermediate part of B.Sc. course in Applied Science.

Geology, as for Second part of B.Sc. course in Mining.

Second Year.

Applied Mechanics, as for Intermediate part of B.Sc. course in Applied Science *or* Engineering, as for Second part of B.Sc. course in Applied Science (*according to the proficiency of the student*).

Economic Mineralogy, Mineral Deposits, and Surveying, as for Second part of B.Sc. course in Applied Science.

Dressing of Minerals, and Mining, as for Final part of B.Sc. course in Applied Science.

This course is arranged for two years, but students who have attended the course and have successfully passed the examinations, even though these be spread over three or more years, will be granted the diploma, except in the case of those students who take the degree of B.Sc. in Mining; provided always that the diploma shall not be granted to any student who cannot produce satisfactory evidence that he has spent at least four months in or about a mine.

Students are strongly recommended to attend the First Aid Class and classes in at least one foreign language; and also to take a course of lectures on the Economics of Industry, and on General and Special Accounting. A knowledge of these subjects will be considered in granting the diploma.

The diploma in Mining has been approved by the Home Secretary for the purposes of the Coal Mines Act, 1911.

MINE SURVEYING.

First Year.

Mathematics, Physics, Chemistry and Mechanical Drawing, as for Intermediate part of B.Sc. course in Applied Science.

Second Year.

Mathematics, Physics, Mineral Deposits, and Surveying, as for Second part of B.Sc. course in Mining.

Geology, as for Second part of B.Sc. course in Mining.

Applied Mechanics, as for Intermediate part of B.Sc. course in Applied Science.

Mining, as for Final part of B.Sc. course in Applied Science.

First Aid, as for B.Sc. course in Mining.

Armstrong College has been approved for the purpose of granting certificates to Mine Surveyors by the Home Secretary, under his order of February 27th, 1912, in accordance with the provisions of the Coal Mines Act, 1911.

D. COMMERCE.

1.—Students entering upon the course for the College diploma in Commerce must furnish evidence of having received a good general education.

2. The course of study for the diploma shall extend over a period of at least two years, residence being recognised by attendance at either day or evening classes, and shall consist of two parts, namely:—

Part I.—Economics I, Economic History and French I, *or* German I, *or* Russian I, *or* Spanish I.

Part II.—Economics II, Commercial Law, and French II, *or* German II, *or* Russian II, *or* Spanish II (whichever language was taken in Part I).

3.—Candidates may attend one or more classes a year, but in entering for the Part I examination shall be required to offer in the first instance all three subjects. It shall be within the discretion of the examiners to refer for re-examination in that subject only candidates who have failed in not more than one of the subjects offered. No candidate shall be qualified to enter for the Part II examination who has not satisfied the examiners in the whole of the Part I examination. Candidates for the Part II examination shall be required to offer in the first instance all three subjects, but it shall be within the discretion of the examiners to refer candidates who have failed in not more than one of the subjects offered for re-examination in that subject only.

4. Candidates for the diploma are also required to attend a course, and pass an examination, in Accounting. The course and examination may be taken in any year at the option of the candidate. Candidates who have passed an approved examination in Accounting may be excused attendance and examination in this subject.

5. Candidates may also attend courses and enter for the examinations in the following additional subjects, and if they are successful in the examinations in these subjects the fact shall be mentioned in the diploma:—

Organisation of Industry and Commerce.
Modern History.
A second Modern Foreign Language.
A Science applicable to Manufacture.
Banking and Currency.
International Trade and the Foreign Exchanges.
Railway Economics.
Railway Operating.
Railway Geography of the United Kingdom.
Railway Law.
Public Finance.
Statistics.
Social Psychology.
Political Science.
Economic History of the 19th century.

6.—The attendance required in each subject shall be the same as for the B.Com. degree.

7.—The names of the successful candidates in the Part I. and Part II examinations and in the examinations in additional subjects will be published in alphabetical order.

8.—Candidates who have taken the College diploma, and who wish to proceed to the degree of B.Com., may do so by attending for two additional years as day or evening students.

9.—Candidates who have passed the examination for the diploma in Commerce and who elect to present themselves for a more advanced examination (written and spoken) in a language approved by the Board of the Faculty of Commerce, may be admitted to such an examination, and if successful shall receive a certificate to that effect. Candidates must present themselves for this examination in June or September.

E. FINE ART.

1.—Candidates for the diploma in Fine Art shall pass an entrance examination in English and one of the following languages:—French, German, Spanish; and shall satisfy the Professor of Fine Art that they are artistically qualified to enter upon the course.

A pass in the required subjects in any examination accepted as qualifying for matriculation shall exempt from the entrance examination.

2.—The course from the diploma shall extend over three academical years. Each year shall conclude with an examination, to be known as the First Year Examination, the Second Year Examination, and the Third Year Examination, respectively. A student shall pass the First Year Examination before entering upon the work of the Second Year, and the Second Year Examination before entering upon the work of the Third Year.

The examinations shall be held in June.

3.—Students shall select a principal subject from the following:—(1) Painting, (2) Sculpture, (3) Crafts and Manufactures, (4) Engraving and Printing. The study of the principal subject shall consist of (i) History and Criticism; and (ii) Practical Work.

4.—In addition to study of the principal subject as defined above, each student shall pursue:—

(*a*) Courses of study, each extending over one academical year, in three other branches of Art. These shall be known as subsidiary subjects, and one shall be selected each year in accordance with the syllabuses set out in pages 605-613 below.

(*b*) Courses of study, each extending over one academical year, in subjects auxiliary to the principal subject.

(*c*) A course of study, extending over two academical years, in English Literature.

(*d*) A course of study, extending over two academical years, in one of the following languages:—French, German, Spanish.

5.—The diploma in Fine Art shall be granted only to candidates who have attended regularly, and duly performed the work of the classes to the satisfaction of the teachers concerned, and who have satisfied the examiners in the several examinations.

The First and Second Year Examinations shall consist of six parts as follows:—

(i) History and Criticism of the principal subject.
(ii) History and Criticism of the subsidiary subject.
(iii) Exercises in the principal subject.
(iv) Exercises in the auxiliary subjects.
(v) English Literature.
(vi) French, or German, or Spanish.

The Third Year Examination shall consist of three parts, as follow:—

(i) History and Criticism of the principal subject.
(ii) History and Criticism of the subsidiary subject.
(iii) Exercises in the principal subject.

Marked success in one subject shall compensate for weakness (but not for failure) in another subject.

The results of the examinations shall be issued in Divisions I, II and III.

F. ARCHITECTURE.

1.—Candidates for the diploma in Architecture must qualify to matriculate in Armstrong College in the Faculty of Arts before entering upon the course.

2.—The course for the diploma shall extend over three academical years of full-time study in the College, followed by two years of part-time study in the College and part-time study in the office of an architect to be approved by the College. During these two latter years candidates shall *either*, (*a*), continue full-time study within the College itself during the two winter terms; *or* (*b*), perform within the College during

the whole of the academical year the equivalent of six half days of study, each week, at least four half days of which study shall be carried out during the day.

3.—There shall be two examinations, to be known as the "First Examination for the diploma in Architecture" and the "Second Examination for the diploma in Architecture," respectively.

4.—Candidates shall not be permitted to enter for the First Examination before the end of the third year of study, or for the Second Examination before the end of the fifth year of study. No candidate shall be qualified to enter for the Second Examination who has not passed the First Examination. Both examinations shall be held in June. Each examination shall be passed as a whole. No candidate shall enter upon the course of study for the Second Examination who has not passed the First Examination.

5.—Candidates shall pursue the following courses of study:—

(*a*) *For the First Examination.*

1st year (i) The Orders, (ii) Simple Construction and Planning, (iii) Perspective, (iv) Modelling, (v) Drawing.

2nd year (i) Mechanics and Strength of Materials, (ii) Chemistry of Materials, (iii) History of Architecture, (iv) Study of Architectural Form, (v) Architectural Design.

3rd year (i) Hygiene, (ii) Theoretical Construction including work in Steel, (iii) History of Architecture, (iv) Studies of Architectural Form, (v) Architectural Design.

(*b*) *For the Second Examination.*

4th year (i) Study of a special subject treated critically and historically, (ii) Architectural Design.

5th year (i) Specifications and Professional Practice, (ii) study of a special subject treated critically and historically, (iii) Architectural Design.

6.—No candidate is permitted to proceed to examination unless the Master of Architecture certifies that he has produced testimonies of study of adequate merit. These testimonies must be submitted at such time prior to the examination as may be determined.

CERTIFICATE IN FINE ART.

1.—Candidates for the Certificate in Fine Art are not required to pass an entrance examination, but must satisfy the Professor of Fine Art of their general and artistic qualifications.

2.—The regulations for the diploma in Fine Art, set out in paragraphs 2-5 on pp. 581, 582 above shall apply to the certificate also, except that candidates for the certificate are not required to take the courses or pass the examinations in English Literature and the modern foreign language.

DEPARTMENTS IN SCIENCE.[1]

MATHEMATICS.

Intermediate course. Mon., Wed., and Fri. at 9.15.
Second Year course. Mon., Wed., and Fri. at 10.0, or Mon., Tues., and Thurs. at 10.0.
Third Year course. Tues. and Wed. at 12.0.
Honours courses. As required.

APPLIED MATHEMATICS AND MATHEMATICAL PHYSICS.

A. *Pass Courses.*

Intermediate course:—Elementary Mechanics. Tues. and Thurs. at 9.15.

Second Year courses:—Statics and Dynamics.
(*a*) Pure Science; Tues. and Thurs. at 10.0, and one hour tutorial class.
(*b*) Applied Science; Tues. and Thurs.; at 10.0 or Wed. and Fri. at 10.0.

Third Year courses:—Analytical Statics, Particle and Rigid Dynamics.
(*c*) Pure Science; Mon. and Fri. at 11.0, and one hour tutorial class.
(*d*) Applied Science; Mon. and Wed. at 12.0.

B. *Honours and Special Courses.*

(*e*) General Analytical Dynamics. Tues., Wed., and Thurs. at 11.0.
(*f*) Mathematical Physics. Mon. and Fri. at 10.0.
(*g*) Hydrodynamics (or Special Honours subject). Mon. and Fri. at 11.0.
(*h*) Post-graduate course.

The subjects and times of courses (*e*)-(*h*) are arranged each academical year, according to requirements.

PHYSICS.

Lecture Courses.

I Intermediate course:—Experimental Mechanics, including Hydrostatics and Pneumatics: the elementary phenomena of Heat, Magnetism and Electricity, Sound and Light, treated experimentally. Mon., Wed. and Fri. at 10.0.

Ia. Course for medical students. 1st term, Tues. and Thurs. at 10.0; 2nd and 3rd terms, Tues. at 10.0.

[1] For courses of study see pp. 197-215.

II. General Physics, including Simple Harmonic Motion and elementary Elasticity: Magnetism and Electricity—measurements and general principles. Elements of Geometrical and Physical optics. Tues. and Thurs. at 12.0.

IIA. Quantitative work on Heat, and general principles of Sound. Wed. at 12.0.

III. Properties of Matter: Magnetism and Electricity. Mon. and Fri. at 12.0.

IIIA. Thermodynamics—applications of second law: Physical Optics: Sound. Thurs. at 9.15.

IV. Advanced treatment of Properties of Matter, Thermodynamics, Magnetism and Electricity, Physical Optics, Sound. Mon. and Fri. at 12.0, Tues. at 11.0, and Thurs. at 9.15.

IVA. Ionisation of gases: Thermionics: Photo-electricity: X-rays: Radioactivity: Theories of the atom, etc. Fri. at 11.0.

Pass students take course I in the 1st year, courses II and IIA in 2nd year, and courses III and IIIA in 3rd year.

Students who qualify to enter on an Honours course by passing the Higher Certificate Examination before entry take courses II and IIA in the 1st year, courses III and IIIA in the 2nd year, and courses IV and IVA in the 3rd year.

Laboratory.

The Physical laboratories are open daily from 10—1 and 2—5, except on Wed. and Sat. when they close at 1.0.

Each student is required to write out a neat account of the principle, method, and result, of each experiment performed, in a regulation notebook, which must be presented for inspection when required.

Each student must provide himself with a stop-watch and a pocket lens.

The hours of attendance are:—

Intermediate students in Pure Science—Tues. or Thurs. 2—5, by arrangement.

Intermediate students in Applied Science—Mon. or Fri. 2—5, by arrangement.

Medical students—2nd term, Fri. 10—12; 3rd term, Thurs., 10—1; Fri. 10—1.

Second Year students in Pure Science—as arranged.

Second Year students in Applied Science—Saturday morning.

Third Year and Honours students—as arranged.

Research in Physics.

Opportunity is afforded to qualified students to undertake original research in Physics. The equipment of the laboratories for research work includes a 16 plate Wimshurst machine, large induction coils, a Dubois electromagnet, spectroscopes, etc.

Among the subjects for which facilities are at present provided may be mentioned Electric Discharge, Electric Waves, Conduction of Electricity through liquids and gases, Spectroscopy.

The Richard Welford telescope, mounted in a small observatory at the extreme S.W. corner of the College site, affords facilities for research in Astrophysics. It is an equatorial with 4½ in. photo-visual objective.

CHEMISTRY.

Lecture and Laboratory Courses.

I. General Inorganic Chemistry.
Lectures: Mon., Wed. and Fri. at 11.0 during Michaelmas and Epiphany terms.
Laboratory: Tues. or Thurs., 9.15—5.0. (Pure Science.)
Mon. and Wed., 9.15—11.0. (Medicine.)

II. Chemistry for Engineers.
Lectures: Mon. and Wed. at 10.0
Laboratory: Sat. 9.15—1.0.

(Mining degree students will attend the laboratory on Mon., 2.0—5.0, and Wed. and Sat., 10.0—1.0; and Mining diploma students, on Mon. and Tues., 2.0.—5.0.)

III. Honours course of Inorganic Chemistry.
Lectures: Tues. and Thurs. at 11.0.
Laboratory: Tues. and Thurs.

IV. Introduction to Organic Chemistry.
Lectures: Mon., Wed. and Thurs. at 12.0 during the Easter term.
Laboratory: Mon., 9.15—4.0; Tues., 11.0—5.0.
This class is for Medical and Pure Science students.

V. The Chemistry of the Metals.
Lectures: Tues. and Thurs. at 11.0 during the Michaelmas and Epiphany terms.

VI. General Organic Chemistry.
Lectures: Tues. and Thurs. at 10.0.
Laboratory: Tues. or Thurs. (six hours weekly for two terms).

VII. General Physical Chemistry.
Lectures: Sat. at 10.0.
Laboratory: Tues. or Thurs. (six hours weekly for one term).

VIII. History of Chemistry and Chemical Philosophy.
Lectures: Sat. at 9.15.

IX. Advanced Organic Chemistry.
Lectures: Tues. and Thurs. at 12.0 during Michaelmas and Epiphany terms.
Laboratories: daily.

In connection with this class there will be a seminar course at hours to be arranged—one hour weekly.

X. Methods of Chemical Analysis.
Lectures: Fri. at 9.15.
Laboratory: Mon. and Fri.
XI. Advanced Physical Chemistry.
Lectures: Mon. at 12.0.
Laboratory: as arranged.
XII. Chemistry of the Rare Elements.
Lectures: Fri. at 10.0.
XIII. Agricultural Chemistry.
Lectures: Mon. and Fri. at 11.0; Wed. at 11.0; Thurs. at 10.0.
Laboratory: afternoons.

Students reading for the Pass degree of B.Sc. will attend course I or II in 1st year; IV, V, and X in 2nd year; and VI, VII, and VIII in 3rd year. Honours B.Sc. students will attend courses III, IV, and X in 1st year; V, VI, VII and VIII in 2nd year; and IX, XI, and XII in 3rd year. Medical students will attend courses I and IV. Agricultural students will attend courses I, VI and XIII.

Students will be provided by the laboratory steward with a set of apparatus on the understanding that they make good all breakages. They are expected to provide themselves with a set of weights of approved type, and with platinum wire and foil. Notes of all experiments must be kept in a well-bound note-book, which will be inspected at the examination.

Post-Graduate Research.

The research laboratories of the Department are available for students desiring to undertake original investigation; all materials and apparatus are supplied free, and every facility is provided for such work. Application for admission should be made to either of the Professors.

Associateship of the Institute of Chemistry.

The courses given in this Department are recognised by the Institute of Chemistry as qualifying for the Associateship under the conditions stated in the regulations of the Institute.

METALLURGY.

Lectures.

I. Elementary General Metallurgy. Thurs. at 10.0.
II. General Metallurgy. Thurs. at 11.0.
III. Advanced Metallurgy. } At times to be arranged.
IV. Metallography. }

Laboratory.

The laboratory instruction in Practical Metallurgy and Assaying is intended to impress upon the student the chief properties of the metals, to indicate the principles upon which metallurgical operations are performed on a large scale, and to teach the principles and practice of assaying and of metallo-

graphic investigation. Students are required to provide themselves with the precious metals required in assaying, and any materials or appliances needed for special investigations.

A practical course in Dental Metallurgy, for dental students will also be arranged as required.

GEOLOGY.

Lecture and Laboratory Courses.

I. General Geology—Intermediate course.
Lectures: Tues. and Thurs. at 11.0.
Laboratory: Mon., 2.0—5.0.

II. General Applied Geology.
Lectures: Wed. and Thurs. at 12.0.
Laboratory: Tues. 10.0—1.0.

III. Palæontology.
Lectures: Wed. and Fri. at 10.0 (Michaelmas and Epiphany terms).
Laboratory: 5 hours a week for 2 terms.

IV. Crystallography and Mineralogy (partly in department of Mineralogy).
Lectures and Demonstrations, 2 hours a week for 2 terms.

V. Petrology.
Lectures: Wed. and Fri. at 11.0 (Michaelmas and Epiphany terms).
Laboratory: 5 hours a week for 2 terms.

VI. Stratigraphy.
Lectures: Mon. at 11.0 and Wed. at 9.15 (Michaelmas and Epiphany terms).

VII. Physical Geology.
Lectures: Wed. and Fri. at 11.0 (Easter term for 2 academical years).
Laboratory: 5 hours a week in Easter term for 2 academical years.

VIII. Advanced Palæontology.
IX. Advanced Petrology.
X. Advanced Stratigraphy.
XI. Determinative Mineralogy.
} Special Honours courses to be arranged as required.

XII. Engineering Geology.
Lectures: Fri. at 10.0.
Laboratory: Fri., 11.0—1.0.

XIII. Mineral Deposits (Coal and Oil).
Lectures: Fri. at 12.0 (Epiphany and Easter terms).

XIV. Agricultural Geology.
Lectures: 2 hours a week during Epiphany term.

Students reading for the Pass degree will take course I in 1st year, courses III, IV and VII in 2nd year, and courses V, VI and VII in 3rd year. Honours students will take the courses mentioned above, together with such of the special Honours courses VIII to XI and such subsidiary subjects as may be approved.

Students reading for the degree in Civil Engineering and Mining take course II in 2nd year. Students in Agriculture (2nd year) take this course for 1st term only, followed by course XIV in 2nd term.

Students in Civil Engineering take course XII in 3rd year.

Students in Mining take course XIII (in 2nd year for Pass degree and diploma; 3rd year for Honours). Diploma students in Mining take course II in 1st year.

Field Work.

Field-days (about three a term) will be arranged on Saturdays for students taking courses I and II. Such students must also attend for a week of field study during the Easter vacation. All students presenting Geology as a subject for the Final degree examination must have attended at least one further field-week during the second or third year of study.

Laboratory Work.

Students must provide themselves with approved notebooks and drawing materials. Petrological microscopes are provided. The laboratory notebooks must be submitted for examination as required; the record of work contained therein will be regarded as important evidence of the students' progress.

Research.

Post-graduate students desiring to undertake original investigations in any field of Geology should make application to the Professor, who will provide full information regarding the facilities available.

CRYSTALLOGRAPHY AND MINERALOGY.

Lectures and Demonstrations.

I. Mineralogy.—Subsidiary subject for Pass B.Sc (old regulations).
   Lectures: (*a*) Crystallography. Mon. at 9.15.
   (*b*) Optical, Thermal, and other physical properties of minerals. Mon. at 3.0.
   Demonstrations: Description of Mineral Species, stereoscopic projection of crystal models and crystals. Mon., 11.0—1.0 and Fri., 2.0—4.0.

II. Crystallography.—For 3rd year Honours students in Geology. Fri. at 9.15.

III. Crystallography.—For 3rd year Honours students in Chemistry. Fri. at 11.0.

IV. Elementary Mineralogy.—For 2nd year Pass students in Geology. 2 hours a week during Michaelmas and Epiphany terms.

V. Economic Mineralogy.—For 2nd year Pass and Honours degree students in Mining. Mon. at 10.0.

VI. Economic Mineralogy.—For 2nd year diploma students in Mining. Mon. at 3.0.

The Department is well equipped with collections of minerals, crystallographic models, goniometers, and instruments for the determination of optical characters.

ZOOLOGY.

Lecture and Laboratory Courses.

I. Intermediate course:—Introduction to Anatomy, Physiology and Embryology.
Lectures: Tues. and Thurs. at 12.0.
Laboratory: Mon. 2.0—5.0.

(This course during the Michaelmas and Epiphany terms is adopted to meet the needs of students in Medicine reading Biology. Such students attend the laboratory Tues., 2.0—5.0.)

II. Second and Third Year course—General Invertebrate and Vertebrate Zoology.
Lectures: Mon., Wed. and Fri. at 12.0.
Laboratory: 6 hours a week.

III. Cytology and Histology. 10 lectures and laboratory.
IV. Embryology. 20 lectures and laboratory.
V. Parasitology. 10 lectures and laboratory.
VI. Genetics. 10 lectures and laboratory.
VII. Marine Zoology. Cullercoats Field Week.
VIII. Fishery Problems. Cullercoats Field Week.
IX. Palæzoology, Distribution, and Migration. 20 lectures and laboratory.
X. Entomology: (*a*) General, (*b*) Medical. 20 lectures and laboratory.
XI. Economic Zoology. 2 lectures and 3 hours laboratory a week.
XII. Anatomy and Physiology of Farm Animals.
XIII. Advanced Study of a special group of animals, or of a problem in Zoology. (Honours course to be arranged as required.)

Courses I, II, III and VI, with the Field Week, satisfy the requirements for the Pass B.Sc. in Pure Science. Courses XI and XII are designed for degree students in Agriculture or students specialising in Agricultural Zoology.

Field Work.

Field work, at Cullercoats and elsewhere, and visits to the Hancock Museum,[2] will be arranged.

Marine Laboratory.

The Marine Laboratory at Cullercoats offers special facilities for research in Marine Biology. It is provided with public and private aquaria, laboratories, library, lecture-room, dark room, etc., and a motor and other boats. Applications for permission to work in this laboratory should be made to the Professor of Zoology.

BOTANY.

Lecture and Laboratory Courses.

I. Intermediate course.—Introductory, dealing with the Anatomy, Physiology and Classification of the Vegetable Kingdom.

[2] See p. 614.

Lectures: Mon. and Fri. at 12.0.
Laboratory: Fri. 2.0—5.0.

Ia. Botany for Medical students.
Lectures: Thurs. at 10.0.
Laboratory: Thurs. 2.0—5.0.

II. Second Year courses. Lectures:—
A. General Classification of the Vegetable Kingdom. Mon. at 11.0.
B. Elements of Mycology. Wed. at 11.0. (Michaelmas term.)
C. Elements of Plant Physiology. Fri. at 11.0. (Michaelmas term.) For agricultural students, Mon. at 11.0.
D. Plant Physiology. and Physiological Anatomy. Wed. and Fri. at 11.0. (Epiphany term.)
E. Flowering Plants. Mon. and Wed. at 11.0. (Easter term.)
Laboratory: Tues. and Fri. 2.0—5.0 throughout the academical year, and at other times by arrangement.

III. Third Year courses. Lectures:—
A. Plant Pathology. Mon. at 9.15. (Michaelmas term.)
B. Bacteriology. Wed. and Fri. at 9.15. (Michaelmas term.)
C. Bio-chemistry of plants. Wed and Fri. at 9.15. (Epiphany term.)
D. Cytology and Genetics. Mon. at 9.15. (Epiphany term.)
E. Economic Botany. Mon. at 9.15. (Easter term.)
F. Ecology. Wed. and Fri. at 9.15. (Easter term.)
Laboratory: Mon. and Fri., 2.0—5.0 throughout the academical year, and at other times by arrangement.

Agricultural degree students take course II B, II C, and II E in 2nd year, and courses III A, III B, III E and III F in 3rd year.

Laboratory Regulations.

Each lecture is supplemented by practical work in the laboratory, and all students are required to attend regularly in the laboratory. Each student is required to make a careful record of laboratory work in a notebook to be handed in when called for. Students must provide themselves with a regulation set of apparatus.

Field Lectures.

Students are required to attend the Field Lectures and to make collections of specimens.

Post-graduate Courses.

Arrangements are made and every facility given for the prosecution of research. The Department is especially equipped for work in Mycology and Cytology, with Genetics.

AGRICULTURE AND RURAL ECONOMY.

Lectures and Demonstrations.

Second Year courses.

Agriculture, Part I. Lectures: Mon. at 9.15, Tues. and Thurs. at 11.0.

Land Surveying. Wed. at 10.0 and 2.0—5.0.

Third Year courses.

Agriculture, Part II. Lectures: Mon. at 11.0, Tues. and Thurs. at 9.15.

Farm Accountancy. Mon 2.0—5.0 (during 1st 2 terms only).

Forestry. Mon. and Fri. at 10.0, Tues. at 12.0 (during 1st 2 terms only).

Estate Management. Mon. at 12.0 (during 1st 2 terms only).

In addition to the above lectures, etc., demonstrations are arranged at the experimental station of the Northumberland County Council at Cockle Park, and at various other farms in the district. All students are required to attend. Besides Chopwell Woods, experimental plantations and nurseries are available for demonstrations and practical instruction in Forestry, while the Duke of Northumberland, the Duke of Portland, the Earl of Strathmore, the Lord Barnard, Lord Armstrong, Lord Allendale, and others, from time to time grant permission for parties of students to visit their farms and woodlands.

Diploma Course.

Students reading for the College diploma in Agriculture, in accordance with the regulations given on page above, must follow the following course, all classes for which are held in the Agricultural Department.

First Winter.

I. Elementary Agriculture. Lectures: Wed. and Fri. at 11.0. Demonstrations: as arranged.

Syllabus:—Elementary study of soils and manures. Implements. Cultivation. First principles of Agriculture.

II. Chemistry. Lectures: Mon. and Wed. at 11.0. Laboratory: Tues. and Fri. 2.0—5.0.

Syllabus:—Matter and energy; chemical and physical change; elements and compounds. Air; temperature and pressure; water. Elementary laws. Ammonia and nitric acid; phosphorus; potassium; calcium; the halogens; sulphur; carbon; metals. Introduction to foods, soils and manures. Practical work.

III. Zoology. Lectures: Thurs. at 10.0. Laboratory: Thurs., 2.0—5.0.

Syllabus:—General survey. Morphology. Physiology,

habits and life-histories of the following types: Amœba, Paramecium, Vorticella, Hydra Lumbricus, Blatta, Amphioxus, Rana, Lepus.

IV. Botany. Lectures: Mon. at 12.0. Laboratory: Mon. 2.0—5.0.

Syllabus:—The parts of a plant; roots and root functions; geotropism; stems; buds; branching; heliotropism; leaves; photosynthesis; transpiration; respiration; modification of parts. Elements of anatomy. Vegetative propagation; fruits; seeds; seed dispersal; germination. Classification of flowering plants. Life history of a fungus.

V. Mensuration. Tues. and Thurs. at 11.0, Fri. at 10.0.

Syllabus:—Plane and solid figures. The field book. Stacks and dung heaps. Live and dead weights.

Second Winter.[3]

I. Agriculture Part I. Lectures: Mon. at 9.15, Tues. and Thurs. at 11.0. Demonstrations: as arranged.

II. Agricultural Chemistry. Lectures: Mon. at 11.0, Tues. and Thurs. at 10.0. Laboratory: Mon. and Thurs., 2.0—5.0.

III. Agricultural Botany. Lectures: Tues. at 12.0 and Wed. at 11.0. Laboratory: Tues., 2.0—5.0.

IV. Anatomy and Physiology of the Farm Animals. Lectures: Wed. at 9.15, Fri. at 10.0. Laboratory: Fri., 2.0—5.0.

V. Entomology. Mon. at 12.0.

VI. Land Surveying. Wednesday at 10.0 and 2.0—5.0.

Third Winter.[4]

I. Agriculture, Part II. Lectures: Mon. at 11.0, Tues. and Thurs. at 9.15. Demonstrations: as arranged.

II. Estate Management. Mon. at 12.0.

III. Farm Accountancy. Mon., 2.0—5.0.

IV. Agricultural Chemistry. Lectures: Wed. at 11.0 and Thurs. at 10.0. Laboratory: Tues. and Fri., 2.0—5.0.

V. Agricultural Botany. Lectures: Tues. at 10.0 and Fri. at 12.0. Laboratory: Thurs., 2.0—5.0.

VI. Pathology and Farm Hygiene. Wed. at 10.0 and Fri. at 12.0.

VII. Forestry. Lectures: Mon. and Fri. at 10.0, Tues. at 12.0. Demonstrations: as arranged.

SPECIAL WINTER COURSE.

This course is for one winter of 2 terms only. Students take selected classes, as arranged, to suit their special requirements.

[3] The syllabus is similar to that for the 2nd part of the degree course, see p. 201.

[4] The syllabus is similar to that for the 3rd part of the degree course, see p. 206.

Six Weeks' Course in Agriculture.

A special short course for young farmers will be given in the Michaelmas term. Lectures will begin on 23rd October, 1922.

I. Soils and Manures. Tues. and Fri. at 12.0.
Syllabus:—Some geological and meteorological facts as to Agriculture and Forestry. Formation and varieties of soils. Draining. Liming. Manuring: its general principles. Farmyard manure. The composition and characters of the more important artificial manures, and their suitability for different soils and crops. How to purchase and apply manures to the greatest advantage.

II. Crops, Grasses and Weeds. Mon. at 11.0 and Wed. at 10.0.
Syllabus:—How plants grow and feed. The principles of rotations. How to modify rotations to suit varying conditions. The cultivation and treatment of the more important crops of the North of England. The formation, improvement, and management of grass land. The characteristics of the more important pasture plants. Manures for pastures. Seed mixtures for hay and pasture.

III. Farm Live Stock. Lectures: Tues. and Thurs. at 10.0.
Syllabus:—An elementary sketch of animal physiology and anatomy. The composition and uses of the principal foods and cakes. How to distinguish good and bad cakes and other foods. The relationship between food and manure. The most economical method of feeding animals for the production of work, meat and milk. Predisposing causes and prevention of disease in the farm animals. The dentition of live stock as indicative of age.

IV. Mensuration and Elementary Surveying. Wed. at 12.0 and Thurs. 2—5.
Syllabus:—The use of the chain and level. The measurement of simple areas and solids, such as fields or portions of fields, stacks and dung heaps.

V. Chemistry. Lectures: Tues. and Thurs. at 11.0. Laboratory: Tues., 2.0—5.0.

VI. Botany. Lectures: Mon. at 12.0. Laboratory: Wed. 2.0—5.0.

VII. Lectures are also given, at hours to be arranged, on Entomology, Farm Hygiene, and Principles of Farm Management; and demonstrations are arranged at experimental stations and farms.

The County Councils of Northumberland and Durham each grant ten scholarships to deserving students to attend this course. Applications should be made to the Directors of Education for the counties.

Six Weeks' Course in Forestry.

A special short course for young foresters will be given in the Michaelmas term, at times to be arranged. Lectures will begin on 30th October, 1922.

The following will give some idea of the scope of the course :— Soils. Forest botany; principles of sylviculture; forest planting; thinning; pruning; tree growth; injurious insects and fungi; hedges and fences; management of park timber. Elements of chemistry. Elements of Surveying. Demonstrations at Chopwell Woods.

The County Council of Durham grants three, and the County Council of Northumberland grants two, scholarships to enable deserving students to attend this course. Similar scholarships are also offered by the County Councils of Cumberland and Westmorland. Applications should be made to the Directors of Education for the counties.

MECHANICAL, MARINE AND CIVIL ENGINEERING.

I. Intermediate courses.

A. Applied Mechanics. Tues., Thurs. and Fri. at 11.0.
B. Mechanical Drawing. Tues. and Thurs., 2.0—5.0, Sat. 10.0—1.0.

II. Second Year courses.

A. Engineering. Lectures: Mon. and Wed. at 11.0., Thurs. at 9.15. Laboratory: For Mechanical, Marine, and Civil Engineering, Mon. and Fri. 2.0—5.0. For Electrical Engineering, Naval Architecture, and 2nd year Honours in Mining and Metallurgy, Fri. 9.15—12.0. For 2nd year Pass in Mining and Metallurgy, Fri. 2.0—5.0.
B. Civil Engineering. Mon. at 12.0, and Thurs. at 11.0.
C. Marine Engineering. Fri. at 11.0.
D. Mechanical Drawing. For Mechanical, Marine, and Electrical Engineering, and 2nd year Pass and Honours in Mining and Metallurgy, Tues. and Thurs., 2.0—5.0. For Civil Engineering, Thurs., 2.0—5.0, and Fri., 9.15—12.0.

III. Third Year courses.

A. Thermodynamics (1st term only). Mon., Tues. and Thurs. at 9.15.
B. Steam (1st term only). Wed. and Fri., 9.15—11.0.
C. Strength and Elasticity of Materials. Mon., Tues. and Thurs. at 9.15 (2nd term), and Mon. and Tues. at 9.15 (3rd term).
D. Internal Combustion Engines (2nd term only). Wed. and Fri., 9.15—11.0.
E. Steam Turbines (3rd term only). Wed. at 9.15 and 11.0, Thurs. and Fri. at 9.15.
F. Civil Engineering. Mon., Tues. and Thurs. at 10.0.
G. Mechanical Drawing. For Mechanical, Marine and Civil Engineering, Mon. and Fri., 2.0—5.0. For Electrical Engineering, Fri., 2.0—5.0.

NAVAL ARCHITECTURE.

Degree and Diploma Courses.

Second Year courses.

A. For Naval Architecture students. Lectures: Mon. at 9.15 and 12.0, and Tues. at 11.0. Ship Drawing and Calculations: Mon., Thurs. and Fri. 2.0—5.0.

B. For Marine Engineering students. Lectures: Mon. at 12.0 and Fri. at 10.0.

Third Year course. Lectures: Mon. and Tues. at 10.0, Thurs. and Fri. at 11.0. Ship Drawing and Calculations: Mon., Thurs. and Fri., 2.0—5.0, and Wed. 9.15—12.0.

Honours courses. Lectures: Tues., Thurs. and Fri. at 12.0. Ship Drawing and Designing office: attendance as arranged.

Evening Classes.

In addition to the regular courses for the degree of B.Sc. and the College diploma, special evening classes in this subject are held. These are arranged to suit the requirements of experienced draughtsmen and others engaged in shipbuilding; they are not a substitute for the courses for the degree and the diploma. Particulars of these classes may be obtained from the Registrar, Armstrong College.

ELECTRICAL ENGINEERING.

Second Year courses.

A. For Electrical Engineering students. Lectures: Mon. at 12.0, Tues. at 11.0, and Wed. at 9.15. Laboratory: Mon. and Fri., 2.0—5.0.

IV. Honours courses. Arranged as required.

The Department of Classics is concerned with the language and the literature of both Greece and Rome, as well as with Greek and Roman History. Each of the subjects, Greek, Latin and Ancient History may be pursued in combination or independently as degree subjects.

* For courses of study see pp. 122-168 and pp. 217-218.

The aim of the lectures in the Pass curriculum is not merely to study a representative variety of prose and verse authors but also to convey a sense of classical background: thus, in addition to prescribed books, the First Year Latin course embraces the political movements of the close of the Roman Republic along with a literary appreciation of Virgil and the *Æneid* as a whole; the Second Year course includes Roman Antiquities; and the Third Year an outline of Roman Literature with special attention to certain literary forms. Similarly, in Greek, Homeric civilisation and the period of Aristophanes form part of the class work at different stages.

The courses on Greek and Roman History have been so planned as to present throughout the curriculum a connected survey of the centuries in antiquity which possess the greatest significance for the modern world.

Occasional students are admissible to classical courses, and can select as a separate course that in the first year on "Greek Life, Thought and Civilisation." Arrangements have been made whereby students who have not had an opportunity of learning Greek earlier may begin its study in College.

The Honours courses are designed so as to constitute an exact and critical study of authors representative of the different periods of Greek and Roman literature, and among the special additional subjects there is a wide variety of choice offered in the field of literary forms, antiquities, politics, society and art.

The Department has undertaken and is carrying out the supervision of still more advanced work of an original character for the post-graduate degree of Ph.D.

The Department is in close touch with the local branch of the Classical Association, which classical graduates are recommended to join; and it is directly concerned in working in College a study circle for the continuous reading and discussion of classical authors.

EDUCATION.

Through the Teachers' Training Department the College trains teachers for both Elementary and Secondary Schools in accordance with the regulations of the Board of Education.

Course.

The course covers one academical year of post-graduate work, but students may enter as Education students at the commencement of their degree course, spending the first three years in reading for a degree, and in receiving such instruction in the technical subjects of teaching as may be found desirable. The fourth year is entirely devoted to the Theory and Practice of Education. Students need not necessarily have had preliminary experience in teaching before entering College.

Selection of Candidates.

Application forms for intending students may be obtained from the Professor of Education. These forms should be completed and returned to him as early as possible after October 1st in each year for entry in the October following. The selection of candidates will depend on physical health, adaptability for teaching (in so far as this can be determined), and upon examination results. All students must before entrance have qualified to matriculate and have attained the age of 17 years.

Honours Degrees.

Under certain conditions intending teachers may be allowed to read for Honours in Arts or Science, and students may also, under certain conditions, undertake in their fourth year study for the University diploma in the Theory and Practice of Teaching instead of for the Teachers' Certificate.

Hostel.

There is no hostel yet for men students, who must live either at home or in lodgings approved by the Professor of Education. Women students of the Department have a University Hostel at Easton Hall, which is available for 40 of those who cannot conveniently live at home. As a rule, women students are not allowed to travel by train.

The Obligation on the Students to Teach.

All students before entering the Department must sign an agreement with the Board of Education to teach for a certain number of years after leaving College. This is an obligation which should not be lightly undertaken; and all intending students, for this and other reasons, should obtain and study the *Regulations for the Training of Teachers* (H.M. Stationery Office, Imperial House, Kingsway, London, W.C. 2; price, post free, one shilling).

Cost.

In return, the Board bears part of the cost of training as follows: (*a*) Women students in the Hostel are required to pay £10 a term or £30 a year, the Board bearing the rest of the cost of tuition and maintenance; (*b*) For students not in the Hostel the Board pays the whole of the tuition fees, and in addition makes a grant of (at present) £30 per annum to each man, and £22 per annum to each woman student, for four years. Students who have taken their degrees as private students and wish to read for the University diploma, may obtain during the fourth year the same tuition and maintenance grants (if holding an Honours degree and willing to accept the above obligation to teach afterwards) or part of those grants (if holding a Pass degree). All students, whether in the Hostel or not, are required to pay examination fees, and certain College subscriptions, amounting in all to about £6 per annum.

Lectures.

I. The Principles of Education, including the applications of Psychology, Ethics and Logic. Tues. at 11.0 and Fri. at 9.15.

II. The History of Education. Fri. at 10.0.

III. General Methods of Teaching. Tues. at 10.0.

IV. Hygiene. Tues. at 9.15.

V. Methods of Teaching. At hours to be arranged.

Practical Work.

Students attend approved schools for supervised practice in teaching, and there are also instructional classes in Music, Art, and Physical Training.

MUSIC.

Degree course.

Intermediate. Mon., Thurs. and Fri. at 12.0.

Special Two Year course on FORM.

DEPARTMENT OF FINE ART.

DIPLOMA AND CERTIFICATE IN FINE ART.

Each course consists of:—

(i) Study of the history and criticism of that branch of Art which has been chosen by the student as the principal subject.

(ii) Study of the history and criticism of three other branches of Art, known as subsidiary subjects. One of these is studied each year, the object of each year's course being to give a general conspectus of the history and criticism of the subject. Opportunity is also given for a certain amount of practice in subsidiary subjects.

(iii) Practice in the principal subject.

(iv) Study of auxiliary subjects necessary to the understanding and practice of the principal subject.

and for diploma candidates only:—

(v) A special course, extending over two academical years, in English Literature.

(vi) The Intermediate and Second Year courses for the degree of B.A. in either French or German, or the First and Second Year courses for the degree of B.Com. in Spanish.

In the following syllabuses the clause marked (*a*) refers to the history and criticism of the principal subject; the clause marked (*b*) refers to the history and criticism of subsidiary subjects, and specifies the years in which they shall be studied; the clause marked (*c*) specifies the auxiliary subjects and the years in which they shall be studied; and the clause marked (*d*) defines the practical work.

The study of the history and criticism of the principal subject marked (*a*) includes technical exercises on historical examples. The practice of the principal subject marked (*d*) is directed to modern professional practice.

Art Pedagogy.

The Department is recognised by the Board of Education as an institution for the training of Art teachers.

The course of study covers one year and is taken after the student has completed his technical qualifications; that is, either after he has obtained the diploma or the certificate in Fine Art, or after he has passed two of the examinations in Art of the Board of Education.

Part Time Students.

Students who cannot undertake the full courses for the diploma or the certificate may in special circumstances be admitted to such parts of the full courses as they are able to attend. They are required to pass examinations at the end of each year of study. They are not eligible for the granting of the diploma in Fine Art. They may, however, enter for the First, Second, and Third Year Examinations for the certificate in Fine Art, when qualified to do so, and on passing these examinations may be awarded the certificate; subject always to the proviso that all candidates must pass the whole of each of the First, Second, and Third Year Examinations at one sitting. Special courses cannot be arranged for part time students.

Evening Classes.

The Department is open on Monday, Tuesday, Wednesday, Thursday and Friday evenings for all subjects. The work is

arranged in classes in definite subjects, which are grouped differently for students having different needs.

Evening class students are accepted only on condition that they work as directed.

All evening class students are required to take such parts of the examinations of the Board of Examinations in Art for the Northern District of England as apply to their particular cases. The syllabuses of these examinations are printed in a separate pamphlet issued by the Board. The Board issues certificates.

Saturday Morning Classes.

There are preparatory classes on Saturday mornings. For these, students need not have reached the age of 16 years.

Classes may also be taken on Saturday mornings by teachers engaged during the rest of the week in their professional capacity.

Class Hours.

The Department is open for instruction and practice on Monday, Tuesday, Wednesday, Thursday and Friday, 10.0—1.0, 2.0—5.0, and 7.0—9.0, and on Saturday 10.0—1.0. Certain lectures commence on Tuesday and Thursday at 9.15.

Detailed time-tables are printed separately for the convenience of students.

LIBRARY REGULATIONS.

The Library is open for the use of all members of the College on week-days during term between 10 a.m. and 5 p.m., except on Saturdays, when it is open from 10 a.m. to 1 p.m.

The Library is closed (*a*) from the Thursday before Easter to the Wednesday after Easter, inclusive; (*b*) on Whit Monday and Whit Tuesday; (*c*) during the last full week in June; (*d*) during the month of August; (*e*) from December 24th to January 2nd inclusive.

Graduates, former students, and certain other persons may use the Library by special permission, and on payment of a fee of 2s. 6d. per annum. Occasional students are required to give the name of a guarantor.

The ordinary books of the Library may be borrowed for 15 days, and a fine of 1d. per day is charged for overdue books of this class. Books of the Special Class are allowed out only over-night, week-ends, or when the Library is closed, and a fine of 1s. 0d. per day is charged for overdue books of this class. Purely reference book may not be borrowed.

If a book be injured or lost, the borrower will be required either to replace it with another copy, of the same edition if possible, or to pay its estimated value.

All books must be returned by the last day of each term or be re-entered on the borrower's card, under penalty of a fine of 1s. 0d. a volume.

OTHER INSTITUTIONS.

The North of England Institute of Mining and Mechanical Engineers.

By the kind permission of the Council of the North of England Institute of Mining and Mechanical Engineers, its Library in Neville Street, Newcastle, is accessible to students of the College.

The Hancock Museum.

By the kind permission of the Natural History Society the Hancock Museum is open to the use of students of the College under certain conditions. Application should be made to the Registrar of the College.

PUBLIC LECTURES.

Earl Grey Memorial Lecture.

The Earl Grey Memorial Lectureship was established on the Earl Grey Memorial Foundation in 1918. The lecture is delivered annually at the College in the Epiphany Term on some subject of educational or social importance. Four lectures have so far been delivered: in 1919 by the late Viscount Bryce, on "National Ideals"; in 1920 by Lord Robert Cecil, on "Unity"; in 1921 by the Right Hon. H. A. L. Fisher, on "An International Experiment"; and in 1922 by Professor Sir W. H. Bragg on "Nature's Architecture."

William Henry Charlton Lecture.

The William Henry Charlton Lectureship was established by Mr. George Frederick Charlton in memory of his brother, an artist and a member of the Art Committee of the College. It is delivered annually on some subject of the Fine Arts. Three lectures have so far been delivered: in 1920 by the Hon. Walter J. James, R.E., on "The Development of Modern Landscape"; in 1921 by Professor W. R. Lethaby on "City Improvement"; and in 1922 by Mr. George Clausen, R.A., on "Vermeer of Delft and Modern Painting."

OCCASIONAL LECTURES.

Occasional lectures are arranged whenever opportunity serves. During 1921-22 the following were delivered:—

(*a*) On "Persian Painting in the XIV and XVI centuries, A.D.," by Sir Thomas W. Arnold, C.I.E.

(*b*) On "The School of Literature" (inaugural lecture of Joseph Cowen Chair of English Language and Literature), by Professor W. L. Renwick.

(*c*) Two lectures on "Spain of To-day" (in Spanish) by Señor Guijarro, Spanish Consul in Newcastle.

(*d*) On "Molière" (in French, by Professor Des Granges (in connection with Molière tercentenary).

Popular Saturday Evening Lectures.

A popular lecture is delivered in the College every Saturday evening during term.

Short Courses of Public Lectures.

Short courses of a large variety of subjects are arranged each year. During 1921-22 the following courses were delivered:—

(1) Three special Christmas lectures on "Sound," for young people, by Professor G. W. Todd.

(2) A Saturday morning course of lectures and laboratory practice on "Horticultural Botany," by Professor M. C. Potter.

(3) Twenty lectures on "Music during the latter half of of the XIX century," by Dr. W. G. Whittaker.

(4) Four lectures on "The Eve of the Reformation," by Miss M. Deanesley.

(5) Three lectures on "The Economic Aspect of Social Problems," by Miss E. F. Stevenson.

(6) Six lectures on "Mediaeval Architecture," by Mr. A. Hamilton Thompson.

(7) Four lectures on "Relativity," by Mr. R. G. Lunnan.

(8) Six lectures on "Human Nature in Society" (a course arranged by the Senate of the University), by Professor R. F. A. Hoernlé.

LECTURES OUTSIDE THE COLLEGE.

By arrangement with the County Councils, the College is prepared to provide courses of lectures at convenient centres in the Northern Counties upon Agriculture, subjects related thereto, and Forestry.

A course will, as a rule, consist of from four to six, but in certain cases may comprise eight or ten lectures. The lectures will be illustrated by specimens and some by lantern views.

(*a*) *Agriculture and Kindred Subjects.*

A choice of lectures on the following subjects is offered for the winter of 1922-23.

1.—Manuring of pasture. 2.—The improvement of meadow land. 3.—Experiments in progress at Cockle Park and Offerton Hall. 4.—The manuring of swedes, mangels, and potatoes.

5.—Manures. 6.—The use and abuse of lime. 7.—The principles of breeding. 8.—The principles of feeding. 9.—Unexhausted value of manures and feeding stuffs. 10.—The turnip crop. 11.—The potato crop. 12.—The chief pasture plants. 13.—The grain crops. 14.—Finger-and-toe and potato disease. 15.—Smut, bunt and rust. 16.—Common insect pests. 17.—Common animal parasites. 18.—Common farm weeds. 19.—Farm seeds and seed testing. 20.—Elementary veterinary hygiene. 21.—Cattle foods. 22.—Milk control.

Those who may desire to arrange for a course of the above lectures, or lectures for which special syllabuses may be submitted, at any local centre are invited to communicate with the Professor in Agriculture. Where practicable, arrangements for the course will be made through the Local Secretary for Education.

The services of the lecturer are provided free of charge by the College, but at each centre those interested will be expected—

1. To provide a suitable room.
2. To advertise the lectures by hand-bills or otherwise.
3. When necessary, to drive the lecturer from the railway station to the lecture hall.

(*b*) *Forestry.*

Lectures on this subject may be given at centres in the four Northern Counties (Cumberland, Durham, Northumberland and Westmorland), provided that the expenses in connection therewith (including the travelling expenses of the lecturer) are defrayed.

1.—Forest Botany (2 lectures). 2.—Principles of sylviculture (4 lectures). 3.—Forest planting (2 lectures). 4.—Thinning (1 lecture). 5.—Pruning (1 lecture). 6.—Soils and tree growth (1 lecture). 7.—Forest enemies (2 lectures). 8.—Diseases of Trees (2 lectures). 9.—Climatic injuries (1 lecture). 10.—Hedges (1 lecture). 11.—Fences (1 lecture). 12.—Planting and management of park timber (2 lectures).

In connection with the lectures, arrangements will be made for visiting woods in the vicinity of the lecturing centre.

CODRINGTON COLLEGE.

BARBADOS.

This College was founded by Christopher Codrington, Captain-General of the Leeward Islands, and Fellow of All Souls' College, Oxford, who died in 1710. His estates in Barbados were left in trust to the Society for the Propagation of the Gospel, then lately incorporated, to found a College, with Professors and Scholars, who should study Divinity, Physic, and Chirurgery. The College was affiliated to the University of Durham in Easter Term, 1875, under regulations which are given at length in Title VIII. There are Scholarships of the aggregate value of about £300, three-fourths of which are for Theological Students.

FOURAH BAY COLLEGE.

SIERRA LEONE.

This College was founded by the Church Missionary Society in 1827 for the purpose of training Africans as schoolmasters, catechists, and clergymen. It supplies men for the Yoruba and the Niger Missions as well as for Sierra Leone and the neighbouring districts. In 1876 its scope was enlarged to allow the admission of other students, and it was affiliated to the University of Durham, under regulations which are given at length in Title VIII. In January, 1918, the Wesleyan Missionary Society became associated with the C.M.S. in the control and work of the College, a Council representative of both Societies being called into being. A Scholarship is maintained by the members of the University in Durham to enable a student to obtain a University course in preparation for work in connexion with the Sierra Leone Native Church or the Missions of the Church Missionary Society in the dioceses of Sierra Leone or Lagos and The Niger.

ALPHABETICAL LIST OF
MEMBERS OF THE UNIVERSITY.

The names in the University Calendar are printed according to the Register of Matriculations, unless there is evidence of mistake or of bona fide change of name.

In the case of ordinary Graduates in the different Faculties, the date given in the following list is that of the Bachelor's degree, except for those who have obtained the degree of M.D. as Practitioners in Medicine. In this case and in reference to degrees by Diploma, Honorary degrees and other titles, the date is that of the degree or title specified. Where degrees or titles in more than one Faculty or subject are specified, the date refers to that which is mentioned first.

In the case of Unattached Students a date in brackets in the central column, thus: (1915) Th., (1915) Mus., gives the date of Matriculation in Theology or Music respectively. An abbreviated date in brackets after Arms. or Med., thus: Arms. (15), Med. (15), gives the last date of appearance on the list of students for the year. Arms. (M), Med. (M) mean that the Student has matriculated but has never appeared on the list of Students.

In cases where no date is given the degrees are Ad Eundem *or by* Vote of Convocation, *unless marked Honorary.* Ad Eundem *degrees are shown by the mark* § *placed before the letters.*

* *Signifies Member of Convocation.* † *Signifies Parliamentary Voter.*

UNIVERSITY SOCIETIES AND CLUBS.

PHILOSOPHICAL SOCIETY.

All past and present students in the Colleges of the University, past and present members of the University, and of the College Staffs and Councils are eligible for membership. The chief objects of the Society are the promotion of research and the discussion of scientific and philosophic questions. The "Proceedings" of the Society are published annually and are widely circulated. Meetings are held in Durham and Newcastle, and excursions are arranged occasionally.

There are five sections of the Society:—

(*a*) Chemical and Physical.
(*b*) Biological.
(*c*) Mathematical.
(*d*) Archaeological and Historical.
(*e*) Applied Science.
(*f*) Philosophical.

The subscription is ten shillings (five shillings for students).

OFFICERS TRAINING CORPS CONTINGENT.

The object of the Officers Training Corps is to enable undergraduates to obtain such training and certificates as will qualify them, if they so desire, to obtain commissions in the Militia or in the Territorial Army.

DURHAM DIVISION.

Of the fees paid terminally by each student, the sum of £1 is appropriated to combined and College Clubs. Of this sum, 10s. is retained by the Treasurer of his College Clubs, and 10s. is paid over to the Central Finance Committee which manages all University Clubs. Every student, therefore, is *ipso facto* a member of the University Boat Club, Cricket Club, Football Club, Tennis Club, and Hockey Club. Each body has its own Boat Club, Debating Society, &c.

NEWCASTLE DIVISION.

Union Society.

The rooms of this club, situated in College Villa, Eldon Street, comprise dining room, reading rooms, writing room, games room, billiard room, etc. Debates upon subjects of general interest are held.

AT THE COLLEGE OF MEDICINE.

Undergraduates' Representative Council.

The undergraduates' representative council was founded in 1897 with the object of providing a recognised means of intercourse and communication between members of the college on the one hand, and the university, college and infirmary authorities on the other.

At first this was the council's only function, but in 1906 when the Durham University College of Medicine Students' Union Society was founded, the administration and control of the funds of this new body were vested in the students' representative council.

As regards the present constitution of the council; three members are elected annually by ballot by the students in each of the five collegiate years, and these, together with four representatives from the athletic union, comprise the total membership of the council. Under certain conditions the medical society and College gazette may also claim representation.

The officers of the council consist of a president, honorary secretary, and honorary treasurer, all elected annually. There is also a permanent treasurer.

The athletic union, founded in 1914, consists of certain members delegated from each of the athletic clubs, and in the hands of this body are placed the management of the finances of the individual clubs, as also the representation of the College in all matters appertaining to athletics.

Athletic Club.

This club is managed by the undergraduates' representative council and is intended to promote athletic pursuits, viz.:— football (association and rugby), hockey, cricket, tennis, swimming, etc. The club ground at Heaton, about six acres in extent, was presented to the Council of the College in 1920, by Cecil A. Cochrane, Esq., M.A., D.C.L., J.P. It is provided with a comfortable pavilion. A professional groundsman is in constant attendance.

Medical Society.

The medical society holds its meeting in the Royal Victoria Infirmary during the winter session. At these meetings papers are read and clinical cases discussed.

Medical Graduates' Association.

The association was founded in 1880 and has a membership of about 600. Its objects are to maintain the interest and extend the usefulness of the medical faculty of the university and to cultivate social intercourse and good fellowship amongst its graduates. The association annually elects three members to serve on the court of governors of the College. Full information regarding it can be obtained from its honorary secretaries.

AT ARMSTRONG COLLEGE.

Students' Representative Council.

This Council, the object of which is to represent the students in their corporate life, is elected annually by and from the students, as follows:—one representative for every 20 students, 2 for every 40, and 3 for every 100, are elected by each of the following constituencies—Pure Science, Engineering, Agriculture, Teachers' Training Department (men), Teachers' Training Department (women), Arts, and Commerce; representatives are elected by each of the following:—The Athletic Union, the Men's Debating Society, the Women's Debating Society, the Dramatic Society, the Choral Society, and the Christian Union and the Toynbee Society (jointly). The Editor of *The Northerner* is a member *ex-officio*; and two representatives are elected at the beginning of the academical year from the First Year students who have just come into residence.

The Council conducts *The Northerner*, the College magazine, which is published monthly during term.

The Athletic Union.

This Union exists to encourage every form of outdoor and indoor athletic sport. It consists of all students who pay the composition fee for students' societies (£2 2s. for men, and £1 5s. for women). There is no separate subscription for any separate club.

The clubs already formed within the Union are:—

For Women . .	Hockey, Tennis, Golf and Net-Ball.
For Men	Association and Rugby Football, Cricket, Hockey, Tennis, Boats, Athletics and Golf.

New sports may be taken up if there is a demand for them, and if the funds of the Union permit.

Agricultural Students' Association.

This Association of past and present students of the Agricultural Department exists to promote the study and development of Agriculture. It holds a general meeting each term.

Botanical Society.

This Society is open to all students, and holds meetings for the investigation and discussion of botanical questions, as well as making botanical excursions in the summer term.

Arts Society.

This Society, which has been only recently formed, aims at uniting all past and present students interested in the study of Classics, Literature, History and Philosophy.

Engineering Society.

This Society is open to all past and present students of the Engineering and allied departments, on payment of an annual subscription of 2s. 6d. It holds meetings for the discussion of technical problems, and also conducts smoking concerts, debates, and dances.

Pure Science Society.

This society aims at the promotion of social intercourse between members of the Pure Science departments, and to promote interest in, and discussion of, recent developments of Science. Papers are read during term, followed by discussion.

Zoological Seminar.

This Society meets every three weeks during term for the reading and discussion of papers on Biological subjects. Lantern illustrations are given when possible.

Choral Society

This Society dates from 1890, and has given many successful concerts. It has rendered works of most of the classical writers, from Palestrina and Byrd down to Brahms, and has devoted much attention to the modern British School. It is open to all present students of Armstrong College and the College of Medicine free, and to all past students on payment of an annual subscription of 2s. 6d. Weekly rehearsals are held during the first two terms and public concerts given.

Orchestral Society.

This Society is open to all past and present students.

Dramatic Society.

This Society is open to all members of the College. It holds weekly readings of plays during the first two terms, and produces a play for public performance each year. Notable past successes are "Electra," in Professor Gilbert Murray's translation, played before the Classical Association in 1920, and Mr. Milne's "The Lucky One," played in Newcastle and in four other towns, in 1921.

Naval Architects' Society

This Society holds meetings for the discussion of questions of interest in Naval Architecture.

The Christian Union.

This Union, which is affiliated to the World's Student Christian Federation, aims at uniting all students in a fellowship of study and prayer, and at presenting Christianity in those aspects which have an immediate application to student life. Membership is open to all students who assent to the aim and basis of membership, and who pay an annual subscription of 2s.

Students' Association of Teachers in Training.

This is a local branch of a national association. It is open to all men students in the Teachers' Training Department.

Economic Society.

This Society is open to all students of the College on payment of an annual subscription of 1s. Meetings are held during term for the discussion of economic questions, papers being read either by members of the Society or by visitors.

Toynbee Society.

This Society is a revival of the University Settlement Association. Its aims are to do practical social work and to study social problems. It conducts a children's play hour at Bensham Grove Settlement and intends to organise girls' and boys' clubs and to arrange study circles and courses of lectures. It is open to all past and present students on payment of an annual subscription of 2s.

Political Society.

This Society is open to all students of the College. Meetings are held during term for the discussion of questions of a political nature, papers being read either by members of the Society or by visitors.

ST. GEORGE'S HOSPITAL MEDICAL SCHOOL

(UNIVERSITY OF LONDON)

HYDE PARK CORNER, S.W.

THE HOSPITAL and MEDICAL SCHOOL are situated at Hyde Park Corner and are *readily accessible from all parts of London.*

The HOSPITAL has a service of 450 beds, of which 100 are at the CONVALESCENT BRANCH at Wimbledon, which is the largest institution of its kind. Hence the proportion of acute cases at St. George's is unusually large.

The entire teaching in the School is devoted to the subjects of the Final Examinations, that is to say to the essentially medical subjects. In other words the entire teaching of the School is specially adapted to the interests of men from the Universities.

By arrangement with the London University, students attend either at King's College or University College for tuition in the Preliminary and Intermediate subjects

ENTRANCE SCHOLARSHIPS.

Two Scholarships in **Anatomy and Physiology** of the value of 90 guineas and £70 respectively, are awarded at the commencement of each Winter Session to University Candidates who have passed the second Medical or corresponding Examination.

EXHIBITIONS.

The WILLIAM BROWN EXHIBITION, of the value of £135 per annum (tenable for two years), is awarded by examination to a Perpetual Pupil of the Hospital every second year.

The WILLIAM BROWN EXHIBITION, of the value of £49 (tenable for three years), is awarded by examination to a Perpetual Pupil of the Hospital every third year.

The ALLINGHAM SCHOLARSHIP, of the value of £60 (approximately), is awarded annually for the best Surgical Essay.

PRIZES.

The BRACKENBURY PRIZE in MEDICINE, the BRACKENBURY PRIZE in SURGERY, the WEBB PRIZE in BACTERIOLOGY, each of the value of about £30; and many other Prizes are awarded annually.

A large number of HOUSE OFFICES (which may be held for six, twelve, or eighteen months) are open to every Perpetual Student of the Hospital, and are made strictly in accordance with the merits of the Candidates.

PAID APPOINTMENTS.

The following APPOINTMENTS, *to which special attention is directed*, are open to Students after holding House Office.

Medical Registrar, £200; **Surgical Registrar**, £200; **Resident Obstetric Assistant**, £50; **Resident Anæsthetist**, £100; **Senior Anæsthetist** £50; **Junior Anæsthetists** (three) £30.

A number of **SPECIAL COURSES** are given in which the requirements of University and other Examinations receive careful attention. The following may be cited as examples:

1. Elementary Bacteriology.
2. Advanced Bacteriology.
3. Clinical Pathology.
4. Systematic Pathology.
5. Histological Pathology and Morbid Anatomy.
6. Pharmacology.
7. Surgical Anatomy.
8. Advanced Anatomy and Physiology.
9. Operative Surgery.
10. Public Health.
11. Tropical Diseases.

REVISION CLASSES are held for all Examinations.

Great attention is paid by Members of the Staff to individual teaching.

The St. George's Hospital Club, with Smoking and Luncheon Rooms on the Hospital premises, and an Athletic Ground of 14½ acres at Wimbledon, is an amalgamation of the Hunterian Society, 'The Gazette,' and the Chess, Lawn Tennis, Boxing, Hockey, Rifle, and Golf Clubs.

Students have the advantage of a Library of Medical and Scientific Books, which is kept up to date.

The WINTER SESSION commences on October 1st, the SUMMER SESSION on May 1st, but Students can enter at any time for any particular course.

Further information may be obtained from the Dean of the Medical School.
